Tenderer & Description of Response	Is it Compliant? Yes or No	Comment Against Criteria				Evaluation Score	Estimated Contract Price	Rank
		Capacity	Demonstrated experience in completing similar services	Demonstrated understanding of the required tasks	Social and economic effects on the local community			
Suez Recycling & Recovery All requirements have been met.	Yes	<p>Suez Recycling & Recovery has been in operation for 35 years in Australia employing 334 staff, including 58 labourers at principal locations in WA. Its business structure was outlined in its organisational chart including a breakdown of the WA team and skill profiles of key personnel.</p> <p>Its nominated receival site for the City's contract is located in Landsdale, and the nominated processing site is located in North Bannister. Both sites are appropriately licenced to receive, accept, weigh and process garden organic waste. Specialised equipment listed include a front-end loader, a mobile aerated floor system and a screening trommel. The company operates an AS/NZS 4801 certified safety system and provided copies of its safety policy, work instructions, and safe operating procedures.</p>	<p>It demonstrated considerable experience providing similar services for the Town of Cambridge (2,600 tonnes annually), Cities of Nedlands (2,600 tonnes), Rockingham (14,000 tonnes) and Stirling (15,000 tonnes).</p> <p>The company was awarded the City's Contract for domestic rubbish and recycling collection in July 2018. This includes collection of garden organic waste (green lidded bin) commencing in February 2019.</p> <p>Periods and dates of the above contracts were provided however no referee contacts were stated.</p>	<p>It demonstrated a thorough understanding of the required tasks. Its methodology included receival, reporting, sorting and transfer of garden organics plus contingency measures for an alternative site at no cost to the City. It demonstrated its ability to process green waste volumes and items inclusive of any contaminant disposal costs as specified in the RFT. Processing will be accredited to AS4454 standards for compost, soil conditioners and mulches useable by the City or other commercial entities in line with principles of a circular economy.</p>	<p>Suez Recycling & Recovery is an international company that has principal locations in Neerabup, Gnangara, Landsdale, Welshpool, Bibra Lake and North Bannister in WA.</p> <p>It employs local residents and works with Edge Employment Solutions based in the City to employ four personnel with a disability.</p>	71.2%	\$2,492,150	1

<p>JD Organics Pty Ltd t/as GO Organics WA</p> <p>All requirements have been met.</p>	Yes	<p>GO Organics WA is a WA owned business that has been in operation since 1988. In 2008 it was acquired by Brunnings WA and currently employs over 16 staff. It nominated a receival and processing site with appropriate equipment and licences to receive, accept and process garden organic waste, however use of a weighbridge was not specified as it is currently proceeding with the procurement and installation of a weighbridge at its receival site which could be supplied and installed within eight (8) weeks to meet the contract commencement date from January 2019. A safety management plan, policies and procedures were provided. No safety incidents were reported in the past two years. Information to support the statement was not provided.</p>	<p>GO Organics WA demonstrated reasonable experience providing similar services. It currently processes garden organic waste received from the Shire of Mundaring under an arrangement with Shredding Services Midland since 2016, and from the City of Stirling and the City of Vincent under an arrangement with Purearth since 2018. Periods and dates of contracts were provided including a list of referee contacts.</p>	<p>GO Organics WA demonstrated some understanding of the required tasks. It provided a methodology for receival, inspection and transfer to its processing facility before onsite compost processing to AS4454 standards. It stated that deliveries with contamination rates between 2 - 5% would incur a 25% price premium and between 5 – 10% would incur a 66.6% price premium. The City has no way to independently determine levels of contamination expected from green waste collections and cannot guarantee deliveries of garden organic waste below the levels of contamination as stated.</p>	<p>GO Organics WA's receival site is located in Landsdale while the nominated processing site is located in Boonanning. If successful it would procure fuel, lubricants, stationery items and other materials from suppliers based within the City. Three of its employees reside within the City and it would consider community support with the City similar to that currently volunteered to Rainbow Food Ministry in Wangara.</p>	54.6%	\$2,489,547 (Assuming contamination is less than 2%)	2
