INTRODUCTION

The City's Planning Framework is structured to ensure operational activities are being driven and delivered in alignment with the strategic priorities of the organisation. The Strategic Plan 2008 – 2011 is a key component of this planning framework. It is the overarching plan that provides direction for all activities and guides the development and provision of the City's services and programs through the five Key Focus Areas of:

- Leadership and Governance.
- The Natural Environment.
- Economic Prosperity and Growth.
- The Built Environment.
- Community Wellbeing.

The Planning Framework is made up of a series of plans to implement the City's Vision *to be a sustainable City and community that is committed to service delivery excellence and operates under the principles of good governance*. The City's mission is *to undertake all our activities with the endeavour of meeting community expectations and achieving sustainable lifestyles*.

The Framework includes:

- The Strategic Plan - provides the broad future strategic direction for the City for the period 2008 – 2011;
- The 20-Year Financial Plan - provides a broad overview of the major projects, programs and resource requirements over the next 4 years (The Plan includes 20-year financial projections);
- The Corporate Plan – sets out the strategies and actions to develop internal systems and organisational capacity during 2008 – 2011 in order to achieve the commitments set out in the Strategic Plan;
- The Annual Plan – which contains annual actions to achieve the vision of the Strategic Plan 2008 – 2011;
- Directorate Plans – contain details of annual projects and programs to be delivered by each Directorate;
- Business Unit Action Plans – contain details of the annual programs, services and activities for each Business Unit; and
- The Annual Budget.

Quarterly progress reports against the Annual Plan provide Council and the community with a full assessment of the City's progress in relation to the achievement of pre-determined milestones for major projects and programs. Full progress reports against the Capital Works Program will be provided at the same time as Annual Plan Progress Reports to Council.

Garry Hunt
Chief Executive Officer

HIGHLIGHTS – APRIL - JUNE 2009 QUARTER

KEY FOCUS AREA 1 – LEADERSHIP AND GOVERNANCE

Community Consultation

The City has undertaken a number of community consultations during the quarter to determine the level of public support for major projects which affect the community and require community feedback. It is encouraging that the response rate to all the surveys has been high. Surveys conducted during the quarter have included consultations on:

- The Ocean Reef Marina Concept Plan;
- The Housing Strategy;
- The City Centre Structure Plan; and
- The Seacrest Park proposed development.

KEY FOCUS AREA 2 - THE NATURAL ENVIRONMENT

Household Hazardous Waste and Electronic Waste Collections

The City's first Household Hazardous Waste Collection Day was held on 23 May for residents to dispose of household paint, pesticides, herbicides, flammable liquids and other chemicals, fluorescent tubes and dry cell batteries free of charge. The collection day was a great success with over 6,500 kgs of household waste collected.

An E-Waste free collection was also conducted at Tamala Park on 6 and 7 June to encourage residents to safely dispose of unwanted electronic waste such as computers, monitors, video recorders and televisions to avoid these items being sent to in landfill. This collection was also a great success with 37,500 kgs of equipment collected for disposal.

Both programs were funded by the State Government's Landfill Levy and the aim was to achieve safe storage and disposal of household hazardous waste which would otherwise be sent for landfill.

World Environment Day

World Environment Day was held on 5 June 2009. In partnership with the Joondalup Learning Precinct, the City hosted three major events including a Breakfast and two Great Garden Workshops to raise awareness of the global, national and local issues relating to the environment which were targeted at City business owners and the community.

The breakfast was an opportunity for senior management and executives of local businesses to find out more about the Carbon Pollution Reduction Scheme (CPRS) and how it will affect the way that they do business. Presenters on the day were Professor Peter Newman from Curtin University of Technology and Michael Wood from KPMG.

The Great Gardens Workshops generated significant community interest in gardening for sustainability with practical tips and demonstrations for living sustainably. A total of 150 local community members attended the workshops.

Weed Education Workshop

A Weed Education Workshop was held on 4 July 2009 at the Craigie Leisure Centre, and constituted one of the five *On the Ground Projects* committed to by the City in its participation in the International Council for Local Environmental Initiatives (ICLEI) Local Action for Biodiversity Campaign.

Members of Friends' Groups and other community members, who had participated in the Living Smart Program, attended the workshop. The course covered introductory information on the effect of weed growth, how weeds spread and the theory and practice behind control measures. A walk around the Craigie Bushland area was conducted to identify species of weeds. The workshop was well attended and positive comments and feedback were received.

Bike Plan

The Bike Plan 2009, endorsed by Council at its June meeting, will assist in improving the bicycle network for commuter and recreational cyclists in the north metropolitan region by linking infrastructure with the Cities of Wanneroo and Stirling and by providing a continuous bicycle network for the region. Implementation of the Bike Plan will have a significant impact on sustainability throughout the City as it will contribute to reductions in greenhouse gases through the increased number of people cycling for transport and recreation.

International Council for Local Environmental Initiatives (ICLEI) Water Campaign

The City received recognition of its commitment to sustainable water management on 22 June 2009 when Mayor Pickard accepted awards for the City's completion of Milestone 1 and Milestone 2 of the City's ICLEI Water Campaign. Milestone 1 involved compiling an inventory of the City-wide water consumption including scheme water and bore water consumption and Milestone 2 required the setting of the water use reduction targets. The City is working towards completion of Milestone 3 which will involve the development and endorsement by Council of a Water Action Plan to bring about a reduction in the corporate and community water consumption and measures to improve water quality.

Evaluation of a City Biodiversity Index

As one of the pioneer cities involved in the Local Action for Biodiversity (LAB) Project, the City of Joondalup was invited to join a small group of international cities to participate in a pilot evaluation of the City Biodiversity Index (CBI) developed by the International Council for Local Environmental Initiatives (ICLEI). The CBI places a measure against selected biodiversity indices to quantify the biodiversity health of the City. If this is successful, the intention is for ICLEI to use this index as a standard tool to enable cities to assess and directly compare the biodiversity health across major cities.

KEY FOCUS AREA 4 – THE BUILT ENVIRONMENT

The April to June quarter saw the completion of several major Capital Works Projects, including the Burns Beach Groyne Reconstruction, the dual carriageway of Burns Beach Road and a footpath and retaining walls in Clontarf Street in Sorrento.

KEY FOCUS AREA 5 – COMMUNITY WELLBEING

The twelfth annual Community Art Exhibition was held from 11-17 June 2009 at Lakeside Joondalup Shopping City and attracted 204 entrants, a 30% increase on the number of participants in 2008. A total of eight awards were presented to the winners in different categories, including an award to local artist, Claire Oakes, for the most outstanding artwork for her piece, *Shipshape*. There was a 40% increase in attendees from 2008, with over 8600 people attending the Exhibition. Sales of exhibits were very strong with 44 artworks purchased. The event received a customer satisfaction rating of 95% by artists and 90% by patrons.

Aquatic Expansion Project – Craigie Leisure Centre

Some key construction milestones have been achieved in recent months. The change rooms, meeting room and pergola areas have been constructed and the concrete shell of the 50m pool has been completed. The concrete foundations for the water playground have been poured and equipment installation has commenced.

Craigie will be the first venue in Western Australia to feature:

- Interactive sound in the water playground ensuring that children have maximum enjoyment;
- Zero water depth with soft-fall rubberized flooring – making the playground safe for all ages and abilities;
- Warm water heated by the geothermal heating system;
- Fully shaded area with access controlled fence separating the playground and the 50m pool; and
- Four super-sized family change rooms complete with baby change facilities.

The new facilities will be completed in 2009-2010.

Upgrade of Community Facilities

A number of upgrades and enhancements to community facilities were completed during the April to June quarter, including:

- MacNaughton Clubrooms in Kinross;
- Kingsley Memorial Clubrooms in Kingsley; and
- Equipment upgrades in the Leisure Centres.

Legend to indicate status of the project:
