Ordinary Meeting of Council

MEETING HELD ON

TUESDAY 28 MAY 2024

Acknowledgement of Traditional Custodians

The City of Joondalup acknowledges the traditional custodians of the land, the Whadjuk people of the Noongar nation, and recognises the culture of the Noongar people and the unique contribution they make to the Joondalup region and Australia. The City of Joondalup pays its respects to their Elders past and present and extends that respect to all Aboriginal and Torres Strait Islander peoples.

3 DECLARATIONS OF FINANCIAL INTEREST / PROXIMITY INTEREST / INTEREST THAT MAY AFFECT IMPARTIALITY

3.1 DISCLOSURES OF FINANCIAL INTEREST / PROXIMITY INTEREST

A declaration under this section requires that the nature of the interest must be disclosed. Consequently, a member who has made a declaration must not preside, participate in, or be present during any discussion or decision-making procedure relating to the matter the subject of the declaration. An employee is required to disclose their financial interest and if required to do so by the Council must disclose the extent of the interest. Employees are required to disclose their financial interests where they are required to present verbal or written reports to the Council. Employees are able to continue to provide advice to the Council in the decision-making process if they have disclosed their interest.

Name / Position	Cr Daniel Kingston.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024 (Motion 13).
Nature of Interest	Financial Interest.
Extent of Interest	Cr Kingston is Secretary of Friends of Yellagonga which is eligible to receive special purpose grants. Cr Kingston's sister is Treasurer of the incorporated entity.

3.2 DISCLOSURES OF INTEREST AFFECTING IMPARTIALITY

Elected Members (in accordance with clause 22 of Schedule 1 of the *Local Government [Model Code of Conduct] Regulations 2021*) and employees (in accordance with the Code of Conduct) are required to declare any interest that may affect their impartiality in considering a matter. This declaration does not restrict any right to participate in or be present during the decision-making process. The Elected Member / employee is also encouraged to disclose the nature of their interest.

Name / Position	Cr Rohan O'Neill.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 11.2 – Petition in relation to Removing the Development Approval Condition for the Retention of the Tuart Tree for Corinthian Court Stage 3 Development.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr O'Neill assisted with advice and instruction of the petition and how to.

Name / Position	Cr Christine Hamilton-Prime, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.2 – 24/34 Marri Road, Duncraig – Section 31 Reconsideration Under State Administrative Tribunal Act 2004.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Scott Greenwood and employees of Hawaiian are known to Cr Hamilton-Prime.

Name / Position	Cr Nige Jones.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.2 – 24/34 Marri Road, Duncraig – Section 31 Reconsideration Under State Administrative Tribunal Act 2004.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Jones knows Scott Greenwood from playing soccer together 20 years ago.

Name / Position	Cr Christopher May.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.2 – 24/34 Marri Road, Duncraig – Section 31 Reconsideration Under State Administrative Tribunal Act 2004.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	The proprietor of Little H Café is known to Cr May.

Name / Position	Cr Christine Hamilton-Prime, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.6 – Erideables Rideshare Service in the City of Joondalup.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	That Cr Hamilton-Prime owns an e-scooter and is an admin of WA Scooter Enthusiasts Group.

Name / Position	Mayor Albert Jacob, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mayor Jacob lives in a Specified Area Rates area.

Name / Position	Cr Adrian Hill.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Hill owns and resides in a property located within the Burns Beach SAR area.

Name / Position	Cr Lewis Hutton.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024 (Motion 32).
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Hutton is a member of the Burns Beach Residents Association.

Name / Position	Cr Daniel Kingston
Meeting Type	Briefing Session
Meeting Date	14 May 2024
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	<p>Motion 7 Cr Kingston is secretary for the Friends of Yellagonga Regional Park, which has an interest in the management of cats.</p> <p>Motion 13 Cr Kingston is secretary for the Friends of Yellagonga Regional Park, which is eligible to receive special purpose grants from the City.</p> <p>Motions 16 and 20 Cr Kingston lives adjacent to a Public Access Way.</p>

Name / Position	Cr John Chester.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.10 – 2024 Annual Review of Register of Delegation of Authority.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Chester is a long-term committee member of the Friends of Yellagonga.

Name / Position	Mayor Hon. Albert Jacob, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.13 – List of Payments made during the month of March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mayor Jacob does some part time work for Thomson Geer. Mayor Jacob does not work on City of Joondalup matters.

Name / Position	Cr Christine Hamilton-Prime, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.17 - Community Funding Program 2023-24 Round Two.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Hamilton-Prime is a member of the Padbury Community Garden.

Name / Position	Cr Russ Fishwick, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.17 – Community Funding Program 2023-24 Round Two.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Fishwick is a member of the Padbury Community Garden.

Name / Position	Cr John Raftis.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.17 – Community Funding Program 2023-24 Round Two.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Raftis is a member of the Padbury Community Garden.

Name / Position	Mayor Hon. Albert Jacob, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.18 – Tender 001/24 Percy Doyle Football / Teeball Clubroom – Refurbishment and Extension.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mayor Jacob's brother provides electrical sub-contracting services to Hickey.

Name / Position	Cr John Chester.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Chester owns a property in an HOA.

Name / Position	Cr Russ Fishwick, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Fishwick is an owner of property within the HOA 1.

Name / Position	Cr John Raftis.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Raftis owns and resides within a property within HOA 4.

Name / Position	Cr Daniel Kingston.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.4 – Proposed Amendment to Local Planning Scheme No. 3 – Lot 36 (95) and Lot 28 (67) Woodvale Drive, Woodvale – Consideration Following Advertising.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Kingston knows a number of members of Woodvale Baptist Church.

Name / Position	Cr Daniel Kingston.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.4 – Proposed Amendment to Local Planning Scheme No. 3 – Lot 36 (95) and Lot 28 (67) Woodvale Drive, Woodvale – Consideration Following Advertising.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Kingston is secretary for the Friends of Yellagona Regional Park, which has an interest in the management of the adjacent Regional Park and Conservation Category Wetland.

Name / Position	Cr Phillip Vinciullo.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.2.1 – Joondalup City Centre Development – Boas Place Project Philosophy and Parameters.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Vinciullo is President of the Joondalup Symphony Orchestra. The Joondalup Symphony Orchestra offices are based in Lotteries House.

Name / Position	Mr Chris Leigh, Director Planning and Community Development.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 16.1 – Notice of Motion 1 – Cr Christopher May, JP – Electric Vehicle (EV) Charging Stations.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mr Chris Leigh drives an electric vehicle.

4 DEPUTATIONS

This item was dealt with at the Briefing Session.

5 PUBLIC QUESTION TIME

5.1 QUESTIONS ASKED PRIOR TO AND VERBALLY AT THE BRIEFING SESSION HELD ON 14 MAY 2024

Questions asked prior to and verbally at the Briefing Session held on 14 May 2024 are included in the Agenda for this Ordinary Meeting of Council.

5.2 QUESTIONS TAKEN ON NOTICE AT THE BRIEFING SESSION HELD 14 MAY 2024

The following summarised written questions were taken on notice at the Briefing Session held on 14 May 2024:

B Hewitt, Edgewater:

Re: Item 13.1.3 - Local Planning Strategy Review - Phase 2 Outcomes and Phase 3 Scope.

Q4 *The report (Attachment 13.1.3) states that the Housing Opportunity Areas (HOAs) provide capacity for an additional 21,239 dwellings. Since the implementation of the dual coding, can the City advise how many developments within the dual coded areas have been simply replacement (1 for 1) of established housing?*

A4 There have been nine (9) dwellings created within HOA's which were knock down rebuilds with no additional dwellings or lots created since the implementation of the dual coding in Housing Opportunity Areas.

Q5 *What is the average yield for all development blocks of land within these areas?*

A5 There have been an average of 1.3 additional dwellings created for each Housing Opportunity Area (HOA) lot redeveloped at the higher density since the implementation of the dual coding in Housing Opportunity Areas. This means redeveloped HOA lots have an average yield of 2.3 dwellings from the implementation of dual coding to date.

M Kwok, Ocean Reef:

Re: Item 12.9 – Minutes of the Annual General Meeting of Electors Held on 5 March 2024.

Q2 *In relation to Motion 20, can the City advise if it has received any public liability claims from users of (Pedestrian Accessways) PAWs managed by the City in the last five years?*

A2 The City only categorises public liability claims primarily to identify the claimant, and then the nature of the incident. It would be necessary to interrogate claims details further to determine whether these relate to a PAW managed by the City.

The City does not have this information in an easily accessible format, and it would divert the local government's resources away from its other functions which the Council has endorsed as priority activities in the Corporate Business Plan.

s5.95 of the Local Government Act 1995 provides that a person's right to inspect information referred to in section 5.94 does not extend to the inspection of information:

- (a) which is not current at the time of inspection; and
- (b) which, in the CEO's opinion, would divert a substantial and unreasonable portion of the local government's resources away from its other functions.

The CEO has determined that in accordance with s5.95 of the *Local Government Act 1995* the information will not be researched and collated.

Q3 *If the answer is Yes to Q2, can the City please supply details?*

A3

Date Rec	Date of Incident	Description of Incident	Location	Detailed Location
3-Jun-20	18-May-20	Injury sustained after falling on raised pathway	Sorrento	Pedestrian accessway (PAW) on St Patricks Road, near High Street, Sorrento.ROP111040
8-Jun-20	22-May-20	Tripped on raised paving	Greenwood	PAW leading from Melaleuca Dr into Warrigal Park
20-Sep-22	15-Sep-22	Wife tripped on weeds on pathway injuring face	Hillarys	Laneway from Parkinson Park to Solander Road Hillarys

Q4 *In relation to Motion 13, can the City advise if it has received any public liability claims from Friends Groups' activities in the last five years?*

A4 The City only categorises public liability claims primarily to identify the claimant, and then the nature of the incident. It would be necessary to interrogate claims details further to determine whether these relate to any activity undertaken by a Friends Group.

The City does not have this information in an easily accessible format, and it would divert the local government's resources away from its other functions which the Council has endorsed as priority activities in the Corporate Business Plan.

s5.95 of the *Local Government Act 1995* provides that a person's right to inspect information referred to in section 5.94 does not extend to the inspection of information:

- (a) which is not current at the time of inspection; and
- (b) which, in the CEO's opinion, would divert a substantial and unreasonable portion of the local government's resources away from its other functions.

The CEO has determined that in accordance with s5.95 of the *Local Government Act 1995* the information will not be researched and collated.

Q5 *If the answer is Yes to Q4, can the City please supply details?*

A5 See response to Q4 above.

The following summarised verbal question was taken on notice at the Briefing Session held on 14 May 2024:

D Poynton, Connolly:

Re: *Item 12.12 – Outcomes of Community Consultation – Iluka Burns Beach Foreshore Reserve Management Plan.*

Q1 *Asking on behalf of the Joondalup Community Coast Care Forum, can the City clarify what was the total cost of conducting surveys and compiling the Draft Iluka Burns Beach Foreshore Reserve Management Plan, including the community consultation?*

A1 A flora, fauna and fungi survey was undertaken in spring 2020 for the cost of \$49,636 excluding GST. The survey informed the development of the draft Iluka-Burns Beach Foreshore Reserve Management Plan. The plan was developed in-house using officer time.

The cost of distributing consultation information to stakeholders was less than \$10.00, as it was primarily delivered online. Please note that this does not include the cost of the Joondalup Voice insert in the PerthNow Joondalup community newspaper (as this involved multiple news items). Nor does it include operational costs, such as staff time spent drafting content, analysing feedback, preparing reports, and responding to questions from the community.

Re Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024 (Motion 13).

Q2 Can the City advise as to the total cost of conducting and reporting on the Sorrento Foreshore Flora Survey and Vegetation Condition Assessment and the Ocean Reef Foreshore Reserve Flora Survey and Vegetation Condition Assessment, conducted in 2023?

A2 The Sorrento Foreshore Reserve Flora Survey and Vegetation Condition Assessment conducted in spring 2023 and associated report was undertaken by consultants for \$5,040 excluding GST. The Ocean Reef Foreshore Reserve Flora Survey and Vegetation Condition Assessment conducted in spring 2023 and associated reporting was undertaken by consultants for \$28,699 excluding GST.

Reporting is undertaken in-house using officer time.

M Kwok, Ocean Reef:

Re: Item 12.4 – Notice of Motion – Library Cats.

Q1 Can the City please advise what was the cost of producing the Officer's Report on Item 12.4 - Notice of Motion – Library Cats?

A1 The cost of responding to Council's Notice of Motion in relation to library cats relates to City officers' time dedicated to researching, liaising with relevant stakeholders and preparing a report for Council's consideration as summarised below:

	Cost	Total cost
Response to initial Notice of Motion request	\$958.69	
Liaison with RSPCA WA and Cat Haven	\$458.92	
Research	\$1,228.38	
Preparing report	\$695.16	
		\$3,341.15

5.3 QUESTIONS ASKED PRIOR TO AND VERBALLY AT THE COUNCIL MEETING HELD 28 MAY 2024

The following summarised questions were received prior to the Council meeting held on 28 May 2024:

Dr T Green, Greenwood:

Re: Tree Canopy Across the City.

Q1 Can the City please provide a summary table of tree canopy across the City, by year, for as far back as possible? If possible, can the table data be broken down by type of land (for example parks, urban residential)?

A1 The City uses the Department of Planning, Lands and Heritage (DPLH) and Western Australian Planning Commission Urban Tree Canopy Dashboard which is publicly available and uses spatial data gathered from high resolution aerial imagery through the Commonwealth Scientific and Industrial Research Organisation's (CSIRO) Urban Monitor Program. The data is analysed by the DPLH to measure and monitor tree canopy trends across Perth and Peel.

The Urban Tree Canopy Dashboard tree canopy data can be searched either by suburb or local government and is categorised into street blocks (combined lots), roads and parks. Canopy cover data is currently available for 2014, 2016, 2018 and 2020: [Better urban forest planning - Perth and Peel \(www.wa.gov.au\)](https://www.wa.gov.au/government/department-of-planning-lands-and-heritage/urban-tree-canopy-dashboard)

Re: Waterwise Verge Treatment Rebate Scheme.

Q2 Can the City please advise if the waterwise verge treatment rebate scheme has finished?

A2 The City's Waterwise Verge Rebate Program was delivered in 2022/23.

Q3 If the Waterwise Verge Treatment Rebate Scheme has finished, can the City advise why the scheme been discontinued. Many Councils subsidise native plants for their ratepayers because of the significant environmental benefits they provide?

A3 The Waterwise Verge Rebate Program was delivered in 2022/23 and whilst it is acknowledged that the Program delivered much benefit to the community and the environment, it must be noted that the implementation of the initiative involved substantial funding and amount of Officer time.

In place of the Waterwise Verge Rebate Program, a Native Plant Giveaway program was delivered in 2023/24 and is planned for 2024/25. In 2023/24 the Native Plant Giveaway initiative has resulted in 7,500 native waterwise seedlings, plus 350 habitat trees being planted on residential properties to create waterwise native gardens, wildlife friendly gardens and verges that connect, cool and green our neighbourhoods.

T Barlow, Woodvale:

Re: Chichester Park.

Q1 *Can the City provide current utilisation rates for both the southern and northern sporting fields at Chichester Park for both the winter and summer seasons?*

A1 The winter season utilisation rate for Chichester Park North is 35% and Chichester Park South is 21%. The summer season utilisation rate for Chichester Park North is 41% and Chichester Park South is 6%.

These utilisation rates are based on the bookable hours of the park being Monday to Friday 5.30am to 9.30pm, Saturday 6.30am to 9.30pm and Sunday 7.00am to 9.30pm. The City has a shared use agreement with the Department of Education to allow North Woodvale Primary School to use Chichester Park North for its regular school activities. The school holds a booking on the park to execute this agreement on school days between 8.00am and 4.00pm.

Q2 *Can the City explain why a petition by residents for a nature-based playground in Chichester Park was immediately rejected by the City, and yet 7 months later a petition for a skatepark was accepted, and progressed, despite the reasons for rejecting the first petition were also applicable to the second petition?*

A2 A petition of electors was received by Council at its meeting held on 21 February 2017 (C05-02/17 refers). The petition requested that Council *"Consider a new play space in Woodvale for the benefit of older children in the area. There is a current lack of decent play areas for children over the age of seven. We request a nature-play park to be considered for the Chichester Park area."*

Council, at its meeting held on 18 July 2017 (CJ124-07/17 refers), considered a report in response to the petition. Council was advised in that report that:

- Chichester Park has recently installed a playspace in 2008-09 that caters for children aged two to 12.
- Chichester Park has a basketball hoop and pad and frisbee golf specifically to cater for older children.
- There were over 100 playspaces in the City in poorer condition requiring more imminent replacement than the Chichester Park playspace.
- Plumdale Park playspace was renewed in 2016-17 with the installation of off-the-shelf play equipment and nature-play equipment.
- Three other playspace renewals for Woodvale had been listed in the *Five Year Capital Works Program*.

Council resolved to not support the installation of a nature-play playspace at Chichester Park, Woodvale.

A Petition of Electors was received by Council on 20 March 2018 requesting a new stake park be built at Chichester Park, Woodvale (C23-03/18 refers). The petition stated that Chichester Park is a major focal point for recreation in Woodvale and *“A skate park facility would be a great asset to be enjoyed by the many young people who live in the area.”*

At a Council meeting held on 16 February 2021, a report noting a number of petitions requesting new skate and BMX facilities and mountain bike trails was tabled (CJ018-02/21 refers). This included the 261-signature petition requesting a new skate park to be built at Chichester Park, Woodvale. The Council noted the information provided in response to the petitions and agreed not to proceed directly to detailed design and development of skate, BMX or mountain bike facilities at this time.

Following an election commitment by the current State Government of \$800,000 as a contribution towards funding a skate facility in Woodvale, and in response to a Notice of Motion considered at its meeting held on 14 December 2021 (C144-12/21 refers), Council at its meeting held 13 December 2022 agreed to progress further investigations to develop an incidental skate facility at Chichester Park, Woodvale (CJ199-12/22 refers).

Q3 *Given Q2 above, why are residents not given options as to what they may wish to see in their local park, for example, activities that are more universal and intergenerational, or better cater for children with disabilities, neither of which a skatepark/pumptrack provide?*

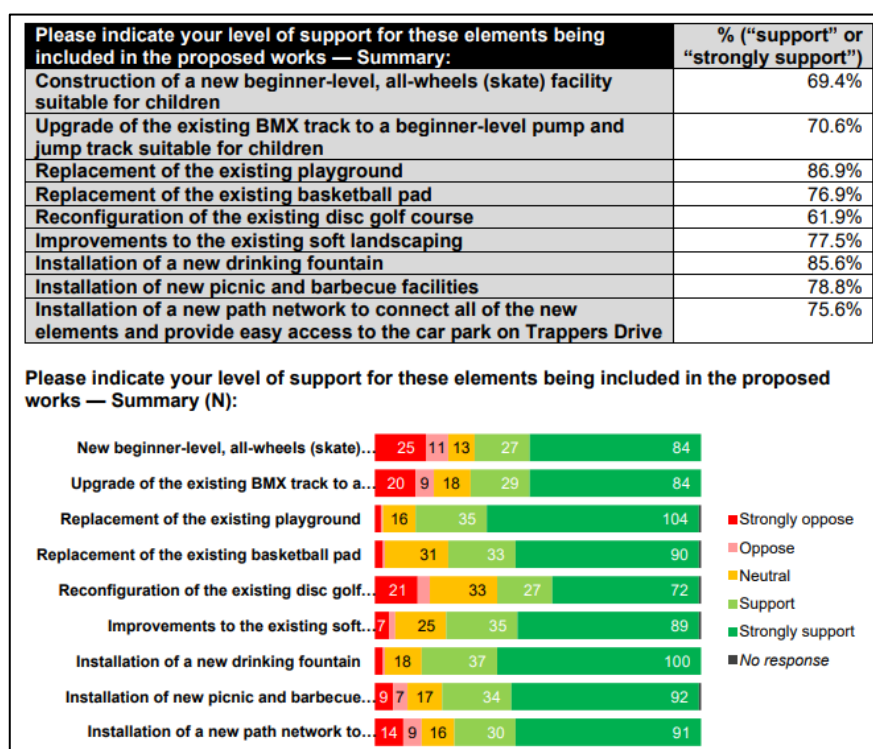

A3 In relation to Chichester Park, the community were invited to provide feedback from Thursday 17 August to Thursday 7 September 2023 on a proposed upgrade to the recreational facilities at Chichester Park. A total of 1,622 stakeholders were directly engaged by the City and 159 responses were received during the 22-day consultation period.

Respondents were asked to rate their level of support for the nine different elements comprising the proposed works. Of the nine elements, replacement of the existing playground, and installation of a new drinking fountain received the most support.

All elements of the proposed works were supported by at least 60% of respondents, and over three-quarters of respondents were supportive of the proposed works in general.

Comments provided by respondents were grouped into common themes with one-third expressing general support for the proposed works. Other feedback related to suggestions for different/additional infrastructure, concerns about noise, litter, anti-social behaviour and maintaining the natural environment, and concerns about existing/exacerbating parking problems at the park.

The table below summarises the responses to the proposed works.

Q4 *It seems to have become acceptable practice for organisations/sporting bodies to have their preferred recreational activity installed in our parks, along with significant input into the project, because they offer to fully fund the project (as seen in Chichester Park with disc golf, and now a skatepark), even if it is not the best option for the community.*

Does the City see how this puts similar petition requests by residents (see Q2 above), that are solely reliant on City of Joondalup funding, at a significant disadvantage?

A4 The City does not agree with this statement. There are multiple factors taken into consideration as part of forward works planning to identify, design, and to determine funding opportunities relating to recreational infrastructure projects throughout the City's parks and public open spaces.

These projects may be identified through a number of sources including City strategies, petition of electors, direct community requests (individuals and groups) and local parliamentarians. Projects are often subject to community consultation with the decision to proceed being a decision of Council through the annual adoption of the Capital Works Program.

- Q5 *There has always been a large dog-walking community at Chichester Park who feel they are being pushed out of the park, as space continues to dwindle.*

Can the City advise why has no consideration or adequate space been left for walking and exercising of dogs within Chichester Park, which has a more universal appeal and is a recreational activity inclusive of all ages and capabilities, more so than a skatepark/pumptrack?

- A5 The proposed upgrade to recreational facilities at Chichester Park is an infrastructure project, specifically for the installation of park facilities in line with the parks classification and in response to community feedback. This project does not include changes to the park classification, and it does not change the park usage and therefore does not include a change of the current dog status of the park.

The City is currently addressing community concerns regarding dog management and behaviour as well as dog access to public open space and beaches. This is being addressed through the planning of a Dog Management Plan that will address the holistic issues with dog management and access and potentially look at each of the City's parks with a view to creating a balance that better meets the needs of all park users. Once this is further progressed, it will go to community consultation for feedback.

N Dangar, Beldon:

Re: *City of Joondalup Use of Glyphosate.*

- Q1 *Has the City discontinued the addition of a marker dye in the liquid they use as a herbicide?*

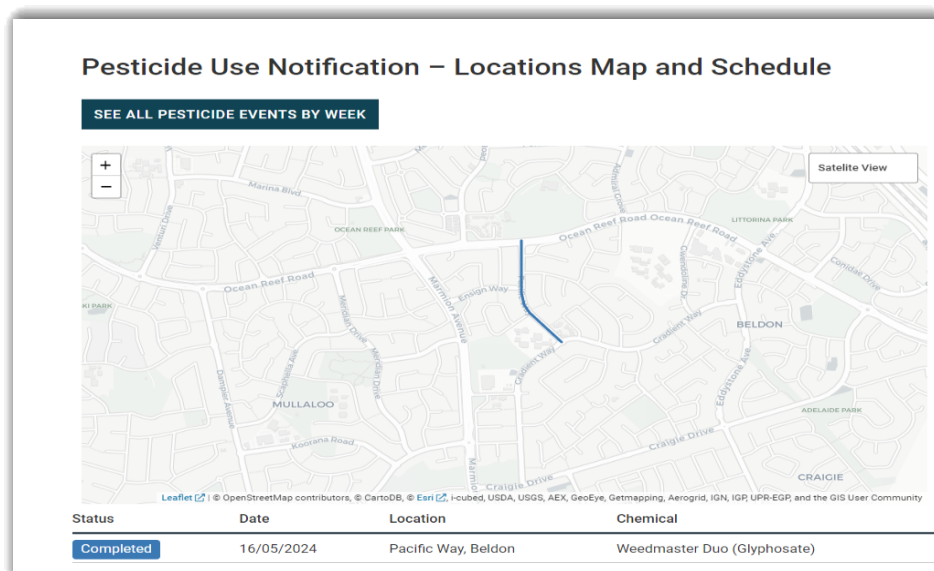

- A1 No. Blue marker dye is used for all applications of glyphosate at a rate so that it is clearly visible to the public for at least 24 hours, depending on weather conditions and the surface it is being applied to.

- Q2 *Is the City aware of the extent of distribution of the substance used as a herbicide in our community?*

- A2 The City is not aware of the distribution or use of glyphosate by residents on private property.

- Q3 *The spraying event as shown in the map was very close to the communities well maintained pedestrian accessway (PAW), between Pacific and Lagoon on 21st May 2024, hence question 2.*

Can the City advise will the spraying have affected the PAW?

A3 The spraying event on Pacific Way, Beldon was to control weeds within the road reserve along kerb lines and footpaths. This did not include any weed control within the PAW between Pacific Way and Lagoon Place nor the PAW between Pacific Way and Cutter Crescent.

Q4 *Can the City please advise of the frequency of spraying herbicides around Beldon Park and in the surrounding areas?*

A4 The use of chemical weed control as a tool to maintain amenity, biodiversity and reduce the risk of fire within the community is an important element of the City's approach to weed management.

The application of herbicides and effectiveness of the application is influenced by a number of factors including but not limited to:

- the target weed
- the season and timing of control
- resistance of the weed to specific herbicides
- site location and any special considerations such as; near wetlands
- weather conditions such as; rain and wind.

The City maintains records of all herbicide use undertaken by the City. The City provides a map and schedule of the past and the upcoming week's planned spraying activities on its website every Friday afternoon. Please refer to the City's website at Pesticide Use Notification – [Locations Map and Schedule – City of Joondalup](#)

Q5 *Can the City please advise what are the consequences for over spraying our communities, on the bees and other pollinators?*

A5 The City only undertakes spraying of herbicides in alignment with the integrated weed management approach as defined in the City's adopted *Weed Management Plan 2023-2033*.

The Plan is based on advice from the State Government and industry agencies who take into consideration the latest science and research. The City only uses herbicides approved by the Australian Pesticides and Veterinary Medicines Authority (APVMA) who is the Australian Government regulator of agricultural and veterinary chemicals to manage the risks of pests and diseases for the Australian community and to protect Australia's trade and the health and safety of people, animals, and the environment. Any questions regarding the impact of herbicide spraying is best directed to the APVMA.

All herbicide applications are undertaken in accordance with all regulations and label instructions.

B Hewitt, Edgewater:

Re: Removal of Tree at Hilltop Park, Edgewater.

Q1 *Can the City please explain why a large old growth tree was recently removed completely from the Lakeview Drive side of Hilltop Park (near the electrical sub station)?*

A1 The large Tuart tree was struck by lightning in November 2023 which left a scar on the main trunk. The City was monitoring the health of the tree which declined to a point that it needed to be removed. An order was raised in April 2024 for its removal.

Q2 *Can the City advise if the City will be planting additional trees in Hilltop Park to make up for the destruction of the old tree?*

A2 Hilltop Park is not listed to have additional trees planted in the 2024 winter tree planting program. The area will be considered to have additional trees planted as part of the 2025 winter tree planting program.

Q3 *If the response to Q2 is yes, how many trees will be planted and what species?*

A3 This will be determined prior to the 2025 winter tree planting program.

N Kimber, Ocean Reef:

Re: Telecommunication Tower – Ocean Reef Marina.

Q1 *Can the City advise who approved the installation of the mobile phone tower?*

A1 The Western Australian Planning Commission granted development approval for the telecommunications tower.

Q2 *Can the City advise were the local residents consulted?*

A2 The City understands that local residents were not consulted.

Q3 *As local residents affected by the installation of the mobile phone tower, can the City advise what are our options in relation to seeking to have the telecommunication tower removed?*

A3 Residents may wish to seek independent advice on this matter. There are no third party appeal rights in the Western Australian planning system, meaning there is no ability to appeal the planning decision to approve the development.

Q4 *Can the City advise if any impact studies have been conducted in relation to the mobile phone tower and has this been made accessible to residents?*

A4 A development application report and environmental electromagnetic report were prepared to support the development application. The development application report provides details regarding site selection, environmental assessment and an assessment of the proposal against State Planning Policy 5.2 Telecommunications Infrastructure.

This information was not provided to residents. Residents may be able to obtain the information via a Freedom of Information request.

Re: *Hooning Behaviour at Ocean Reef Marina.*

Q5 *The marina has for several years been subjected to hooning behaviour which has now abated somewhat with the closure of one of the entrances to the marina and the current work on the site. In relation to hooning behaviour, what mechanisms does the Council presently have in place to reduce hooning behaviour in the Ocean Reef area?*

A5 The City has limited powers in relation to hoon behaviour and it is primarily the responsibility of the WA Police. The City has been working closely with WA Police and DevelopmentWA to deter hooning in this area.

S Kimber, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *Can the City advise who is responsible for any issues concerning the mobile phone tower?*

A1 DevelopmentWA has suggested that all community enquires regarding this subject be directed to the following:

Amplitel: Non-carrier related enquiries e.g. structure and compound - <https://www.amplitel.com.au/contact-us> or call us on 1800-AMPLITEL (1800 267 548).

Q2 *Can the City advise why was the site chosen as an appropriate site for the mobile phone tower?*

A2 The development (planning) application report submitted with the proposal outlines the site was selected for the following reasons:

- There is sufficient space within the site to accommodate the proposed installation.
- The site has been cleared of native vegetation which limits the environmental impacts.
- The facility is screened by existing vegetation and achieves sufficient separation from sensitive land uses.
- The landowner provided consent.
- The site is located in proximity to the existing facility that is being removed.

Q3 *Can the City advise what are the various considerations when approving the installation of a mobile phone tower?*

A3 A local government's role in the approval of telecommunications infrastructure generally relates to the development approval (planning) process. In the case of the recently erected infrastructure within the Ocean Reef Marina project area, the City's role in the planning application process was to assess the application against the relevant planning framework (Ocean Reef Marina Improvement Scheme No.1, State Planning Policy 5.2 Telecommunications Infrastructure) and to provide a recommendation to the WAPC.

In providing this response, the City recommended to the Western Australian Planning Commission (WAPC) that prior to determining the application it undertake community consultation for a period of 28 days by writing to properties within 400 metres of the site and erecting a sign at the location of the proposed infrastructure.

It is the proponent's responsibility to ensure all relevant legislative requirements are met in relation to siting and operation of telecommunications towers. Separate to the planning and development approval process, exposure to electromagnetic emissions from telecommunication infrastructure is controlled via Commonwealth agencies, in particular the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

ARPANSA is the primary Commonwealth agency responsible for protecting the health and safety of people and the environment from the harmful effects of radiation.

Local government is not the regulating agency for exposure to electromagnetic emissions. This is confirmed in *State Planning Policy 5.2 (Telecommunications Infrastructure)* (SPP 5.2) in which it states that provisions to address health or safety standards for human exposure to electromagnetic emissions, such as setback distances, are beyond the scope of SPP 5.2 and are not appropriate for inclusion in local planning schemes or local planning policies.

Q4 *Can the City advise will Council be holding any community meetings in future to address any concerns community members may have in relation to the Ocean Reef Marina development?*

A4 There are no meetings planned to discuss the development of Ocean Reef Marina. Residents are welcome to submit their concerns in writing to the City at info@joondalup.wa.gov.au, so that the City can respond.

The City has regular meetings with DevelopmentWA to ensure that the project is being delivered in line with the Development Agreement and Land Transfer Deed.

The Development Agreement and Land Transfer Deed set out the roles, rights and obligation of each party and were endorsed by Council at its Special Meeting of Council held on 7 February 2023 (JSC01-02/23 refers).

Re: *Hooning Behaviour at Ocean Reef Marina.*

Q5 *The marina has for several years been subjected to hooning behaviour which has now abated somewhat with the closure of one of the entrances to the marina and the current work on the site.*

Can the City advise what plans will be in place to mitigate the threat of hooning behaviour once the site works have been completed and the area reopened?

A5 The City has limited powers in relation to hoon behaviour and it is primarily the responsibility of the WA Police. The City has been working closely with WA Police and Development WA to deter hooning in this area.

I Hurst, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *Can the City advise if the City of Joondalup questioned the height and location of the tower before approving the construction to go ahead?*

A1 Approval of the telecommunications tower was issued by the Western Australian Planning Commission (WAPC), not the City of Joondalup. The City's role in the development application process was to assess the application against the relevant planning framework (Ocean Reef Marina Improvement Scheme No.1, State Planning Policy 5.2 Telecommunications Infrastructure) and to provide a recommendation to the WAPC.

The tower is located in the Marine Enterprise Precinct of the Ocean Reef Marina Improvement Scheme No.1 where telecommunications infrastructure is a 'D' (discretionary) land use. The location of the tower is consistent with Development WA's preferred concept plan for the development.

The provider, Amplitel considered that a facility such as the one erected is necessary in order to provide the required level of coverage in this area.

Q2 *Can the City advise if the final site was the only site considered for its location?*

A2 There were a number of sites considered for the location of the telecommunications facility.

Q3 *Can the City advise what impact studies were carried out prior to the construction of the tower?*

A3 A development application report and environmental electromagnetic report were prepared to support the development application. The development application report provides details regarding site selection, environmental assessment and an assessment of the proposal against State Planning Policy 5.2 Telecommunications Infrastructure.

Q4 *Can the City advise if Amplitel have exemption from public scrutiny and regulations in regard to a development application approval?*

A4 There is no exemption for Amplitel to obtain relevant approvals prior to construction of the telecommunications infrastructure. Amplitel submitted an application for development approval that was processed and determined by the Western Australian Planning Commission (WAPC) in accordance with the requirements of the Ocean Reef Marina Improvement Scheme No.1.

Re: *Ocean Reef Marina.*

Q5 *Can the City advise why has the southern boundary of the marina been extended to what is on the plans?*

A5 The City can advise that the southern boundary falls within land owned by the Water Corporation. The development of the marina does not extend beyond this boundary.

Further information on what is planned for this area can be found in the concept plan on DevelopmentWA website [Ocean Reef Marina - Overview - DevelopmentWA - Shaping our State's future](#)

S Apps, Woodvale:

Re: Item 13.1.4 - Application to Rezone Lot 28 & 36 Woodvale Drive, Woodvale.

Q1 Can the City advise what will be the process for any subsequent subdivision application for these lots for example; would the application be considered and determined at Council or at Development Assessment Panel?

A1 Applications for subdivisions are determined by the Western Australian Planning Commission (WAPC).

The City's role in the subdivision process is, as part of the initial application, to provide the WAPC with a recommendation on a particular proposal.

If a subdivision application is approved, the City is then also required to review and confirm whether any conditions relevant to the Local Government have been met prior to new certificates of title being created.

The City's role in the subdivision process is undertaken by City officers.

Further detail on the subdivision process can be found on the City's website: [Subdivision – City of Joondalup](#)

Re: Responsibility for Native Animals on City of Joondalup Land.

Q2 Department of Biodiversity, Conservation and Attractions (DBCA) have advised that responsibility for kangaroos is the domain of the landowner that the animal is found to be on for example; the City of Joondalup would be responsible when a kangaroo is on a local government road, park, sporting fields and, verges.

Can the City please advise what duty of care and responsibility the City undertakes when an animal is found injured on a local government road, park, sporting fields and, verges?

A2 The City is often called to attend to injured or roaming wildlife that have left nature reserves and City owned parks. City Field Officers are not trained to assist or remove injured wildlife and as such City officers will refer the matter to the Department of Biodiversity, Conservation and Attractions' (DBCA) Wildcare Helpline who can attend and take the appropriate action to either rescue or euthanise the injured animals.

The City will arrange the removal and disposal of animals which have died.

Q3 *Can the City advise does the City of Joondalup have a native animal welfare program, which includes care of kangaroos, and if so, can this be provided?*

A3 The City uses the Department of Biodiversity, Conservation and Attractions (DBCA) Wildcare Helpline which provides assistance and referral to available native animal welfare programs and care where required.

Q4 *The area around Duffy House including the fencing, is the responsibility of the City of Joondalup. There are often many kangaroos within the fenced area, that are then the City's responsibility. The current fencing has white or black wiring and it indeterminable during the day, and virtually impossible to see at sunrise and sunset.*

Can the City advise why has the City of Joondalup installed fencing that does not follow the guideline as detailed on DBCA Fauna Notes No. 32, where it states "The visibility of kangaroo proof fences and access gates is very important. Irrespective of design, if an animal cannot see the fence, it will not be effective."?

A4 The City is working in collaboration with the DBCA regarding the conservation fencing surrounding Duffy House. The City has recently changed the 2 top black wires to white wire based on advice from the DBCA. The City has also created access for kangaroos to enter and exit the area around Duffy House through removal of the back fence. This is an interim measure until the future use of this site is determined.

Q5 *Can the City advise the current number of Rangers on staff and how many are rostered on at any given time?*

A5 There are 24 full time equivalent (FTE) positions for City Field Officers. The City currently has 22 of these positions filled, with two vacancies currently being recruited for.

Field Officers are organised into four teams, morning and afternoon, over the seven-day week. At full capacity there may be up to 12 Field Officers rostered on, depending on vacancies, leave and training requirements.

R Gunasegaram, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *I am very concerned about the proximity and height of the mobile tower to us as residents and to the visitors of the very iconic redevelopment of the Marina, we have long looked forward to the completion of the billion dollar development.*

Can the City advise if a study was done or consideration on the dangers the tower would pose with the 5G and radio frequency exposure, radiation on residents living in the area?

- A1 The telecommunications infrastructure is intended to replace telecommunications infrastructure that currently exists at Ocean Reef Marina.

Exposure to electromagnetic emissions from telecommunication infrastructure is controlled via Commonwealth agencies, in particular the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

ARPANSA is the primary Commonwealth agency responsible for protecting the health and safety of people and the environment from the harmful effects of radiation.

Local government is therefore not the regulating agency for exposure to electromagnetic emissions and is considered separately to the development (planning) approval process.

This is confirmed in *State Planning Policy 5.2 (Telecommunications Infrastructure)* (SPP 5.2) in which it states that provisions to address health or safety standards for human exposure to electromagnetic emissions, such as setback distances, are beyond the scope of SPP 5.2 and are not appropriate for inclusion in local planning schemes or local planning policies.

- Q2 *This will also considerably devalue our residences due to the uncertainty that health effects of exposure from the radiation will cause in the long term.*

Can the City advise why were residents not consulted or informed about the installation of the tower?

- A2 The Western Australian Planning Commission (WAPC) determined the development (planning) application for the telecommunications infrastructure.

The City recommended to the Commission that they undertake community consultation for a period of 28 days to properties within 400 metres of the site and a sign being erected on the site.

The City's role in this process was to assess the proposed development against the Ocean Reef Improvement Scheme No.1 and State Planning Policy 5.2 Telecommunications Infrastructure, and to provide a recommendation to the decision maker, the Western Australian Planning Commission (WAPC).

In providing this response, the City recommended to the WAPC that prior to determining the application it undertake community consultation for a period of 28 days by writing to properties within 400 metres of the site and erecting a sign at the location of the proposed infrastructure.

The WAPC advised the City that community consultation was not undertaken in this instance as the application met the objectives of State Planning Policy 5.2 *Telecommunications Infrastructure and the Ocean Reef Marina Improvement Scheme No.1*.

Q3 *Can the City advise can further work on the telecommunication tower be stalled, until community concerns are resolved?*

A3 Construction of the tower has received the necessary approvals. The City cannot require work to be paused or stopped.

M Sideris, Mullaloo:

Re: *Capital Works FNM2095 Mullaloo North Beach Connection.*

Q1 *Referring to the response provided to questions submitted to the Council meeting held on 28 November 2023 regarding Capital Works FNM2095 Mullaloo North Beach Connection where at question 3 it was stated "A Vegetation Clearing Permit will not be required as the boardwalk has been designed to have minimal footprint and the route selected avoids the clearing of native vegetation".*

Can the City please explain why various site inspections and Nearmap satellite imagery clearly shows a reasonably healthy native vegetation coverage that must be removed or impacted by any proposed boardwalk installation? Site photos and of Nearmap image below:

Re: *Item 12.9 – Minutes of the Annual General Meeting of Electors Held on 5 March 2024.*

Q2 *Referring to Item 12.9 Motion 35 regarding capital works project FNM2095 Mullaloo North Beach Connection and with regard to native vegetation.*

Can the City advise are the City and Elected Members aware that native vegetation under the Environmental Protection Act is defined as “indigenous aquatic or terrestrial vegetation, and includes dead vegetation unless that dead vegetation is of a class declared by regulation to be excluded from this definition but does not include vegetation in a plantation” and also includes indigenous aquatic or terrestrial vegetation that was intentionally planted for the purposes of biodiversity or land conservation, or under a conservation covenant?

Therefore, any vegetation that is native to Western Australia, including “ground disturbance”, dead vegetation and single trees, that meets the above criteria is considered native vegetation and is regulated under the Environmental Protection Act.

Q3 *Referring to Item 12.9 Motion 35 regarding capital works project FNM2095 Mullaloo North Beach Connection and with regard to Native vegetation.*

Can the City advise are the City and Elected Members aware that “Under the Environmental Protection Act, the clearing of native vegetation must be done in accordance with a valid Clearing Permit, referral determination or under an exemption from the requirements of a clearing permit”?

Q4 *Referring to Item 12.9 Motion 35 regarding capital works project FNM2095 Mullaloo North Beach Connection and with regard to native vegetation.*

Can the City advise are the City and Elected Members aware that “activities that require the removal of native vegetation (such as pruning) that will likely to cause the death of that native vegetation or is so severe as to substantially damage or denude the vegetation then these activities would require a permit”?

Q5 *Referring to Item 12.9 Motion 35 regarding capital works project FNM2095 Mullaloo North Beach Connection.*

Can the City please explain how it is intended to constrain public access to the adjacent fragile vegetation habitat and satisfy all the Fencing Considerations from Coastal Planning and Management Manual - A community guide for protecting and conserving the Western Australian coast, Western Australian Planning Commission, August 2003?

- A1-5 The proposed raised boardwalk will be installed on an existing informal track to minimise any impact to native vegetation. There will only be a requirement to undertake minor pruning of some vegetation in sections to allow room to install the boardwalk.

The City has sought advice from Department of Water and Environmental Regulation (DWER) who advised that vegetation may be pruned, provided it does not lead to any of the results listed under the definition of clearing in Section 51A of the *Environmental Protection Act*. For example, clearing means:

- (a) the killing or destruction of;
- (b) the removal of;
- (c) the severing or ringbarking of trunks or stems of; or
- (d) the doing of any other substantial damage to,

some or all of the native vegetation in an area.

Additionally, the product being used for the boardwalk allows for light and rain to get through to vegetation which may be situated under the boardwalk, this will allow the boardwalk to be installed over vegetation where required.

The boardwalk will be raised off the ground level and fitted with handrails in high points which will assist with guiding pedestrians along the boardwalk rather than into the vegetation. The boardwalk being situated on an existing informal track that is heavily used by pedestrian to access the beach will formalise and improve this beach access point and mitigate vegetation damage by pedestrian traffic which is currently the case.

K Allen, Ocean Reef:

Re: Telecommunication Tower – Ocean Reef Marina.

Q1 *Can the City advise was there a City of Joondalup representative involved on the Development WA Ocean Reef Marina Steering Committee when the decision was made to approve the 35-metre mobile telecommunications tower?*

A1 The decision to approve the telecommunication infrastructure was made by the Western Australian Planning Commission (WAPC), not the Development WA's Project Steering Group for the Ocean Reef Marina project.

The City is represented on the Steering Group. Telecommunications infrastructure has been discussed by the steering group and it has been noted that telecommunications infrastructure is a sensitive issue.

Q2 *If yes to Q1 above, what communication exists in relation to not choosing to conduct community consultation on the matter?*

A2 The Western Australian Planning Commission advised the City that community consultation was not undertaken in this instance as the application met the objectives of State Planning Policy 5.2 Telecommunications Infrastructure and the Ocean Reef Improvement Scheme No.1.

Q3 *If yes to Q1 above, it is understood that an artist's impression was used to determine whether there was or was not visual impact disturbance.*

Can the City provide a hard copy of the artist's impression?

A3 This information may be able to be obtained through a Freedom of Information request.

Q4 *Can the City advise on what date was the City of Joondalup notified that a mobile tower was to be constructed at this site?*

A4 Development WA's concept plan was updated in July 2021 to identify the location of the proposed telecommunications infrastructure where it has been erected.

The concept plan identifying the telecommunications infrastructure in the location it has now been erected was included as an attachment to the reports presented to Council on the Ocean Marina Development Agreement and Land Transfer Deed at meetings held on 29 March 2022 (JSC01-03/222 refers) and 7 February 2023 (JSC01-02/23 refers).

The formal development (planning) application was received on 16 October 2023.

Q5 *Can the City advise what alternative approaches were made to use existing infrastructure for joint attachment, to avoid the erection of more large ugly towers?*

A5 The provider, Amplitel considered that a facility such as the one erected is necessary in order to provide the required level of coverage in this area.

It is also noted that the existing telecommunications tower at Ocean Reef Marina is being decommissioned as it is heavily corroded and unable to support any further work.

N Brammer, Iluka:

Re: *Use of Glyphosate.*

Q1 *Can the City advise does the City/City's contractor apply glyphosate to seeded weeds?*

A1 Due to the varying maturity rates of weeds within a weed infestation sometimes the spraying of seeded weeds cannot be avoided.

Q2 *Can the City advise are the seeds removed after the weeds are killed?*

A2 Yes, in some instances.

Q3 *Can the City advise does the City have any mechanisms to reduce the seed bank?*

A3 Yes, through the implementation of the City's Integrated Weed Management Plan.

Q4 *In 2019, a collaborative study published in Mutation Research reported that individuals with particularly high exposures to glyphosate (those who spray it) could have a 41% increased relative risk of developing non-Hodgkin lymphoma.*

Can the City advise if the City is aware of this study?

A4 The City is aware of this study which is based mainly in America, Sweden and France. It shows an increase in the use of glyphosate-based herbicides during introduction of the blanket spraying of genetically modified glyphosate-resistant "Roundup-ready" crops in 1996.

The City does not use glyphosate in this manner and only uses herbicides approved by the Australian Pesticides and Veterinary Medicines Authority (APVMA) and the application of herbicides complies with all regulations and label instructions.

Q5 *Can the City advise what percentage of the employees of the City of Joondalup, past and present, including contractors, that apply glyphosate or glyphosate related products, suffer from non-Hodgkin lymphoma?*

A5 Health records of employees, both from the City of Joondalup and contractors are confidential.

D Blackburn, Kingsley:

Re: *Item 12.6 - eRideables Rideshare Service in the City of Joondalup.*

Q1 *City of Stirling has 20km/h speed limit signs on its dual use coastal paths around Scarborough.*

Can the City advise why doesn't the City of Joondalup apply a speed limit on its dual use paths?

A1 The City of Joondalup is not the responsible authority for the setting of speed limits.

It must be noted that the City of Joondalup adheres to the Western Australian road rules for eRideables as contained within the [WA Road Traffic Code 2000](#) which stipulates the following:

“(2) A person must not ride an electric rideable device on a carriageway, bicycle path or shared path at a speed exceeding 25 km/h.”

Q2 *Everyday violations of the Road Safety Commission eRideables rules are observed such as two people on a scooter, no helmets being worn to name a few.*

Can the City advise how will the City of Joondalup ensure compliance with the eRideables rules on the City's paths be maintained?

A2 City officers can educate the community on the safe use of motorised vehicles such as eRideables within public spaces, however the enforcement of compliance with laws relating to the use of eRideables lies with WA Police.

By engaging with an Escooter Shared Scheme provider the City would be able to work with that provider so that hire scooters are used in accordance with the Road Safety Commission eRideable rules.

Q3 *For most people walking/running along the coastal dual use paths is a form of exercise and relaxation.*

Has the City taken into account that this experience will be transformed to one of anxiety about being run over with increased higher speed Escooter Shared Scheme (ESS) vehicle traffic along these paths, with pedestrians effectively being excluded due to the risk?

- A3 Privately owned and operated eRideables, which are able to operate at a higher speed than ESS eRideables, currently have access to the coastal dual use paths.

The addition of eRideables as part of an Escooter Shared Scheme (ESS) will not add a new forms of faster transportation to the path network.

The City will work closely with the Escooter Shared Scheme provider to identify areas in which there is a need for even lower speeds and can apply 'go slow' restrictions to shared eRideables in these areas. This means the ESS eRideables would be speed restricted to a lower speed, for example 10km/per hour.

- Q4 *Based on feedback from other local governments, can the City advise what is the likely cost of the trial to the City in staff time?*

- A4 As part of its normal business and budgeted staff time, the City regularly and frequently prepares and manages contracts for the delivery of services.

It is estimated that the establishment of an Escooter Shared Service may be expected to take in the order of 40-80 hours of staff time.

Feedback from other local governments indicate that the ongoing management of the trial would take up around 20 to 30 hours per week of staff time initially which is likely to taper off as user requirements become more familiar.

- Q5 *Can the City advise if a pedestrian or other path user is impacted by an ESS scooter, who is responsible for damages to person and property?*

- A5 The Escooter Shared Services Provider would be responsible for any injury to person or damage to property and will be required to carry insurance for this.

M O'Byrne, Kinross:

Re: *Item 11.- Petitions received at the Council Meeting held on 28 November 2023.*

- Q1 *In reference to the Petition relating to the Traffic Signal Operation at the intersection of Selkirk Drive and Connolly Drive. Can the City advise which of the two petition versions (the abbreviated version as per the agenda, or the full petition as presented to Council by the lead petitioner) were provided to Elected Members prior to the Ordinary Council Meeting held on the 28 November 2023?*

Q2 *In reference to the Petition relating to Maintenance, Repair and Upgrade of Elcar Dog Park. Can the City advise which of the two petition versions (the abbreviated version as per the agenda, or the full petition as presented to Council by the lead Petitioner) were provided to Elected Members prior to the Ordinary Council Meeting held on the 28 November 2023?*

Q3 *In reference to the Petition relating to Maintenance, Repair and Upgrade of Falkland Park Children's Play Equipment and Ground Matting Cover. Can the City advise which of the two petition versions (the abbreviated version as per the agenda, or the full petition as presented to Council by the lead Petitioner) were provided to Elected Members prior to the Ordinary Council Meeting held on the 28 November 2023?*

A1-3 The full petitions, as presented by the lead petitioner, were sent to Elected Members via email on Monday 20 November 2023.

Q4 *Can the City advise what precedent allows the City to use audio to 'document' any unsuccessful foreshadowed motion raised, but not carried at an Ordinary Council Meeting?*

Q5 *Can the City advise what precedent allowed the City to use audio to 'document' the unsuccessful foreshadowed motions taken against three petitions at the 28 November 2023 Ordinary Council Meeting, when at no time over the last seven years has any such action been taken against even one other petition?*

A4-5 Further clarification is requested in order to answer Q4 and Q5.

P Pearce, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *Can the City advise will the Joondalup City Council be proactive in reversing the decision made by Development WA and ensure that the 35-meter telecommunication tower is relocated to another suitable place, as it affects the aesthetics and visual of the ocean front site?*

A1 Development (planning) approval for the telecommunications infrastructure was issued by the Western Australian Planning Commission (WAPC). The City cannot require the decision to be reversed.

M Kwok, Ocean Reef:

Re: *Item 12.4 - Notice of Motion – Library Cats.*

Q1 *Can the City provide the answer to the question taken on notice at the Briefing Session held on 14 May 2024 so that information is available to Elected Members before voting on the topic at the Council Meeting to be held on 28 May 2024?*

- A1 The estimated cost of responding to Council's Notice of Motion in relation to library cats relates to City officers' time dedicated to researching, liaising with relevant stakeholders and preparing a report for Council's consideration as summarised below:

	Cost	Total Cost
Response to initial Notice of Motion request	\$958.69	
Liaison with RSPCA WA and Cat Haven	\$458.92	
Research	\$1,228.38	
Preparing report	\$695.16	
		\$3,341.15

Re: *Item 12.9 – Minutes of the Annual General Meeting of Electors Held on 5 March 2024.*

- Q2 *In relation to Motion 32, can the City please provide information on the total revenue received by the City from the hiring out of public parks from each of the 22 suburbs since 1st July 2023?*

A2 The total revenue received by the City from park hire is estimated at \$212,112 (01/07/2023 – 30/04/2024). This is across all of the City's 22 suburbs.

- Q3 *Can the City please advise what proportion of the revenue received is from sporting facilities hired?*

A3 \$159,150 of the \$212,112 revenue received is from hire of active parks (used for organised sporting activities). This is 75% of the revenue received from the park hire.

- Q4 *Can the City please advise which suburbs have reticulation on their verges and median strips?*

A4 All 22 suburbs within the City of Joondalup have some irrigated verges and/or medians. The irrigated verges and/or medians pertains mostly to arterial and distributor roads.

- Q5 *Can the City please advise how often do Directors attend meetings with or pertaining to SARs?*

A5 Technical officers attend committee meetings, when invited, as well as the individual Specified Area Rates (SAR) group Annual General Meetings. Directors do not usually attend.

D Pilmoor, Ocean Reef:

Re: Telecommunication Tower – Ocean Reef Marina.

Q1 *Can the City advise what date the City of Joondalup approved the construction works management plan for Amplitel Telecommunication Tower?*

A1 The Construction Management Plan was approved by the Western Australian Planning Commission (WAPC). The City provided advice to the WAPC on the Plan.

Q2 *Can the City advise if the City of Joondalup has raised any concerns / objections in relation to the telecommunication tower?*

A2 The City's role in this process was to assess the proposed development against the Ocean Reef Improvement Scheme No.1 and State Planning Policy 5.2 Telecommunications Infrastructure, and to provide a recommendation to the decision maker, the Western Australian Planning Commission (WAPC).

In providing this response, the City recommended to the WAPC that prior to determining the application it undertake community consultation for a period of 28 days by writing to properties within 400 metres of the site and erecting a sign at the location of the proposed infrastructure.

Q3 *Can the City advise why was there no consultation with local residents prior to the tower being approved?*

A3 The City recommended to the Western Australian Planning Commission (WAPC) that it undertake community consultation for a 28 day period, with letters to be provided to residents within 400 metres of the site and a sign being erected at the location of the proposed infrastructure.

The WAPC advised the City that community consultation was not undertaken in this instance as the application met the objectives of State Planning Policy 5.2 *Telecommunications Infrastructure and the Ocean Reef Marina Improvement Scheme No.1.*

Q4 *What impact studies were completed by Amplitel?*

A4 A development application report and environmental electromagnetic report were prepared to support the development application. The development application report provides details regarding site selection, environmental assessment and an assessment of the proposal against State Planning Policy 5.2 Telecommunications Infrastructure.

Q5 *Why wasn't a lower impact solution considered as opposed to the high impact 35m concrete pole?*

A5 Amplitel considered that a facility such as the one erected is necessary in order to provide the required level of coverage in this area.

R Hurst, Ocean Reef:

Re: Telecommunication Tower – Ocean Reef Marina.

Q1 *Can the City advise if the Elected Members are aware of the installation of the new tower in Ocean Reef and the residents' concerns?*

A1 The City is not able to answer on behalf of Elected Members.

Q2 *Can the City advise what other changes are being considered in relation to the Ocean Reef Marina development?*

A2 As described in the executed Development Agreement, the Ocean Reef Marina will include:

- a marina, inclusive of eight boat launching ramps and trailer parking bays, which is to have a capacity for approximately:
 - 550 boat pens;
 - 200 boat stacker bays;
- an internal beach within the protection of the marina and a coastal pool;
- approximately 12,000 square metres of retail and commercial floor space;
- over five hectares of community spaces;
- approximately 1,000 dwellings, comprising of single residential homes, apartments and grouped dwellings;
- mixed-use developments;
- short stay and hotel rooms;
- a waterfront promenade;
- public parking (including car bays and boat trailer parking areas);
- new sites and facilities for Marine Rescue Whitfords, Ocean Reef Surf Life Saving Club and a telecommunications provider;
- commercial opportunities for the City including commercial agreements with third parties; (l) public infrastructure to support the Project such as street lighting, road and path networks and drainage;
- community spaces such as playgrounds, gazebos, BBQs and public artwork; and
- public equity, to ensure that there is unrestricted community access to the public waterfront areas (but excluding the secure marine enterprise area) as each stage is completed, especially in relation to those waterfront areas in front of the residential components of the marina.

Further information can be found on DevelopmentWA's website <https://developmentwa.com.au/projects/industrial-and-commercial/ocean-reef-marina/overview>

Q3 *Can the City advise if it was aware that construction of the tower was to commence on Friday 17th May 2024?*

A3 The City was not aware of the intended date on which construction was to commence.

Q4 *Why was the construction plan of this tower approved by the City of Joondalup with no community consultation?*

A4 The development was approved by the Western Australian Planning Commission (WAPC), not the City of Joondalup.

The City's role in this process was to assess the proposed development against the Ocean Reef Improvement Scheme No.1 and State Planning Policy 5.2 Telecommunications Infrastructure, and to provide a recommendation to the decision maker, the WAPC.

In providing this response, the City recommended to the WAPC that prior to determining the application it undertake community consultation for a period of 28 days by writing to properties within 400 metres of the site and erecting a sign at the location of the proposed infrastructure.

Q5 *How do we apply to have the development approval overturned?*

A5 There are no third party appeal rights on planning decisions (including development approvals) in Western Australia.

Residents may wish to seek independent advice on this matter.

F Chadinha, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *The City has advised “the Western Australian Planning Commission (WAPC) that public consultation for the application relating to the new telecommunications infrastructure tower should be undertaken to guide the decision-making process. The City recommended that the WAPC undertake community consultation for a 28 day period, letters be provided to residents within 400 metres of the site and on-site signage installed.” It now seems that Community Consultation was not undertaken by the WAPC.*

What is the watch dog role of the Council of behalf of its residents?

A1 The City's role in the development application process was to assess the application against the relevant planning framework (Ocean Reef Marina Improvement Scheme No.1, State Planning Policy 5.2 Telecommunications Infrastructure) and to provide a recommendation to the WAPC. Notwithstanding that the City's *Telecommunications Local Planning Policy and Planning Consultation Local Planning Policy* does not apply to land within the Ocean Reef Marina Improvement Scheme No.1 area, the City had regard to these policies in providing its recommendation to the WAPC. In responding to the WAPC, the City recommended that the WAPC undertake community consultation for a period of 28 days to properties within 400 metres of the site and a sign being erected on the site.

The City can only recommend, not require, the WAPC to undertake consultation.

Q2 *Can the City advise why there was no timeous Community Consultation undertaken?*

A2 The WAPC advised the City that community consultation was not undertaken as the application met the objectives of State Planning Policy 5.2 *Telecommunications Infrastructure and the Ocean Reef Marina Improvement Scheme No.1*.

M Davies, Ocean Reef:

Re: *Telecommunication Tower – Ocean Reef Marina.*

Q1 *Can the City advise when the Council is going to hold a community meeting to address all concerns and issues relating to the new marina?*

A1 There are no meetings planned to discuss the development of Ocean Reef Marina. Residents are welcome to submit their concerns in writing to the City at info@joondalup.wa.gov.au, so that the City can respond.

The City has regular meetings with DevelopmentWA to ensure that the project is being delivered in line with the Development Agreement and Land Transfer Deed.

Any concerns and issues relating to the Marina should be raised with DevelopmentWA as DevelopmentWA is the lead proponent for the development of the Ocean Reef Marina.

Q2 *Can the City advise how can a 35-metre-tall tower be erected in such a prime location without any consultation with the local residents?*

A2 The development was approved by the Western Australian Planning Commission (WAPC), not the City of Joondalup.

The City's role in this process was to assess the proposed development against the Ocean Reef Improvement Scheme No.1 and State Planning Policy 5.2 *Telecommunications Infrastructure*, and to provide a recommendation to the decision maker, the Western Australian Planning Commission (WAPC).

In providing this response, the City recommended to the WAPC that prior to determining the application it undertake community consultation for a period of 28 days by writing to properties within 400 metres of the site and erecting a sign at the location of the proposed infrastructure.

The WAPC advised the City that community consultation was not undertaken in this instance as the application met the objectives of State Planning Policy 5.2 *Telecommunications Infrastructure and the Ocean Reef Marina Improvement Scheme No.1*.

Q3 *We understand that the new communication equipment that will be attached to the tower will be six metres in diameter not to mention the radiation that will be produced by the equipment.*

Can the City advise who provided approval at the City of Joondalup allowing this telecommunication tower to be installed?

A3 Please see response to Question 2 above.

C Davies, Ocean Reef:

Re: Telecommunication Tower – Ocean Reef Marina.

Q1 *Can the City advise how as local residents do we go about relocating this tower to a more suitable location?*

A1 Residents may wish to consider seeking independent advice on this matter. There are no third party appeal rights in the Western Australian planning system, meaning there is no ability to appeal the planning decision to approve the development.

Q2 *Can the City advise why can't this equipment go on top of the proposed nine storey hotel when it is built?*

A2 The City is not able to advise on possible future options.

Q3 *Can the City advise what has happened to the 'Bushland forever' policy that was in place when we moved to Ocean Reef twenty years ago?*

A3 The State Government Bush Forever policy and program provides a policy and implementation framework that aims to ensure bushland protection and management issues in the Perth Metropolitan Region are appropriately addressed and integrated with broader land use planning and decision-making, securing long-term protection of biodiversity and associated environmental values.

The policy recognises the protection and management of significant bushland areas as a fundamental consideration in the planning process, while also seeking to integrate and balance wider environmental, social and economic considerations. In general terms, the policy does not prevent development where it is consistent with the measures in this policy and other planning and environmental considerations.

The Metropolitan Regional Scheme Amendment 1270/41, along with an associated Bush Forever Negotiated Planning Outcome (NPO) was supported by the Department of Planning, Lands and Heritage (DPLH) which resulted in the lifting of the Bush Forever layer over the required areas within the Ocean Reef Marina development. An Improvement Scheme was subsequently gazetted in 2019 which adopted the same project boundary to define the area suitable for development.

In accordance with the approved NPO, DevelopmentWA acquired offset land comprising coastal vegetation in similar or better condition and with similar or higher conservation value to that which has been excised and will also collect native seeds and use these to rehabilitate approximately 5 hectares of nearby degraded bushland.

The following summarised questions were asked verbally at the Council meeting held on 28 May 2024:

S Apps, Woodvale:

Re: Item 13.1.4 - Lot 28 (67) Woodvale Drive, Woodvale – Consideration Following Advertising.

Q1 *Can the City advise what opportunity there is for the community to have input into the final layout and design for the re-zoning of Lots 36 and 28, Woodvale Drive?*

A1 The Director Planning and Community Development responded that as part of the subdivision process, an application is made to the Western Australian Planning Commission (WAPC). The WAPC refers the application to the City to review and provide recommendation using relevant policies, without community consultation. The WAPC then make the final decision on the subdivision application.

Q2 *Why has the City decided to support the application for R30, when it is considered medium density and Woodvale Drive lacks the amenities that would support medium density?*

A2 The Director Planning and Community Development responded that in relation to the re-zoning, R30 is considered appropriate for various reasons. There is proximity to public open space through Yellagonga Regional Park and access to public transport with the bus stop in front of the property. Furthermore, R30 density coding provides the opportunity for different Lot sizes and therefore different price points and housing types to be available as part of the development.

K Allen, Ocean Reef:

Re: Telecommunication Tower - Ocean Reef Marina.

Q1 *Can it be confirmed that the City approved the planning request for the recently erected 35m Mobile Tower at the Ocean Reef Marina, without prior consultation with the community?*

A1 The Director Planning and Community Development responded that the application was approved by the Western Australian Planning Commission (WAPC), a State Government convened body, rather than the City of Joondalup. The role of the City of Joondalup was to provide a review of the application to the WAPC. The City recommended the WAPC undertake community consultation as part of its' assessment and decision, however such community consultation was not undertaken.

Q2 *Can the City provide a copy of the artist's impression used to make the determination by the WAPC, and if this is not available, will it be released under Freedom of Information?*

A2 The question was taken on notice at the Council Meeting and the following response is now provided by the City:

The City will investigate how a copy of the artist's impression of the telecommunications tower can be provided. The City will liaise directly with Mr Allen on this matter.

M Sideris, Mullaloo:

Re: *Capital Works FNM2095 Mullaloo North Beach Connection.*

Q1 *In relation to the response to questions submitted to the Council meeting. Can the City advise the date of the map used by the City to refer to the pathway for the proposed site for the boardwalk?*

A1 The question was taken on notice at the Council Meeting and the following response is now provided by the City:

The image used to show the proposed location for the boardwalk was from the latest GIS aerial dated 6 April 2024.

I Anthony, Ocean Reef:

Re: Spraying of Pesticides.

Q1 *Why is the weekly pesticide use location map indicating that chemical weed spray will be applied today when the weather consists of heavy rain, as this would contradict the rules and be a waste of ratepayers' money?*

A1 The Director Infrastructure Services responded that the planning of spraying activities is undertaken the week prior, however, the event will be rescheduled in the event of rain. There is no additional work involved in rescheduling, as the original maps will be used at the rescheduled time. The City's website will provide indication as to whether the spraying of pesticides is delayed or cancelled.

6 PUBLIC STATEMENT TIME

The following summarised statements were submitted verbally at the Council meeting held on 28 May 2024:

M Norman, Sorrento:

Re: Item 12.9 – Minutes of the Annual General Meeting of Electors Held on 5 March 2024.

Mr Michael Norman spoke in relation to Motion 13 and addressed the Council to emphasise the need for City funding of Friends Groups. Mr Norman outlined that Friends Groups achieve their aims through a combination of volunteer effort and directly employed sole trader contractors that are funded by the City's annual Special Purpose Grant plus external grants. Mr Norman noted that the Special Purpose Grant has only increased 3% over 9 years, an amount that is not considered adequate by many Friends Groups.

Mr Norman expressed support for the motion put forward at the AGM of Electors to allow access to funds that is budgeted but not allocated each year, a sum of \$20,000 that could be used effectively by Friends Groups. Mr Norman explained that the work conducted by Friends Groups is in accord with the City's *Strategic Community Plan*, the *Environment Plan* and every *Natural Area Management Plan*. Mr Norman urged the Council to support Cr Chester's alternate motion on behalf of the hardworking Friends Groups.

R Hazebroek, Woodvale:

Re: Item 13.1.4 Proposed Amendment to Local Planning Scheme No. 3 – Lot 36 (95) and Lot 28 (67) Woodvale Drive, Woodvale – Consideration Following Advertising (Ward – Central).

Mr Rick Hazebroek spoke on behalf of residents of the Sanctuary, a subdivision adjacent to the new development in Woodvale, to raise concerns about the proposed rezoning amendment to Lots 28 and 36, Woodvale Drive. Mr Hazebroek expressed a community preference for a reduced number of new dwellings, as the prospect of 54 additional new homes is expected to have a detrimental effect on the surrounding area.

Mr Hazebroek also expressed disappointment that the local community is being excluded from the decision-making process. Mr Hazebroek thanked Councillors May and Pizzey for their efforts to keep Waterview Drive a cul-de-sac.

Mr Hazebroek also raised concerns regarding the parking issues of the local church and emphasised the need for an updated reassessment of traffic volumes and parking in Woodvale Drive.

B Saunders, Woodvale:

Re: Item 12.9 – Minutes of the Annual General Meeting of Electors Held on 5 March 2024.

Mr Brian Saunders spoke on behalf of the four current Specified Area Rates (SAR) areas to thank the Officers for the recommendation in relation to Motion 32, carried at the Annual General Meeting of Electors, which they do not support.

Mr Saunders expressed hopeful anticipation towards the opportunity to present a position to the CEO during the current consultation period and review of the City's SAR Policy. Mr Saunders emphasised the contribution that the four SAR areas already bring to the City, far outweighing any suggested administration.

Mr Saunders urged the Elected Members to support the Officers' recommendation to allow proper consultation and consideration to take place.

M Kwok, Ocean Reef:

Re: A range of topics within the City of Joondalup.

Ms Michele Kwok addressed the Council to raise concerns over a range of topics, including subject matter relating to Items 12.4 and 12.6 of the agenda, the installation of telecommunication towers in Joondalup and the Community Art Exhibition.

Ms Kwok stated that the City should not spend \$10,000 of ratepayers' money on a single event promoting cat adoption.

Secondly, Ms Kwok questioned why companies that hire out eScooters within the City of Joondalup are not required to pay fees to the City and emphasised the need for transparent community consultation on the matter.

Thirdly, Ms Kwok spoke in relation to the installation of a telecommunication tower in Craigie Open Space, and more recently at the Ocean Reef Marina. Ms Kwok requested that the City liaise with DevelopmentWA to seek alternative solutions to these constructions.

Lastly, Ms Kwok reflected on the City of Joondalup's Community Art Exhibition highlighting the works of Kim Allen and Mary O'Byrne.

G Green, Kingsley:

Re: 11.2 – Petition in relation to removing the development approval condition for the retention of the Tuart Tree for Corinthian Court Stage 3 Development.

Mr Greg Green spoke in support of the petition to remove the development approval of the Tuart Tree on Moolanda Boulevard, Kingsley. Mr Green described his personal context as an 83-year-old living near the tree, noting that it is situated between 4-7 metres of some villas.

Mr Green expressed concerns over negative effects of the tree's proximity such as fragments falling on the roofs of residents, interrupting sleep and posing potential risks during storms.

Mr Green noted that Sonic Care had erected a sign to warn residents of the nuts that have fallen on the street that may cause injury. Mr Green questioned why no responsibility is to be taken by the City for any injuries that may occur.

Mr Green urged the Council to remove development approval of the tree so that residents may enjoy better living conditions.

S North, Woodvale:

Re: Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024.

Ms Sue North spoke in relation to Motion 3 from the AGM of Electors, offering a perspective on the rights of parents to choose the level of their children's participation in City events. Ms North emphasised that the City and its' libraries should provide opportunities and information for everyone, with no place for discrimination or censorship. Ms North highlighted that the success of Motion 3 would represent such discrimination.

Ms North described the role of the parent in determining what material is appropriate for their children depending on their family's individual context and beliefs. Ms North explained that Drag Queen Storytime is an example of an event which parents should have the right to choose to attend or not attend, and that event promotion should adequately detail what is to be expected. Ms North noted that this allows for learning about and respecting differences in culture, families, and identities.

Ms North warned against potential restriction of the valid and legal beliefs and practices of others and requested that Council uphold the rights of parents to choose for their own families.

B Hewitt, Edgewater:

Re: Notice of Motion No. 2 – Cr Kingston – Ocean Reef Road Crossing.

Ms Beth Hewitt spoke as Secretary of Edgewater Community Residents Association (ECRA) to raise awareness of the dangerous conditions on Ocean Reef Road, particularly the pedestrian crossing between Edgewater and Woodvale. Ms Hewitt thanked Cr Kingston for listening to the concerns of the community and working to address these issues. Ms Hewitt also thanked the Officers for their report on the Notice of Motion.

Ms Hewitt described Ocean Reef Road as one of the busiest roads in the metropolitan area, with over 45,000 cars present every day. Ms Hewitt highlighted that residents frequently travel between Edgewater and Woodvale for school, work, shopping and recreation. Ms Hewitt described concerns over the safety of many school children who use the dual path around Yellagonga, particularly during peak traffic times.

Ms Hewitt noted that as populations to the east increase, the safety risks will intensify, and so urged Council to support Cr Kingston's Notice of Motion to bring about improvement through finding solutions as a matter of urgency.

C Thatcher, Duncraig:

Re: Item 12.2 - 24/34 Marri Road, Duncraig, Section 31 Reconsideration Under State Administrative Tribunal Act 2004.

Mr Callum Thatcher addressed the Council on behalf of Hawaiian Group, Duncraig, speaking in relation to Item 12.2. Mr Thatcher described the car parking issues that have resulted from the subject site that includes the Little H café, other commercial tenants, and residential apartments.

Mr Thatcher emphasised the view that there is no planning justification or fair reason for expanding the seating of Little H café. Mr Thatcher explained that the subject site depends on the use of parking at the Duncraig Shopping Centre, as well as surrounding verges and nearby streets. Mr Thatcher explained that Little H patrons park at the shopping centre, walk to the Café and leave only a negative impact on the small businesses at Duncraig Shopping Centre.

Mr Thatcher highlighted that approving an increase to seating at the Little H Café contradicts orderly and proper governance and planning.

7 APOLOGIES AND LEAVE OF ABSENCE

7.1 LEAVE OF ABSENCE PREVIOUSLY APPROVED

Cr Adrian Hill 28 June to 15 July 2024 inclusive.

7.2 REQUESTS FOR LEAVE OF ABSENCE

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ104-05/24)

MOVED Cr Kingston, **SECONDED** Cr Hill that Council **APPROVES** the following requests for Leave of Absence from Council duties for:

- 1 Cr Nige Jones covering the period 2 June to 18 June 2023 inclusive;
- 2 Cr John Raftis covering the period 4 June to 11 June 2024 inclusive;
- 3 Cr John Raftis covering the period 17 June to 25 June inclusive;
- 4 Cr Russ Fishwick, JP covering the period 17 June to 28 June 2024 inclusive;
- 5 Cr John Raftis covering the period 1 July to 5 July 2024 inclusive;
- 6 Cr Lewis Hutton 15 August to 25 August 2024 inclusive;
- 7 Mayor Albert Jacob, JP 12 September to 2 October 2024 inclusive.

The Motion was Put and

CARRIED (13/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.
Against the Motion: Nil.

8 CONFIRMATION OF MINUTES

8.1 MINUTES OF THE ORDINARY COUNCIL MEETING HELD ON 23 APRIL 2024 (Resolution No: CJ105-05/24)

MOVED Cr May, **SECONDED** Cr Vinciullo that the Minutes of the Council Meeting held on 23 April 2024 be **CONFIRMED** as a true and correct record.

The Motion was Put and

CARRIED (13/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.
Against the Motion: Nil.

9 ANNOUNCEMENTS BY PRESIDING MEMBER WITHOUT DISCUSSION

RECORD NUMBERS FOR COMMUNITY ART EXHIBITION

Mayor Jacob announced that a record number of artworks are on display at the City's 2024 Community Art Exhibition, which is currently being held at Lakeside Joondalup Shopping City.

Mayor Jacob stated that it is open to residents and members of local visual arts associations and that this year's exhibition features more than 200 pieces in various mediums.

Mayor Jacob advised that the art exhibition was first held in 1998, adding that the celebration of our creative local visual arts community is a highlight event on the City's annual arts and cultural calendar.

Mayor Jacob noted that the award winners will be announced on Saturday 1 June, which includes the Most Outstanding Artwork which comes with a prize of \$4,000.

Mayor Jacob advised that the Community Art Exhibition runs until 15 June.

HUB FUNDING

Mayor Jacob announced that the City recently received a \$3 million Lotterywest grant towards the construction of the \$8.1 million Duncraig Adventure Hub project at Percy Doyle Reserve.

Mayor Jacob stated that the cheque presentation took place at the former tennis courts site on Ron Chamberlain Drive, where the hub will be built.

Mayor Jacob advised that skate park and bike facilities are major features of the project, which will incorporate a multipurpose court, play space, barbecues, shaded hangout spaces, restrooms, CCTV and lighting.

Mayor Jacob announced that Phase 3 Construction Pty Ltd has been appointed to undertake the design, supply and construction of the skate facilities, while Common Grounds Trail Pty Ltd was awarded the tender for the design, supply and construction of the \$800,000 bike component.

Mayor Jacob noted that work is expected to commence in Autumn this year.

BIG BIRTHDAY ON HORIZON

Mayor Jacob announced that Duncraig Library is turning 50 years old in late-July, adding that the City wants to celebrate this special anniversary with our community.

Mayor Jacob advised that the library first opened its doors on 27 July 1974 and is almost twice as old as the City of Joondalup itself.

Mayor Jacob stated that anyone who would like to share their special memories or photos of Duncraig Library is asked to email them to sociallibraries@joondalup.wa.gov.au

Mayor Jacob said that more details about the celebration will be publicised soon.

10 IDENTIFICATION OF MATTERS FOR WHICH THE MEETING MAY BE CLOSED TO THE PUBLIC

Nil.

11 PETITIONS

COUNCIL RESOLUTION (Resolution No: CJ106-05/24)

MOVED Cr O'Neill, SECONDED Cr Chester that the following petitions be RECEIVED and REFERRED to the Chief Executive Officer for action:

- 1 A 44-signature petition has been received from residents of the City of Joondalup in relation to the dangerous commute faced by the children of Poynter Primary School;**
- 2 A 63-signature petition has been received from residents of the City of Joondalup in relation to removing the development approval condition for the retention of the Tuart Tree for Corinthian Court Stage 3 Development to enable the tree to be removed due to the health and safety issues being experienced by the residents of this retirement village.**

The Motion was Put and

CARRIED (13/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

12 REPORTS

12.1 DEVELOPMENT AND SUBDIVISION APPLICATIONS - MARCH 2024 (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	07032, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for ‘noting’).

PURPOSE

For Council to note the number and nature of applications considered under delegated authority during March 2024.

EXECUTIVE SUMMARY

Schedule 2 (deemed provisions for local planning schemes) of the *Planning and Development (Local Planning Schemes) Regulations 2015* (the Regulations) provide for Council to delegate powers under a local planning scheme to the Chief Executive Officer (CEO), who in turn has delegated them to employees of the City.

The purpose of delegating certain powers to the CEO and officers is to facilitate the timely processing of development and subdivision applications. The framework for the delegations of those powers is set out in resolutions by Council and is reviewed annually, or as required.

This report identifies the development applications determined by the administration under delegated authority powers during March 2024 (Attachment 1 refers), as well as the subdivision application referrals processed by the City during March 2024 (Attachment 2 refers).

BACKGROUND

Clause 82 of schedule 2 (deemed provisions for local planning schemes) of the Regulations enables Council to delegate powers under a local planning scheme to the CEO, and for the CEO to then delegate powers to individual employees. At its meeting held on 27 June 2023 (CJ096-06/23 refers), Council considered and adopted the most recent Town Planning Delegations.

DETAILS

Subdivision referrals

The number of subdivision and strata subdivision referrals processed under delegated authority during March 2024 is shown in the table below:

Type of subdivision referral	Number of referrals	Potential additional new lots
Subdivision applications	2	2
Strata subdivision applications	8	11
TOTAL	10	13

Of the subdivision referrals, five were to subdivide in housing opportunity areas, with the potential for eight additional lots.

Development applications

The number of development applications determined under delegated authority during March 2024 is shown in the table below:

	Number	Value (\$)
Development applications processed by Planning Services	76	\$14,591,795

Of the 76 development applications, 13 were for new dwelling developments in housing opportunity areas, proposing a total of 14 additional dwellings.

The total number and value of development applications determined between March 2021 and March 2024 is illustrated in the graph below:

The number of development applications received during March 2024 was 104.

The number of development applications current at the end of March was 251. Of these, 24 were pending further information from applicants and 14 were being advertised for public comment.

In addition to the above, 181 building permits were issued during the month of March with an estimated construction value of \$33,812,249.61.

Consultation

Consultation may be required by the provisions of the R-Codes, any relevant policy and/or LPS 3 and the Regulations.

COMMENT

Large local governments utilise levels of delegated authority as a basic business requirement in relation to town planning functions. The process allows for timeliness and consistency in decision-making for rudimentary development control matters. The process also allows the elected members to focus on strategic business direction for the Council, rather than day-to-day operational and statutory responsibilities.

All proposals determined under delegated authority are assessed, checked, reported on and cross checked in accordance with relevant standards and codes.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ107-05/24)

MOVED Cr Jones, **SECONDED** Cr Hill that Council **NOTES** the determination and recommendations made under delegated authority in relation to the:

- 1** development applications described in Attachment 1 to this Report during March 2024;
- 2** subdivision applications described in Attachment 2 to this Report during March 2024.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.
Against the Motion: Nil.

RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	106277, 101515
AUTHORITY / DISCRETION	Administrative - Council administers legislation and applies the legislative regime to factual situations and circumstances that affect the rights of people. Examples include town planning applications, building licences and other decisions that may be appealable to the State Administrative Tribunal.

PURPOSE

For Council to:

- Reconsider its previous decision relating to seating numbers for a previously approved 'Restaurant/Cafe' at Lot 702 (24/34) Marri Road, Duncraig (the subject site), in accordance with section 31 of the *State Administrative Tribunal Act 2004*.
- Consider a request by the applicant to enter into a payment instalment arrangement for the construction of one on-street parking bay over a period of two years.

EXECUTIVE SUMMARY

In August 2023 Council considered a partial retrospective application for modifications to a previous approval at 24/34 Marri Road, Duncraig (the subject site) which trades as Little H Cafe. These modifications included:

- increased seating capacity from 40 to 80 seats (retrospective element)
- increase in the size of the dining area including the addition of bar table seating (retrospective element)
- implementation of time limited parking restrictions for two existing on-street bays on Cassinia Road (proposed element).

Council approved the increase to the size of the dining area, bar table seating and time limited parking restrictions components of the application however, did not support the request to retrospectively approve an increase in the seating capacity from 40 to 80 seats.

In September 2023, the applicant submitted an application to the State Administrative Tribunal (SAT) to review Council's decision to not support any further increase to the previously approved seating capacity of 40 seats. This matter has been progressing through the SAT mediation process which has resulted in an amended proposal and supplementary information being provided. The amended proposal presented by the applicant for further consideration is outlined below as follows:

- Increase seating capacity from 40 to 50 (Monday to Thursday).
- Increase seating capacity from 40 to 60 (Friday to Sunday).
- Options for the construction of between two and seven on-street parking bays on the southern side of Marri Road, adjacent to Duncraig Shopping Centre.

The amended proposal is supported by a car parking survey undertaken during the café's peak period of operation (Attachment 5 refers).

The SAT has invited Council to reconsider the application in light of the amended proposal in accordance with Section 31 of the *State Administrative Tribunal Act 2004*.

The City advertised the amended proposal to surrounding landowners and people who made a submission on the previous proposal for a period of 14 days concluding on 1 March 2024. A total of two submissions were received, both objecting to the development.

Currently there is an approved car parking shortfall of eight bays across the site. In assessing the acceptability of the proposed seating increases, the City has given consideration to available car parking on-site, existing on-street car parking along Cassinia Road and the operating hours of the Educational Establishment, which shares parking with Little H Café at the subject site. The City has considered the options provided by the applicant for the construction of additional on-street parking bays along Marri Road, and has found that the verge adjacent to Duncraig Shopping Centre is capable of accommodating no more than three on-street bays. The City is of the view that with an additional three on-street car bays, a total increase of 14 seats (from 40 to 54) can be accommodated through a combination of on-site and on-street car parking.

However, the City does not support the proposed increase of 20 seats (from 40 to 60) on Fridays to Sundays, as it is considered there is insufficient parking available, both on-site and on-street to accommodate the parking demand associated with the additional patrons.

It is therefore recommended that Council approves the application with an increase of 14 seats from that previously approved, which would allow the café to operate with a total of 54 seats from Monday to Sunday. It is also recommended that Council supports the applicant's request to enter into a two-year payment arrangement for \$17,666.67 which is the cost of construction of one on-street car parking bay.

BACKGROUND

Suburb/Location	Lot 702 (24/34) Marri Road, Duncraig.
Applicant	CF Town Planning.
Owner	JFH Holdings Pty Ltd.
Zoning	LPS Commercial.
	MRS Urban.
Site area	1,583m ² .
Structure plan	Not applicable.

The subject site is zoned 'Commercial' under the City's *Local Planning Scheme No.3* (LPS3). The land use 'Restaurant/Cafe' is a permitted ('P') use in this zone.

The subject site is bounded by Duncraig Shopping Centre to the east, Marri Road to the north, Cassinia Road to the west and apartments to the south (Attachment 1 refers). The subject site accommodates a mixed use development which includes 20 residential apartments, a Recreation – Private (Best Bodies pilates), an Educational Establishment (Kip McGrath tutoring) and Little H café which is located on the ground floor on the corner of Marri Road and Cassinia Road.

The original development approval for the site included 33 on-site parking bays for the mixed use development, comprising of 20 resident bays within a secure basement car park accessed from Cassinia Road, and 13 publicly accessible bays within a covered parking area accessed from Marri Road. An overall parking shortfall of six bays was approved at this time.

Since the original approval, there has been a number of applications considered for the site including the following:

- July 2016 – The City approved a 'Restaurant/café' use with a seating capacity of 32 seats (DA16/0605).
- June 2018 - Council refused application to increase the seating capacity to 48 seats (CJ087-06/18 refers).

- November 2018 – Council reconsideration of June 2018 decision, approved increase in seating from 32 to 40 seats and a floor area of 60.34m² (CJ189-11/18 refers). This approval was conditional on the installation of two on-street car parking bays on Cassinia Road to assist in mitigating the impact of the parking shortfall onsite, which have since been constructed and have been in place since 2019.
- April 2019 – Council approved of change of use from Office to Education Establishment which increased the overall on-site parking shortfall to eight (CJ036-04/19 refers). The operating hours were conditioned to between 4.00pm to 7.00pm Monday to Friday.
- August 2023 – Council approved an increase in seating area, retrospective seating and a table, and installation of time limited parking signs on Cassinia Road. Council did not support the request to increase seating from 40 to 80 patrons (CJ134-08/23 refers).

Since the application was presented to Council in August 2023, the café has reduced its seating numbers from 80 to 60 seats to reflect the maximum number of seats proposed through the revised application. During this time, the City has received 13 complaints and has issued five infringements and four cautions relating to parking on footpaths and unauthorised verge parking along Marri Road and Cassinia Road. A total of 50 complaints were received in the twelve months prior to Council's August 2023 (44 between May and August 2023) consideration of seating numbers for Little H Café.

In response to a request received from Duncraig Shopping Centre relating to parking on the verge, the City has recently installed three additional no-standing signs within the verge adjacent to the subject site and Duncraig Shopping Centre, in order to manage unauthorised verge parking occurring adjacent to the shopping centre. Two of these signs are located on the southern side of Marri Road and the other located on the eastern side of Cassinia Road, adjacent to the subject site (Attachment 2 refers). These signs are in addition to no-standing signage installed along Cassinia Road in 2023.

DETAILS

The proposal comprises the following:

- Increase seating capacity from 40 to 50 (Monday to Thursday).
- Increase seating capacity from 40 to 60 (Friday to Sunday).
- Options for the construction of between two and seven additional on-street parking bays on the southern side of Marri Road, adjacent to Duncraig Shopping Centre.

The City has undertaken a review of the proposed on-street parking options along Marri Road (Attachment 6 refers) and has determined that a maximum of three on-street bays could be accommodated within the verge adjacent to Duncraig Shopping Centre taking into account relevant safety considerations.

In this regard, the applicant is proposing to pay upfront for the installation of two on-street bays and is seeking Council's support to enter into an instalment arrangement over a two-year period to pay for the third bay (Attachment 4 refers).

A copy of the plans (including seating layouts), the applicant's planning report and parking survey are provided as Attachments 3, 4 and 5 to this Report respectively.

The design drawing prepared by the City for the on-street parking bays and footpath works is provided as Attachment 6 to this Report.

Planning Assessment

The application has been assessed against the requirements of the City's Local Planning Scheme No. 3 (LPS3) and the City's Commercial, Mixed Use and Service Commercial Zone Local Planning Policy (Commercial Zone LPP). The key objective of the 'Commercial' zone under LPS3 relevant to the consideration of this application is:

"To ensure that development is not detrimental to the amenity of adjoining owners or residential properties in the locality."

The City's planning assessment against the above framework is provided below:

Parking assessment

There is an existing overall parking shortfall of eight bays across the subject site, however, this is an overall shortfall that does not take into account the development approval for the Educational Establishment which limits its operating hours to between 4.00pm to 7.00pm Monday to Friday, which falls outside the operating hours of Little H Café (which are from 6.00am to 3.00pm Monday to Sunday). Acknowledging there is no parking demand for the Educational Establishment during the operating hours of Little H Café there is a reduction in the parking shortfall across the site during the operating hours of Little H Café to three bays.

The below table sets out the existing parking requirements, the parking requirements resulting from the revised proposal (50 seats Monday to Thursday and 60 seats Friday to Sunday) and the resultant parking shortfalls for all tenancies which generate a parking demand during the opening hours of Little H Café.

Tenancy	Current car parking requirement	Parking requirement (Monday to Thursday)	Parking requirement (Friday to Sunday)
Restaurant (Little H) 1 bay per 4 people accommodated	40 seats = 10 bays	50 seats = 12.5 bays	60 seats = 15 bays
Educational Establishment 1 bay per 3 students	Does not open during opening hours of café so no parking required		
Recreation – Private 1 bay per 4 persons based on capacity	10 people = 2.5 bays	10 people = 2.5 bays	10 people = 2.5 bays
Residential 1 bay per dwelling plus 0.25 bays per dwelling (<u>visitors</u>)	20 units / 20 resident and 5 visitor bays = 25 bays	20 units / 20 resident and 5 visitor bays = 25 bays	20 units / 20 resident and 5 visitor bays = 25 bays
Car parking required	37.5 (38 bays)	40 bays	42.5 (43) bays
Car parking provided (onsite)	33 bays (13 publicly available)	33 bays (13 publicly available)	33 bays (13 publicly available)
Result parking shortfall (onsite)	5 bays	7 bays	10 bays
Verge parking provided (existing)	2 bays	2 bays	2 bays
Resultant parking shortfall (overall)	3 bays	5 bays	8 bays

It is noted that an additional three on-street parking bays are proposed by the applicant along Marri Road which would reduce the overall parking shortfall to two bays during operation with 50 seats and five bays during operation with 60 seats. Having regard to the three proposed on-street bays, there would be a three bay shortfall during operation with 54 seats, which is consistent with the current parking shortfall.

The applicant considers that the proposed on-site car parking shortfall can be supported for the following reasons:

- The café has a large walkable catchment and attracts clientele from the surrounding residential area, the adjoining commercial development (shopping centre) and the residents within the complex above the café which reduces the demand for car parking (aided by the provision of nine bicycle parking bays on-site).
- The café will commit to the construction of three additional on-street parking bays within the Marri Road verge (Attachment 3 refers) to further reduce the on-site parking demand at the subject site.
- Whilst there is no reciprocal parking agreement with Duncraig Shopping Centre, the subject site and the adjoining property form part of an activity centre (local neighbourhood centre) which contains a number of commercial and mixed use developments. As such, the precinct would experience informal reciprocal parking usage as patrons undertake multi-task trips (such as attend the café and the shopping centre on the adjoining lot as one trip) and as such will reduce the overall car parking demand.
- The café's peak periods occur at the weekend, outside the Educational Establishment's hours of operation. Furthermore, on weekdays the Educational Establishment does not operate until 4.00pm, whereas the café closes at 3.00pm meaning that the bays ordinarily required for the Educational Establishment are able to be utilised for café parking.
- The on-street parking bays on Cassinia Road are frequently occupied by residents of the residential apartments located above the café. Of the 20 residential apartments, there is a total of five on-site bays available for visitors. Therefore, there is a likelihood that verge parking issues in the area are resulting from visitors associated with the apartments and that car parking issues are not solely resulting from the operation of Little H café.
- The parking survey provided with the application demonstrates that there are between one to four bays available on-site during the café's peak period, indicating a surplus of on-site parking when the café is operating with a 60 seat capacity.
- Since the café's seating was previously considered by Council, the café has undertaken the following steps to minimise impact of parking on the surrounding area:
 - The café's suppliers and waste collection services have been contacted and provided with instructions to attend the premises on-site or along the southern side of the Marri Road road reserve adjacent to the café, and not park along the northern side of Marri Road abutting residential properties.
 - Improve communications and notices to customers to be mindful of local residents when parking at the café.
 - Control/monitor bookings and patron arrival/departure times to ensure a smooth transition of customers and avoid queues.
 - Reduce the operating seating capacity of 80 seats to 60 seats, reflective of the maximum amount of seating being applied for.

As outlined above, the applicant submitted a parking survey (Attachment 5 refers) which recorded parking at the subject site between 8.30am and 10.30am on Saturday, 13 January 2024, during one of the café's peak periods of operation. The parking survey area included the 13 publicly available on-site parking bays, the two on-street verge bays along Cassinia Road, verge areas along Marri Road and the Duncraig Shopping Centre carpark.

The survey found that between 12 and 14 of the 15 on-site and on-street bays along Cassinia Road were occupied at any one time, indicating that parking available to users of the café is operating at between 80-93% capacity during the café's peak period. The survey also observed between three and six cars parked on the verge on the northern side of Marri Road opposite the café and that the car park at Duncraig Shopping Centre operated at an average capacity of 83% and maximum capacity of 94% during the survey period.

The applicant did engage with the owner of the Duncraig Shopping Centre in relation to parking arrangements however no resolution was forthcoming. The owner of the Shopping Centre made a submission objecting to the revised proposal (an objection was also received on the initial proposal). The shopping centre owner objects to the presence and availability of car parking within the shopping centre carpark being used as any justification to support a shortfall for Little H Café, given there is no reciprocal parking arrangement in place for this to occur. The centre's submission referenced a parking survey commissioned across a number of days in March 2022 to support its submission on the initial proposal. This survey indicated a high percentage of centre bays were being used, despite low patronage of centre tenancies.

In the lead up to Council's consideration to increase seating to 80 patrons in August 2023, the City had received 50 complaints relating to verge parking in the vicinity of the café in the preceding 12 months (44 between May and August 2023). It is noted the café was operating with an 80 seat capacity at that time, which reduced to 60 seats following Council's August 2023 decision not to increase the seating numbers. Since August 2023, the City has received 13 complaints relating to verge parking in the vicinity of the café and has also issued five infringement notices and four caution notices relating to parking on footpaths or verges without owner/occupier consent during this period, with one job still active.

Whilst the reduction in complaints may be related to the reduction in patron numbers for the café, it is evident that even at a patronage of 60 customers, without any additional parking being provided, there is still an ongoing issue with vehicles being parked over footpaths and on adjoining verges without landowner consent.

The City acknowledges that it would be unlikely that Little H Café customers would be aware that a reciprocal parking arrangement did not exist between the shopping centre and 34 Marri Road and simply choose to park where convenient. However, this does not mean that the availability of bays within the Shopping Centre during opening hours for Little H can be used to justify a further parking shortfall for the café. In the absence of a reciprocal parking agreement with the Shopping Centre, the parking demand for Little H would need to be met by on-site and on-street parking. There is no opportunity to provide any further bays on-site and therefore any further increase in seating capacity for Little H café is limited to whether any additional on-street parking can be provided.

Ongoing discussions between the City and the applicant have identified the potential for three on-street bays on the southern side of Marri Road, approximately 60 metres east of the café, in the verge adjacent to the shopping centre. The applicant presented the City with three additional design concepts for four, five and seven on-street parking bays, however the City has determined that these would impact on vehicle sightlines for vehicles exiting the Shopping Centre and on services located within the verge. The City is of the view that any more than three on-street parking bays would impact on pedestrian and driver safety and therefore should not be supported.

The City has previously had discussions with the shopping centre owner regarding on-street bays. The shopping centre owner has since advised the City that it does not wish to pursue the option of providing on-street bays on Marri Road, following recent carpark upgrades on its site. Given this, the City considers it is reasonable for this option to be pursued by Little H café provided that no more than three bays are accommodated. Whilst the bays will not be directly located outside the café, they are considered to be within a reasonable walking distance for customers.

Little H Café is currently operating with a capacity of 60 seats, which is 20 seats more than their current approved limit of 40 seats. This in effect has increased the shortfall during their operating hours from three bays to eight bays which is still having an impact on surrounding landowners, evidenced by ongoing complaints, infringements and cautions. Construction of an additional three on-street bays would satisfy parking requirements for a further 12 patrons. The City therefore considers that an increase in seating numbers to 54 patrons (additional 14 patrons) could be supported, given the current parking requirements have been rounded up by 0.5 bay which equates to another two patrons.

The applicant has requested whether in the event that 60 seats is not supported, whether a maximum capacity of 55 seats could be supported. The City does not support an increase to more than 54 seats at any time, as it does not believe there is sufficient parking on-site or on-street, even with three additional bays constructed in the Marri Road verge, to accommodate the parking demand associated with the additional patrons.

It is therefore recommended that Council approves modification to condition 1.2 of its August 2023 approval and approves an increase to the total number of patrons permitted at the café from 40 to 54, seven days per week. It is also recommended that Council include a condition on any approval that the operating hours of Little H Café be limited to between 6.00am to 3.00pm seven days per week, to ensure the parking demands of the Educational Establishment (which is currently approved to operate from 4.00pm to 7.00pm Monday to Friday) do not overlap with Little H Café.

Issues and options considered

Council may determine an application for development approval by:

- granting development approval without conditions
- granting development approval with conditions
- or
- refusing to grant development approval.

Not applicable.

Financial / budget implications

All amounts quoted in this report are exclusive of GST.

Current financial year impact

Not applicable.

Future financial year impact

The scope of works including the installation of a footpath and the three on-street bays totals \$120,000. The total cost of works is included in the City's Capital works program for the 2024/2025 financial year.

The estimated cost of construction for the three on-street bays is \$53,000 of the total cost. The applicant is proposing to pay for construction of two bays up front (\$35,333.33), and seeks Council's support to enter into a two year payment plan with the City for the remaining \$17,666.67.

In relation to the total cost of the bays, should any unspent funds be accrued these would be refunded to the applicant or deducted from the payment plan mentioned above.

All amounts quoted in this report are exclusive of GST.

Consultation

The revised proposal was advertised for a period of 14 days, commencing on 16 February 2024 and ending on 1 March 2024.

Consultation was undertaken in the following manner:

- A total of 75 letters were sent to owners and occupiers of 63 properties who were previously consulted with and to people who previously made a submission on the application.
- Development plans and information were made available for public viewing on the City's website.

A total of two submissions were received during the public consultation period each objecting to the proposal.

A summary of the issues raised along with applicant's comments is included in Attachment 7 to this Report and with officer's comments in Attachment 8.

The main issues identified through consultation include the following:

- Concerns with increased seating numbers proposed from Friday to Sunday, particularly on Saturday and Sunday mornings.
- Continued unauthorised parking on residents' verges along the northern side of Marri Road, which obstructs the footpath along Marri Road and obstructs vehicle sightlines for residents exiting their driveways.
- Inadequate parking/no-parking signage is in place along Marri Road to help manage verge parking issues.
- Concerns that the parking survey provided with the revised proposal has included an analysis of the car park belonging to Duncraig Shopping Centre on the adjoining lot.
- Lack of car parking on the subject site, has resulted in the car park at Duncraig Shopping Centre becoming an 'overflow' car park for café patrons.
- Overflow parking from the café is impacting on the availability of carparking at Duncraig Shopping Centre and the businesses which require that car parking for their own customers.
- Parking with the Duncraig Shopping Centre carpark reaches its highest capacity on Friday, Saturday and Sunday mornings, which is when the café is proposing its maximum seating capacity.
- The education establishment on-site does operate on Saturday's (8.30am – 12.00pm). It is incorrect to state it does not operate on weekends.
- The addition of only two on-street parking bays is insufficient to accommodate the increase in seating proposed.
- Car parking on-site is already at capacity with the existing approval for 40 seats. There should not be scope to increase the number of seating any further.

One of the submissions received during consultation raised concerns with the proposed increase in seating to 60 seats between Friday to Sunday, however supported the increase to 50 seats from Monday to Thursday. The submission also acknowledged that the café provides a needed meeting place for people in the local neighbourhood and wider community.

It is noted that during the previous consultation, 69 submissions were received in support of the proposal, 25 objected to the proposal and one was neutral.

COMMENT

Construction of parking bays

The additional three on-street parking bays proposed by the applicant will integrate with a City-planned infrastructure upgrade to the verge along the southern side of Marri Road, which includes a shared path connection between the existing footpaths adjacent to the subject site and east of Duncraig Shopping Centre. A detailed design of the footpath upgrades and the proposed on-street bays is included in Attachment 6 to this Report.

The applicant is seeking Council's approval to enter into a payment arrangement for one of the on-street parking bays to assist the café operator financially, allowing them to pay for the bay over a period of up to two years, with the other two bays paid for up-front.

Should Council support this application, the City could undertake the works within 2024/25 financial year, inclusive of the footpath and on-street bays.

The City considers that the on-street bays will contribute to parking availability within the overall activity centre and provide a community benefit. Whilst one of the bays will not be paid for up-front, construction of the bays will allow the café to operate with an increased number of seats, and in turn will better position the operator financially to pay off the remaining bay.

The City is therefore supportive of the proposed payment plan.

Section 31 reconsideration to increase seating numbers

As outlined in the planning assessment above, the City is supportive of a proposed increase to the seating numbers at Little H Café to a total of 54, as well as the development of three on-street bays within the Marri Road verge, however it is not supportive of the proposal for a total of 60 seats Friday to Sunday.

Acknowledging that parking within the overall Activity Centre is operating close to capacity during the café's peak operating hours, and that issues with unauthorised verge parking have been recorded within the vicinity of the café, the formalised verge parking proposed as part of the application, alongside recent installation of parking restrictions on Marri Road/Cassinia Road will assist with improving the parking situation within the overall Activity Centre.

It is therefore recommended that Council approves modification to condition 1.2 of its August 2023 approval which would increase the total number of patrons permitted at the café from 40 to 54, seven days per week. It is also recommended that Council condition the operating hours of Little H Café to between 6.00am to 3.00pm seven days a week, to ensure the café's parking demand does not overlap with the Educational Establishment's hours of operation, and condition the payment of three on-street parking bays within the Marri Road verge at the Café Operator's expense, inclusive of a two year payment plan for one of these bays.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION

That Council:

- 1 Reconsiders its decision relating to condition 1.2 of its approval dated 22 August 2023 (CJ134-08/23 refers) as invited by the State Administrative Tribunal pursuant to Section 31 of the *State Administrative Tribunal Act 2004*, and APPROVES under clause 68(2)(c) of Schedule 2 of the *Planning and Development (Local Planning Schemes) Regulations 2015* the application for development approval to amend DA17/1226 submitted by CF Town Planning, the applicant, for the RESTAURANT/CAFE (modifications to DA17/1226 – retrospective) at Lot 702 (24/34) Marri Road, Duncraig subject to the following conditions:
 - 1.1 DA23/0281 approved on 22 August 2023 remains a valid approval and all conditions and advice notes of that approval remain applicable with exception to condition 1.2 which is modified to:

"A maximum of 54 dining seats are permitted within the internal and external floor space."

- 1.2 Three on-street car parking bays shall be provided within the Marri Road verge as indicated on the approved plans, and at the Café Operator's cost, to the specifications and satisfaction of the City. Contribution for one of the bays shall be received by the City prior to commencement of construction of the car parking bays;
- 1.3 The hours of operation shall be between 6.00am to 3.00pm Monday to Sunday;
- 2 SUPPORTS the City entering into a payment plan with the Café Operator plan for the cost of one on-street car parking bay, with full payment being required within a maximum period of two years.

Cr Chester left the Chamber at 7.31pm and returned at 7.33pm.

ALTERNATE RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ108-05/24)

MOVED Cr Fishwick, SECONDED Cr Raftis that Council:

- 1 **Reconsiders its decision relating to condition 1.2 of its approval dated 22 August 2023 (CJ134-08/23 refers) as invited by the State Administrative Tribunal pursuant to Section 31 of the *State Administrative Tribunal Act 2004*, and APPROVES under clause 68(2)(c) of Schedule 2 of the *Planning and Development (Local Planning Schemes) Regulations 2015* the application for development approval to amend DA17/1226 submitted by CF Town Planning, the applicant, for the RESTAURANT/CAFE (modifications to DA17/1226 – retrospective) at Lot 702 (24/34) Marri Road, Duncraig subject to the following conditions:**
 - 1.1 **DA23/0281 approved on 22 August 2023 remains a valid approval and all conditions and advice notes of that approval remain applicable with exception to condition 1.2 which is modified to:**

“A maximum of 54 dining seats are permitted within the internal and external floor space Monday to Thursday; and

A maximum of 60 dining seats are permitted within the internal and external floor space Friday to Sunday”;
 - 1.2 **Three on-street car parking bays shall be provided within the Marri Road verge as indicated on the approved plans, and at the Café Operator's cost, to the specifications and satisfaction of the City. Contribution for one of the bays shall be received by the City prior to commencement of construction of the car parking bays;**
 - 1.3 **The hours of operation shall be between 6.00am to 3.00pm Monday to Sunday;**

- 2 SUPPORTS the City entering into a payment plan with the Café Operator plan for the cost of one on-street car parking bay, with full payment being required within a maximum period of two years;**
- 3 APPLIES time restricted parking limits on the proposed three on-street car parking bays within the Marri Road verge and the two existing on-street car parking bays within the Cassinia Road verge to provide short-term parking.**

The Alternate Motion was Put and

CARRIED (7/6)

In favour of the Alternate Motion: Cr Chester, Cr Fishwick, Cr Hutton, Cr May, Cr O'Neill, Cr Pizzey and Cr Raftis.
Against the Alternate Motion: Mayor Jacob, Cr Hamilton-Prime, Cr Hill, Cr Jones, Cr Kingston and Cr Vinciullo.

Reason for departure from officer's recommendation

In accordance with Regulation 11 (da) of the *Local Government (Administration) Regulations 1996*, the reason Council made its decision which was significantly different to what the administration recommended is because the change in the dining seating accommodates patronage for the local residents and also supports local business.

12.3 CONSULTING ROOMS (MODIFICATION TO PREVIOUSLY APPROVED DA14/0665) - 34 SEACREST DRIVE, SORRENTO (WARD – SOUTH-WEST)

WARD	South-West
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	00732, 101515
AUTHORITY / DISCRETION	Administrative - Council administers legislation and applies the legislative regime to factual situations and circumstances that affect the rights of people. Examples include town planning applications, building licences and other decisions that may be appealable to the State Administrative Tribunal.

PURPOSE

For Council to consider an application for modifications to a previous approval for 'Consulting Rooms' at Lot 504 (34) Seacrest Drive, Sorrento.

EXECUTIVE SUMMARY

In February 1991, approval was granted for a 'Consulting Room' at Lot 504 (34) Seacrest Drive, Sorrento (the subject site), subject to a condition limiting operation of the premises to a maximum of one health practitioner. That approval included the provision of six on-site car parking bays.

In 2018 gazettal of *Local Planning Scheme No. 3* (LPS3) occurred which modified the definition of a 'Consulting Room' to 'Consulting Rooms' that included provision for up to two health consultants (such as Consulting Rooms). LPS3 defines 'Consulting Rooms' as "*premises used by no more than 2 health practitioners at the same time for the investigation or treatment of human injuries or ailments and for general outpatient care*".

The applicant proposes to modify condition 1 of the past approval to allow an additional health practitioner to operate from the premises. Condition 1 of the previous approval states:

- 1 *No more than one (1) health consultant generating their own patient load shall be permitted to operate from the premise at any given time.*

In order to accommodate an additional practitioner, modifications are proposed to the existing car parking area located in front of the building, to increase the amount of parking by providing two additional bays, resulting in a total of eight car bays on-site. The City's *Consulting Rooms Local Planning Policy* requires a total of 10 parking bays for Consulting Rooms operating with two health practitioners, therefore resulting in a car parking shortfall of two bays. As the on-site parking shortfall exceeds 10% (20% proposed) Council is required to determine the application in accordance with the current Register of Delegation of Authority.

The City considers that the parking shortfall will not result in a detrimental impact to the amenity of the surrounding residential area, and that the proposed modifications to the carpark and on-site landscaping will provide an improved presentation of the development as viewed from the street.

It is therefore recommended that Council APPROVES the application subject to conditions.

BACKGROUND

Suburb/Location	Lot 504 (34) Seacrest Drive, Sorrento.
Applicant	Dynamic Planning.
Owner	Physiotherapy & Rehabilitation Pty Ltd.
Zoning	LPS Residential.
	MRS Urban.
Site area	707.946m ² .
Structure plan	Not applicable.

The subject site gains access from Seacrest Drive to the south and is bound by residential properties to the west and north, and another 'Consulting Rooms' development to the east which is approved for a maximum of two practitioners. Located further east on the corner of Seacrest Drive and Sandpiper Street is Seacrest Medical Centre which is defined under LPS3 as a 'Medical Centre'. Located opposite the subject site on the corner of Seacrest Drive and Viewcrest Way is a 'Child Care Premises' currently under construction. A location plan detailing the above is included as Attachment 1 to this Report.

The subject site is zoned 'Residential' under the City's *Local Planning Scheme No.3* (LPS3). The land use 'Consulting Rooms' is listed as an 'A' use within the Residential zone, which means that the use is not permitted unless approved by the Local Government following public consultation.

The land use was originally considered by Council at its meeting held on 22 August 1990 and refused on the basis that the development did not meet the requirements of *Town Planning Scheme No. 1*, specifically, the minimum lot size required for a Consulting Room, number of car parking bays required (six in total) and a non-residential located use on Residential zoned land. The applicant at the time appealed this decision to the Minister for Planning, who in February 1991 approved the application subject to the following conditions:

- Limiting the operation of the consulting rooms to a sole practitioner.
- Requiring the practitioner to reside at the premises.

The approved plan is provided as Attachment 2 to this Report.

At its meeting held on 6 November 1995, Council considered a further application to amend the approval by adding a second practitioner and removing the condition requiring the practitioner to reside at the premises. Council refused the application on the basis that six parking bays were considered insufficient to accommodate car parking required for two practitioners and the City's *Medical Facilities/Consulting Rooms Policy* at the time limited a 'Consulting Room' to one practitioner only.

In 2014 the City considered an application to amend the development approval by removing the condition requiring the sole practitioner to reside at the premises. The application was approved on the basis that since the development approval was granted, gazettal of the City's *District Planning Scheme No. 2* (DPS2) had occurred which removed the previous requirement for the practitioner to reside at the premises. Under DPS2 the definition of a 'Consulting Room' retained the limitation of one health practitioner.

In 2018 gazettal of LPS3 updated the 'Consulting Room' land use definition under the previous local planning schemes to 'Consulting Rooms' which permits up to two health practitioner as defined below:

"Consulting Rooms means premises used by no more than 2 health practitioners at the same time for the investigation or treatment of human injuries or ailments and for general outpatient care".

The applicant is now proposing to modify condition 1 of the 2014 approval (Attachment 3 refers) to accommodate an additional health practitioner.

DETAILS

The proposal comprises of the following:

- One additional consultant operating from the premises at any one time (such as two in total).
- Two additional on-site car parking bays totalling eight bays on-site.
- Demolition of the existing carport at the front of the building. A trellis accommodating climbing plants is proposed against the wall of the building which will be made visible by the carport's removal.
- Removal of an existing brick letterbox at the front of the property to accommodate the additional car parking bays and allow for vehicle sightlines.
- Landscaping treatments to the site, including the retention of six existing shade trees within the car park, a climbing plant trellis on the building and hedge planting between the car park and street boundary.

The proposed development plans are included as Attachment 4 to this Report.

Planning Assessment

The application has been assessed against the requirements of the City's *Local Planning Scheme No. 3* (LPS3) and the City's *Consulting Rooms Local Planning Policy* (Consulting Rooms LPP). The key objective of the 'Residential' zone under LPS3 relevant to the consideration of this application is:

"To provide for a range of non-residential uses, which are compatible with and complementary to residential development."

The City's planning assessment against the above framework is provided below:

Parking and access

Consulting Rooms LPP	Requirement	Proposed	Assessment
Clause 5.5.1 Car Parking Standards	5 bays per practitioner 2 practitioners = 10 bays	8 on-site bays	A car parking shortfall of 2 bays is proposed. The City supports the parking shortfall as outlined below.
Clause 5.5.2 Car Park Location and Design	Car park bay widths in accordance with the	Car bay widths of 2.5 metres proposed	The 2.5 metre wide car bay widths are considered acceptable

Consulting Rooms LPP	Requirement	Proposed	Assessment
	Australian Standard of 2.6 metres		and supported by the City as outlined below.
Clause 5.5.3 Bicycle Parking standards	2 spaces	Not depicted on plans	A condition requiring 2 bicycle spaces has been recommended.

The applicant is proposing to install an additional two car parking bays which will increase the number of bays on-site to eight, one of which is an ACROD parking bay. Modifications are proposed to the existing car park to accommodate the two additional car parking bays. The modified car park includes bay widths of 2.5 metres, which is slightly less than the Australian standards for off-street car parking which require a 2.6 metre width. However, the car park includes a 6.46 metre parking aisle width, which exceeds the Australian Standards requirement of 5.8 metres, providing greater maneuvering space allowing the bays and carparking area to remain functional.

The applicant considers that eight bays will be sufficient to accommodate the parking demand for the Consulting Rooms which will comprise both staff and patient parking. Three bays will be set aside for staff (two health practitioners and one receptionist), and four bays for customers (two patients being seen by practitioners and two patients waiting).

In the absence of any detail on the type of practitioners that will be operating from the Consulting Rooms, it is difficult to determine the level of risk that appointments may run late and result in additional parking demand from patient overlap. This situation would typically eventuate with shorter appointment times (ie. General Practitioner appointments) where a high number of patients are seen each day. The City considers this could be addressed through a parking management plan demonstrating how appointments will be appropriately managed to ensure there are no more than four patients on site at any one time.

In relation to the car park modifications, the City considers the additional aisle width adequately offsets the reduced bay widths and will provide sufficient space for vehicle maneuvering/turning within the car park.

Should the application be approved, it is recommended that condition 1 from the original approval is modified to allow for two health practitioners to be permitted to operate from the premises at any one time, and for a parking management plan to be provided, approved and adhered to, demonstrating how appointments will be managed to ensure there is no more than four patients on-site at any one time. A standard condition is also recommended to ensure the modification to the parking area is undertaken in accordance with the approved plans and relevant Australian Standards.

Building design

Consulting Rooms LPP	Requirement	Proposed	Assessment
Clause 5.4 Building design	Building must be of residential appearance, in keeping with the surrounding environment, and not detract from the amenity of adjoining properties.	Removal of the existing carport will result in a blank wall facing the street.	The City supports the removal of the carport and resultant blank wall as outlined below.

The applicant has provided the following justification for removal of the carport and resultant blank wall:

- To offset the removal of the carport which currently screens a blank wall of the building, vertical landscaping of the wall will be included utilising a planter box and trellis system.

Whilst overall the building will maintain a residential appearance similar to a brick and tile dwelling, removal of the existing carport will result in a blank wall of the building that is currently screened by the carport, being visible from Seacrest Drive. This wall is set back 13.3 metres from the street boundary and located directly behind bay 08 and associated shared space. Whilst visibility of the wall from Seacrest Drive will increase, due to the street setback, and it being located behind the car park and front building alignment, it is considered unlikely that the wall will be visually imposing on the streetscape. It is therefore considered that the planter box and climbing trellis would adequately mitigate any visual impact the wall may otherwise have on the streetscape and is therefore supported by the City.

Should the application be approved it is recommended a condition requiring a landscaping plan to ensure the installation and ongoing maintenance of the vertical landscaping be imposed.

Landscaping

Consulting Rooms LPP	Requirement	Proposed	Assessment
Clause 5.6 Landscaping	Minimum 8% of the site as landscape area	21.8%	The overall amount of landscaping across the site achieves the requirements of the LPP.
	Shade tree provision for 1 tree per 4 uncovered parking bays: requires two trees	Retention of 6 existing shade trees within the car park	The 6 shade trees within the car park satisfies and exceeds the amount of 2 shade trees required under the LPP.
	Landscaping strip of 1.5 metres to street boundaries	Minimum landscaping strip of 0.75 metres width between bay VB 05 and the street boundary	The landscape widths proposed are supported as outlined below.
	Verge area landscaped to discourage parking on the verge	The applicant has agreed to the installation of verge landscaping to be included as a condition of approval	It is considered appropriate to include a condition requiring verge landscaping to address this matter.

The original approved plan for the site (Attachment 2) included a 2.2 metre wide landscape strip to the right of the driveway and a three metre strip to the left of the driveway, within the property boundary.

In order to accommodate the additional car parking bays, it is proposed to reduce the width of the existing landscaping strips (within the property boundary) to between 0.75 metres and 0.89 metres on the right of the driveway adjacent to bay 05, and between 1.08 metres and 1.31 metres adjacent to bay 01 to the left of the driveway, achieving an overall average width of 0.92 metres. Low height hedge screening will be installed within the garden beds adjoining the street boundary to provide some landscaped screening of the car parking area.

The current landscaping to the front of the site comprises of grass between the car park and the street. The grass extends to the verge area adjoining the subject site. The addition of screen hedging between the car park and the street boundary, along with additional landscaping within the verge will provide a more attractive interface than the current landscaping, and also better screen the car park from the street and discourage parking occurring within the adjoining verge area. The City considers that the proposed landscaping will improve the appearance of the development, and therefore supports this element of the proposal.

Should the application be approved it is recommended that a landscaping plan including further detail be submitted to, and approved by the City prior to occupation, to ensure that additional details such as irrigation and verge landscaping can be incorporated as part of the landscaping plan to the City's satisfaction.

Issues and options considered

Council may determine an application for development approval by:

- granting development approval without conditions
- granting development approval with conditions
or
- refusing to grant development approval.

Consultation

The proposal was advertised for public comment for a period of 14 days, commencing on 23 February 2024 and ending on 8 March 2024.

Consultation was undertaken in the following manner:

- Letters were sent to owners and occupiers of seven properties in the vicinity of the subject site.
- Placement of a sign on-site.
- Development plans and information were made available for public viewing on the City's website.

No submissions were received during consultation of the application.

COMMENT

Parking

Changes to LPS3 in 2018 enable a Consulting Rooms land use to accommodate up to two health practitioners to be considered at the subject site, which would require a total of 10 on-site parking bays under the Consulting Rooms LPP.

The subject site currently accommodates a total of six parking bays with an additional two proposed, totalling eight bays. The provision of car parking therefore results in a car parking shortfall of two bays (20%) and therefore requires determination by Council.

The applicant has outlined that the business would function with a total of three staff (two practitioners and a receptionist), with the practitioners collectively conducting a maximum of two appointments at a time. Furthermore, the applicant has outlined the resultant parking demand being two bays for patients attending an appointment, two bays for patients waiting for the following appointments and three bays for staff, totaling a parking demand of seven bays. The City considers that the justification provided by the applicant in this manner adequately demonstrates that the Consulting Rooms will be able to operate efficiently with the provision of the eight bays proposed, without needing to utilise any additional areas within the verge or on-street for parking associated with the business.

The City therefore considers that the proposed car parking shortfall is appropriate.

Landscaping

In order to accommodate the changes to the on-site parking, it is proposed to reduce the width of the landscaping strips between the car park and the street boundary. The Consulting Rooms LPP requires a landscape strip of 1.5 metres be included adjacent to a street boundary, whereas the development proposes a minimum width of 0.75 metres.

Currently the landscaping strip between the car park and street boundary achieves a width of between 2.2 metres and 3.0 metres and accommodates a grassed area which extends out to the verge. The application seeks to replace the landscaping strip with hedge planting, and the applicant has committed to landscaping the adjoining verge in a manner which discourages any verge parking. It is considered that a combination of the above will improve the appearance of the development as viewed from Seacrest Drive and is therefore supported by the City.

In light of the above it is recommended that Council approve the application subject to conditions.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ109-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council:

- 1 APPROVES** under clause 68(2)(c) of Schedule 2 of the *Planning and Development (Local Planning Schemes) Regulations 2015* the application for development approval to amend DA14/0665 submitted by Dynamic Planning, the applicant, for the CONSULTING ROOMS (modifications to DA14/0665) at Lot 504 (34) Seacrest Drive, Sorrento subject to the following amended and new conditions:

AMENDED CONDITION

- 1 DA14/0665 approved on 4 August 2014 remains a valid approval and all conditions and advice notes of that approval remain applicable with exception to condition 1 which is modified to:**

No more than two (2) health practitioners generating their own patient load and one receptionist shall be permitted to operate from the premise at any given time.

NEW CONDITIONS

- 5 A detailed landscaping plan shall be submitted to, and approved by, the City prior to the commencement of development. The plan is to indicate the proposed landscaping treatment(s) in the subject site and the adjoining road verge(s), and shall:**
 - **Be drawn at an appropriate scale of either 1:100, 1:200 or 1:500;**
 - **Provide details regarding the proposed vine trellis required to screen the blank wall at the front of the building;**
 - **Include verge landscaping in a manner that discourages car parking occurring within the verge;**
 - **Indicate any vegetation to be retained and the proposed manner in which this will be managed;**
 - **Be based on water sensitive urban design principles to the satisfaction of the City;**
 - **Be based on Designing out Crime principles to the satisfaction of the City;**
 - **Show all irrigation design details.**

6 A Parking Management Plan shall:

- Be submitted by the applicant/owner and approved by the City prior to a second health practitioner operating from the site;
- Contain detail including, but not limited to, appointment management practices to ensure no more than two patients per health practitioner are on-site at any one time;
- Be adhered to thereafter following its approval.

7 The car parking bays, driveways and/or access points/crossovers shown on the approved plans are to be designed, constructed, drained and marked in accordance with the *Australian Standards* (AS2890) except where permitted by this approval, prior to the occupation of the development and thereafter maintained to the satisfaction of the City;

8 Two (2) bicycle parking spaces shall be designed and installed in accordance with the *Australian Standard for Off-street Car parking – Bicycles* (AS2890.3-1993), prior to occupation of the development and thereafter maintained to the satisfaction of the City;

9 All stormwater shall be collected on-site and disposed of in a manner acceptable to the City;

10 All development shall be contained within the property boundaries.

AMENDED ADVICE NOTE

1 NOTES the approved land use is ‘Consulting Rooms’ which is defined under the *City of Joondalup Local Planning Scheme No. 3* as “premises used by no more than 2 health practitioners at the same time for the investigation or treatment of human injuries or ailments and for general outpatient care”.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

12.4 NOTICE OF MOTION - LIBRARY CATS (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	07065, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider information and recommendations in response to a Notice of Motion for a report on library cats.

EXECUTIVE SUMMARY

At its meeting held on 28 November 2023 as a result of a Notice of Motion, the Council resolved (CJ250-11/23 refers), in part that it:

“REQUESTS the Chief Executive Officer to prepare a report to Council to investigate options for the City to host cats at the City’s Joondalup Library on a trial basis, with options to make the arrangement permanent.”

The City has undertaken investigation into a number of different options in relation to hosting cats in Joondalup Library. These investigations have been supported by engagement with the Royal Society for the Prevention of Cruelty to Animals (RSPCA WA) and Cat Haven, to seek their input and advice on the library cat concept.

Both the RSPCA WA and Cat Haven advised that cats are not ideally suited for inclusion within a public library environment, nor within library-based programs. Reasons behind this advice noted risks not only to the library, its patrons and staff, but also to the cat itself.

Rather than cats in the library, the RSPCA WA and Cat Haven noted the need for increased awareness in the community regarding responsible pet ownership, including that of cat ownership.

This is something that can be readily accommodated and the City can develop new programming to be delivered within the Joondalup Libraries from 2024/25 promoting the importance of responsible pet ownership. This is able to be achieved with no impact on existing service levels or budgets.

Further to this, both the RSPCA WA and Cat Haven noted the possibility of a Cat Adoption Program that could be delivered in partnership with the City from the Joondalup Libraries.

The City has explored this idea further and has determined that this will require further work to be undertaken to develop the program and will have an impact on budget. As such it is recommended that a Cat Adoption Program be considered as part of the 2024/25 mid-year budget review process.

It is therefore recommended that Council:

- 1 *NOTES the information contained within the report, most notably the advice gathered that cats are not suited to an unrestrained, or uncontrolled presence within a public library;*
- 2 *NOTES that the City will introduce some new programming as part of the Joondalup Libraries "Discovery Sessions" brand, in partnership with the RSPCA and / or Cat Haven in relation to responsible pet ownership;*
- 3 *NOTES that the City will give consideration to developing a Cat Adoption Program as part of future budget considerations.*

BACKGROUND

At its meeting held on 28 November 2023 as a result of a Notice of Motion, Council resolved (CJ250-11/23 refers) that it:

"REQUESTS the Chief Executive Officer to prepare a report to Council to investigate options for the City to host cats at the City's Joondalup Library on a trial basis, with options to make the arrangement permanent, considering:

- 1 *Feasibility and potential implications of the different options by which to host cats in the Joondalup Library;*
- 2 *Feasibility for an area in the library where cats of appropriate temperament can interact freely with visitors who wish to use said area (such as in an area where those who may be allergic to cats or not want to be around cats are not impacted);*
- 3 *Partnership opportunities with organisations such as Cat Haven and SAFE (Saving Animals from Euthanasia) Perth and whether cats will be looked after by volunteers from partner organisations;*
- 4 *Whether, if successful, such a program could be rotated or expanded to include other libraries."*

DETAILS

Cats in a library

A traditional library cat model consists of domesticated cats that live in public libraries. As noted in the Notice of Motion the presence of cats within a public library had been commonplace as far back as the Middle Ages, with an estimated 300 living resident library cats still present today. A report from the American Library Association documented that in the early 2000's it was believed there were approximately 200 Library Cats throughout the United States of America, whereas a more recent survey conducted in 2016 showed that number had reduced to only 39.

While there are some benefits that can come from bringing a cat into the library environment, there are also a number of challenges, not only considering the library as a public space, but also a workplace.

Consideration must be given to a number of factors which would need to be adequately addressed and resolved to ensure a library cat is not only safe for visitors, staff, and the library asset itself, but to also ensure the environment is suitable for the cat. Considerations would need to include the following:

- Responsible cat ownership and welfare.
- Risk of injury (to patrons, staff, and the cat/s).
- Damage and cleaning requirements.
- Management of allergens and allergies.
- Patrons and staff suffering from Ailurophobia (fear of cats).

In discussions with the RSPCA WA and Cat Haven, it was advised that a public library is not considered to be an ideal place for the keeping of a cat. It was also noted that the nature of cats as opposed to dogs was more solitary, quiet, and unpredictable, especially in an environment that has a high number of different people coming and going.

Beyond the considerations of a library cat as a principle, the upkeep and management of a cat in a public library presents a number of practical challenges. In addition to the considerations outlined above, containment of a library cat within the space would likely be an issue with a cat being able to exit through the libraries automatic doors without being noticed. This could result in a cat being able to leave the library environment without being noticed, creating a risk to the surrounding natural environment as well as presenting a challenge for staff in monitoring a cat's whereabouts. Administrative considerations would also need to be overcome such as changes to staff position descriptions, risk management documentation and other processes and protocols required to adapt to the responsibilities of a living animal within a library.

Based on the feedback and discussions with the key stakeholders (RSPCA WA and Cat Haven) and after consideration of the operational requirements, the City is not recommending the initiation of any form of library cat concept.

Cat-based programming

While it is noted above that a library cat is not recommended, the City has identified an opportunity and alignment to deliver some additional cat-based programming.

Similar challenges to those of hosting a library cat present when trying to adapt established programs like Story Dogs and Study Dogs to cats given the different typical natures of the two animals. Investigations also revealed that there do not appear to be any readily available program presenters or trained cats to deliver comparable cat-based programming where live cats are used within library program activities.

Notwithstanding, an opportunity is available however to integrate the topic of responsible cat ownership and broader responsible pet ownership into Joondalup Libraries 'Discovery Session' program, which are held regularly at all four Joondalup Library locations, targeted at lifelong learning.

This is an area that the RSPCA WA and Cat Haven both strongly support and have noted their willingness to be involved in sharing their knowledge and experience with Joondalup Libraries.

Responsible pet ownership also strongly aligns with several City initiatives and priorities, especially when considering the alignment with recent changes in animal local laws, and the anecdotal growth in nuisance / feral cats, and their impact on the City's natural environment.

The delivery of responsible pet ownership programs based within Joondalup Libraries can be delivered in 2024/25 with no additional resources required.

Cat adoption program

As part of engagement with the RSPCA WA, the RSPCA WA proposed the idea of a library-based cat adoption program, hosted by the City but conducted by the RSPCA WA, in partnership with Cat Haven.

This was suggested and supported by both the RSPCA WA and Cat Haven as an opportunity to address one of the most significant issues in relation to animal and pet management, ensuring surrendered, unclaimed lost, or neglected cats can be re-homed, reducing the number of animals euthanised.

A cat adoption program could be held annually, hosted by the Joondalup Libraries with operational responsibility for the event being undertaken by the RSPCA WA, or another appropriate organisation.

The City estimates that it would cost \$10,000 to deliver this program. There are no funds listed for consideration in the draft 2024/25 operating budget to support this program and additional time is needed to develop the program and ascertain whether further resources are required. It is therefore recommended that consideration be given to this new program as part of future budget processes.

Issues and options considered

In undertaking investigations in response to Council's decision a number of options were considered in how cats could be accommodated within the City of Joondalup public libraries:

- Option 1 – Traditional library cat model.
 - Not recommended for a number of reasons as outlined in the report.
 - As this option is not recommended it is not considered replicable across Joondalup Libraries.
- Option 2 – Cat programming.
 - Not recommended for similar reasons to 'traditional library cat' model.
 - As this option is not recommended it is not considered replicable across Joondalup Libraries.
- Option 3 – Responsible pet (cat) ownership programming.
 - Recommended by City officers.
 - Supported by RSPCA and Cat Haven.
 - Able to be implemented in 2024/25 with no impact to existing services and budget.
 - Able to be delivered across all Joondalup Libraries.

- Option 4 – Cat adoption program.
 - Recommended for further consideration by City officers.
 - Supported by RSPCA and Cat Haven.
 - Is likely to have some resourcing and budget impacts.
 - Further investigation is required to determine whether it can be delivered across all Joondalup Libraries.

Council may choose to:

- Support or not support any of the City's recommendations in relation to the Library Cats Notice of Motion.

Legislation / Strategic Community Plan / Policy implications

Legislation Not applicable.

10-Year Strategic Community Plan

Key theme 1. Community.

Outcome 1-2 Inclusive and connected - you enjoy local services and programs that cater for different ages, abilities and backgrounds.
1-3 Active and social - you enjoy quality local activities and programs for sport, learning and recreation.

Policy Not applicable.

Risk management considerations

There are risk management considerations that would be applicable to any situation that results in cats being present within a public library which escalate if cats were to be unrestrained and uncontrolled.

The City believes the recommended approach provides an adequate balance of positive animal and community outcomes while ensuring a safe environment for library patrons, staff, and the animals themselves.

Financial / budget implications

The introduction of responsible pet/cat ownership programming within the Joondalup Libraries can be undertaken within the existing programming schedule and budget and will not have any further financial implications.

Should the City partner with an external organisation to deliver a cat adoption program, there would still be some direct costs to the City in hosting the program. A breakdown of the actions and an estimated cost is provided as follows:

- Program management and administration - \$2,000.
- Staffing (Casual staff member present during program) - \$1,500.
- Aligned programming - \$500.
- Cat registration fee waiver - \$2,000 (based on 20 cats x \$100 lifetime registration fee).
- Room hire waiver - \$300.

- Air purifiers - \$2,000.
- Deep cleaning of space after the program - \$1,000.
- Contingency - \$700.

(Total - \$10,000)

There are currently no funds listed for consideration in the 2024/25 budget for the cat adoption program.

All amounts quoted in this report are exclusive of GST.

Regional significance

Not applicable.

Sustainability implications

Environmental

Any increase in the awareness within the Joondalup community of their obligations as pet owners along with the non-proliferation of nuisance / feral cats would be expected to have a positive effect on the natural environment.

Consultation

The City has engaged directly with several stakeholders during the preparation of this report including the RSPCA WA and Cat Haven.

The feedback from these organisations demonstrated that cats are not well-suited for a public library environment and that to mitigate the risks associated, both for the people involved (visitors and staff) and for the cats, significant consideration and resources would be required.

Similarly, all stakeholders noted that any animal-based programming should focus on the elements of responsible pet ownership and increasing the prevalence of animal adoption.

COMMENT

While the introduction of many different animals within a public library environment may provide benefit for library patrons, it is not believed that cats would be ideally suited to this. As regulations in relation to both animal ownership, as well as work health and safety increase, the ability for the City to engage in animal programming is becoming more challenging, hence the need for the City to partner with professional and reputable organisations to deliver on these programs.

The City believes the proposed approach provides a measured and beneficial approach that is sensitive not only to the needs of the animal, but to the needs of the library space, its patrons, and its staff.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION

MOVED Cr May, SECONDED Cr Pizzey that Council:

- 1 NOTES the information contained within the report, most notably the advice received from the RSPCA and Cat Haven that cats are not suited to an unrestrained, or uncontrolled presence within a public library;**
- 2 NOTES that the City will introduce some new programming as part of the Joondalup Libraries 'Discovery Sessions' brand, in partnership with the RSPCA and / or Cat Haven in relation to responsible pet ownership;**
- 3 NOTES that the City will give consideration to developing a Cat Adoption Program as part of future budget considerations.**

The Governance Coordinator left the Chamber at 8.05pm.

The Manager Planning Services left the Chamber at 8.07pm.

The Governance Coordinator entered the Chamber at 8.09pm.

The Manager Planning Services entered the Chamber at 8.10pm.

During debate it was requested that Parts 1, 2 and 3 be voted upon separately.

MOVED Cr May, SECONDED Cr Pizzey that Council:

- 1 NOTES the information contained within the report, most notably the advice received from the RSPCA and Cat Haven that cats are not suited to an unrestrained, or uncontrolled presence within a public library;**

The Motion was Put and

CARRIED (11/2)

12.5 EXECUTION OF DOCUMENTS (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr James Pearson Chief Executive Officer
FILE NUMBER	15876, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to note the documents executed by means of affixing the Common Seal for 15 March 2024 to 19 April 2024.

EXECUTIVE SUMMARY

The City enters into various agreements by affixing the Common Seal. The *Local Government Act 1995* states that the City is a body corporate with perpetual succession and a Common Seal.

It is therefore recommended that Council NOTES the Signing and Common Seal Register for 15 March 2024 to 19 April 2024 as detailed in Attachment 1 to this Report.

BACKGROUND

Documents that are to be executed by affixing the Common Seal or signed by the Mayor and the Chief Executive Officer are reported to Council for information on a regular basis. The last report to Council was made at its meeting held on 23 April 2024.

DETAILS

From 15 March 2024 to 19 April 2024, nine documents were Executed by affixing the Common Seal. A summary is provided below:

Type	Number
Deed of Extension and Variation of Lease	4
Application for New Titles	1
Pest Plant Amendment Local Law 2023	1
Transfer of Titles	1
Parking Local Law 2023	1
Withdrawal of Caveat	1

Legislation / Strategic Community Plan / Policy implications

Legislation *Local Government Act 1995.*

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-1 Capable and effective - you have an informed and capable Council backed by a highly-skilled workforce.

Policy Not applicable.

Risk management considerations

Using a common seal to execute documents provides for consistency and accuracy and helps to reduce errors to ensure the execution of documents is undertaken correctly for it to be valid, binding and enforceable.

Such documents also provide third parties with assurance, and ensures parties comply with and obey the requirements of all laws and relevant authorities. They can also indemnify the City against any action, demand, costs or liability rising from damages.

Financial / budget implications

This process is carried out using budgeted resources.

Regional significance

Effective and consistent approach to the execution of documents enhances the City's capability to deliver services to the district, and beyond, as required.

Sustainability implications

Effective and consistent approach to the execution of documents enhances the City's capability to operate sustainably particularly when third parties must ensure that the premises and/or properties are capable of being lawfully used for the permitted use including environmental matters such as contamination, waste and dangerous goods.

Consultation

Not applicable.

COMMENT

Not applicable.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ111-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council NOTES the Signing and Common Seal Register for 15 March 2024 to 19 April 2024 as detailed in Attachment 1 to this Report.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

ATTACHMENTS

1. Signing and Sealing Register from 15 March 2024 to 19 April 2024 [**12.5.1** - 1 page]

Disclosure of interest affecting Impartiality

Name / Position	Cr Christine Hamilton-Prime, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.

Nature of Interest	Interest that may affect impartiality.
Extent of Interest	That Cr Hamilton-Prime owns an e-scooter and is an admin of WA Scooter Enthusiasts Group.

12.6 ERIDEABLES RIDESHARE SERVICE IN THE CITY OF JOONDALUP (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr James Pearson Chief Executive Officer
FILE NUMBER	109714, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider information and recommendations in response to a Notice of Motion regarding implementation of a trial for an eScooter ride-sharing service in the City of Joondalup.

EXECUTIVE SUMMARY

This report is in response to the decision of Council, as a result of a Notice of Motion at the Council meeting held on 21 September 2021 (C99-09/21 refers) which called for a report on the implementation of a trial for an eScooter ride-sharing service within the City and other initiatives relating to eRideables.

It is proposed to offer a service, using hireable eScooters, to allow residents and visitors enhanced ability to explore the Sunset Coast and surrounding commercial, leisure and activity areas using a modern, low cost, innovative and environmentally friendly mode of transport.

An eScooter falls within the category of "eRideable" - micro mobility devices that are electrically powered such as scooters or skateboards intended for individual use. ERideables offer a convenient and sustainable means of transportation for short distances, catering to last-mile commutes and recreational riding. They can be privately owned or provided to the community by rideshare commercial operators and can also offer designs to assist people living with mobility issues in the community.

This report proposes the implementation of an eScooter shared scheme (ESS) trial in the City of Joondalup, and considers the benefits, risks, and safety considerations associated with ESS usage. It evaluates the advantages and risks of introducing an ESS to the community, proposing a trial along the coastline linking commercial, recreational and activity precincts.

The recommendations in this report follow the State Government guidelines and leverage insights from recent trials of ESS operating across Local Government areas in metropolitan and regional WA.

Issues including safety risks, amenity concerns around storage and displaced eRideables, and infrastructure maintenance have been addressed by ESS operators working with other Local Governments to ensure the safety of users and the wider community and maintain public amenity.

An ESS offers safety and amenity measures including on-board user training, provision of helmets, speed inhibitors, go-slow zones and geo-fencing to limit areas within which the eRideable can operate.

Such measures will be a key aspect of an EOI and subsequently included in contractual arrangements allowing for effective management and efficient resolution of any issues during the trial period.

Hireable eScooters, in the form of an ESS, offer a modern, sustainable transport and lifestyle solution, positioning Joondalup as pro-active and innovative, whilst bringing benefits to the local community including an increase in economic activity and recreational tourism opportunities.

It is therefore recommended that Council:

- 1 *APPROVES an Expression of Interest (EOI) process to be conducted for an eScooter Shared Scheme (ESS) provider to operate for a 12-month trial period;*
- 2 *APPROVES the City to appoint a preferred ESS operator at the conclusion of the EOI process, based on the evaluation of responses received and the ability of the respondents to provide a successful ESS service to the community over a 12-month trial period;*
- 3 *NOTES the trial will take place within a prescribed zone being west of Marmion Avenue, from Beach Road to Ocean Reef Road.*

BACKGROUND

At its meeting held on 21 September 2021 (C99-09/21 refers), Council resolved the following Notice of Motion:

That the Council REQUESTS the Chief Executive Officer:

- *Prepare a report investigating the implementation of a trial for an e-scooter ride-sharing service with the City of Joondalup, partnering with a commercial operator/s to conduct e-scooter services within designated areas and strategic locations;*

- *Identify strategic locations and nodes for hubs and the use of personal mobility devices/eRideables can be used to support micro mobility for both commercial and recreational uses such as coastal dual use paths, parks/reserves, train stations, and the Joondalup CBD;*
- *Investigate the need for creation of specific policy and/or guidelines for eRideables/micro mobility, its use and commercial permission to operate permits and designated parking areas; and*
- *That the report be prepared in consultation with the Department of Transport and relevant stakeholders, in anticipation of legislation for eRideable devices and changes to the Western Australian regulatory framework.*

The City has consulted with the Department of Transport and the City of Stirling and monitored developments in other cities and local government areas with existing ESS operations in place.

The City of Stirling has conducted a trial over an extended period and has shared feedback with the City. This feedback indicates the trial has had a positive impact on the community overall, with high uptake of the service and an increase in spend at local businesses. The City of Stirling has progressed beyond the trial and has now appointed an ESS operator for a 2-year period.

In December 2021, the Department of Transport released new rules around eRideables that negate the need for the City to develop its own specific policy or guidelines for use. The City will prepare an agreement with the ESS operator detailing the terms and conditions for operating within the City including parking and abandonment terms, operating hours and permitted areas and speed limits.

Partnering with an ESS provider can enable a continuous service between the City of Joondalup and City of Stirling boundary along the shared Sunset Coast dual-use coastal path, maximizing the benefits to local businesses including those located at Hillarys Boat Harbour, Mullaloo Beach and the Whitford City commercial precinct.

The Town of Cambridge has recently initiated a 12-month trial of the extension of an ESS from the City of Stirling's southern boundary into the Town of Cambridge's coastal area.

DETAILS

In Western Australia (WA), the deployment of ESS's has been assisted by State Government guidelines released in December 2021 by the WA Road Safety Commission. These guidelines and road rules provide streamlined safety measures that govern the use of both private and commercial eRideables ([eRideables - Road Safety Commision](#)).

The growing popularity and prevalence of eRideables is apparent across WA, with private eRideables including eScooters widely used across the City of Joondalup and the Perth Metropolitan Region. Local governments increasingly recognise the advantages of partnering with commercial operators to provide eScooter rideshare services in designated areas.

Local authorities including the City of Perth, Town of Cambridge, City of Stirling, and Town of Vincent in the metropolitan area have utilised these guidelines and introduced ESS operators to their communities. A collaborative approach ensures that residents, patrons, and visitors in these cities have access to a modern and convenient transit solution that operates seamlessly across council boundaries.

Regional local governments, including the Cities of Albany and Busselton and the Shire of Denmark, have also entered into agreements with ESS operators to provide eScooter services to locals and visitors.

In a shared discussion paper on eScooters WALGA notes that “a Local Government intending to permit an e-scooter shared service to commence should consider the impact that service may have on neighbouring Local Governments. It is likely that e-scooter users will be unaware when crossing Local Government boundaries which can have implications for a neighbouring Local Government in terms of inappropriate parking, abandonment, and safety of others. Neighbouring Local Governments may also be launching e-scooter shared services resulting in an oversupply of e-scooters in adjacent areas. Therefore, it is important that neighbouring Local Governments are engaged to raise awareness of an impending e-scooter shared service, to understand any unintended consequences and to agree on mitigation strategies.”

This report considers the benefits and concerns around introducing rideshare eRideables to the Joondalup community and proposes locations where they could be a positive addition to the City’s economy and support active lifestyle activities for residents and visitors.

The trial is not proposed to include the area east of Marmion Avenue, including the Joondalup City Centre. Subject to a successful trial of an ESS, the addition of operations in the City Centre, and other areas east of Marmion Avenue, could be explored after a review of the trial data and community feedback.

Benefits

There are many benefits of the City permitting an ESS operator to provide eScooters in the district, particularly along the Sunset Coast. By working with an ESS operator, the City can ensure that the conditions and restrictions such as operating hours, geo-locations, parking areas and speed limits are monitored and effectively managed to benefit users and the wider community. Benefits include economic, social, and environmental factors, such as:

1 Transport

E-scooters supplied through a rideshare service provide a safe, efficient, and low-cost method of travel for short trips, encouraging public transport use by providing connectivity and convenient ‘last mile’ transport. E-scooters promote active outdoor lifestyles and ease pressure on parking requirements and road congestion in high traffic areas such as at Hillarys Boat Harbour.

2 Increased Tourism and Visitation

Seen by many as an attractive recreational opportunity and an enjoyable way to explore coastal destinations and visitor precincts, permitting an ESS to operate along the Sunset Coast is expected to increase visitation along the City’s coastline. Businesses in coastal precincts and activity centers would benefit from the increase in visitor numbers due to improved accessibility. Providing an ESS that links Scarborough to Hillarys and beyond will provide the community and visiting tourists with the ability to visit more businesses in the area. An ESS in the City of Joondalup supports the City’s Destination Plan and the Sunset Coast tourism strategy. A single operator for the City of Joondalup would ensure community and visitor convenience and continuity, however this would be subject to the outcome of the EOI process.

3 Local Jobs

ESS operators typically employ a local workforce to support their operations in the City. Whilst employment opportunities depend on fleet size and area covered, local jobs are required to undertake daily sweeps of the operating route and ensure all eScooters are maintained and ready for use. A growth in local business activity could also create demand for local jobs in cafes and other small businesses.

4 Place Activation

The City's Place Activation Strategy strives for enhanced liveability, connection, and economic vibrancy by fostering a strong bond among residents, visitors, businesses, and organisations. The introduction of an ESS aligns with place activation goals, connecting coastal areas, enhancing accessibility, and promoting a positive lifestyle for improved health and wellbeing.

5 Sustainability and Environmental

The City is dedicated to addressing climate change and is developing its draft Climate Change Plan 2024 – 2034, which aims to reduce transport-related greenhouse gas emissions through enhanced public transport, walking, and cycling. An initiative within the plan involves exploring an eScooter hire trial to promote a sustainable and active mode of transport. The adoption of eco-friendly transport not only addresses congestion and safety concerns but also contributes to carbon emission reduction, offering residents a chance to actively participate in decarbonising their commute and recreational travel.

State Guidelines

The guidelines on the use of eRideables introduced by the WA Road Safety Commission include the following:

- The speed limit on bike paths, shared paths and local roads will be 25km/h, consistent with regulations in Queensland, the Australian Capital Territory and New Zealand.
- The speed limit on footpaths and in pedestrian areas will be 10km/h.
- Users of eRideables must be at least 16 years of age.
- Users must wear an approved helmet, use lights and reflectors at night, and have a working warning device.
- Users cannot ride on roads with a speed limit exceeding 50km/h.

As various trials have been conducted across Australia, a wide spectrum of issues have arisen, largely falling into the following two categories:

Community acceptance:

- behaviour of riders such as not wearing helmets and operating scooters while inebriated
- vandalism to eScooters and discarded eScooters
- lack of law enforcement
- risk of personal injury to pedestrians, including people with disabilities and older people, and riders.

Regulatory and planning issues:

- speed limits
- infrastructure (roads; pathways; parking; no-go zones)
- integrating e-scooters into existing transport infrastructure.

Many of these issues have been addressed through improvements such as the use of mobile apps and designated parking areas. ESS operators are enhancing their eRideables with technology that improves safety outcomes, such as speed inhibitors, location restrictions (geofencing), built-in warnings, cognitive tests and specified operating hours.

ESS operators ensure clients are bound by GPS boundaries or specific routes, behaviour requirements, helmet use and age restrictions. In doing so they provide a model for the broader community as opposed to privately owned e-scooters which are often capable of illegal speeds and subject to unsafe practices by users.

Billing practices by ESS operators encourage users to maintain safe and correct use of the eScooters, such as returning them to designated parking areas.

By entering into an agreement with an ESS operator, the City can ensure any issues and concerns are addressed and managed on an ongoing basis. As usage patterns emerge the ESS can modify conditions as required to suit a particular area. In addition, the City and the operator can provide awareness and safety campaigns to align with the trial.

Pre-conditions

Following an EOI process and before appointing the preferred operator as the rideshare provider, preconditions must be met as part of the contract with an ESS provider, including developing a detailed list of potential issues, and determining the optimal deployment of e-scooters for effective coverage in the trial area, along with the requirement for the operator to manage communications to the community on impacts of e-scooters and handle complaints and compliance issues. The operator will work with the City to determine appropriate speeds, parking areas, go-slow or no-go zones, and restricted areas as needed.

The CEO can amend the operation area, such as no-go zones, parking areas, go-slow zones and speed restrictions as required, based on feedback from the ESS operator, local businesses, and the community. This will include the need to geofence areas of planned works or maintenance by the City, such as upgrades to the Coastal Shared Path.

The ESS devices to be deployed in a Joondalup trial will represent an evolution in e-scooters aimed to tackle known issues using the latest technology supported by responsive management.

The proposed devices would be expected to include built-in safety and educational innovations to assist the user when using a device, including a potential for a unique cognitive test that can be activated at specific times and in specific locations, to ensure users meet safety criteria before gaining access to an e-scooter.

It is proposed to investigate software that facilitates in-app promotions for local businesses, supporting the business community and serving as a cross-promotion platform for various community activities and promotions. Additionally, the City will be seeking to incorporate sustainability initiatives to address the carbon footprint on a pathway to be carbon neutral.

The proposed operator will be required to provide comprehensive data analytics that include user movement patterns and desire lines through the trial area and provide this information for the City to review.

With increasing use of eRideables in the community the WA Road Safety Commission has launched a mass media campaign to ensure all West Australians are familiar with the new rules around eRideables. This clarity and increasing awareness around user issues, rules and regulations will assist the City in delivering a successful trial.

The agreement between the City and the ESS operator will address issues and specifications for the deployment of e-scooters in a trial area in Joondalup.

ESS operational approach

Following the EOI process, it is proposed to issue a license or permit to a sole ESS operator for an initial 12-month trial period. The ESS is proposed to be operated along the Sunset Coast and nearby coastal business precincts including commercial, activity and recreation hubs and centres in the City of Joondalup.

Permitting a sole ESS operator for a trial period will ensure the selected route is not overpopulated with competing ESS and will allow the City to review and monitor the trial more effectively. Should the trial be successful, the City may consider multiple operators in the future.

The City will work with the selected ESS operator to finalise an assessment of all proposed eScooter parking sites and use locations to:

- identify and finalise appropriate restrictions for operating areas
- continuity of service and experience optimisation along the Sunset Coast
- preparation of an Operator Agreement
- completion of due diligence regarding the ESS operator and the proposal.

Key considerations will include:

- a high level of safety and compliance with laws
- ease of use of each eScooter
- ease of operation of the ESS
- maintaining comfortable movement for public on footpaths and in public spaces including low speed areas and pedestrian only zones in high use pedestrian areas
- appropriate parking arrangements to minimize clutter and visual impact on streets and public spaces from the ESS and a cap on numbers of eScooters
- community aspects, including support for local businesses, tourism, events, social enterprises, and sustainability policies
- customer service, communication framework, information, and media management, including response and resolution timeframes
- required insurance of operator
- performance standards.

To maximise the success of the operation of an ESS, movement and activity will be managed to include restricted areas of use, managed speed limits in specific areas and regular hours of operation.

Issues and options considered.Proposed Locations for E-Scooters

The Shared Coastal Path from Marmion to Mullaloo on the City's Sunset Coast and surrounding residential, commercial, activity and recreational hubs and centers have been identified as being suitable for a trial of an ESS in the City of Joondalup. The options below are proposed as potential areas of operation that could be part of the City's ESS trial.

Option 1

The smallest route option for the introduction of an ESS to the City of Joondalup is to permit an ESS to operate on the Shared Coastal Path from West Coast Drive at Beach Road, Marmion (boundary with City of Stirling), through to Hillarys Boat Harbour. Currently, ESS users travelling north along the shared coastal path are stopped by geo-fencing at the City's southern boundary and are unable to continue onto Hillarys and beyond.

While this route will enable users coming from coastal precincts such as Scarborough Beach to continue north along the coastal path to Hillarys Boat Harbour, it is not recommended. Feedback from ESS providers indicates that the route will not be commercially viable in isolation.

Option 2 – a prescribed zone west of Marmion Avenue, from Beach Road to Ocean Reef Road

This option includes the area to the west of Marmion Avenue, from the southern boundary with City of Stirling extending north, with the northern most point being the corner of Ocean Reef Road and Oceanside Promenade in Mullaloo. This route will incorporate several commercial, recreation and activity centres in proximity to the coast, including Whitfords Nodes, Pinnaroo Point, Westfield Whitford City shopping and dining precinct, and the Mullaloo Beach entertainment and dining precinct. This zone of operation will increase accessibility to local businesses, enabling them to benefit from an ESS operator in the area, whilst the community will benefit from convenient last mile transportation.

Specific zone details will be managed by the City in partnership with the ESS operator and will be dynamic in order to respond to business and community needs and feedback.

It is expected there will be a defined geo-fenced area created within the zone of operation that enables ESS access to local businesses, natural attractions, commercial, recreation and activity precincts within proximity to the coast as noted above. Slow zones and no-go areas, and parking and no parking areas, will be clearly defined. Such areas could include schools, private residential estates, short stay hotels and resorts, public car parks and Hillarys Boat Harbour.

The route is not recommended to go further north than the corner of Ocean Reef Road and Oceanside Promenade in Mullaloo at this stage, due to ongoing construction at Ocean Reef Marina, and the view that trialing the ESS over a smaller, popular area of the City's coastline is preferable to a trial over the full length of the City's coastline.

Extending the route of an ESS east of Marmion Avenue including the Joondalup City Centre is recommended to be considered following the trial period based on the evaluation of data and feedback received from the trial.

Implementation

The successful implementation of an ESS within the City of Joondalup will take a whole-of-city approach to ensure delivery of the service during the trial period is monitored and compliant with all requirements.

To facilitate this an internal working group will be established to allow for a collaborative approach, comprising representatives from relevant functional areas to ensure effective coordination and address any potential issues. This collaborative effort will ensure a comprehensive and well-rounded approach. The working group will play a crucial role in the management of the contract with the ESS operator, drawing parallels with the existing contract with the PTA for the CAT bus in the City Centre and envisioning a similar management approach for the ESS operator.

As part of this implementation, customer-facing staff will be briefed on how to respond to incoming calls relating to e-scooters, however these calls would be directed to the ESS operator in most cases.

Legislation / Strategic Community Plan / Policy implications

Legislation	<i>Road Traffic Code 2000.</i> <i>Traffic Act 1974.</i>
--------------------	--

10-Year Strategic Community Plan

Key theme	3. Place.
------------------	-----------

Outcome	3-1 Connected and convenient - you have access to a range of interconnected transport options.
----------------	--

Policy	<i>Sustainability Policy.</i>
---------------	-------------------------------

Risk management considerations

There is an actual and perceived risk of injury associated with the use of eRideables, as with all modes of mechanized transport.

There is already a significant number of privately owned eRideables being used within the City of Joondalup, and privately owned eRideables are not subject to speed limitations, geofencing or the oversight of an operator.

The eRideables operated by a commercial rideshare present a lower risk to users and pedestrians, due to the limitations imposed on speed capabilities and movement within specific areas by the operators of the devices.

The Road Safety Commission seeks to reduce incidents by educating users through a mass media campaign of the new laws that were introduced in December 2021 ([eRideables \(www.wa.gov.au\)](https://www.wa.gov.au)).

Dual use shared paths along the coastline are already popular with pedestrians, private eRideable users and cyclists. ERideable and eScooter usage data at the City's counter site on the Coastal Shared Path, Marmion, show that in the month of November 2023, scooters (all scooters not just e-scooters) represented 2.8% of path users. Pedestrians are 78% with bikes at 18.2%.

In terms of numbers, an average of 1,704 pedestrians, 488 bikes and 62 scooters were recorded at this point on the shared path per day for the month of November 2023. That is 67,620 people on this section of the path each month. The path is 3 metres wide (1.5 metres each way) and the introduction of additional transport devices such as those that an ESS operator would bring, will impact path users. This will be monitored throughout the trial and measures put in place, such as reduced speed of ESS devices, should issues arise.

A selected ESS operator will be required to ensure risk mitigation measures are in place including adherence to laws and regulations, designated locations, geo-fencing technology that places virtual boundaries along specific routes and areas, speed limit and behaviour inhibitors and monitoring, and GPS tracking capability.

Financial / budget implications

The ESS trial is expected to be provided at no cost to the City other than in staff time, based on feedback from other local governments. Any costs associated with the operation of the ESS trial will be required to be borne by the operator, who will charge a fee to users.

City officers will work closely with the ESS operator to ensure routes are well-managed and take into account planned capital works, including path upgrades.

There is potential to generate a small amount of income from the operation, if the ESS is in place on an ongoing basis. As this is a trial, it is not proposed for the City to seek an income from an ESS operator at this stage. Options for the City to receive an income from an ESS operator can be explored following the trial period and will be subject to procurement processes.

Regional significance

An ESS in Joondalup will add to the availability of eRideables as a personal transport option in the broader region, particularly the Sunset Coast.

As Joondalup positions itself as a Global City and a Digital City, there is an expectation that the City is active in micromobility options

The City has been monitoring trials from other local governments, including neighbouring and nearby local governments over the last 18 months since the notice of motion was approved by Council.

The City of Stirling has completed an e-scooter trial and appointed a permanent operator to continue the service. Initial discussions with the City of Stirling and their operator indicate that the rideshare service has replaced car trips, reduced carbon emissions, and increased local hospitality and retail spend. The trial demonstrated a high level of safety with very few incidents of harm or damage.

The City of Wanneroo has not been active in respect of e-scooters to date but acknowledges the potential for a coastal pathway that incorporates the Cities of Joondalup and Wanneroo.

The City will continue to engage with neighboring local governments to identify partnership opportunities.

Sustainability implications

Environmental

Partnering with a commercial device service would provide an opportunity to assess the benefits of micro mobility and its related energy consumption and reduced carbon emissions. The use of such devices contributes to lower levels of pollution compared to traditional transport options.

Providing an alternative means of sustainable transport throughout the City provides residents with the opportunity to participate in decarbonising their commute.

Social

Prioritising active travel will help reduce traffic and create a safer City. Providing a high standard of livability for residents involves providing a range of interconnected transport options so that residents can access quality facilities and public open spaces.

With an increase in residents living in smaller residences such as townhouses, units and apartments, and several new apartment buildings planned, providing residents with car-free options of transport will only increase the appeal of residing in the City of Joondalup.

Economic

The deployment of e-scooters in Joondalup holds significant promise for the local economy, with positive impacts across various facets. The proposed ESS trail is anticipated to contribute to economic growth through an increase in tourism, providing a unique and enjoyable means for visitors and residents to explore the City's scenic coastal areas. The trial aligns with the City's Destination Plan and the Sunset Coast tourism initiatives, offering an attractive recreational opportunity that enhances visitation along the coastline.

Additionally, the introduction of e-scooters is expected to generate local job opportunities, as the rideshare operator may employ a local workforce to support its operations. This not only increases employment prospects but also injects vitality into Joondalup's business ecosystem, with potential benefits for small enterprises.

Furthermore, the ESS aligns with the City's Place Activation Strategy, fostering a vibrant and connected community. By integrating micro-mobility solutions like e-scooters, the City aims to create a more active and socially engaged environment, linking activity centres and enhancing accessibility. The success of this trial may pave the way for building stronger transport links to the Joondalup City Centre, reinforcing the City's commitment to sustainable and innovative urban planning.

The City's eRideable working group will be responsible for consideration of additional revenue streams beyond the trial period. If revenue streams are identified, there could be an opportunity for such revenue to be reinvested in paths to improve safety. The City would need to consider at that stage if such re-investment is consistent with financial management policies.

Consultation

The WA government's new eRideable rules were prepared following extensive consultation with users of eRideables and the community and attracted more than 18,000 responses.

Should the City proceed with a trial eRideable rideshare service, ongoing evaluation and feedback will be sought from users and the broader community to determine benefits and issues.

The ESS provider engaged by the City would be expected to provide detailed reporting on the user experience and impacts of the trial including, but not limited to:

- number of trips and kilometres travelled
- replacement of car trips
- impact on carbon emissions
- added convenience and amenity to the community
- impact on incremental spend such as in hospitality and retail
- level of safety / number of incidents reported
- number of local jobs created.

The City would also undertake community consultation to ensure non-users (such as local residents) feedback is captured.

Key Performance Indicators may include:

- the eRideable trial demonstrates a positive economic, social, and environmental impact on the community for both users and non-users
- the eRideable trial delivers a high level of safety for both users and non-users, with >99% incident free trips.

COMMENT

Residents and visitors are currently permitted to use privately owned eRideable devices on appropriate roads, paths, parks and spaces throughout the City of Joondalup.

Partnering with an ESS provider to trial a rideshare eRideable service will extend this opportunity to more people and provide benefits to the City including increased visitor numbers which benefit small businesses, promotion and awareness of sustainable transport options and increased mobility and community engagement along the coastline.

The popularity of the Sunset Coast Explorer Bus launched in Spring/Summer 2021/22 demonstrates the appeal of Joondalup's Sunset Coast and the proposed eRideable partnership is another way for the City to showcase this spectacular asset to residents and visitors to the region.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION

- 1 APPROVES an Expression of Interest (EOI) process to be conducted for an eScooter Shared Scheme (ESS) provider to operate for a 12-month trial period;
- 2 APPROVES the City to appoint a preferred ESS operator at the conclusion of the EOI process, based on the evaluation of responses received and the ability of the respondents to provide a successful ESS service to the community over a 12-month trial period;
- 3 NOTES the trial will take place within a prescribed zone being west of Marmion Avenue, from Beach Road to Ocean Reef Road.

PROCEDURAL MOTION – THAT THE ITEM BE DEFERRED

(Resolution No: CJ112-05/24)

MOVED Cr Hamilton-Prime, **SECONDED** Cr Vinciullo that Item 12.6 - Eridables Rideshare Service in the City of Joondalup, **BE DEFERRED** to the Ordinary Council Meeting to be held on 27 August 2024 to allow further discussions with Elected Members on the following:

- 1 Prescribed Zones in which the eScooter Shared Scheme (ESS) would operate during a 12-month trial;**
- 2 Appropriate agreement, including payment to the City, for a commercial operator to use land controlled by the City during the trial period and the terms and conditions of the permit;**
- 3 Appointment of a preferred ESS operator at the conclusion of the EOI process to be referred to the Council for approval.**

The Motion was Put and

CARRIED (11/2)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Cr Kingston and Cr May.

12.7 STATUS OF COUNCIL DECISIONS - MARCH 2024 (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	48638, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

To inform Council of the action taken in relation to Council decisions.

EXECUTIVE SUMMARY

At its meeting held on 22 August 2023 (CJ169-08/23 refers), Council endorsed a monthly report to Council on all outstanding matters that direction has been given on, including an update on any legal action that may have a contingent liability and are unresolved.

It is therefore recommended that Council NOTES the Status of Council Decisions Report for the month of March 2024, as provided in Attachment 1 to this Report.

BACKGROUND

At its meeting held on 22 August 2023 (CJ169-08/23), Council resolved as follows:

"That Council REQUESTS the Chief Executive Officer to prepare a monthly report to Council, on all outstanding matters that direction has been given on, including an update on any legal action that may have a contingent liability and are unresolved."

City Officers have interpreted this request to include a monthly report on all outstanding Council decisions and any action that has been taken in relation to them. Should additional information be required, for example historical decisions related to major projects that are still progressing, an assessment of resourcing will be required, to complete this information.

The content and format of a separate report in relation to outstanding legal matters, is currently being examined.

DETAILS

The Status of Council Decisions report (Actions Register) is included as Attachment 1 to this Report.

The Status of Council Decisions report details all outstanding items where a decision has been made by Council and/or a Committee and a status update has been provided by relevant officers.

The Status of Council Decisions report is run through Doc Assembler, which went live on 1 July 2023. Any actions that were outstanding prior to 1 July 2023, have been added into the system manually (historical actions). It is to be noted that these items do not have a date displayed in the 'Meeting Date' column. Rather, it is included under the 'Action Required' heading. From 1 July 2023, all actions will appear in the Register in date order.

The Status of Council Decisions report also includes the completed items for the prior month.

Issues and options considered

Council may choose to:

- accept the Status of Council Decisions report
or
- not accept the Status of Council Decisions report.

Legislation / Strategic Community Plan / Policy implications

Legislation Not applicable.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-1 Capable and effective - you have an informed and capable Council backed by a highly-skilled workforce.
5-3 Engaged and informed - you are able to actively engage with the City and have input into decision-making.

Policy Not applicable.

Risk management considerations

In order to remain transparent and to facilitate timely and appropriate decision making, it is requested that action items be reviewed at each Council meeting.

Financial / budget implications

Not applicable.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

Not applicable.

COMMENT

The Status of Council Decisions report includes decisions made at a Council meeting and/or Committee meetings. Where a recommendation is made at a Committee meeting, and the decision subsequently made by Council, the Council decision will only be included in the Status of Council Decision report.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ113-06/24)

MOVED Cr Jones, **SECONDED** Cr Hill that Council **NOTES** the **Status of Council Decisions Report** for the month of **March 2024**, as provided in **Attachment 1** to this **Report**.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

12.8 MINUTES OF REGIONAL COUNCIL MEETINGS (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	41196, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to note the minutes of various bodies on which the City has current representation.

EXECUTIVE SUMMARY

The following minutes are provided:

- Minutes of the Mindarie Regional Council meeting held on 28 March 2024.
- Minutes of the Catalina Regional Council meeting held on 18 April 2024.

DETAILS

Ordinary Mindarie Regional Council Meeting – 28 March 2024

An ordinary meeting of the Mindarie Regional Council was held on 28 March 2024.

At the time of this meeting Mayor Albert Jacob, JP was Council's representative at the Ordinary Mindarie Regional Council meeting, and Cr Christopher May, JP was an apology.

The attached minutes detail those matters that were discussed at this external meeting that may be of interest to the City of Joondalup (Attachment 1 refers).

Ordinary Catalina Regional Council Meeting – 18 April 2024

An ordinary meeting of the Catalina Regional Council was held on 18 April 2024.

At the time of this meeting Cr John Chester and Cr Lewis Hutton were Council's representatives at the Ordinary Catalina Regional Council meeting.

The attached minutes detail those matters that were discussed at this external meeting that may be of interest to the City of Joondalup (Attachment 2 refers).

Legislation / Strategic Community Plan / Policy implications

Extent of Interest	Cr Hutton is a member of the Burns Beach Residents Association.

Name / Position	Cr Daniel Kingston.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024
Item No. / Subject	Item 12.9 – Minutes of the Annual General Meeting of Electors held on 5 March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Motion 7 Cr Kingston is secretary for the Friends of Yellagonga Regional Park, which has an interest in the management of cats. Motion 13 Cr Kingston is secretary for the Friends of Yellagonga Regional Park, which is eligible to receive special purpose grants from the City. Motions 16 and 20 Cr Kingston lives adjacent to a Public Access Way.

Cr Kingston left the Chamber at 8.26pm.

12.9 MINUTES OF THE ANNUAL GENERAL MEETING OF ELECTORS HELD ON 5 MARCH 2024 (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	107128, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to note the Minutes of the Annual General Meeting of Electors held on 5 March 2024 and to give consideration to the motions carried at that meeting.

EXECUTIVE SUMMARY

The Annual General Meeting of Electors of the City of Joondalup was held on 5 March 2024 in accordance with section 5.27 of the *Local Government Act 1995* (the Act). Section 5.33(1) of the Act requires that all decisions made at an Electors' Meeting are to be considered at the next Ordinary Meeting of Council, where practicable, or if that is not practicable, at the first ordinary council meeting after that meeting, or at a special meeting called for that purpose, whichever happens first. On this occasion, the City has been unable to meet these timeframes, and as such the motions will be considered by Council at the May Ordinary Council meeting.

BACKGROUND

The City's Annual General Meeting of Electors was held on 5 March 2024 in accordance with section 5.27 of the Act. The meeting was attended by 60 members of the public, with a total of 39 motions carried at the meeting. Below is a summary of whom the motions were received from, and how many motions were submitted:

Name	Number of Motions submitted
M. Kwok	12 motions
B. Hewitt	8 motions
M. Sideris	8 motions
L. Crawford	5 motions
M. Van Dyk	2 motions
M. Norman	2 motions
J. Hope	1 motion
P. Navas-Pajero	1 motion
TOTAL	39 motions

Decisions made by electors at an Electors' Meeting are the recommendations of those electors present, on the matters discussed and considered at the meeting. Any motions passed at an Electors' meeting are not binding on the Council; however, Council is required to consider them.

DETAILS

The Motions passed at the Annual General Meeting of Electors are set out below:

MOTION NO. 1

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City that all motions from electors this evening and at all future Annual Electors' Meetings be read aloud by the Presiding Member and displayed on the large screens in the Council Chambers, so as to ensure all attendees are able to fully understand the wording proposed and be clear about what they are voting on.

Officer's Comment

This elector's motion is similar to Motion No. 1 raised at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"1 In relation to Motion No. 1 carried at the Annual General Meeting of Electors:

1.1 NOTES that the City has undertaken a number of activities to increase accessibility for visually impaired members of the community in the council Chamber in recent years."

In recent years, the City has undertaken a number of activities to increase accessibility for visually impaired members of the community in the Council Chamber. In 2019, the City installed three large HD screens in the Council Chamber, positioned for viewing by members of the public in the public gallery. In addition, hard copy agendas are made available for members of the public, which are also available in alternative formats. The City also has a dedicated access and inclusion officer who is available to assist members of the public with any requests for documents in alternative formats, and is available to discuss with members of the public how the City can make the Council process more inclusive.

With regard to the request for the Presiding Member to read aloud all motions in full before voting takes places, this is a matter for the Presiding Member to consider and any such requests shall be at the Presiding Members' discretion. It should be noted that at the Annual General Meeting of Electors held on Tuesday 5 March 2024, the Presiding Member permitted electors to read aloud their motions before starting the 2 minutes for debate.

Officer's Recommendation

That Council, in relation to Motion No. 1 carried at the Annual General Meeting of Electors REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers):

1 NOTES that the City has undertaken a number of activities to increase accessibility for visually impaired members of the community in the Council Chamber in recent years;

- 2 *NOTES that the request for the Presiding Member to read aloud all motions in full before voting takes place is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion.*

MOTION NO. 2

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer from 2025 to schedule all Annual Electors' Meetings as stand-alone events, not held before another public meeting within the City of Joondalup or immediately after a public holiday.

Officer's Comment

This elector's motion is similar to Motion No. 10 raised at the Annual General Meeting of Electors held on 8 February 2022.

When considering this motion at its meeting held on 19 April 2022 (CJ049-04/22 refers), Council resolved as follows:

"10 in relation to Motion No. 10 carried at the Annual General Meeting of Electors:

- 10.1 NOTES the setting of the date and time for the Annual General Meeting of Electors is a matter to be determined by Council, in accordance with section 5.27 of the Local Government Act 1995."*

Section 5.27 of the *Local Government Act 1995* requires that the Annual General Meeting (AGM) of Electors be held on a day to be determined by Council, but not more than 56 days after the local government accepts the annual report.

A report was presented to Council on 31 January 2024, for Council to determine the meeting date for the 2023 AGM of Electors (CJ003-01/24 refers). At that meeting, Council determined that the most appropriate date and time for the AGM was Tuesday 5 March 2024, commencing at 5:30pm.

Officer's Recommendation

That Council, in relation to Motion No. 2 carried at the Annual General Meeting of Electors REAFFIRMS its decision of 19 April 2022 (CJ049-04/22 refers):

- 1 NOTES the setting of the date and time for the Annual General Meeting of Electors is a matter to be determined by the Council, in accordance with section 5.27 of the Local Government Act 1995.*

MOTION NO. 3

MOVED J Hope, SECONDED A Arrah that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to prepare a report on a proposed policy having regard to the following:

That all Indoor and Outdoor Events that are organised, supported and/or approved and funded by the City of Joondalup, where children under the age of 16 years are involved in, or have access to, be adherent to a Policy, made by the City of Joondalup where, and which includes all points below:

- 1 **All organising and presenting staff (paid and voluntary) are to have current “Working with Children” Clearances;**
- 2 **No sexualised, inferred sexualised or politicised content in activities, presentations and/or in the materials (including books and videos) is to be used, as adult themes or inferred adult themes are not suitable for children, who have developing minds;**
- 3 **Presenters and staff (paid and voluntary) are to be of good character (no sexualised or politicised websites, all of which are unsuitable for children);**
- 4 **Presenters and staff (paid and voluntary) must have three professional “character references” to support their good character, thus proving to be good role models for our children.**

Officer’s Comment

The City carefully considers the selection of staff, volunteers, and contractors to ensure they are the most suitable applicant and / or person to undertake that role, including taking into consideration their skills, knowledge, and experience as well as cultural fit for the organisation and the role.

Professional references and reference checks are part of the City’s recruitment process for staff and can form part of the selection process for volunteers and presenting contractors where deemed necessary.

Above the City’s employment processes and practices, all employees (paid and voluntary) are guided by the City’s *Code of Conduct for Employees*. This sets out clear expectations for the behaviour of all employees (paid and voluntary) and considers how employees should act with personal integrity and what personal behaviours are expected of them. These elements are also considered in the selection and contracting of presenters and performers acting on the City’s behalf.

The City’s current recruitment and selection process for staff, volunteers, and contractors (including those that undertake performances and the like) for child-related work is aligned with the *Working with Children (Screening) Act 2004* (the Act). A Working with Children Check is a compulsory screening strategy for people engaging in child-related work in Western Australia. The Act states that a Working with Children Check is required if someone has “an agreement to work” in a role undertaking “child-related work” and no “exemptions” apply. “Child-related work” is defined as “the ‘usual duties’ of the work involved or are likely to involve contact with a child in connection with at least one of the categories of ‘child-related work’”.

It is important to note that if a person does not meet the requirements for a Working with Children Check, they are unable to receive one. Therefore, not everyone is eligible to receive, nor hold a Working with Children Check.

Programming is based on a number of factors including community interest, previous programming feedback and industry experience. Programming is also guided by the City’s *Access and Inclusion Plan*, in particular elements of social inclusion which is defined by the Plan as:

“Everyone can participate in the same activities, in the same space. True social inclusion is a cultural change. It is the change of attitude towards those who have been historically excluded.”

In view of this, programming that is delivered by the City is broad and provides options for the community.

Programs and events provided by the City are delivered on an 'opt in' basis. It is a proactive choice by someone to attend a City program, or in the case of children's programming, a parent or guardian has chosen on behalf of the child to attend and participate. While the City always endeavours to ensure that programs with adult themes are only accessible by the appropriate audience, each individual (or their parent or guardian) has the ultimate responsibility on choosing what they wish to engage in.

It is also noted that a number of actions have been undertaken by the City following the publication of the Final Report from the Royal Commission into Institutional Responses to Child Sexual Abuse (the Royal Commission) in December 2017. This has included the City signing up to the National Redress Scheme and implementing a new mandatory reporting process consistent with the new requirements of the Reportable Conduct Scheme overseen by the Ombudsman WA.

In relation to the Reportable Conduct Scheme the City's responsibilities include the following:

- Prevent reportable conduct by employees, volunteers and contractors in the course of their employment/engagement.
- Enable people to report reportable allegations and convictions to the CEO.
- Enable people to report reportable allegations and convictions involving the CEO to the Ombudsman.
- Notify the Ombudsman of reports received by the CEO within 7 days of becoming aware of a reportable allegation or conviction.
- Investigate reportable allegations and convictions and take appropriate action in response to a finding of reportable conduct.
- Receive, handle, and disclose investigation information.

The Reportable Conduct Scheme does not replace the need to report allegations of child abuse, including criminal conduct to the WA Police Force, the Department of Communities or other applicable regulatory bodies or to otherwise take appropriate action.

The City has developed an online reporting form available on the City's website – [Reportable Conduct Scheme – City of Joondalup](#) – and has also developed internal resources for its workforce.

The final element of the City's response to the Royal Commission's report will be the establishment of a Child Safety Policy. To aid in the development of this policy, the City currently participates in the Child Safety working group with the Department of Local Government, Sport and Cultural Industries, the Western Australian Local Government Association as well as other local governments. This new Child Safety Policy is being guided by the Royal Commission, the Child Safety Working Group and the *National Principles for Child Safe Organisations*, developed by the Australian Human Rights Commission.

The draft Child Safety Policy is expected to be presented for Council consideration in late 2024.

In view of the above practices that the City currently undertakes, along with the ongoing work to develop a Child Safety Policy, separate action as per the motion carried at the Annual General Meeting of Electors held on 5 March 2024 is not considered to be required.

Officer's Recommendation

That Council in relation to Motion No. 3 carried at the Annual General Meeting of Electors:

- 1 *NOTES the City's existing processes for the appropriate selection and recruitment of employees, volunteers, presenters, and performers, including the requirements under the Working With Children (Screening) Act 2004;*
- 2 *NOTES that in response to the findings of the Royal Commission into Institutional Responses to Child Sexual Abuse, the City is currently developing a Child Safety Policy.*

MOTION NO. 4

MOVED L Crawford, SECONDED P Navas-Parejo that the Electors of the City of Joondalup REQUEST that Council instructs the City to limit where possible, the use of wireless technology in council areas, where there are a lot of activities involving children and pregnant women, for example community centres and libraries.

Officer's Comment

The City currently provides a combination of wired and wireless networking within City Libraries, the Craigie Leisure Centre, the City Administration Building, Civic Chambers and other select community buildings and services (Youth Centres, Youth Truck). Wireless (Wi-Fi) access is provided both for public and staff use from devices such as mobile phones and tablets that are increasingly incapable of connecting to a wired (Ethernet) network.

The City has seen significant growth in demand for the Joondalup Libraries free public Wi-Fi service, with growth from 21,792 connections in 2019-20 to 28,950 connections in 2022-23, or 33%. During that same period access to the hard-wired public computers has only seen minor growth from 23,276 connections to 24,498 connections, or 0.5%.

Beyond the public use of the City's public Wi-Fi system, there is also a strong operational requirement for secured wireless internet and network access for City staff to conduct its business efficiently and effectively. This includes the City's team members that work in the field, for presentations or collection management at the Joondalup Libraries, member tours and inductions, court sport scoring at Craigie Leisure Centre and access to laptops, tablets and mobile devices at Council Meetings.

Reverting to hard-wired cable connectivity in lieu of wireless technology would significantly limit access to internet services for community members accessing City facilities, as well as City staff. The number of people who could access the service at any one time would be limited due to the number of cable connections available.

When considering any matter that relates to public or personal health, the City relies on the advice and guidance of the relevant governmental agency. In relation to any form of radiation (in this case, non-ionising radiation), the City refers to the advice provided by the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

In relation to wireless technologies, most commonly presenting as Wi-Fi (or wireless local access network (WLAN) more broadly), ARPANSA has determined:

“there is no established scientific evidence that the low exposure to RF (Radiofrequency) EME (electromagnetic energy) from Wi-Fi adversely affects the health of children or the general population”.

It is noted that the RF EME emissions from Wi-Fi and other wireless technologies used for communication are regulated by the Australian Communications and Media Authority (AMCA), and that the ACMA require wireless devices to comply with ARPANSA RF exposure limits. The ARPANSA limits are designed to protect people of all ages and health status against all known adverse health effects from exposure to RF EME. ARPANSA state:

“On the basis of current scientific information, APRANSA sees no reason why Wi-Fi should not continue to be used in school and other places”.

Officer’s Recommendation

That Council in relation to Motion No. 4 carried at the Annual General Meeting of Electors:

- 1 *NOTES the advice from ARPANSA on the safe use of wireless technologies in public areas;*
- 2 *NOTES that the use of wireless technology will continue as part of City operations and in the delivery of services to the community.*

MOTION NO. 5

MOVED P Navas-Parejo, SECONDED A Arrah that the Electors of the City of Joondalup REQUEST that Council instructs the City to stop spending funds on further CCTV devices, software and/or systems, and consider the following:

- 1 **That residents and ratepayers are under financial stress with increasing interest rates, increasing council rates, increasing fuel prices, energy prices, food prices and inflation to name a few;**
- 2 **That residents and ratepayers DO NOT want the City spending council rates on a civilian surveillance system that has not been proven to reduce or deter antisocial behaviour or crime;**
- 3 **That residents and ratepayers DO NOT want the City tracking vehicles through City roads, or storing any form of data relating to our vehicles, such as number plates, current location, distance travelled, carbon footprint, as this would be subject to potential hacks and other threats;**
- 4 **The Council AGREES instead to lower the council rates, which would be much more welcomed by its ratepayers.**
- 5 **That the Chief Executive Officer investigates having fake cameras and lights to deter antisocial behaviour and consider passive surveillance while designing public areas to improve public safety for community members.**

Officer's Comment

The implementation of CCTV has a direct link to the 'Healthy and safe – you feel healthy and safe in your local community' objective of the City's *Strategic Community Plan*.

It has been established through Crime Prevention through Environmental Design (CPTED) principles that the perception of safety is increased through the installation of CCTV systems, increased lighting, activation and patrols.

Community safety and the perception of safety is important for the City and its community as has been identified in previous community safety and crime prevention plan consultations, as well as 'Shaping Your Local Community' consultation initiatives which were undertaken to inform the City's current strategic community plan. As part of these previous consultations a high level of support for CCTV in public areas was demonstrated.

The City does not store data in relation to peoples' or vehicles' location, distance travelled or carbon footprint. CCTV cameras are used primarily as a deterrent to crime or antisocial behaviour and is used, when required, in investigations conducted by the WA Police which assists in convicting alleged offenders.

The City is currently developing a new Community Safety Plan that will be released for community consultation during 2024. The Plan and the results of the consultation will guide the City on future community safety initiatives.

Officer's Recommendation

That Council, in relation to Motion No. 5 carried at the Annual General Meeting of Electors:

- 1 *DOES NOT SUPPORT the request to stop spending funds on further CCTV devices, software and/or systems;*
- 2 *NOTES that the City is currently developing a new Community Safety Plan which will be advertised for community consultation.*

MOTION NO. 6

MOVED M Van Dyk, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the City to ENSURE the option for cash payment is maintained in all City venues and facilities.

Officer's Comment

The City offers the ability for customers to pay for services in a variety of ways. These include over-the-counter payment using cash, cheque, EFTPOS, or debit/credit card (Mastercard or Visa). Where facilitated, customers are also able to make payments in the City's website using an accepted debit/credit card or by BPAY.

The City will continue to accept cash as payment as long as it remains legal tender or until Council determines that payment options for a particular service should no longer include cash.

Officer's Recommendation

That Council, in relation to Motion No. 6 carried at the Annual General Meeting of Electors:

- 1 *NOTES that cash remains a means for customers to pay City notices, or pay for services;*
- 2 *NOTES that Council determines what means of payment are accepted in relation to any service provided or notice issued by the City.*

MOTION NO. 7

MOVED M Norman, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City to develop a Cat Local Law (similar to that recently adopted by the City of Wanneroo) specifying the following:

- 1 Cat-prohibited natural areas;**
- 2 That a cat found in natural areas can be seized and impounded by the City;**
- 3 That the owner deemed to be committed of an offence, will have the relevant penalty applied.**

Officer's Comment:

The City has recently undertaken a review of the *Animals Local Law 1999*, and as part of that review has suggested that additional provisions be included to specifically address the control of cats.

The review recommends that:

- Additional provisions be added to the City's Animals Local Law for the provision of designated cat prohibited areas.
- Additional provisions be added to the City's Animals Local Law to prohibit cats in private places.

A new Animals Local Law 2024 has been drafted including the above provisions, as well as the power to impound cats found in restricted areas as well as impose modified penalties to offending cat owners.

Council considered the draft Animals Local Law 2024 at its meeting held on 26 March 2024 (CJ061-03/24 refers) and resolved to advertise the new local law for public consultation. Public consultation is expected to commence in May 2024, and be open for a period of 6 weeks in accordance with the requirements of the *Local Government Act 1995*.

It is considered that the proposed changes to the City's Animal Local Law meet the request of the motion carried at the Annual General Meeting of Electors dated 5 March 2024 and as such a separate Cat Local Law is not required.

Officer's Recommendation

That Council, in relation to Motion No. 7 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the City has commenced the process to develop a new Animals Local Law;*
- 2 *NOTES that the proposed Animals Local Law 2024 incorporates provisions that respond to the control of cats, as requested in the motion carried at the Annual General Meeting of Electors on 5 March 2024.*

MOTION NO. 8

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup MOVE that ratepayers be given the opportunity to ask additional questions and present additional motions without notice.

Officer's Comment

In accordance with section 5.31 of the *Local Government Act 1995*, the procedures to be followed at electors' meetings are to be in accordance with the *Local Government (Administration) Regulations 1996*.

In accordance with Regulation 18 of the *Local Government (Administration) Regulations 1996*, the procedure to be followed at a general or special meeting of electors is to be determined by the person presiding at the meeting.

The question of whether electors be given the opportunity to ask additional questions and present additional motions without notice, is a matter for the Presiding Member to consider. It should be noted that at the Annual General Meeting of Electors held on Tuesday 5 March 2024, the Presiding Member did allow electors to ask more than two questions, after other electors had been given the opportunity and further, the Presiding Member did allow motions from the floor without notice.

Officer's Recommendation

That Council, in relation to Motion No. 8 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the request to be given the opportunity to ask additional questions and present additional motions without notice is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion.*

MOTION NO. 9

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer that all motions from the Annual General Meeting of Electors this year, and in all future years, are addressed fully and separately with individual reports and are voted on separately when presented to Council.

Officer's Comment

This elector's motion is similar to motions raised at the Annual General Meeting of Electors held on 23 March 2021, 8 February 2022 and 7 March 2023.

When considering this motion at its meeting held on 18 May 2021 (CJ063-05/21 refers), Council resolved as follows:

"In relation to Motion No. 12 carried at the Annual General Meeting of Electors, NOTES:

- 1 the requirements and time limitations under the Local Government Act 1995 in addressing motions passed at electors' meetings and the City's current processes in place; and*
- 2 how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the Local Government Act 1995 and the procedures set out in the City's Meetings Procedures Local Law 2013."*

When considering this motion at its meeting held on 19 April 2022 (CJ049-04/22 refers), Council resolved as follows:

"That Council in relation to Motion No. 14 carried at the Annual General Meeting of Electors:

14.1 REAFFIRMS its decision of 18 May 2021 (CJ063-05/21 refers) that NOTED:

- 14.1.1 the requirements and time limitations under the Local Government Act 1995 in addressing motions passed at electors' meeting and the City's current processes in place;*
- 14.1.2 how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the Local Government Act 1995 and the procedures set out in the City's Meeting Procedures Local Law 2013".*

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"In relation to Motion No. 4 carried at the Annual General Meeting of Electors:

- 4.1 REAFFIRMS its decisions of 18 May 2021 (CJ063-05/21 refers) and 19 April 2022 (CJ049- 04/22 refers) that NOTED:*
 - 4.1.1 the requirements and time limitations under the Local Government Act 1995 in addressing motions passed at electors' meeting and the City's current processes in place;*
 - 4.1.2 how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the Local Government Act 1995 and the procedures set out in the City's Meeting Procedures Local Law 2013"*

It has been the City's practice over numerous years that a single report is prepared presenting the minutes of the Annual General Meeting, as well as consideration of the motions passed. This report provides an Officer's comment in respect of each elector's carried motion, and a suggested recommendation for Council to consider. Each motion is considered and given attention individually and this practice also ensures that motions passed by the electors are addressed in a timely manner and in accordance with the above legislative constraints.

Notwithstanding, it is for the Council of the day, in receiving this report, to either accept the recommendations presented by City Officers or to resolve another form of action it may desire. Similarly, it is also open to Council to consider each part of a motion separately and vote accordingly in accordance with the procedures under the City's *Meeting Procedures Local Law 2013*.

Officer's Recommendation

That Council, in relation to Motion No. 9 carried at the Annual General Meeting of Electors REAFFIRMS its decisions of 18 May 2021 (CJ063-05/21 refers), 19 April 2022 (CJ049-04/22 refers) and 23 May 2023 (CJ067-05/23 refers) that:

- 1 *NOTES the requirements and time limitations under the Local Government Act 1995 in addressing motions passed at electors' meetings and the City's current processes in place;*
- 2 *NOTES how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the Local Government Act 1995 and the procedures set out in the City's Meeting Procedures Local Law 2013.*

MOTION NO. 10

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer that in all future City of Joondalup Annual Reports ensure that a record is included from the Customer Service Feedback, which should include, at a minimum:

- 1 the number of compliments;**
- 2 feedback and complaints provided through the customer feedback;**
- 3 report on the outcomes of these figures in terms of the City's response to customer feedback.**

Officer's Comment

In response to a notice of motion, Council at its meeting held on 25 July 2023 (CJ1207-07/23 refers) resolved that the Chief Executive Officer prepare a report that investigates options to present an ongoing quarterly report to the Audit and Risk Committee, providing analysis of customer complaints and feedback and highlighting any trending issues with the community or City organisation.

At the Council meeting held on 23 November 2023 (CJ227-11/23 refers) Council accepted the proposed structure of quarterly reporting to the Audit and Risk Committee being the number of complaints, compliments and general feedback received each month of the reportable quarter with reporting commencing in 2024/25.

High level information relating to the number of compliments, feedback and complaints gained from these quarterly reports to the Audit and Risk Committee is proposed to be included in the Annual Report from 2024/25.

In regard to reporting of the outcomes, as the Annual Report is a summary of activities for the financial year it would not be appropriate to include this level of detail within the report.

Officer's Recommendation

That Council, in relation to Motion No. 10 carried at the Annual General Meeting of Electors:

- 1 *SUPPORTS the inclusion of the number of compliments, feedback and complaints received by the City within the City's Annual Report;*
- 2 *NOTES that reporting will be in accordance with the proposal accepted by Council at the Council meeting held on 23 November 2023 (CJ227-11/23 refers).*
- 3 *NOTES that reporting will commence from 2024/25.*

MOTION NO. 11

MOVED M Van Dyk, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the City DO NOT duplicate services already provided by the State Government such as Immunisation Clinics.

Officer's Comment:

The City provides free immunisation clinics with scheduled vaccinations for members of the community. These clinics are undertaken in a room within the Joondalup Library situated on Boas Avenue, Joondalup and are usually run on three Tuesdays within each calendar month and are appointment based. Some funding is provided by the Federal Government.

Although there are other service providers the clinics, currently provided by the City are not considered to be a duplication of a service already provided by the State Government. Should the City cease operating its immunisation clinics, residents would need to find alternative providers, such as their GP.

There are other discretionary services that the City provides in lieu of the State Government providing the service. Examples include the school-based immunisation program and the City's noise service which administers the *Environmental Protection (Noise) Regulations 1997*.

These services are not duplicated as such, as the State Government does not provide these services in the City of Joondalup whilst the City provides them. In the absence of the City providing these services to the community the relevant agency would need to consider the provision of the service (being the Department of Health and Department of Water and Environmental Regulation respectively in the aforementioned examples).

Officer's Recommendation

That Council, in relation to Motion No 11. carried at the Annual General Meeting of Electors:

- 1 *NOTES that the immunisation clinics the City currently provides is not considered to be a duplication of service already provided by the State Government;*
- 2 *NOTES that any cessation of service, such as immunisation clinics, should be phased and done in consultation with relevant stakeholders and providers to ensure continuity of services for the City of Joondalup community.*

MOTION NO. 12

MOVED L Crawford, SECONDED J Hope that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to make a representation to the government to request that:

- 1 **The Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) take the science on non-thermal biological effects of Radiofrequency Electromagnetic Radiation (RF-EMR) into consideration;**
- 2 **Develop a new RF standard which is divided into three categories with much lower maximum exposure levels than the current ARPANSA RF standard.**

Officer's Comment:

When considering any matter that relates to public or personal health, the City relies on the advice and guidance of the relevant governmental agency. In relation to any form of radiation (in this case, non-ionising radiation), the City refers to the advice provided by the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

ARPANSA acknowledges that radiofrequency electromagnetic energy (RF EME), is now encountered virtually everywhere in modern society with the most common exposure resulting from telecommunications networks, public broadcast infrastructure such as radio and television, wireless technology (such as Wi-Fi), and the use of personal devices including mobile phones, laptops and tablets. Sources of RF EME are also used in industrial and medical applications and in radar and security scanning equipment.

ARPANSA also acknowledges that exposure to sufficiently high levels of RF EME, well above the public or occupational exposure limits, can heat biological tissue and potentially cause tissue damage. However, RF EME levels routinely encountered in the environment by the public are too low to produce any significant heating or increases in body temperature.

Protection against the established harmful effects of exposure to RF EME has been provided by ARPANSA's *Radiation Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3 kHz to 300 GHz* (RPS-3), published in 2002 based on guidelines developed by the International Commission on Non-Ionizing Radiation Protection (ICNIRP) in 1998.

Since the publication of RPS-3, research in the area of RF and health has grown rapidly and in March 2020 the ICNIRP published updated guidelines for RF EME taking into account current knowledge of how RF EME affects the human body.

In response to the new ICNIRP guidelines ARPANSA has developed a new standard called 'Standard for Limiting Exposure to Radiofrequency Fields – 100 KHz to 300 GHz' (RPS S-1) and brings Australia in line with international best practice.

ARPANSA maintain that there is no substantiated scientific evidence to support any adverse health effects from low-level exposure to RF EME associated with telecommunications and wireless technology below the limits set within the ARPANSA RF Standard.

In addition to ARPANSA's position, it is also noted that the City does not employ the scientific expertise on radiofrequency electromagnetic radiation as the City does not have a role in determining applicable RF EME standards. It is therefore considered that it would be inappropriate for the City to request any change to current standards, including a request to lower maximum exposure levels.

Officer's Recommendation

That Council, in relation to Motion No. 12 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;*
- 2 *DOES NOT SUPPORT the request to make a representation to the Government that the Australian Radiation Protection and Nuclear Safety Agency develop a new radiofrequency standard with lower maximum exposure levels.*

MOTION NO. 13

MOVED M Norman, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1st of May of each financial year:

- 1 **Shall be made available for Friends' Groups (who have already received a grant of the annual prescribed maximum amount) to apply during May for additional funds so as to double their annual grant;**
- 2 **Any successful applicant shall be paid the additional funding requested, or a lesser amount depending on the number of applications received, by the end of the financial year.**

Officer's Comment

The City currently has 17 Bushland Friends' Groups who assist the City in protecting, preserving and enhancing significant bushland areas in the community which are as follows:

- Friends of Cadogan Park.
- Friends of Carnaby Reserve.
- Friends of Central Park Bushland.
- Friends of Duncraig Library Bushland.
- Friends of Harman Park.
- Friends of Hepburn and Pinnaroo Bushland.
- Friends of Hillarys and Kallaroo Foreshore.
- Friends of Maritana Bushland.
- Mullaloo Beach Community Group.
- Friends of North Ocean Reef/Iluka Foreshore.
- Friends of Periwinkle Bushland.
- Friends of Porteous Park.
- Friends of Robin Park Bush Reserve.
- Friends of Shepherd Bush Park.
- Friends of Sorrento Beach and Marmion Foreshore.
- Friends of Warwick Bushland.
- Friends of Yellagonga Regional Park.

The City has been supported by Friends' Groups for over 25 years. The largest of these groups is the Friends of Yellagonga Regional Park, which has a membership of over 200. Smaller groups have a membership of less than ten. All groups hold community weeding and planting events that residents are invited to.

Friends' Group volunteers participate in a range of activities and include:

- manually removing introduced weed species
- planting native plants grown in the City's Works Operation Centre (WOC) nursery and specialist native plant nurseries
- conducting guided bushland walks
- applying for external grants to enhance the group's activities
- assist the City in mapping weed populations
- inform the City about local bushland issues.

Friends' Groups provide an important service to the City's natural area management activities. They contribute many thousands of hours of labour annually and foster an interest within schools and residents about the importance of the natural area. The groups also act as a conduit between the public and the City in relation to natural resource management issues.

To assist in these approved activities, the City provides Special Purpose Grant funding. A funding matrix was developed which considers a base amount, the area of bushland the group cares for and the group's historic contribution of volunteer hours. Dependent on these factors, groups can apply for and if approved receive between \$2,420 and \$3,965 on an annual basis. The amount is indexed annually during the setting of the budget. Groups can also submit an annual claim to reimburse administration expenses costs associated with running a group to a limit of \$700.

To be eligible for Special Purpose Grant funding, Friends' Groups must:

- provide the City with an Annual Work Plan for approval which is to be received by the City during the first quarter of the financial year
- completed an acquittal for the Special Purpose Grant funding received in the year prior
- funding applications must be received by 1 May.

These requirements ensure that the appropriate administration processes are in place to manage and acquit grant funding provided. It also provides time for Friends' Groups to complete planned works within the financial year for which the grant is applicable.

Allowing further funding applications to be received post 1 May, would not only impact upon the City's ability to effectively consider and manage the grant funding, but also impact on the Friends' Groups ability to deliver the works by 30 June as it would be unlikely that additional works would be organised, completed, and acquitted prior to the 30 June. If works are not completed and the grant funding acquitted, this will in turn impact on the availability of grant funding in the subsequent year which will potentially impact on other Friends' Groups.

As such this Motion is not supported.

Officer's Recommendation

That Council, in relation to Motion No. 13 carried at the Annual General Meeting of Electors:

- 1 *NOTES there is value in providing Special Purpose Grant funding to Friends' Groups to carry out approved tasks within the City's bushland;*
- 2 *NOTES that allowing further funding applications to be received after 1 May would impact on the City's ability to effectively consider and manage the Friends' Groups Special Purpose Grant funding;*
- 3 *NOTES that allowing further funding applications to be received after 1 May would impact on the Friends' Groups ability to organise, complete, and acquit the additional works prior to 30 June;*
- 4 *DOES NOT SUPPORT the motion that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1 May each financial year be made available to Friends' Groups for additional funding applications.*

MOTION NO. 14

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup MOVE that sufficient parts of Standing Orders be set aside to enable free and open discussion on any matter raised by electors without notice.

Officer's Comment

In accordance with section 5.31 of the *Local Government Act 1995*, the procedures to be followed at electors' meetings are to be in accordance with the *Local Government (Administration) Regulations 1996*.

In accordance with Regulation 18 of the *Local Government (Administration) Regulations 1996*, the procedure to be followed at a general or special meeting of electors is to be determined by the person presiding at the meeting.

Procedures for Electors' Meetings are established for the purpose of ensuring an appropriate structure and framework to provide clarity, continuity, consistency and effective outcomes.

The question of whether to set aside sufficient parts of the standing orders to enable free and open discussion is a matter for the Presiding Member to consider.

Officer's Recommendation

That Council, in relation to Motion No. 14 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the request to set aside sufficient parts of the standing orders to enable free and open discussion is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion.*

MOTION NO. 15

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City to prepare a comprehensive program this year to phase out the use of glyphosate and other pesticides within the City of Joondalup. Making an incremental shift to non-chemical weeding methods, such as hydrothermal, manual and mechanical weeding, over the next three years.

Officer's Comment

The City's *Weed Management Plan 2023 - 2033* (the Plan) details an integrated weed management approach to prevent, monitor, prioritise and control the introduction and spread of weeds in the City. The Plan describes the potential impacts from weeds, weed control methods, the City's current weed management approach and proposes management strategies to be implemented over the life of the Plan to minimise potential impacts.

In developing the Plan, consideration was given to previous Council decisions, outcomes of the Strategic Community Reference Group meeting held in May 2021, and community concerns regarding herbicide use, including two petitions that were open at the time, one being a request to cease the use of any pesticides within 50 metres of playspaces.

At its meeting held on 15 November 2022 (CJ194-11/22 refers), Council endorsed the release of the draft Weed Management Plan 2022 - 2032 for community consultation, for a period of 21 days.

The feedback received during the community consultation period was outlined within the community consultation summary, shown as Attachment 1 in the report considered by Council at its meeting held on 28 March 2023 (CJ040-03/23 refers) and amendments were made to the Plan to incorporate feedback, where appropriate.

The report informed Council that the Plan is based on current science, research and relevant advice from State Government and industry agencies including advice from the Department of Health which states that glyphosate products that are registered with Australian Pesticides and Veterinary Medicines Authority (APVMA) are safe when used in accordance with the labelled instructions. Furthermore, advice provided states that glyphosate is not a confirmed class 1 human carcinogen and is registered for use throughout the world and current regulatory assessment is that it does not pose a risk to humans when used according to the labelled instructions.

Regarding the petition request to cease the use of any pesticides within 50 metres of playspaces, it was noted that the City already utilises non-chemical weed control within playspaces, however, pesticides such as insecticides and rodenticides would be required to be used within these areas to ensure the appropriate management of dangerous and destructive pests, such as ants, termites and spiders. The City's position was that the petition request could not be supported and was not reflected in the Plan. It was also noted that when applying these pesticides, the City complies with labelled instructions and relevant regulation. Council adopted the Plan at its meeting held on 28 March 2023 (CJ040-03/23 refers).

In adopting the Plan, Council endorsed the management actions described within the Plan which includes the continued use of herbicides such as glyphosate as part of an integrated approach to weed management. The use of chemical weed control as a tool to maintain amenity, biodiversity and reduce the risk of fire within the community is an important element of the City's approach to weed management.

As per the objectives of the Plan, the City will continue to reduce reliance of herbicide use by increasing non-chemical weed control methods where appropriate including trialing alternative forms of weed control and utilise non-chemical weed control for hardstand areas within 50 meter radius of schools and within playspaces. Additionally, non-chemical control will be used within kerbs, footpaths, hardstand median islands, mulched median islands and general paved areas within the City's Central Business Precinct.

Officer's Recommendation

That Council, in relation to Motion No. 15 carried at the Annual General Meeting of Electors:

- 1 *NOTES that weed management activities across the City will continue to be undertaken in alignment with the adopted Weed Management Plan 2023-2033;*
- 2 *DOES NOT SUPPORT the motion requesting the City prepare a comprehensive program this year to phase out the use of glyphosate and other pesticides within the City of Joondalup to make an incremental shift to non-chemical weeding methods, such as hydrothermal, manual and mechanical weeding, over the next three years.*

MOTION NO. 16

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City to investigate replacing chemical weeding (excluding the use of hydrothermal) methods along laneways and pedestrian access ways with non-chemical weeding methods.

Officer's Comment

Weed prevention and control in the City's natural areas, parks and urban landscaping areas, including the use of herbicides, has been the subject of much discussion over the past decade and has resulted in a number of considerations and decisions by Council.

The City's *Weed Management Plan 2023 - 2033* (the Plan), adopted by Council at its meeting held on 28 March 2023 (CJ040-03/23 refers), details an integrated weed management approach to prevent, monitor, prioritise and control the introduction and spread of weeds in the City. The Plan describes the potential impacts from weeds, weed control methods, the City's current weed management approach and proposes management strategies to be implemented over the life of the Plan to minimise potential impacts.

In developing the Plan, consideration was given to previous Council decisions, outcomes of the Strategic Community Reference Group meeting held in May 2021 and community concerns regarding herbicide use, including two petitions that were open at the time.

The Plan is based on current science, research and relevant advice from state government and industry agencies including advice from the Department of Health which states that glyphosate products that are registered with Australian Pesticides and Veterinary Medicines Authority (APVMA) are safe when used in accordance with the label instructions. Furthermore, advice provided states that glyphosate is not a confirmed class 1 human carcinogen and is registered for use throughout the world and current regulatory assessment is that it does not pose a risk to humans when used according to the label instructions.

The City has approximately 900 Pedestrian Access Ways (PAWs) within its boundaries. PAWs are classified as low priority urban landscaping as per the City's *Public Open Space Framework* and are serviced, on average, twice per annum which includes the removal of rubbish and weed control if required. If there are no weeds present at the time of service, weed control is not undertaken.

Although the motion excluded the use of hydrothermal methodology to replace the current chemical control, based on a high-level estimate, it would cost the City an additional \$356,000 per annum for six hydrothermal events per annum to maintain the weeds at an acceptable level. Hand weeding is also not financially sustainable across the City's PAWs and certain perennial weed varieties are difficult to remove by hand weeding.

There is already a mechanism implemented by the City for interested residents to participate in the care, planting and maintenance of their adjacent PAWs.

At its meeting held on 18 May 2021 (CJ063-05/21 refers), Council considered a report in relation to a number of items carried at the Annual General Meeting of Electors held on 23 March 2021 including a request that Council allow residents the option to plant and maintain native shrubs along public accessways. Council resolved, amongst other things, as follows:

"19 in relation to Motion No. 18 carried at the Annual General Meeting of Electors:

- 19.3 NOTES public access ways form an integral part of the City's overall transport network and specifically caters for non-motorised modes of transport such as pedestrians and cyclists;*
- 19.4 SUPPORTS the planting of appropriate vegetation including native shrubs within public access ways, subject to the expressed support of all adjoining property owners of the public accessway;*
- 19.5 NOTES vegetation planted within a public access way can have a detrimental impact on the overall perception of safety as well as unimpeded access for users of the public access way;"*

In response to part 19.4 above, City officers developed an on-line process that allows residents to apply and seek approval to landscape the adjacent PAW to their property in accordance with Council's decision. The approval is subject to a number of conditions applicants must commit to including, amongst other things, the following:

- Maintaining the PAW in a safe, good and tidy condition.
- Keeping footpaths clear of landscaping and trip hazards.
- Not using any chemical weed control.

Based on the above, if a PAW is maintained and kept weed free under the mechanism described above, the City will not undertake chemical weed control. As such this motion is not supported.

Officer's Recommendation

That Council, in relation to Motion No. 16 carried at the Annual General Meeting of Electors:

- 1 *NOTES that weed management across the City's laneways and pedestrian access ways will continue to be undertaken in alignment with the City's adopted Weed Management Plan 2023- 2033 ;*
- 2 *DOES NOT SUPPORT limiting weed management within the City's laneways and pedestrian access ways to non-chemical weed management only.*

MOTION NO. 17

MOVED L Crawford, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to make a representation to the Government requesting schools, especially kindergartens remain hard wired where possible, with wireless devices limited where possible and turned off when not in use.

Officer's Comment

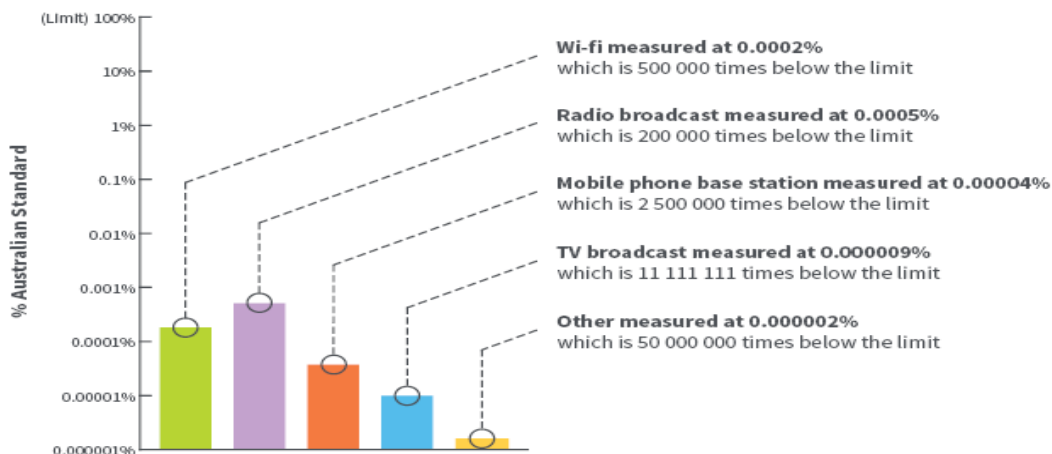

When considering any matter that relates to public or personal health, the City relies on the advice and guidance of the relevant governmental agency. In relation to any form of radiation (in this case, non-ionising radiation), the City refers to the advice provided by the Australian Radiation Protection and Nuclear Safety Agency (ARPANSA).

In relation to wireless technologies, most commonly presenting as Wi-Fi (or wireless local access network (WLAN) more broadly), ARPANSA has determined "there is no established scientific evidence that the low exposure to RF (Radiofrequency) EME (electromagnetic energy) from Wi-Fi adversely affects the health of children or the general population".

It is noted that the RF EME emissions from Wi-Fi and other wireless technologies used for communication are regulated by the Australian Communications and Media Authority (ACMA), and that the ACMA require wireless devices to comply with ARPANSA RF exposure limits. The ARPANSA limits are designed to protect people of all ages and health status against all known adverse health effects from exposure to RF EME. ARPANSA state:

"On the basis of current scientific information, ARPANSA sees no reason why Wi-Fi should not continue to be used in school and other places".

ARPANSA conducted a measurement study of 23 schools throughout Victoria and New South Wales that measured the RF EME levels in school classrooms and school yards. The findings of that study are provided below:

Classroom**School Yard**

Source: -

In addition to ARPANSA's position, it is also noted that the City does not employ the scientific expertise on radiofrequency electromagnetic radiation as the City does not have a role in determining applicable RF EME standards. It is therefore considered that it would be inappropriate for the City to request any change to current practices in schools and kindergartens, including limiting the use of wireless devices or turning them off when not in use.

Officer's Recommendation

That Council, in relation to Motion No. 17 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;*
- 2 *NOTES the position of the Australian Radiation Protection and Nuclear Safety Agency in relation to low exposure to RF EME;*

- 3 *DOES NOT SUPPORT the request to make a representation to the Government requesting schools, especially kindergartens, remain hard wired where possible, with wireless devices limited where possible and turned off when not in use.*

MOTION NO. 18

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council significantly reduce the current maximum property value of \$900,000 that the Chief Executive Officer has delegated authority to dispose of under the current Delegated Authority Register, and that all property under consideration for disposal and valued greater than \$100,000 be reported to Council for review.

Officer's Comment

Council determines the extent of delegated authority provided to the Chief Executive Officer to execute any particular function. These delegations are contained in the *City of Joondalup's Delegation of Authority Register*, which Council reviews annually.

As part of this review, Council can consider whether any delegation itself or any aspect of a delegation, including any applicable financial limits, requires amendment and determine accordingly.

It is currently intended that a review of the *Delegation of Authority Register* will be considered by Council at its meeting to be held on 28 May 2024.

Officer's Recommendation

That Council, in relation to Motion No. 18 carried at the Annual General Meeting of Electors:

- 1 *NOTES that all delegations to the Chief Executive Officer are recorded within the City of Joondalup's Delegation of Authority Register;*
- 2 *NOTES that a review of the Delegation of Authority Register is intended to be presented to the Council Meeting to be held on 28 May 2024, where all delegations to the Chief Executive Officer will be considered by Council.*

MOTION NO. 19

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to ensure that the Annual Report is to be prepared and ready to be signed off by the Council before 31 December each year.

Officer's Comment

This elector's motion is similar to Motion 51 raised at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers) Council resolved as follows:

"In relation to Motion No. 51 carried at the Annual General Meeting of Electors:

- 1 *NOTES the requirements of s5.27 and s5.54 of the Local Government Act 1995, as they pertain to the acceptance of annual reports and setting of meeting dates for annual general meetings of electors, respectively;*
- 2 *NOTES the Council resolution of 7 February 2023 (JSC05-02/23 refers) regarding concerns raised in relation to annual audits undertaken by the Office of the Auditor General."*

Provisions related to acceptance of a local government's Annual Report, Annual Financial Report, and setting of a meeting date for the Annual General Meeting of Electors, are established by the *Local Government Act 1995*.

With regard to acceptance of the Annual Report and Annual Financial Report, s5.54 of the *Local Government Act 1995* provides as follows:

5.54. Acceptance of annual reports

- (1) *Subject to subsection (2), the annual report for a financial year is to be accepted* by the local government no later than 31 December after that financial year.*

** Absolute majority required.*

- (2) *If the auditor's report is not available in time for the annual report for a financial year to be accepted by 31 December after that financial year, the annual report is to be accepted by the local government no later than 2 months after the auditor's report becomes available.*

Acceptance of annual reports as required by s5.54 can only occur upon receipt of the auditor's report.

The auditor's 2022/23 report became available early December, however there was insufficient time to allow for internal processes as well as presentation to the Audit and Risk Committee to meet the deadline for the December 2023 Council meeting agenda.

A Special Audit and Risk Committee meeting was held on Tuesday 30 January 2024, and a Special Council meeting on Wednesday 31 January 2024, to accept the Annual Report and the Annual Financial Report. This was the earliest date the City could hold the Special Audit and Risk Committee meeting and Special Council meeting given that Council is usually in recess for the month of January.

It is not the City's preference to accept its annual reports and conduct its Annual General Meeting of Electors so late, however, the City is bound by legislative requirements and timing of receipt of the auditor's report.

It is worth noting that the Council, at its Special Council Meeting held on 7 February 2023 (JSC05-02/23 refers) resolved, in part, that Council:

- 5 *EXPRESSES its disappointment to the Office of the Auditor General for the delay in finalisation of the 2021-22 Financial Year Audit, resulting in a delay to the conduct of the City's General Meeting of Electors;*

- 6 *FORMALLY REQUESTS the Mindarie Regional Council work with the office of the Auditor General and other member Councils to progress their 2022-23 Audit process in a more timely manner;*
- 7 *FORMALLY REQUESTS the Western Australian Local Government Association to seek feedback from the local government sector regarding the performance of the Office of the Auditor General with regard to the end of financial year audits, and to provide that feedback to the Premier and Minister for Local Government should the responses be similar to that of the City of Joondalup.*

Further, it is noted that the Council, at its meeting held on 26 March 2024, considered a Notice of Motion from Cr Fishwick and resolved as follows:

“That Council REQUESTS the Western Australian Local Government Association to lobby the State Government to review the Local Government (Audit) Regulations 1996 to:

- 1 *Limit the Audit Fee a local government can be charged to 0.15% of rates revenue for the year being audited;*
- 2 *To require the Office of the Auditor General to establish a local government audit section to ensure adequate resources are allocated to local government audits; and*
- 3 *Require the Office of the Auditor General to complete audits within eight weeks of the relevant financial reports being supplied to the Office of the Auditor General.”*

The City therefore acknowledges that it is preferable to accept the annual reports and conduct its annual general meeting of electors prior to 31 December, however, is restricted by legislative provisions of the *Local Government Act 1995*.

Officer's Recommendation

That Council, in relation to Motion No. 19 carried at the Annual General Meeting of Electors REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:

- 1 *NOTES the requirements of s. 5.27 and s. 5.54 of the Local Government Act 1995, as they pertain to the acceptance of annual reports and setting of meeting dates for annual general meetings of electors, respectively;*
- 2 *NOTES the Council resolution of 7 February 2023 (JSC05-02/23 refers) regarding concerns raised in relation to annual audits undertaken by the Office of the Auditor General.*

MOTION NO. 20

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City to develop a Citywide Friends of PAWs group for interested residents who would like to participate in the care, planting and maintenance of their local PAWs, so that members may be covered under the City's own public liability insurance and supported by the City in this valuable work.

Officer's Comment

The City currently has several mechanisms to support the community in participating in gardening, conservation and maintenance activities on public land, owned or managed by the City.

The table below summarises the current available options for conducting these activities under existing guidelines and frameworks, and in particular, the coverage of public liability insurance and public indemnities under each.

Option	Activities	Group Responsibilities	City Responsibilities
Natural Areas Friends Group Manual	<ul style="list-style-type: none"> Monitoring and recording of flora and fauna. Non-chemical weed control / removal Guiding nature walks Rubbish cleanup Seed collection Community education (talks and presentations) Revegetation and planting (approved species) 	<ul style="list-style-type: none"> Requires minimum 4 people to form Group. Registration of Friends Group with the City Appointment of group coordinator Development and approval of partnership agreement with the City Submission of annual work plan Development of annual report Maintenance of volunteer register Adherence to PPE requirements 	<ul style="list-style-type: none"> Provision of public liability insurance for ages 12-80 Friends Groups promotion and publications Meeting facilitation Provide advice and assistance on works and activities Provide special purpose grant funding Provide financial administrative support
Community Garden Guidelines	<ul style="list-style-type: none"> Gardening / watering (predominately edible plants) Maintenance Minor infrastructure installation Non-chemical weed control / removal Pest management Community education 	<ul style="list-style-type: none"> Must be incorporated, not-for-profit community group Requires minimum six people to form committee Must be sufficiently resourced and prepared to fund all governance, insurances and operations of the group Must enter into a Land Use Agreement with the City 	<ul style="list-style-type: none"> Make land available Maintenance of surrounding infrastructure not part of the garden Assist with requests and approvals
Pedestrian Accessway (PAW) Planting and Maintenance Process	<ul style="list-style-type: none"> Non-chemical weed control / removal Rubbish cleanup Planting (approved species) 	<ul style="list-style-type: none"> On-line application from Lead Applicant Seek written approval from all adjoining property owners Develop planting plan Fund all approved activities Indemnify the City against damage to property or people Reapply every two years 	<ul style="list-style-type: none"> Assess applications Assist with requests and approvals

Based on the information outlined in the motion, the City would require more information to understand the purpose of the proposed Citywide Friends of PAWs group and potential activities they would be undertaking to inform the most appropriate mechanism to support them. It may be, that one of the existing mechanisms is sufficient and appropriate to expand for these activities.

Notwithstanding the above, depending on the intended structure and activities of the group, the City would need to consider the level of resource required to manage and support them. With approximately 900 public accessways across the City, this may become a significant undertaking for the City to manage should the community become highly engaged in such an initiative.

Based on these unknowns that motion is not supported as insufficient information is available to understand the extent of resource requirements for the City.

Officer's Recommendation

That Council, in relation to Motion No. 20 carried at the Annual General Meeting of Electors DOES NOT SUPPORT the development of a Citywide Friends of PAWs group within the City's laneways and pedestrian access due to insufficient information available to assess the impacts on City resourcing.

MOTION NO. 21

MOVED L Crawford, SECONDED J Hope that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to write to the Minister for Health with regard to the serious deleterious effects of fluoride in our drinking water, especially in children and pregnant women.

Officer's Comment

When considering any matter that relates to public or personal health, the City relies on the advice and guidance of the relevant governmental agency. The Federal Government National Health and Medical Research Council (NHMRC) is Australia's leading expert body promoting the development and maintenance of public health and clinical standards. It is responsible for providing the Australian community with health advice based on the best available scientific evidence.

Fluoridation of drinking water is supported by a range of national and international health research agencies and government bodies.

In 2016, the NHMRC finished a thorough review of the latest scientific research relevant to Australia on the potential link between water fluoridation and human health. The NHMRC confirmed that community water fluoridation helps to reduce tooth decay, and that there is no reliable evidence that water fluoridation at current Australian levels causes any health problems.

In addition to the NHMRC's position, it is also noted that the City does not employ the scientific expertise on water fluoridation as the City does not have a role in establishing levels of fluoridation in drinking water. It is therefore considered that it would be inappropriate for the City to write to the Minister of Health regarding fluoride in drinking water.

Officer's Recommendation

That Council, in relation to Motion No. 21 carried at the Annual General Meeting of Electors:

- 1 NOTES that the Federal Government National Health and Medical Research Council is the appropriate expert government body for water fluoridation;*
- 2 NOTES that there is appropriate Federal Government and State Government legislation that exists relating to fluoride in water.*

MOTION NO. 22

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to establish with high priority a Management Plan for dealing with the asbestos and unexploded ordnance (UXO) currently buried at Pinnaroo Point and now being exposed due to coastal erosion and sea level rise.

Officer's Comment

The City first started receiving reports of potential asbestos-containing material (ACM) at the Hillarys Animal Beach in November 2021, which was being exposed as a result of ongoing dunal erosion from wind and wave action.

The likely source of these fragments are the beach shacks that were located along this section of coastline between the 1950s and 1970s. The beach shacks were made mostly of asbestos sheeting and corrugated iron, and when they were demolished in the 1970s, some of the material was buried on-site.

The City takes reports of potential ACM seriously and has been actively monitoring and managing the Hillarys Dog Beach since 2021, by undertaking the following actions:

- Engaged a specialist contractor to carry out regular inspections and handpicking of asbestos. Approximately 2,800kgs of ACM has been removed from the site and the contractor has noted a downward trend in the volume of material being removed. The City will continue this action as required.
- Completing extensive rehabilitation works in 2023 to the dunes including the hydro mulching of approximately 6,000 square metres to stabilise the foreshore dune.
- Engaged a consultant to develop an ACM Preliminary Assessment. The objective of this assessment was to assess the nature and extent of ACM contamination throughout the surface and potential risk to relevant site users. Results from the assessment indicated that the asbestos fragments were generally bonded, weathered but in good condition. The risk to site users was considered low. Following this report, the City submitted a Form 1 'report of a known or suspected contaminated site' under the *Contaminated Sites Act* in 2023 to the Department of Water and Environmental Regulation (DWER).

The City received advice from the DWER on 13 February 2024 that although the quantities of ACM remain below the Department of Health's assessment levels for parks and public space land use, and that the subsequent risk to human health is low, it is recommended that an ongoing site management plan (OSMP) be prepared for the site in accordance with the appropriate guidelines. The DWER also recommended that that warning signage and temporary fencing be installed around the impacted area, which the City has now completed.

The City has engaged a consultant to develop the OSMP and providing updates to DWER on a regular basis. Actions arising from the OSMP will be implemented once approval is received from DWER.

It is not a requirement under the *Contaminated Sites Act 2003* to include Unexploded Ordnance (UXO) in the OSMP. The City manages UXOs at an operational level as issues arise.

Pinnaroo Point was used by allied aircraft for gunnery and bombing practice during WWII and has an 'other' occurrence risk category with a low risk of finding UXO on site. The definition for 'other' category related to UXO from the Australian Government includes:

"Defence records confirm that the area was used for military training but do not confirm that the site was used for live firing. UXO or explosive ordnance fragments / components have not been recovered from the site. Defence opinion is that it would be inappropriate to assess as either slight, substantial or remote."

The City has a 'Finding Unexploded Ordnance Items' process which is provided to City staff or Contractors in the event of finding UXO within UXO areas.

Officer's Recommendation

That Council, in relation to Motion No. 22 carried at the Annual General Meeting of Electors:

- 1 *NOTES the City has engaged a consultant to develop an Ongoing Site Management Plan for managing asbestos containing material at Hillarys Dog Beach, in accordance with Department of Water and Environmental Regulations recommendation and requirements;*
- 2 *NOTES that Unexploded Ordnance is not covered under the Contaminated Sites Act 2003 and therefore will not be included in an Ongoing Site Management Plan for Hillarys Dog Beach.*

MOTION NO. 23

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer (CEO) to:

- 1 **make public the CEO's current Key Performance Indicators (KPI's) within three months of the AGM of Electors' meeting;**
- 2 **to change the City's policy to ensure that all future contracts signed by the current, and future, CEO's of the City of Joondalup include publicly provided and accessible KPIs within one month of signing of the said contract.**

Officer's Comment

This motion is about an issue being addressed in the State Government's current local government reform process administered by the Department of Local Government, Sport and Cultural Industries.

The proposed reforms (from the *Local Government Review Panel Final Report* dated May 2020 and the current proposals as of March 2024) include that the State Government is proposing to introduce requirements to publish:

- the CEO's performance criteria
- the report on the CEO's performance against that criteria
- the CEO's response to that report on their performance.

At its meeting held on 15 February 2022 (CJ012-02/22 refers), Council endorsed the City of Joondalup submission in response to the Department's invitation to comment on its proposed reforms of the *Local Government Act 1995*.

This submission included the following under 3.5 Chief Executive Officer Key Performance Indicators (KPIs) be published:

Current Requirements

- It is a requirement of the *Local Government Act 1995* that CEO performance reviews are conducted annually.
- The Model Standards for CEO recruitment and selection, performance review and termination require that a local government must review the performance of the CEO against contractual performance criteria.
- Additional performance criteria can be used for performance review by agreement between both parties.

Proposed Reforms

- To provide for minimum transparency, it is proposed to mandate that the KPIs agreed as performance metrics for CEOs:
 - be published in council meeting minutes as soon as they are agreed prior to (before the start of the annual period)
 - the KPIs and the results be published in the minutes of the performance review meeting (at the end of the period)
 - the CEO has a right to provide written comments to be published alongside the KPIs and results to provide context as may be appropriate (for instance, the impact of events in that year that may have influenced the results against KPIs).

At the time of receiving the reform submission the City did not have a position in relation to proposal 3.5 and included the following comments:

As WALGA has provided, in principle, this proposal has some merit and would be particularly effective if all CEO KPIs consistently reflect Strategic Community Plans and Corporate Business Plans of Local Governments, together with KPIs reflective of the CEO's statutory functions under Section 5.41 of the Act. This approach would inform the community of the CEO's performance related to the strategic direction and operational function of the Local Government.

In practice, the drafting of statutory provisions will require sensitive consideration of certain KPIs ie those relating to issues affecting the workplace or identified risk-based concerns, to reflect the way Audit Committees currently deal with some internal control, risk and legislative compliance issues confidentially. This approach will protect the interests of Local Governments and other parties associated with such KPIs. It would be prudent for exemptions to be provided, based on matters of confidentiality.

The proposed reforms and recent Act amendments signal a clear intent to permit closer community involvement and scrutiny of Local Government. However, negative consequences are likely if Local Government Council's responsibility as the employing authority of the CEO became blurred due to perceived community entitlement to comment, question and influence KPIs and the performance review process.

Additionally, the publication of CEO KPI's will elevate this employment position to a high degree of public scrutiny seldom evident in the public or private sector, if at all. It is worth investigating whether the proposed reforms considered whether this factor could impact on the recruitment of CEO's, particularly from outside the Local Government sector.

The results of performance reviews should continue to be confidential information between the employer and employee and should not be published and remain within the confidential human resource records of the organisation.

The Council resolved to endorse the City of Joondalup submission provided as Attachment 2 to Report CJ012-02/22 (subject to the inclusion of comments relating to the Theme – Stronger Local Democracy and Community Engagement) including a position that it:

- "1 CONDITIONALLY SUPPORT the proposed reforms related to 3.5 Chief Executive Officer Key Performance Indicators (KPIs) be published that are consistent with the strategic direction and operational function of the Local Government, subject to exemptions for publishing KPIs of a confidential or personal nature.*
- 2 DOES NOT SUPPORT the results of Performance Reviews of CEOs being published.*
- 3 REQUEST the Minister to give consideration to the provision of mandatory training and development programs to assist Elected Members in performance management."*

The timing of the proposed reform is not known – or whether it will become a legislative requirement.

The City's past and current practice is to maintain confidentiality of CEO KPIs.

Most local governments do not make CEO KPIs publicly available, including City of Wanneroo and City of Stirling.

Regarding the publication of current and future CEO's employment contracts, the Administration does not support the publication of these contracts, in whole or in part, as they form a confidential agreement between the CEO and the Council.

It is recommended that the City await the proposed reforms in relation to publication of CEO KPIs before considering further action.

Officer's Recommendation

That Council, in relation to Motion No. 23 carried at the Annual General Meeting of Electors:

- 1 *DOES NOT SUPPORT the publication of the CEO's current Key Performance Indicators (KPI's) within three months of the AGM of Electors' meeting provided they have been endorsed by Council;*
- 2 *DOES NOT SUPPORT the request to change the City's policy to ensure that all future contracts signed by the current, and future, CEO's of the City of Joondalup include publicly provided and accessible KPIs within one month of signing of the said contract.*

MOTION NO. 24

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to NOT REQUIRE members of the public when speaking at a public meeting to state their full address, and to provide a system where this information can be verified prior to the commencement of the meeting, such as a confidential written register.

Officer's Comment

The requirement for a member of public to state their name and full address when asking a question during public question time and/or making a public statement is provided for:

- in the procedures for the conduct of Briefing Sessions adopted at the Council Meeting held on 20 September 2022.
- in the City's *Meeting Procedures Local Law 2013* (clause 5.7) for Council meetings.

The *City of Joondalup Meeting Procedures Local Law 2013*, at clause 5.7(3) provides that:

"5.7 Other procedures for question time for the public

- (3) *A member of the public wanting to ask a question during public question time must first state their name and full address."*

The *City of Joondalup Meeting Procedures Local Law 2013*, at clause 5.8(3) also provides that:

"5.8 Public statement time

- (3) *A member of the public wanting to make a public statement must first state their name and full address."*

At its meeting held on 13 December 2022 (CJ218-12/22 refers), Council considered a report with regard to the *City of Joondalup Meeting Procedures Local Law 2013* review. When considering this item, Council resolved as follows:

"That Council:

- 1 *NOTES the current review of the City of Joondalup Meeting Procedures Local Law 2013;*
- 2 *AGREES to make no changes to the City of Joondalup Meeting Procedures Local Law 2013, given the impending Local Government reforms, in particular the standardisation of meeting procedures."*

As part of the State Government's proposed reforms to the *Local Government Act 1995*, changes will include standardising council and committee meeting procedures. The Department of Local Government, Sport and Cultural Industries (DLGSC) issued a consultation paper on 28 February 2024, and it is intended that the new standard meeting procedures will apply to all council and committee meetings held by local governments.

The new standardised requirements are proposed to require that a member of the public only provide their name and suburb/locality (and not any other information) before asking a question.

At the Council meeting held on 23 April 2024, Council endorsed the City of Joondalup submission in response to the Department of Local Government's invitation to comment on the proposed standardised meeting procedures. That submission included a comment that *"the City is supportive of the requirement for members of the public to provide their name and suburb/locality only (not any other information) before asking a question."*

Given the proposed changes to the *Local Government Act 1995* and Regulations, it is not proposed to make any changes to the City's *Meeting Procedures Local Law 2013* at this stage.

Officer's Recommendation

That Council, in relation to Motion No. 24 carried at the Annual General Meeting of Electors:

- 1 *NOTES the requirements under the City's Meeting Procedures Local Law 2013 for a member of the public to state their name and full address when asking a public question and/or making a public statement;*
- 2 *NOTES the proposed changes to the Local Government Act 1995 and Regulations to require that a member of the public only provide their name and suburb/locality before asking a question.*

MOTION NO. 25

MOVED L Crawford, SECONDED P Navas-Parejo that the Electors of the City of Joondalup REQUEST that Council instructs the City to consider investing in a training program on 'Electromagnetic Fields Awareness' for key members of the City of Joondalup, particularly those involved in Planning and Development, Council Members and the Mayor. This would increase the City's knowledge base on current safety issues and how best to mitigate them, thereby minimising future harms and possibly even litigation.

Officer's Comment

Electromagnetic Emissions (EME) standards are set, controlled, and regulated by the *Australian Radiation Protection and Nuclear Safety Agency (ARPANSA)* and the *Australian Communication and Media Authority (ACMA)*, which are federal government agencies responsible for protecting the health and safety of people, and the environment, from the effects of radiation.

The role of local government with respect to telecommunications infrastructure is limited to making a planning decision or a recommendation on a proposal (depending on the proposed location), noting that defined 'low impact' telecommunication infrastructure is exempt from the requirement to obtain planning approval under Federal legislation.

Both the City's *Telecommunications Infrastructure Local Planning Policy* and the State Government's *State Planning Policy 5.2 Telecommunications Infrastructure* recognise that radiofrequency electromagnetic energy (RF EME) is a matter governed by Federal legislation and is therefore not within the scope of state or local governments to address potential health or safety concerns though planning decisions on applications for this infrastructure.

As the City does not control or influence matters related to RF EME, it is not considered appropriate to invest resources in training key staff or Elected Members on electromagnetic fields awareness as no applicable benefit could be gained from such training given the City has no role in these matters.

Officer's Recommendation

That Council, in relation to Motion No. 25 carried at the Annual General Meeting of Electors:

- 1 *DOES NOT SUPPORT the request to invest in a training program on 'Electromagnetic Fields Awareness' as the local government does not control, or influence matters related to radiofrequency electromagnetic energy.*

MOTION NO. 26

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to establish a Public Notification Plan that deals with Algal Bloom outbreaks that recently closed Mullaloo Beach.

Officer's Comment

The City supports a number of State Government agencies in responding to water quality issues such as those that have occurred at Mullaloo Beach in early 2024.

The Department of Biodiversity, Conservation and Attractions (DBCA), the Department of Water and Environmental Regulation (DWER), the Department of Health (DoH) and the City of Joondalup (the City) are working together to investigate and respond to community concerns of regular visible biological materials/plumes in the water, including identifying any potential public health risks.

The DBCA are responsible for managing the Marmion Marine Park; the DWER are the relevant regulatory body that includes the Pollution Response Unit and Phytoplankton Ecology Unit; the DoH are responsible for providing expert guidance on public health risks; and the City is a support agency assisting with water sampling and the installation of signage when requested by the DoH.

The City has developed internal procedures that includes the installation of warning signage if required. These arrangements are in consultation with the relevant State Government agencies and includes procedures in the event action is required after typical business hours, such as on weekends.

Any public notifications are under the guidance of the relevant State Government agencies. It is important that the messaging the City provides is consistent with the information that these State Government agencies provide and publicly release.

Officer's Recommendation

That Council, in relation to Motion No. 26 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the City supports a number of State Government agencies in responding to water quality issues such as those that have occurred at Mullaloo Beach in early 2024 and remains in regular communication with these relevant expert State Government agencies;*
- 2 *NOTES that the City has established procedures to communicate to the public and erect warning signage and undertake other actions when directed by relevant State Government agencies.*

MOTION NO. 27

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council:

- 1 **ENSURES that any rates in the dollar rise is limited to no more than 0.1% in the coming year, due to the financial impact of interest rate rises and the general cost of living increases on the community;**
- 2 **NOTES that any increases in Gross Rental Value (GRV) will have an increase in the Council rates required to be paid by ratepayers, and in the event that the rate in the dollar is also increased, it is likely to put enormous pressure on families who make up the largest ratepayer group within the City.**

Officer's Comment

Council determines the extent of rates revenue required in a given year as part of the annual budget consideration for that year. Council takes into account multiple factors, including the expected cost of services and facilities to be provided to the community, other sources of funding, community expectations, as well as the current economic environment. Proposed differential rates for any budget year are published for community comment before Council makes a final determination of rating levels for that year.

Gross Rental Values are revalued by the Valuer-General on a three-yearly cycle. The last review occurred in the 2022-23 year. Revaluations to property GRVs are not expected in 2024 -25, although changes to individual GRVs can occur at any time as a consequence of additions, demolitions renovations and the like.

In revaluation years, where there are significant rises in GRVs across the board, Council typically sets the rate/dollar at a level that mitigates the impact of the valuation rise.

Officer's Recommendation

That Council, in relation to Motion No. 27 carried at the Annual General Meeting of Electors:

- 1 *NOTES that rates requirements for 2024-25 will follow due consideration of budget requirements for services, facilities and projects to be provided in 2024-25;*
- 2 *NOTES that any proposal to levy differential rates in 2024-25 will be issued for public comment, which Council must consider prior to any decision to levy rates;*
- 3 *NOTES that 2024-25 is not a GRV revaluation year.*

MOTION NO. 28

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City to prepare and publish the Agenda for the Briefing Session at least five full days prior to the Briefing Session meeting to allow residents and ratepayers sufficient opportunity to read it and prepare deputations.

Officer's Comment

This elector's motion is similar to an elector's motion raised at the Annual General Meeting of Electors held on 4 December 2018 and 23 March 2021.

When considering this motion at its meeting held on 19 February 2019 (CJ008-02/19 refers), Council resolved, in part, as follows:

"That Council:

7 in relation to Motion No. 6 carried at the Annual General Meeting of Electors:

7.2 DOES NOT SUPPORT all agendas being published seven days before a scheduled meeting date of a Briefing Session, Council Meeting, Committee Meeting or electors' meeting in view of the legislative provisions in place and the internal agenda setting processes at the City."

When considering this motion at its meeting held on 18 May 2021 (CJ063-05/21 refers), Council resolved as follows:

"That Council

12 in relation to Motion No. 11 carried at the Annual General Meeting of Electors, REAFFIRMS its decision of 19 February 2019 (CJ088-02/19 refers) and that the current publication timeframes of Briefing Session agendas is sufficient to support:

12.1 the decision-making responsibilities of Council;

12.2 the legislative provisions in place in regard to distribution and publishing of agenda material;

12.3 the internal agenda setting processes used at the City."

The availability of agendas for meetings is governed by the *Local Government Act 1995*, the *Local Government (Administration) Regulations 1996* and the *City's Meeting Procedures Local Law 2013*. The Act provides that , *"the CEO is to convene an ordinary meeting by giving each council members at least 72 hours' notice of the date, time and place of the meeting and an agenda for the meeting."* There are no legislative requirements around the time limit for the availability of a Briefing Session agendas and Briefing Sessions are not legislated to conform to any requirements, although Council has adopted certain procedures with regard to their operation.

The availability of particular agendas at the City is cognisant of the above requirements, and also in view of the robust internal administrative processes in place to prepare numerous reports; review content and information; and obtain the necessary approval processes, before an agenda is released and published.

It should be noted that due to the City's decision-making processes for Briefing Sessions and Council meetings, most reports presented to a Council meeting are included in the Briefing Session Agenda, which is traditionally released on the Friday prior to a meeting. It should also be noted that at its meeting held on 28 November 2023 (CJ229-11/23 refers), Council adopted its meeting dates and times for the forthcoming year with Briefing Sessions to be held in Week 2 of the month, and Council meeting to generally be held in Week 4 of the month. This means there is generally 2.5 weeks between releasing the Briefing Session agenda and the Council meeting.

In addition, deputations are not the only mechanism for which community members can engage with the Council and Elected Members on agenda matters including public question time, public statement time, petitions and direct contact with individual Elected Members.

In view of this, it is considered that the current timeframes around the release of Briefing Session agendas is considered sufficient in view of the City's legislative responsibilities and internal agenda setting processes.

Officer's Recommendation

That Council, in relation to Motion No. 28 carried at the Annual General Meeting of Electors REAFFIRMS its decision of 19 February 2019 (CJ088-02/19 refers) and 18 May 2021 (CJ063-05/21 refers) that the current publication timeframes of Briefing Session agendas is sufficient to support:

- 1 *the decision-making responsibilities of Council;*
- 2 *the legislative provisions in place, with regard to distribution and publishing of agenda material;*
- 3 *the internal agenda setting processes used at the City.*

MOTION NO. 29

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City to expand the Waterwise verge garden program to:

- 1 **ENCOURAGE people to reduce water usage and plant native verge gardens;**
- 2 **INVESTIGATE providing an annual selection of waterwise plants free to the community (as is undertaken in the Town of Victoria Park).**

Officer's Comment

This elector's motion is similar to the motion raised at the Annual General Meeting of Electors held on 23 May 2023 (CJ067-05/23 refers), where Council resolved as follows:

- "1 *DOES NOT SUPPORT the expansion of the Waterwise Verge Rebate Program in 2023/24;*

- 2 *NOTES that as part of the City's Environmental Education Program that the City is planning a native plant giveaway event for residents in 2023/24, subject to budget approval;*
- 3 *NOTES that the City will consider implementing the Waterwise Verge Rebate Program in 2024/25, subject to resourcing and budget approval."*

The City implemented a Waterwise Verge Rebate Program in 2022/23 for 100 participants and included:

- a \$250 voucher for a selected nursery or garden centre to purchase native plants and mulch
- 20 native plants provided during a plant giveaway event in May 2023
- a pack of everlasting seeds
- signage for each garden to raise awareness about waterwise verge gardens
- invitations to 2 x Waterwise Verge Garden workshops.

A Waterwise Verge Garden competition was also run as part of the program to acknowledge and celebrate residents with existing waterwise verges.

The Waterwise Verge Rebate Program was eligible for funding through the Water Corporation's Waterwise Greening Scheme (up to \$10,000) and an additional \$10,000 funding for the City being awarded Platinum Waterwise Council of the year in 2022. The total expenditure for the Waterwise Verge Rebate Program was \$36,656 with co-funding of \$18,050 from the Waterwise Greening Scheme.

Whilst it is acknowledged that the Waterwise Verge Rebate Program delivered much benefit to the community and the environment, it must be noted that the implementation of the initiative involved substantial amount of officer time. This includes development of promotional materials and supporting documentation, liaison with suppliers as well as administration of the program. The estimated officer time to develop and implement the program is 2-3 months.

The City is implementing a Native Plant Giveaway initiative in 2023/24 at a cost of \$20,000 with up to \$10,000 co-funding from the Waterwise Greening Scheme. The initiative allows 750 residents in the City of Joondalup with a garden, verge, courtyard or suitable balcony to apply for:

- ten free native seedlings through the choice of five bespoke plant packs including a waterwise verge garden pack
- resources on waterwise and habitat gardening
- a habitat tree seedling, depending on suitability of property and availability
- support and advice from an Environmental Project Officer.

The Native Plant Giveaway initiative will result in 7,500 native waterwise seedlings plus 750 habitat trees being planted on residential properties to create waterwise native gardens, wildlife friendly gardens and verges that connect, cool and green our neighbourhoods.

It is aimed to deliver the Native Plant Giveaway again in 2024/25 to further improve biodiversity and canopy cover across the City with the cost of \$20,000, subject to budget approval. The City would also apply for co-funding of \$10,000 from the Waterwise Greening Scheme to contribute towards the costs. The City encourages residents to establish waterwise native gardens through the ongoing Environmental Education Program via mediums such as social media, website, e-newsletters and biodiversity workshops.

Other local governments also offer free native plant giveaways annually. The Town of Victoria Park deliver an annual Urban Forest at Home plant giveaway offering residents free tree seedlings and shrubs to increase biodiversity and native fauna habitat on private property. The Town of Victoria Park will provide 952 native trees and 7,650 native plants to a total of 1,275 residents in 2024 for home planting through their Urban Forest at Home program.

Due to a high level of environmental projects being planned for 2023/24 and 2024/25, the City does not have the capacity to implement the Waterwise Verge Rebate Program in addition to the Native Plant Giveaway without additional budget and resourcing being made available.

The City will consider implementing the Waterwise Verge Rebate Program in 2025/26, subject to resourcing and budget approval.

Officer's Recommendation

That Council, in relation to Motion No. 29 carried at the Annual General Meeting of Electors:

1. *DOES NOT SUPPORT the expansion of the Waterwise Verge Rebate Program due to the increased resources required.*
2. *NOTES that the City is implementing a Native Plant Giveaway initiative in 2023/24.*
3. *NOTES that the City is aiming to implement a Native Plant Giveaway initiative in 2024/25.*
4. *NOTES that the City will consider implementing the Waterwise Verge Rebate Program in 2025/26, subject to resourcing and budget approval.*

MOTION NO. 30

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer that the Council and Administration should generally not go on overseas trips at the expense of the ratepayers of the City of Joondalup.

Officer's Comment

This motion is similar to Motion No. 35 considered at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"35 In relation to Motion No. 35 carried at the Annual General Meeting of Electors:

- 35.1 *NOTES the request not to support Elected Members' overseas travel and amend the Elected Members' Entitlements Policy (to remove provisions related to overseas travel; or implement a No Overseas Travel Policy."*

The following information is considered relevant to the elector's motion:

Strategic Community Plan 2032

The Council recently endorsed its *Strategic Community Plan 2032* following extensive community consultation, retaining its vision to be A global City: bold, creative and prosperous. *Joondalup 2032* specifically states that the City in 2032 desires to be internationally connected — a global facing city, with local amenity, and a powerful sense of community.

Joondalup 2032's economic goal is that “we are a global facing city with a prosperous and resilient economy. Our City is home to diverse industries that generate a wide range of local job opportunities. We encourage creativity and innovation, and we support opportunities to build the City’s brand as a popular business and tourism destination.” To deliver on this goal the following outcomes are specified:

- Prosperous and local - you feel supported to grow your business in the City.
- Innovative and confident - you are attracted to the City’s unique characteristics and potential and feel confident in investing.
- Appealing and welcoming - you welcome residents, and local and international visitors to the City.

Further, the City actively pursues global engagement opportunities and has done so since the development of the *Economic Development Strategy* in 2014 and the *International Economic Development Activities Plan* in 2017.

Expanding Horizons

The existing *Expanding Horizons Economic Development Strategy*, adopted by Council in 2014, supports the achievement of the City’s vision with seven themes as follows:

- Business Growth and Innovation.
- Employment Skills and Development.
- Business Clusters and Investment.
- City and Regional Infrastructure.
- Global City.
- Digital City.
- Destination City.

The Global City and Destination City themes relate directly to international economic development, while the Digital City theme acts as a delivery mechanism to enable efficient digital engagement and commerce in the international marketplace.

At the Council meeting held on 27 February 2024 (CJ010-02/24 refers), the Council endorsed a new draft Expanding Horizons 2033 Economic Development Strategy, to be advertised for public consultation for a period of 21 days.

The new strategy is aligned with the City of Joondalup *Strategic Community Plan 2022-2032* and outlines the following three key priorities:

- 1 Creating a high-performing City Centre and precincts.
- 2 Establishing a global-facing innovation ecosystem.
- 3 Empowering businesses and the community.

Following community consultation, a final draft will be presented to Council for adoption.

International Economic Development Activities Plan

The City developed the International Economic Development Activities Plan (IEDAP) in 2017 to identify opportunities to generate economic outcomes for the City that are aligned with industry strengths and growth opportunities. The overarching purpose of the International Economic Development Activities Plan is to provide clear guidance to the City of Joondalup on opportunities to facilitate international relationships that will lead to the establishment of Joondalup as a 'Global City' (a strategic thematic area identified in Expanding Horizons) based around the development of mutually beneficial relationships and outcomes:

- 1 Export development - To assist local businesses to build their knowledge, capability and capacity to grow their business through exporting products and services to identified target markets.
- 2 Investment attraction - To attract investment to Joondalup that will help to facilitate expansion of the local economy.
- 3 International education - Enhance the experience of international students when visiting Joondalup and explore opportunities to leverage off their time spent in the City.
- 4 Profile raising - Raise the profile of Joondalup as an international business destination by promoting the City's capabilities and success stories.
- 5 Infrastructure development - Facilitate the development of catalytic infrastructure required to enhance Joondalup's reputation as an international business destination.

The IEDAP recommends that the City builds strategic relationships with several target markets aligning to Joondalup's economic strengths, cultural alignment, educational links, established relationships and presence. The recommended markets to explore opportunities include China, India, Japan, South Korea, Southeast Asia UK, Africa and USA.

The IEDAP provides a framework for the City to focus effort and resources effectively in order to attract international investment and assist businesses located in the City to diversify into the international marketplace. Overseas travel is only one of the approaches to achieve these relationships and outcomes.

Strategic Position Statements

The Council has adopted the following Strategic Position Statements (CJ185-12/20 refers) related to international activity:

- *International Recognition and Innovation*

The City should build upon its international recognition for liveability by continuing to demonstrate and embrace innovation and best practice in all fields of service, which are comparable on a global scale.

- *Economic Development International Activity*

The City supports the pursuance of international economic development activities that seek to achieve:

- *local economic growth*
- *investment attraction*
- *export growth in local goods and services*
- *return on investment.*

The City's role in achieving the above should include:

- *facilitating linkages between local businesses and industries to international markets*
- *providing financial contributions to pilot programs and initiatives with partner organisations that support international investment within the City*
- *leveraging current international sister city relationships, for example Jinan, China*
- *delivering a focused economic development international activities program to support the economic growth of the City of Joondalup for the benefit of ratepayers, Joondalup businesses, and other key stakeholders.*

Activities should also align with the specialist themes contained within the City's Economic Development Strategy, namely: Global City, Destination City and Digital City.

International Economic Development Outcomes

The City ensures that, in accordance with the Council's Policy, any requests for overseas travel are submitted to the Council for endorsement, and this will incorporate what is anticipated to be achieved. It is also usual practice to provide a subsequent report on the outcomes of the travel to demonstrate return on the investment.

Overseas travel is not undertaken on a regular basis by Elected Members, however, the following latest delegation reports demonstrate how the Council assesses the outcomes of travel undertaken:

Invest and Trade WA Mission to India

The Council, at its meeting held on 28 June 2022 (CJ105-06/22 refers), approved City participation by a City delegation in the WA Government's Invest and Trade WA Mission to India in July 2022, to meet key Indian industry and government representatives to benefit economic development in the City of Joondalup. The City's Deputy Mayor at the time, Cr Hamilton-Prime, participated in the delegation.

The report detailed that the reasons for engaging in this activity included the following:

- Promote Joondalup as a Global City.
- Support Joondalup businesses to explore their export potential.
- Support stakeholders, such as Edith Cowan University and North Metropolitan TAFE, who also attended the Mission.

A report detailing the outcomes of attendance on the trade mission was presented to Council at its meeting held on 20 September 2022 (CJ153-09/22 refers) which provided that by going on the Mission, the City was able to achieve the following:

- Acquire an additional 47 contacts to pursue public/private investment into Joondalup.
- Expand on existing networks and partnerships with Joondalup stakeholders (including North Metropolitan TAFE and Edith Cowan University) who also attended the Mission.
- Confirmation of partnership in the Joondalup Innovation Challenge 2022 by Indian institutions Amity University, WeSchool and Pandit Deendayal Energy University. 20 Indian students represented these institutions in the 2022 Challenge. This has allowed for the international growth of the Joondalup Innovation Challenge while building Joondalup's reputation as a destination for international students and innovation.

- Media coverage showcasing Joondalup's participation in the Mission to India has positioned Joondalup as a destination for international education and Investment.
- Build new connections in India to benefit the Joondalup community across a range of sectors including education and medical.
- Initiate discussions with key investors about opportunities in the City of Joondalup.
- Build the City's profile to support advocacy in India for our community.
- Post Mission briefing held in Joondalup attracting over 70 stakeholders and business to discuss the business connections and benefits from the mission.

The cost of attending the Mission was considered to represent good value for money, as the cost of the achievements described would likely have been higher if they were pursued on an individual basis without the support of the State Government and without face-to-face interactions.

Delegation to Jinan and Huzhou

The Council, at its meeting held on 11 December 2018 (CJ232-12/18 refers) accepted invitations from the Jinan Municipal People's Government the City of Huzhou to send a delegation to formalise introductions between the Mayor of Joondalup and the Mayors of Jinan and Huzhou, and to meet with key government and industry representatives to advance economic exchange opportunities.

The delegation comprised representatives of the City, Australian Medical Association, Bethanie, Black Swan Health, North Metropolitan TAFE, and National Electrical and Communications Association.

A report detailing the outcomes of attendance on the delegation was presented to Council at its meeting held on 25 June 2019 (CJ079-06/19refers) which provided that by going on the trade delegation, the City was able to achieve the following:

- Develop a three-year Cooperation and Exchange Plan between Jinan, China and the City of Joondalup, Australia.
- Sign a Letter of intent between HuZhou City, Zhejiang province of the People's Republic of China and the City of Joondalup on the establishment of friendly exchange relationships.
- Assist the City's key stakeholders to increase international trade with businesses in China, building upon the success of previous delegations. A range of trade outcomes is detailed within the report.

Elected Members' Entitlements Policy

The Council's Elected Members' Entitlements Policy (Part 8) provides for Elected Member attendance at Overseas Conferences, as follows:

- a An Elected Member may, with Council approval, attend an overseas conference. The Council report must include details of the anticipated benefits to the City and the Elected Member in attending the requested overseas conference. The specific Council resolution must state the authorised travel period that would include sufficient time to travel to and from the conference location (including a reasonable acclimatisation period) and attendance at the conference; and*

- b An Elected Member may attend an overseas conference if the Elected Member has sufficient funds in their annual Conference and Training Expense Allocation to meet the costs. Where there are insufficient funds to meet the cost of the registered overseas Conference or Training in the Elected Member's Conference and Training Expense Allocation, Council approval must be obtained before costs are incurred in keeping with 7.8(d) above or the Elected Member agrees to meet the additional costs personally.*
- c Air travel overseas may be by Business Class, except where an Elected Member chooses to travel at a cheaper rate. If Business Class is not available, Economy Class is to be used.*
- d Cash advances are payable for overseas conferences (see 7.6.8).*

The City has a global outlook, delivering initiatives to empower local businesses to access global markets, encourage the exchange of knowledge and enable international trade and investment in the City, reflected in the Council adopted Plans and Strategies.

Representing one of the Asia-Pacific's most unique and exciting business locations, the City and its Joondalup Learning Precinct partners have demonstrated their commitment to creating a vibrant City encouraging and attracting a variety of investors and visitors from around the world, including Sister City, Jinan, China.

It is considered that the policy provision related to approval for overseas travel remain, as it provides transparency and accountability to proposed programs.

Attendance at overseas conferences/training/seminars for City Officers

The City has a protocol that deals with interstate and overseas travel at conferences, seminars and training. The protocol provides that any international travel for City Officers is to be determined on a case-by-case basis (full business case required) and approved by the CEO.

Within one month upon return from any conference and training events as detailed within the protocol, the attending employee is required to prepare a report on their attendance and benefits to be provided to the CEO.

In recent times, no staff members have undertaken international travel unless part of a Council endorsed Sister City delegation.

Officer's Recommendation

That Council, in relation to Motion No. 30 carried at the Annual General Meeting of Electors:

- 1 NOTES the request that the Council and Administration should generally not go on overseas trips at the expense of the ratepayers of the City of Joondalup.*
- 2. NOTES the benefits of appropriate overseas engagements including activities that seek to achieve local economic growth, investment and attraction, export growth in local goods and services, and return on investment.*
- 3 DOES NOT SUPPORT:*
 - 3.1 An amendment to the Elected Members' Entitlements Policy to remove Part 8 relating to Overseas Conferences, noting that Council must endorse proposed travel; and*
 - 3.2 Revocation of the Council positions related to International Recognition and Innovation; Economic Development International Activity.*

MOTION NO. 31

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to report in all future Annual Reports all sources of income received by Council Members that are as a consequence of any of the following:

- 1 appointments to Regional Councils;**
- 2 appointments to Development Assessment Panels;**
- 3 appointments to the Western Australian Local Government Association;**
- 4 appointments to any committees, boards, panels or any other body which are as a consequence of or in relation to a person holding the office of Council Member.**

Officer's Comment

This elector's motion is similar Motion No. 50 raised at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"In relation to Motion No 50. Carried at the Annual General Meeting of Electors:

50.1 REAFFIRMS its decision of 16 August 2022 (CJ128-08/22 refers) regarding the inclusion of additional disclosures in the City's Annual Financial Report and Annual Report pertaining to compensation earned by Elected Members in performing roles as representatives of the City."

At the Council meeting held on 16 August 2022 (CJ128-08/22 refers) a report was considered (as a result of a Notice of Motion – C010-02/22 refers) examining similar matters, and which the Council has established a position in relation to such disclosures.

The Council, at its August 2022 meeting considered, amongst other matters, *"the potential benefits and issues involved for the future Annual Financial Statements and Annual Reports to contain additional detailed information on remuneration, allowances and expense reimbursements received by Elected Members in performing roles held with Mindarie Regional Council, Tamala Park Regional Council, WALGA and Joint Development Assessment Panel, such that there is clarity on the full compensation received by Elected Members in the performance of their roles."*

The August 2022 report to Council provided the following:

"Sections 5.98, 5.98A, 5.99 and 5.99A of the Local Government Act 1995 as well as Part 8 of the Local Government (Administration) Regulations 1996 provide for councillors (such as Elected Members, including mayor and deputy mayor) of a local government to be paid certain fees, expenses or allowances in performance of various duties as councillors. A local government cannot make any payments to anyone who serves in this capacity unless it is in accordance with these legislative provisions.

Regulation 44 of the Local Government (Financial Management) Regulations 1996 prescribe that a local government's annual financial report must include the total of each category of fees, expenses or allowance paid to each council member.

The Local Government Act 1995 defines a councillor as "...a person who holds the office of councillor on a council..."

Reporting of fees, expenses or allowances in the City's Annual Financial Report under Regulation 44 is therefore only in respect of such amounts paid to those who hold the office of councillor of the City of Joondalup.

The City complies with this reporting requirement each year, which is subject to audit by the Office of the Auditor-General (OAG), with the most recent disclosure of such payments to councillors included in the City's audited Annual Financial Report for the year ended 30 June 2021.

The Local Government (Financial Management) Regulations 1996 (FMR) require a local government to comply with the prescriptions of the Australian Accounting Standards (AAS) to the extent not inconsistent with the Regulations. The AAS are issued by the Australian Accounting Standards Board with a number of these applicable to the City's annual financial reporting.

AASB 124 Related Party Disclosures requires a reporting entity to include the following disclosure in its annual financial statements:

Key Management Personnel compensation in total and for each of the following categories:

- (a) short-term employee benefits;*
- (b) post-employment benefits;*
- (c) other long-term benefits;*
- (d) termination benefits; and*
- (e) share-based payment.*

AASB 124 defines Key Management Personnel (KMP) as "those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity."

In the case of a local government, KMP would therefore comprise councillors and senior staff (executives), as indicated in the guidance provided within AASB 124. Since the accounting standard became applicable, the City has reported related party disclosures for KMP on this same basis. This approach has been confirmed in each annual financial audit.

Reporting of allowances paid to City of Joondalup councillors in the Annual Financial Report under Regulation 44 is deemed to satisfy the disclosure requirements under AASB 124 in respect of KMP who are Councillors. In respect of KMP who are Executives, the City discloses remuneration paid in aggregate to all such KMP for each of the categories required in AASB 124.

This financial reporting treatment has been accepted as complying with the requirements of AASB 124 by the City's auditors in each annual financial audit so far.

Current disclosure detail for KMP in Annual Financial Report.

<i>Allowances to Councillors</i>	<i>Remuneration to executives</i>
<i>Allowances reported individually for each councillor as required in Reg 44.</i>	<i>Reported cumulatively for all executives in line with AASB 124.</i>
<i>Reported for each allowance category, such as meeting fees, IT allowances, as required in Reg 44.</i>	<i>Reported for each category of remuneration prescribed in AASB 124.</i>
<i>Reported in notes to annual financial report.</i>	<i>Reported in notes to annual financial report.</i>

Current disclosure detail for KMP in Annual Report.

Allowances to Councillors	Remuneration to executives
<i>Reported individually for each councillors in addition to annual financial report.</i>	<i>Included by virtue of Annual Financial report forming part of Annual report.</i>
<i>Reported for each allowance category such as meeting fees, IT allowance, in addition to annual financial report.</i>	<i>Included by virtue of Annual Financial report forming part of Annual Report.</i>

The Council resolution (C010-02/22) is for the City to:

Prepare a report on the potential benefits and issues involved for the future Annual Financial Statements and Annual Reports to contain additional detailed information on:

- 1 remuneration, allowances and expense reimbursements received by Elected Members in performing roles held with Mindarie Regional Council, Tamala Park Regional Council, WALGA and Joint Development Assessment Panel, such that there is clarity on the full compensation received by Elected Members in the performance of their roles.

Under the Local Government Act 1995 a councillor is a person who holds the office of councillor on a council.

Under Regulation 44 of the FMR, the City's annual financial report discloses details of all allowances and other payments made to councillors of the City of Joondalup. No disclosure is made of any remuneration or payment that a councillor might derive from another source, which may include private employment, business or other activities, which has not been paid or incurred by the City towards them as Councillors.

The City is a member of two regional local governments, namely the Tamala Park Regional Council (TPRC) and Mindarie Regional Council (MRC). By virtue of being a member council, the City nominates two of its councillors to sit on the councils of each of these regional local governments on behalf of the City. These councillors, along with similarly nominated individuals from other member councils, constitute the council of each of these regional local governments, for the purposes of Regulation 44 of the FMR. Allowances and other payments made to the councillors of both MRC and TPRC are reported by both in their respective annual financial reports as required by the FMR as these individuals, as councillors of those local governments, are considered KMP of those entities.

Similarly, Elected Members of the City of Joondalup have been nominated by the Council to serve on the state council of the Western Australian Local Government Association (WALGA). WALGA is constituted under the Local Government Act 1995 and is the peak industry sector body representing the interests of member local governments in Western Australia. WALGA reports remuneration paid to members of its state council in aggregate in its annual financial report.

Joint Development Assessment Panels (JDAPs) are constituted by the WA State Government as independent decision-making bodies comprising technical experts and local government Elected Members to determine planning applications made under local and regional planning schemes. JDAPs service two or more local government districts. The City, as a member of JDAP, is required to nominate members who are appointed by the state Minister for Planning. Sitting fees and expenses reimbursements are paid to Elected Members of the City who sit on a JDAP.

Nominations of specific Elected Members to these entities arise from decisions of Council. Reports to Council that are the basis for Council decisions in this regard include information about the applicable allowances and other remuneration that are expected to be paid to the nominated individuals. This information is therefore considered by Council when making a decision to nominate an individual in this manner.

Disclosure in the Annual Financial Report and/or Annual Report of remuneration received by Elected Members from other roles/sources

The City's Annual Financial Report (AFR) presents the City's revenue and expenditure over a particular reporting period. This includes expenditure that the City incurs on allowances and other remuneration paid to Elected Members for their role as councillors, including meeting fees, IT allowances, training expenses, and reimbursements of allowable expenses incurred.

The AFR presents the financial statements, including the statement of comprehensive income (income statement), supported by the various notes where applicable. The AFR reports expenditure incurred by the City in the course of its operations, including remuneration paid to Elected Members in the performance of their roles as councillors of the City of Joondalup.

The City does not include, either in the financial statements or the notes, information pertaining to remuneration or other income that Elected Members may derive from sources outside of their roles as councillors of the City of Joondalup. This includes income from private employment, business interests, or investments.

This is for two related reasons:

- such remuneration is not earned by Elected Members from the performance of their roles as councillors of the City of Joondalup.*
- such remuneration earned by Elected Members has not been incurred by the City as a cost of its operations.*

Elected Members who perform roles as councillors of the Mindarie Regional Council or the Tamala Park Regional Council are nominated to those roles by the Council of the City of Joondalup and derive remuneration from those entities to perform those roles. However, those costs are not incurred by the City of Joondalup and, though Elected Members are nominated to those roles they are required to exercise their functions as councillors of those entities in those capacities and are therefore required to participate in decision-making at those entities to achieve the best outcomes for those entities, rather than for the City of Joondalup. This is similar to the corporate world, where individuals serving as directors of multiple organisations are still required to act in the best interests of each entity they serve, regardless of how that affects other organisations that they might be directors of.

Consequently, performance of an Elected Member in their role as a councillor of the City of Joondalup does not include their performance as a councillor of those regional councils or any other entity that they might serve, regardless of whether they were nominated to those roles by the City or not. Those entities are distinct from the City and performance of those roles is separate from the same individuals' performance as councillors of the City of Joondalup.

The Act and Regulations do not make stipulations about disclosures in the City's Annual Report of remuneration that Elected Members might derive from sources outside of their roles as councillors of the City of Joondalup. The City's Annual Report contains a variety of information pertaining to the City's operations, including financial results, governance, activities undertaken during the reporting period and other relevant information. While there is an expectation that information included in the City's Annual Report be accurate and relevant, this is not subject to external requirements such as Australian Accounting Standards and information in the City's Annual Report is not subject to audit, except for the audited financial information included in it through the Annual Financial Report.

Therefore, Council can choose to include information in the Annual Report over and above what is required by legislation, should this be considered necessary by Council to enhance understanding of the City's operations by users of the Annual Report, including the City of Joondalup community.

Broadly, information about Elected Members' income, other than remuneration derived from the City, is usually considered private and separate to the City's activities and, therefore, excluded from an Annual Report. Remuneration derived by Elected Members from entities on which they serve as Elected Members by virtue of being nominated by the City, can still be considered private as those entities are entirely separate from the City and, as noted earlier, performance of Elected Members in roles with those entities does not form part of the performance of their roles as councillors of the City."

The Council report provides further information regarding the Notice of Motion however, it is considered that the above excerpts are sufficient to address the intent of the elector's motion.

The Council at its August 2022 meeting resolved as follows:

"That Council:

- 1 NOTES that remuneration paid by the City to Key Management Personnel that are Elected Members is disclosed in the City's Annual Financial Report and Annual Report in the manner required by the Local Government (Financial Management) Regulations 1996;*
- 2 NOTES that legislation does not require disclosure of remuneration earned by Key Management Personnel that are Elected Members from sources other than the City of Joondalup in the City's Annual Financial Report or Annual Report;*
- 3 AGREES that remuneration earned by Key Management Personnel that are Elected Members from sources other than the City of Joondalup should not be disclosed in the City's Annual Report or Annual Financial Report;*
- 4 AGREES that the City's Annual Report should identify Key Management Personnel that are Elected Members who serve on Regional Councils, Joint Development Assessment Panels, or other entities to which they have been nominated, with the period of their service and should refer users of the Annual Report to those entities for details of remuneration paid by them to these Key Management Personnel;*
- 5 NOTES that remuneration paid by the City to Key Management Personnel who are not Elected Members is currently disclosed in the Annual Financial Report in aggregate in the manner required by AASB 124 Related Party Disclosures;*
- 6 NOTES that neither accounting standards nor legislation requires disclosure of individual remuneration of Key Management Personnel who are not Elected Members in the City's Annual Financial Report;*

- 7 *NOTES that individual remuneration of Key Management Personnel who are not Elected Members are not disclosed in the City's Annual Financial Report or Annual Report;*
- 8 *NOTES that the number and positions of Key Management Personnel who are not Elected Members are disclosed in the Annual Financial Report where aggregate remuneration is disclosed."*

With regard the elector's motion on income disclosure from other sources, the Council has, as a result of this resolution, established a position that remuneration earned by Key Management Personnel, that are Elected Members, from sources other than the City of Joondalup, should not be disclosed in the City's Annual Report or Annual Financial Report.

Should the Council consider that disclosure occur and be reported in the City's Annual Report a revocation motion will be required.

Officer's Recommendation

That Council, in relation to Motion No. 31 carried at the Annual General Meeting of Electors REAFFIRMS its decision of 16 August 2022 (CJ128-08/22 refers), and 23 May 2023 (CJ067-05/23 refers) regarding the inclusion of additional disclosures in the City's Annual Financial Report and Annual Report pertaining to compensation earned by Elected Members in performing roles as representatives of the City.

MOTION NO. 32

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to ensure that all administrative costs of the Special Area Rates (SARs) within the City of Joondalup, are passed onto the SARS in full, in addition to any operational costs which may already be charged to the SARs.

Officer's Comment

A Specified Area Rate (SAR) may be imposed under Section 6.37 of the *Local Government Act 1995* for the purpose of meeting the cost of providing a higher standard of landscaping, capital infrastructure, specific work, service or facility that the Council considers has benefited or will benefit the ratepayers and/or residents within the proposed specified area or that they have contributed or will contribute to the need for that higher standard, improvement, work, service or facility.

The City currently has four SARs in place at Iluka, Woodvale Waters, Harbour Rise and Burns Beach which are negotiated through the following representative bodies:

- Iluka Homeowner's Association Inc.
- Woodvale Waters Land Owners Association Inc.
- The Harbour Rise Association Inc.
- Burns Beach Residents' Association Inc.

Council adopted the *Specified Area Rating Policy* (last amended by Council CJ067-05/21 refers) which has the objective to provide guidance on the circumstance under which a SAR may be applied and the arrangements for the management and control of the SAR collected.

At the Policy Committee meetings held on 31 October 2022 and 7 November 2022, under the 'Request for Reports for Future Consideration' section, the following was requested by Cr Raftis:

"That the CEO undertake a review of the Specified Area Rating Council Policy with specific requests for the inclusion of:

- *A statement specifying that the service agreement and each annual service arrangement agreed with each specified area is to be made freely available on the City's website, noting that commercial in confidence information may be obfuscated.*
- *The recognition of all additional costs incurred in the delivery of the specified area rate service arrangement, including but not limited to, the additional City staff costs in managing the additional services delivered and opportunity costs such as the value of groundwater utilised that is in excess of the standard utilised in City parks and reserves."*

At the Policy Committee meeting held on 19 February 2024, a report was considered by the Committee under Item 8.9 Specified Area Rating Policy Review which detailed the following information:

Recognition of additional costs incurred in the delivery of the specified area rate agreement

The current management and administration of the SAR is estimated at approximately \$48,500, the cost of which is currently not recovered from the SAR collected. This estimated cost comprises of the following:

- Oversight of the maintenance contracts and management agreements.
- Attendance at meetings outside of normal working hours.
- Negotiation of landscaping upgrade projects with the representative property owners' groups, including plans, costing, tendering and construction contract administration.

If this cost was to be recouped, the City could consider apportioning a fee structure based on the landscaped areas within the specific boundaries of the specified area as detailed in the annual service review contract. The indicative costs per annum based on this apportionment are provided below:

SAR (Specified Area Rate)	Size (square metres)	Cost
Woodvale Waters	28,107	\$4,422
Harbour Rise	47,921	\$7,539
Iluka	143,778	\$22,618
Burns Beach	88,486	\$13,921

The Committee resolved that Item 8.9 - Specified Area Rating Council Policy Review BE REFERRED BACK to the Chief Executive Officer to undertake targeted consultation with the SAR representative groups on the proposed revised Policy and cost allocation model.

As the substance of this motion is currently under consideration, the motion is not supported.

Officer's Recommendation

That Council, in relation to Motion No. 32 carried at the Annual General Meeting of Electors:

- 1 *DOES NOT SUPPORT the motion to instruct the Chief Executive Officer to ensure that all administrative costs of the Special Area Rates (SARs) within the City of Joondalup, are passed onto the SARS in full, as the substance of the motion forms part of the current review of the policy which will be considered by Council at a future date.*

MOTION NO. 33

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to make available to the ratepayers, through providing in the agenda or minutes of Council Meetings (both Briefing and Ordinary), answers to all questions that are taken on notice during Council Meetings (both Briefing and Ordinary). This is to include questions raised by both ratepayers and Elected Members.

Officer's Comment

This motion is similar to Motion No. 45 considered at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"In relation to Motion No. 45 carried at the Annual General Meeting of Electors:

- 45.1 *NOTES the City prepares Briefing Notes, with responses to Elected Member's questions taken on notice at a Briefing Session, which are circulated to Elected Members only;*
- 45.2 *NOTES that should Council wish the Briefing Notes to be published for the public, the Council would need to amend the Procedures for Strategy Sessions, Briefing Sessions, Council/Committee meetings and Electronic meetings;*
- 45.3 *NOTES that it is not the City's practice to distribute to the public responses to Elected Member questions taken on notice and/or include in the Council Minutes."*

The following information is considered relevant to the elector's motion:

Briefing Sessions

Should a member of the public ask a question at a Briefing Session, and that question is taken on notice, the question appears in the Council Agenda, and then the question along with the response appears in the Council Minutes for that month.

Should an Elected Member ask a question at a Briefing Session, and that question is taken on notice, responses are provided to Elected Members via Briefing Session Notes. In accordance with the Procedures for Strategy Sessions, Briefing Sessions, Council/Committee meetings and Electronic meetings (the Procedures):

“a record shall be kept of all Briefing Sessions. As no decisions are made at a Briefing Sessions, the record need only be a general record of the items covered but shall record any disclosure of interests as declared by individuals. A copy of the record is to be forwarded to all Elected Members.”

Briefing Sessions are not formal meetings of the Council. As such, matters related to Briefing Sessions are procedural in nature and the Procedures adopted by the Council are at its discretion.

The City prepares Briefing Notes with responses to questions taken on notice, which are circulated to Elected Members. Should the Council request that these matters be published for the public, the Council would need to amend the adopted Procedures.

Ordinary/Special Council Meetings

Should a member of the public ask a question at a Council meeting, and that question is taken on notice, the question and response is provided in the Council Minutes of the same month, or alternatively the Council Agenda for the next month.

Should an Elected Member ask a question at a Council meeting, and that question is taken on notice, responses are distributed to Elected Members via an email from the relevant Director, or via a Memorandum distributed to Elected Members. It is not the City's current practice to distribute responses to the public and/or include in the Council Minutes for Elected Member questions taken on notice.

Officer's Recommendation

That Council, in relation to Motion No. 33 carried at the Annual General Meeting of Electors:

- 1 NOTES the City already provides responses to questions taken on notice from the public, both at Briefing Sessions and Council Meetings, through the Council Agenda or Council Minutes process.*
- 2 With regard to Elected Member questions taken on notice, REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:*
 - 2.1 NOTES the City prepares Briefing Notes, with responses to Elected Member's questions taken on notice at a Briefing Session, which are circulated to Elected Members only;*
 - 2.2 NOTES that should Council wish the Briefing Notes to be published for the public, the Council would need to amend the Procedures for Strategy Sessions, Briefing Sessions, Council/Committee meetings and Electronic Meetings;*
 - 2.3 NOTES that it is not the City's practice to distribute to the public responses to Elected Member questions taken on notice and/or include in the Council Minutes.*

MOTION NO. 34

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City:

- 1 to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;**
- 2 NOTES the removal of the re-registration requirement, will prevent unnecessary anxiety if residents have forgotten to re-register in July.**

Officer's Comment

This elector's motion is the same as Motion No. 12 raised at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council was advised that:

"The City's ability to notify residents on the Pesticide Exclusion Use Register and the Pesticide Use Notification Register depends on the correct contact details to enable accurate and timely notifications. The annual re-registration process is the best way to ensure that the City obtains the most up to date contact details from registrants. It also provides the opportunity for registrants to consider if they want to continue to receive the notification or if they want to view the Pesticide Use Notification – Locations Map and Schedule on the City's website. Registrants are reminded to re-register via a public notice on the City's website and social media posts. These notices also advertise the opportunity for residents to register that may not have been registered previously."

Council resolved the following:

"12 in relation to Motion No. 12 carried at the Annual General Meeting of Electors:

- 12.1 NOTES that the success of the Pesticide Use Notification Register and Pesticide Exclusion Use Register is highly dependent on accurate contact details of registrants;*
- 12.2 DOES NOT SUPPORT the motion to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;"*

The City advertises the Pesticide Exclusion Use Register, the Pesticide Use Notification Register along with the Pesticide Use Notification - Locations Map and Schedule annually through social media platforms, community news and the City's website. Registrants are reminded to re-register via a public notice on the City's website and social media posts. These notices also advertise the opportunity for residents to register that may not have been registered previously. Registration can be submitted at any time and activated within five working days if registrants have forgotten to re-register in July.

Officer's Recommendation

That Council, in relation to Motion No. 34 carried at the Annual General Meeting of Electors:

1 *REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:*

- 1.1 *NOTES that the success of the Pesticide Use Notification Register and Pesticide Exclusion Use Register is highly dependent on accurate contact details of registrants;*
- 1.2 *DOES NOT SUPPORT the motion to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration.*

MOTION NO. 35

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST Council to reconsider the capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds to areas of higher need including the provision of low-key beachside fencing and signage to encourage the broader community that the coastal dune reserves with fragile and vulnerable ecosystems.

Officer's Comment

The 2023-24 budget includes a project, FNM2095 Mullaloo North Beach Connection, for the construction of beach access from Mullaloo north beach to the coastal dual use path. This project was initiated to formalise the informal track that had been formed over many years of beach goers accessing the beach from the coastal shared path north of the Key West Carpark.

Following the adoption of the 2023-24 budget in June 2023, the City commenced with the delivery of this project with the design of a boardwalk which follows the existing informal walking track to minimise impact to the environment. A boardwalk was selected as a raised structure will further reduce any potential impact to the vegetation and dunal system.

Following the completion of the design a contractor was appointed for the supply and installation of the boardwalk. Fabrication has already commenced and installation is scheduled for quarter four of the current financial year. As works on this project have significantly progressed with actual expenditure of \$84,341 as at 11 April 2024, the motion to reallocate funds to another project is not supported.

Additionally, the provision of low-key beachside fencing and signage was previously raised at the Annual General Meeting of Electors held on 7 March 2023.

“MOTION NO. 32 MOVED M Harrison, SECONDED J Sideris that the Electors of the City of Joondalup REQUEST that Council instructs the City to protect our coastal reserves by installing dune fencing that is environmentally resilient and effective with its design, management and maintenance systems continually adapting to the changing local conditions on all sides of the coastal reserve to prevent dune access by people and pets notably from the beach.”

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council was advised that:

“The City has historically attempted to fence portions of the seaward side of the dune system between Hillarys Marina and the northern section of Mullaloo Beach. Unfortunately, a combination of severe storms and the natural expansion of the dune system resulted in this fencing not being successful. Fencing on the west of the dune system is rapidly covered by shifting sands or washed away or destroyed by wave action. Due to this, and the significant cost, it is not seen as a long-term viable option to protect dunes from foot traffic. The City has installed regulatory signage at the beach advising beach users not to enter the dune system. Fencing is currently only constructed and maintained on the east, west and north edges of the coastal reserve to protect eco-systems.”

Council resolved the following:

“32 in relation to Motion No. 32 carried at the Annual General Meeting of Electors:

32.1 DOES NOT SUPPORT the construction of fencing on the seaward side of the coastal dune system;”

Officer's Recommendation

That Council, in relation to Motion No. 35 carried at the Annual General Meeting of Electors:

- 1 NOTES that the 2023-24 Budget includes a project FNM2095 – Mullaloo North Beach Connection for the construction of beach access from Mullaloo North Beach to the coastal dual use path;*
- 2 NOTES that significant progress has been made in the delivery of project FNM2095 – Mullaloo North Beach Connection with a contractor appointed for the supply and installation of a boardwalk;*
- 3 NOTES that actual expenditure on project FNM2095 – Mullaloo North Beach Connection was \$84,341 as at 11 April 2024;*
- 4 DOES NOT SUPPORT the motion to reconsider the capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds for other purposes.*

MOTION NO. 36

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST Council to direct the CEO to progressively revise the register of decisions to include archived decisions of Council for the City of Joondalup and Wanneroo and that an annual report be provided to Electors.

Officer's Comment

It is assumed that the reference to a 'register of decisions' is a reference to a resolutions register of previous Council decisions. In that regard, a report was presented to the Policy Committee on 8 May 2023, with regard to a proposal to develop a policy to create a Register of Resolutions Policy.

In July 2023 the City began using an Agendas and Minutes software program (Doc Assembler) that has the capability to create a register of resolutions. The Council and Committee resolutions from July 2023 onwards are currently available within the register however, at this time the City is having some administrative issues in making that register publicly available. The City is currently in discussions with the service provider to resolve these matters. Once resolved, a register of resolutions will be available on the City's public website for all to view.

It should be noted, however, that the register does not currently contain any historical data (from earlier than 1 July 2023). The City is working on a solution to manually import historical resolutions into the register and it is expected the project will be completed over the next 12- 24 months.

It is therefore not considered necessary that an annual report of previous Council decisions be provided to the Electors Annual General Meeting.

Officer's Recommendation

That Council, in relation to Motion No. 36 carried at the Annual General Meeting of Electors:

- 1 *NOTES that the City has already implemented software that has the capability to create a register of resolutions, and is working on making this register publicly available;*
- 2 *NOTES that the City is currently working on a solution to import historical resolutions into the register.*

MOTION NO. 37

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup in a move towards open and accountable government DIRECTS the Council to consider amending the City's ability to classify reports as confidential matters well beyond the deliberative period that Council requires to consider that matter before it.

Officer's Comment

The *Local Government Act 1995* (the Act) provides for the circumstances in which meetings are to be closed to members of the public. Section 5.23(2) of the Act provides as follows:

- (2) *If a meeting is being held by a council or by a committee referred to in subsection (1)(b), the council or committee may close to members of the public the meeting, or part of the meeting, if the meeting or the part of the meeting deals with any of the following –*
 - (a) *a matter affecting an employee or employees; and*
 - (b) *the personal affairs of any person; and*
 - (c) *a contract entered into, or which may be entered into, by the local government and which relates to a matter to be discussed at the meeting; and*
 - (d) *legal advice obtained, or which may be obtained, by the local government and which relates to a matter to be discussed at the meeting; and*

- (e) a matter that if disclosed, would reveal —
 - (i) a trade secret; or
 - (ii) information that has a commercial value to a person; or
 - (iii) information about the business, professional, commercial or financial affairs of a person, where the trade secret or information is held by, or is about, a person other than the local government; and
- (f) a matter that if disclosed, could be reasonably expected to —
 - (i) impair the effectiveness of any lawful method or procedure for preventing, detecting, investigating or dealing with any contravention or possible contravention of the law; or
 - (ii) endanger the security of the local government's property; or
 - (iii) prejudice the maintenance or enforcement of a lawful measure for protecting public safety; and
- (g) information which is the subject of a direction given under section 23(1a) of the *Parliamentary Commissioner Act 1971*; and
- (h) such other matters as may be prescribed.

The decision to classify a report and/or attachments to a report as confidential is based on the requirements provided in section 5.23(2) of the Act. It should be noted that the City of Joondalup uses the provisions of section 5.23(2) sparingly giving consideration to those circumstances of confidentiality, whilst also ensuring high levels of transparency and accountability.

In South Australia, the legislation provides a framework in which Councils must provide for the release of confidential documents following the expiration of a confidentiality order and to review confidential orders every 12 months (refer section 91(9) of the South Australian *Local Government Act 1999* (SA)).

It is considered that a legislative framework would be the most appropriate mechanism to manage the release of confidential documents in a consistent way.

It is recommended that the Chief Executive Officer write to the Department of Local Government, Sport and Cultural Industries to ask that consideration be given to including provisions for the review and release of confidential items similar to those provided in section 91(9) of the South Australian *Local Government Act 1999*.

Officer's Recommendation

That Council, in relation to Motion No. 37 carried at the Annual General Meeting of Electors:

- 1 *INSTRUCTS the Chief Executive Officer to WRITE to the Department of Local Government, Sport and Cultural Industries to consider including provisions for the review and release of confidential items similar to those provided in section 91(9) of the South Australian Local Government Act 1999, and if included consider developing guidelines to assist Councils in meeting the objectives of those legislative provisions.*

MOTION NO. 38

MOVED M Kwok, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the CEO to ensure information about fees, expenses and allowances in the Annual Financial Statement are to be accurately reflected in the Annual Report as prescribed by section 19BD of the *Local Government (Administration) Regulations 1996*, Part 5, Division 2.

Officer's Comment

Reporting of fees, expenses and allowances paid to Elected Members in the Annual Financial Report is presented in accordance with the *Model Financial Statements* distributed by the Department of Local Government, Sport and Cultural Industries to the sector. Details that may not be accommodated in this presentation will be reported in the City's Annual Report.

Officer's Recommendation

That Council, in relation to Motion No. 38 carried at the Annual General Meeting of Electors:

- 1 *NOTES that fees, expenses and allowances paid to Elected Members are reported in the City's Annual Financial Report as prescribed in the Local Government Act 1995 and the Local Government (Financial Management) Regulations 1996;*
- 2 *NOTES that the presentation of fees, expenses and allowances paid to Elected Members in the Annual Financial Report follows the presentation in the Model Financial Statements issued by the Department of Local Government, Sport and Cultural Industries;*
- 3 *NOTES that any additional disclosures required by section 19BD of the Local Government (Administration) Regulations 1996 in relation to fees, expenses or allowances paid to Elected Members will be presented in the City's Annual Report*

MOTION NO. 39

MOVED M Kwok, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instruct the City to resign membership of WALGA, until WALGA has an independent forensic audit from the Office of the Auditor General, and the report be published and made public.

Officer's Comment

This elector's motion is similar to Motion 49 raised at the Annual General Meeting of Electors held on 7 March 2023.

When considering this motion at its meeting held on 23 May 2023 (CJ067-05/23 refers), Council resolved as follows:

"In relation to Motion No. 49 carried at the Annual General Meeting of Electors:

- 49.1 *DOES NOT SUPPORT the proposal that the Office of the Auditor General conduct financial and performance audits of the Western Australian Local Government Association (WALGA) given:*

49.1.1 WALGA is not a recognised state or local government entity and therefore does not fall within the jurisdiction of the functions and powers of the Auditor General;

49.1.2 WALGA's financial auditing is undertaken by Deloitte, one of Australia's largest and most recognised auditing and consulting organisations;

49.1.3 The State Government intends to remove references to WALGA from the Local Government Act 1995 as part of the local government reform process, to provide clarity that WALGA is not a State Government entity."

The WA Local Government Association (WALGA) is an independent, member based, not for profit organisation representing and supporting the WA Local Government sector. WALGA advocates on behalf of WA's 139 Local Governments and negotiates service agreements for the sector and is not a government department or agency.

Membership of the Association is not compulsory, and participation in the LGIS Mutual Service, of which WALGA is trustee, is also not compulsory. Further, as a Registered Training Organisation it operates in a competitive environment with other providers offering training for Elected Members and officers. Use of WALGA's preferred supplier panels is at the discretion of each and every member local government.

To suspend the City's membership with WALGA will have significant implications for the City not the least in the policy and advocacy areas for the City of Joondalup, but also for the wider local government sector. WALGA exists to represent and support local governments in Western Australia and leverage the collective strength and influence of the sector for the benefit of its members and their communities. All 139 local governments in Western Australia are members of WALGA.

WALGA Membership

WALGA's operational structure is comprised of a number of internal business units who undertake policy and advocacy work on behalf of the local government sector.

WALGA's policy areas include the following:

- Economics.
- Emergency Management.
- Employee Relations – of particular interest at this time is managing the transition to a State Industrial Relations system and managing Union activity. If we were to cancel our subscription we would need to look at alternate mechanisms for advice which we have done previously, and it cost the City at least the amount currently subscribed too if not more.
- Environment – of particular interest at this time is CHRMAP and managing coastal issues including advocacy to the State Government.
- Governance and Organisational Services – of particular interest at this time is being an active participant in local government reform issues.
- Infrastructure.
- People and Place.
- Planning and Building.
- Waste.

In addition, WALGA has a number of advocacy position which represent all 139 local governments and have been developed with the community benefit front of mind. The WALGA Advocacy Positions Manual can be viewed [here](#).

Subscription Services

WALGA offers a number of subscription services to assist local governments in performing their duties. These include:

- *Procurement services*

Subscribers to WALGA's Procurement service can access:

- The procurement toolkit.
- High quality support, facilitation and advice at every step of the procurement process.
- Template policies and procedures.
- Collaborative procurement opportunities and networking including WALGA's Procurement Network to discuss current issues, and share information from the National Procurement Network and National LG Procurement Training Group.
- Access to WALGA's library of procurement resources and discussion forum.
- A newsletter providing access to information and latest updates related to procure in the sector.

- *Tax Services*

- WALGA's tax service provides local governments with specialised taxation advisory and information services across all indirect revenue types.
- The current consultancy contract for the tax service is held by Moore Australia WA, whose dedicated local government team provides members with a range of services that are directly tailored to the tax and financial accounting requirements of local governments.
- Subscribers to the WALGA Tax Service are able to submit written tax enquiries relating to GST, FBT and associated revenues and receive a written response within two (2) business days.
- The WALGA tax service also delivers regular bulletin and newsletter communications to all subscribers containing relevant information relating to tax changes, tax cases and issues that impact the local government sector.
- Webinars are run regularly throughout the year for local government specific training and workshop events on such topics as FBT and GST.

- *Employee Relations*

WA local governments and Regional Councils can pay an annual subscription fee to access the WALGA Employee Relations services. Subscribers to WALGA's Employee Relations Service receive:

- Industrial advocacy and representation.
- Employee relations and human resources advice.
- Regular employee relations alerts.
- Template policies and procedures, and ER guides.
- Free access to the WALGA Salary Survey if they complete the survey.

- *Governance/Local Laws service*

Subscribers to WALGA's Governance service can access:

- Decision making in practice toolkit.
- Good governance in practice.
- Councillor's manual.

- Practice notes.
- Forms and pro formas.
- Template policies, procedures and local laws.
- Governance and local laws advice.

As an organisation formed under the *Associations Incorporation Act*, WALGA is required to have an annual financial audit undertaken by an approved auditor. The annual financial statement and the audit report are made available to all members at the WALGA Annual General Meeting and are publicly available on their website.

The Minister for Local Government has proposed that WALGA not be incorporated under the *Local Government Act 1995* in his policy positions on Local Government reform.

Local Government Reform Proposals

At its meeting held on 15 February 2022 (CJ012-02/22 refers) the Council considered a range of proposed local government reforms by the State Government.

The reform papers provided that in accordance with the Local Government Review Panel Report's recommendation, it is proposed as part of the reforms, that WALGA no longer be constituted under the *Local Government Act 1995*. It has been suggested this will provide clarity that WALGA is not a State Government entity.

WALGA advised as part of its response to the reform proposal that it *"is conducting its own due diligence on this proposal, previously identified in the Local Government Review Panel Report. The outcome of this reform would require a transition of WALGA from a body constituted under the Act to an incorporated association. It is important to the Local Government sector that the provisions relating to the mutual self-insurance scheme and tender exempt prequalified supply panels remain in the Act and are not affected by this proposal. Further work is being carried out by WALGA to fully understand the effect this proposal will have on WALGA and the sector."*

The 2020 Local Government Reform Panel Report provided as follows:

"The Panel deliberated the merits of WALGA being constituted under the Local Government Act and determined that it was not appropriate to incorporate a member body under this legislation.

This created confusion as to the extent of the Minister's powers over the organisation and WALGA's level of independence. More appropriate legislation would appear to be the Associations Incorporation Act 2015.

Transitional provisions should be included in the new Local Government Act to allow for the orderly reconstitution of WALGA without affecting their operations. This change would not restrict the new Act (or other Acts) from referencing WALGA membership on boards and committees.

The Panel saw merit in the sector being able to use its aggregated buying power through use of WALGA's preferred supplier program and their mutual insurance coverage. Recognition of these initiatives in the legislation should be accompanied by a power for the Auditor General to conduct regular audits of these programs and related processes."

The Council therefore endorsed the following position:

The City of Joondalup:

- 1 *SUPPORTS the WALGA position that it undertake due diligence on the proposal and advise the sector accordingly;*
- 2 *REQUEST the Minister to recognise the preferred supplier program and mutual insurance coverage from LGIS.*

The Minister for Local Government has advised that WALGA's role in the *Local Government Act 1995* will be integrated into the second tranche of reforms to be introduced later in the year.

Auditor General's Role

The Auditor General's functions and powers are prescribed in the *Auditor General Act 2006*.. The Auditor General's role is to audit the finances and activities of Western Australian State and local government entities and report their findings to Parliament.

WALGA is not a recognised state or local government entity and therefore does not fall within the jurisdiction of the functions and powers of the Auditor General.

WALGA Auditor

WALGA's financial report is audited by Deloitte, one of Australia's largest and most recognised auditing and consulting organisations.

The WALGA Annual Report including Auditor's Report for 2022/23 is provided [here](#).

Resigning membership would result in missing out on the subscription services which are valuable to the City's Officers in performing their duties.

If Council did suspend its membership with WALGA, it would be the only local government in Western Australia not to be a member of WALGA.

It is recommended that the City continues its membership with WALGA.

Officer's Recommendation

That Council, in relation to Motion No. 39 carried at the Annual General Meeting of Electors:

- 1 *DOES NOT SUPPORT the request for the City to resign its membership with the Western Australia Local Government Association (WALGA);*
- 2 *REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that the Council DOES NOT SUPPORT the proposal for the Office of the Auditor General to conduct financial and performance audits of the Western Australian Local Government Association given:*
 - 2.1 *WALGA is not a recognised state or local government entity and therefore does not fall within the jurisdiction of the functions and powers of the Auditor General;*
 - 2.2 *WALGA's financial auditing is undertaken by Deloitte, one of Australia's largest and most recognised auditing and consulting organisations;*

- 2.3 *The State Government intends to remove references to WALGA from the Local Government Act 1995 as part of the local government reform process, to provide clarity that WALGA is not a State Government entity.*

Legislation / Strategic Community Plan / Policy implications

Legislation Section 5.33 of the Local Government Act 1995 states:

Decisions made at Electors' Meetings:

- 5.33 (1) *All decisions made at an Electors' Meeting are to be considered by the Council at the next ordinary council meeting or, if this is not practicable –*
- (a) *at the first ordinary council meeting after that meeting; or*
 - (b) *at a special meeting called for that purpose, whichever happens first.*
- (2) *If at a meeting of the Council a local government makes a decision in response to a decision made at an Electors' Meeting, the reasons for the decision are to be recorded in the minutes of the Council Meeting.*

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-1 Capable and effective - you have an informed and capable Council backed by a highly-skilled workforce.

5-3 Engaged and informed - you are able to actively engage with the City and have input into decision-making.

Policy Not applicable.

Risk management considerations

Not applicable.

Financial / budget implications

The main cost to the City has been in Officer's time, which involves both salary expense and the opportunity cost of other work not done. It is estimated that officers have spent approximately 38 hours, or the equivalent of one week of an officer's time, in preparing responses to, reviewing and finalising the AGM Motions report.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

Not applicable.

COMMENT

Decisions made by electors at an Electors' Meeting are the recommendations of those electors present, on the matters discussed and considered at the meeting. Any recommendations are not binding on the Council, however, Council is required to consider them.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION

That Council:

- 1 in relation to Motion No. 1 carried at the Annual General Meeting of Electors:
 - 1.1 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:
 - 1.1.1 NOTES that the City has undertaken a number of activities to increase accessibility for visually impaired members of the community in the Council Chamber in recent years;
 - 1.1.2 NOTES that the request for the Presiding Member to read aloud all motions in full before voting takes place is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;
- 2 in relation to Motion No. 2 carried at the Annual General Meeting of Electors:
 - 2.1 REAFFIRMS its decision of 19 April 2022 (CJ049-04/22 refers) that:
 - 2.1.1 NOTES the setting of the date and time for the Annual General Meeting of Electors is a matter to be determined by the Council, in accordance with section 5.27 of the *Local Government Act 1995*;
- 3 in relation to Motion No. 3 carried at the Annual General Meeting of Electors:
 - 3.1 NOTES the City's existing processes for the appropriate selection and recruitment of employees, volunteers, presenters, and performers, including the requirements under the *Working With Children (Screening) Act 2004*;
 - 3.2 NOTES that in response to the findings of the Royal Commission into Institutional Responses to Child Sexual Abuse, the City is currently developing a Child Safety Policy;
- 4 in relation to Motion No. 4 carried at the Annual General Meeting of Electors:
 - 4.1 NOTES the advice from ARPANSA on the safe use of wireless technologies in public areas;
 - 4.2 NOTES that the use of wireless technology will continue as part of City operations and in the delivery of services to the community;

- 5 in relation to Motion No. 5 carried at the Annual General Meeting of Electors:
 - 5.1 DOES NOT SUPPORT the request to stop spending funds on further CCTV devices, software and/or systems;
 - 5.2 NOTES that the City is currently developing a new Community Safety Plan which will be advertised for community consultation.
- 6 in relation to Motion No. 6 carried at the Annual General Meeting of Electors:
 - 6.1 NOTES that cash remains a means for customers to pay City notices, or pay for services;
 - 6.2 NOTES that Council determines what means of payment are accepted in relation to any service provided or notice issued by the City.
- 7 in relation to Motion No. 7 carried at the Annual General Meeting of Electors:
 - 7.1 NOTES that the City has commenced the process to develop a new Animals Local Law;
 - 7.2 NOTES that the proposed Animals Local Law 2024 incorporates provisions that respond to the control of cats, as requested in the motion carried at the Annual General Meeting of Electors on 5 March 2024.
- 8 in relation to Motion No. 8 carried at the Annual General Meeting of Electors:
 - 8.1 NOTES that the request to be given the opportunity to ask additional questions and present additional motions without notice is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;
- 9 in relation to Motion No. 9 carried at the Annual General Meeting of Electors:
 - 9.1 REAFFIRMS its decisions of 18 May 2021 (CJ063-05/21 refers), 19 April 2022 (CJ049-04/22 refers) and 23 May 2023 (CJ067-05/23 refers) that:
 - 9.1.1 NOTES the requirements and time limitations under the *Local Government Act 1995* in addressing motions passed at electors' meetings and the City's current processes in place;
 - 9.1.2 NOTES how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the *Local Government Act 1995* and the procedures set out in the *City's Meeting Procedures Local Law 2013*;
- 10 in relation to Motion No. 10 carried at the Annual General Meeting of Electors:
 - 10.1 SUPPORTS the inclusion of the number of compliments, feedback and complaints received by the City within the City's Annual Report;
 - 10.2 NOTES that reporting will be in accordance with the proposal accepted by Council at the Council meeting held on 23 November 2023 (CJ227-11/23 refers);
 - 10.3 NOTES that reporting will commence from 2024/25;

- 11 in relation to Motion No 11. carried at the Annual General Meeting of Electors:
- 11.1 NOTES that the immunisation clinics the City currently provides is not considered to be a duplication of service already provided by the State Government;
 - 11.2 NOTES that any cessation of service, such as immunisation clinics, should be phased and done in consultation with relevant stakeholders and providers to ensure continuity of services for the City of Joondalup community;
- 12 in relation to Motion No. 12 carried at the Annual General Meeting of Electors:
- 12.1 NOTES that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;
 - 1.2 DOES NOT SUPPORT the request to make a representation to the Government that the Australian Radiation Protection and Nuclear Safety Agency develop a new radiofrequency standard with lower maximum exposure levels.
- 13 in relation to Motion No. 13 carried at the Annual General Meeting of Electors:
- 13.1 NOTES there is value in providing Special Purpose Grant funding to Friends' Groups to carry out approved tasks within the City's bushland;
 - 13.2 NOTES that allowing further funding applications to be received after 1 May would impact on the City's ability to effectively consider and manage the Friends' Groups Special Purpose Grant funding;
 - 13.3 NOTES that allowing further funding applications to be received after 1 May would impact on the Friends' Groups ability to organise, complete, and acquit the additional works prior to 30 June;
 - 13.4 DOES NOT SUPPORT the motion that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1 May each financial year be made available to Friends' Groups for additional funding applications;
- 14 in relation to Motion No. 14 carried at the Annual General Meeting of Electors:
- 14.1 NOTES that the request to set aside sufficient parts of the standing orders to enable free and open discussion is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;
- 15 in relation to Motion No. 15 carried at the Annual General Meeting of Electors:
- 15.1 NOTES that weed management activities across the City will continue to be undertaken in alignment with the adopted *Weed Management Plan 2023-2033*;
 - 15.2 DOES NOT SUPPORT the motion requesting the City prepare a comprehensive program this year to phase out the use of glyphosate and other pesticides within the City of Joondalup to make an incremental shift to non-chemical weeding methods, such as hydrothermal, manual and mechanical weeding, over the next three years;

- 16 in relation to Motion No. 16 carried at the Annual General Meeting of Electors:
- 16.1 NOTES that weed management across the City's laneways and pedestrian access ways will continue to be undertaken in alignment with the City's adopted *Weed Management Plan 2023-2033* ;
 - 16.2 DOES NOT SUPPORT limiting weed management within the City's laneways and pedestrian access ways to non-chemical weed management only;
- 17 in relation to Motion No. 17 carried at the Annual General Meeting of Electors:
- 17.1 NOTES that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;
 - 17.2 NOTES the position of the Australian Radiation Protection and Nuclear Safety Agency in relation to low exposure to RF EME;
 - 17.3 DOES NOT SUPPORT the request to make a representation to the Government requesting schools, especially kindergartens, remain hard wired where possible, with wireless devices limited where possible and turned off when not in use;
- 18 in relation to Motion No. 18 carried at the Annual General Meeting of Electors:
- 18.1 NOTES that all delegations to the Chief Executive Officer are recorded within the *City of Joondalup's Delegation of Authority Register*;
 - 18.2 NOTES that a review of the Delegation of Authority Register is intended to be presented to the Council Meeting to be held on 28 May 2024, where all delegations to the Chief Executive Officer will be considered by Council;
- 19 in relation to Motion No. 19 carried at the Annual General Meeting of Electors:
- 19.1 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:
 - 19.1.1 NOTES the requirements of s. 5.27 and s. 5.54 of the *Local Government Act 1995*, as they pertain to the acceptance of annual reports and setting of meeting dates for annual general meetings of electors, respectively;
 - 19.1.2 NOTES the Council resolution of 7 February 2023 (JSC05-02/23 refers) regarding concerns raised in relation to annual audits undertaken by the Office of the Auditor General;
- 20 in relation to Motion No. 20 carried at the Annual General Meeting of Electors:
- 20.1 DOES NOT SUPPORT the development of a Citywide Friends of PAWs group within the City's laneways and pedestrian access due to insufficient information available to assess the impacts on City resourcing.
- 21 in relation to Motion No. 21 carried at the Annual General Meeting of Electors:
- 21.1 NOTES that the Federal Government National Health and Medical Research Council is the appropriate expert government body for water fluoridation;

- 21.2 NOTES that there is appropriate Federal Government and State Government legislation that exists relating to fluoride in water;
- 22 in relation to Motion No. 22 carried at the Annual General Meeting of Electors:
 - 22.1 NOTES the City has engaged a consultant to develop an Ongoing Site Management Plan for managing asbestos containing material at Hillarys Dog Beach, in accordance with Department of Water and Environmental Regulations recommendation and requirements;
 - 22.2 NOTES that Unexploded Ordnance is not covered under the *Contaminated Sites Act 2003* and therefore will not be included in an Ongoing Site Management Plan for Hillarys Dog Beach;
- 23 in relation to Motion No. 23 carried at the Annual General Meeting of Electors:
 - 23.1 DOES NOT SUPPORT the publication of the CEO's current Key Performance Indicators (KPI's) within three months of the AGM of Electors' meeting provided they have been endorsed by Council;
 - 23.2 DOES NOT SUPPORT the request to change the City's policy to ensure that all future contracts signed by the current, and future, CEO's of the City of Joondalup include publicly provided and accessible KPIs within one month of signing of the said contract;
- 24 in relation to Motion No. 24 carried at the Annual General Meeting of Electors:
 - 24.1 NOTES the requirements under the City's *Meeting Procedures Local Law 2013* for a member of the public to state their name and full address when asking a public question and/or making a public statement;
 - 24.2 NOTES the proposed changes to the *Local Government Act 1995* and Regulations to require that a member of the public only provide their name and suburb/locality before asking a question;
- 25 in relation to Motion No. 25 carried at the Annual General Meeting of Electors:
 - 25.1 DOES NOT SUPPORT the request to invest in a training program on 'Electromagnetic Fields Awareness' as the local government does not control, or influence matters related to radiofrequency electromagnetic energy;
- 26 in relation to Motion No. 26 carried at the Annual General Meeting of Electors:
 - 26.1 NOTES that the City supports a number of State Government agencies in responding to water quality issues such as those that have occurred at Mullaloo Beach in early 2024 and remains in regular communication with these relevant expert State Government agencies;
 - 1.2 NOTES that the City has established procedures to communicate to the public and erect warning signage and undertake other actions when directed by relevant State Government agencies;

- 27 in relation to Motion No. 27 carried at the Annual General Meeting of Electors:
- 27.1 NOTES that rates requirements for 2024-25 will follow due consideration of budget requirements for services, facilities and projects to be provided in 2024-25;
 - 27.2 NOTES that any proposal to levy differential rates in 2024-25 will be issued for public comment, which Council must consider prior to any decision to levy rates;
 - 27.3 NOTES that 2024-25 is not a GRV revaluation year;
- 28 in relation to Motion No. 28 carried at the Annual General Meeting of Electors:
- 28.1 REAFFIRMS its decision of 19 February 2019 (CJ088-02/19 refers) and 18 May 2021 (CJ063-05/21 refers) that the current publication timeframes of Briefing Session agendas is sufficient to support:
 - 28.1.1 the decision-making responsibilities of Council;
 - 28.1.2 the legislative provisions in place, with regard to distribution and publishing of agenda material; and
 - 1.2.3 the internal agenda setting processes used at the City;
- 29 in relation to Motion No. 29 carried at the Annual General Meeting of Electors:
- 29.1 DOES NOT SUPPORT the expansion of the Waterwise Verge Rebate Program due to the increased resources required;
 - 29.2 NOTES that the City is implementing a Native Plant Giveaway initiative in 2023/24;
 - 29.3 NOTES that the City is aiming to implement a Native Plant Giveaway initiative in 2024/25.
 - 29.4 NOTES that the City will consider implementing the Waterwise Verge Rebate Program in 2025/26, subject to resourcing and budget approval;
- 30 in relation to Motion No. 30 carried at the Annual General Meeting of Electors:
- 30.1 NOTES the request that the Council and Administration should generally not go on overseas trips at the expense of the ratepayers of the City of Joondalup;
 - 30.2 NOTES the benefits of appropriate overseas engagements including activities that seek to achieve local economic growth, investment and attraction, export growth in local goods and services, and return on investment.
 - 30.3 DOES NOT SUPPORT an amendment to the Elected Members' Entitlements Policy to remove Part 8 relating to Overseas Conferences, noting that Council must endorse proposed travel; and
 - 30.4 DOES NOT SUPPORT the revocation of the Council positions related to International Recognition and Innovation; Economic Development International Activity;

- 31 in relation to Motion No. 31 carried at the Annual General Meeting of Electors:
- 31.1 REAFFIRMS its decision of 16 August 2022 (CJ128-08/22 refers), and 23 May 2023 (CJ067-05/23 refers) regarding the inclusion of additional disclosures in the City's Annual Financial Report and Annual Report pertaining to compensation earned by Elected Members in performing roles as representatives of the City;
- 32 in relation to Motion No. 32 carried at the Annual General Meeting of Electors:
- 32.1 DOES NOT SUPPORT the motion to instruct the Chief Executive Officer to ensure that all administrative costs of the Special Area Rates (SARs) within the City of Joondalup, are passed onto the SARS in full, as the substance of the motion forms part of the current review of the policy which will be considered by Council at a future date;
- 33 in relation to Motion No. 33 carried at the Annual General Meeting of Electors:
- 33.1 NOTES the City already provides responses to questions taken on notice from the public, both at Briefing Sessions and Council Meetings, through the Council Agenda or Council Minutes process;
- 33.2 With regard to Elected Member questions taken on notice, REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:
- 33.2.1 NOTES the City prepares Briefing Notes, with responses to Elected Member's questions taken on notice at a Briefing Session, which are circulated to Elected Members only;
- 33.2.2 NOTES that should Council wish the Briefing Notes to be published for the public, the Council would need to amend the Procedures for Strategy Sessions, Briefing Sessions, Council/Committee meetings and Electronic Meetings;
- 33.2.3 NOTES that it is not the City's practice to distribute to the public responses to Elected Member questions taken on notice and/or include in the Council Minutes;
- 34 in relation to Motion No. 34 carried at the Annual General Meeting of Electors:
- 34.1 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:
- 34.1.1 NOTES that the success of the Pesticide Use Notification Register and Pesticide Exclusion Use Register is highly dependent on accurate contact details of registrants;
- 34.1.2 DOES NOT SUPPORT the motion to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;
- 35 in relation to Motion No. 35 carried at the Annual General Meeting of Electors:
- 35.1 NOTES that the 2023-24 Budget includes a project FNM2095 – Mullaloo North Beach Connection for the construction of beach access from Mullaloo North Beach to the coastal dual use path;

- 35.2 NOTES that significant progress has been made in the delivery of project FNM2095 – Mullaloo North Beach Connection with a contractor appointed for the supply and installation of a boardwalk;
 - 35.3 NOTES that actual expenditure on project FNM2095 – Mullaloo North Beach Connection was \$84,341 as at 11 April 2024;
 - 35.4 DOES NOT SUPPORT the motion to reconsider the capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds for other purposes;
- 36 in relation to Motion No. 36 carried at the Annual General Meeting of Electors:
- 36.1 NOTES that the City has already implemented software that has the capability to create a register of resolutions, and is working on making this register publicly available;
 - 36.2 NOTES that the City is currently working on a solution to import historical resolutions into the register;
- 37 in relation to Motion No. 37 carried at the Annual General Meeting of Electors:
- 37.1 INSTRUCTS the Chief Executive Officer to WRITE to the Department of Local Government, Sport and Cultural Industries to consider including provisions for the review and release of confidential items similar to those provided in section 91(9) of the *South Australian Local Government Act 1999*, and if included consider developing guidelines to assist Councils in meeting the objectives of those legislative provisions;
- 38 in relation to Motion No. 38 carried at the Annual General Meeting of Electors:
- 38.1 NOTES that fees, expenses and allowances paid to Elected Members are reported in the City's Annual Financial Report as prescribed in the *Local Government Act 1995* and the *Local Government (Financial Management) Regulations 1996*;
 - 38.2 NOTES that the presentation of fees, expenses and allowances paid to Elected Members in the Annual Financial Report follows the presentation in the *Model Financial Statements* issued by the Department of Local Government, Sport and Cultural Industries;
 - 38.3 NOTES that any additional disclosure required by section 19BD of the *Local Government (Administration) Regulations 1996* in relation to fees, expenses or allowances paid to Elected Members will be presented in the City's Annual Report;
- 39 in relation to Motion No. 39 carried at the Annual General Meeting of Electors:
- 39.1 DOES NOT SUPPORT the request for the City to resign its membership with the Western Australia Local Government Association (WALGA);
 - 39.2 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that the Council DOES NOT SUPPORT the proposal for the Office of the Auditor General to conduct financial and performance audits of the Western Australian Local Government Association given:

39.2.1 WALGA is not a recognised state or local government entity and therefore does not fall within the jurisdiction of the functions and powers of the Auditor General;

39.2.2 WALGA's financial auditing is undertaken by Deloitte, one of Australia's largest and most recognised auditing and consulting organisations;

39.2.3 The State Government intends to remove references to WALGA from the *Local Government Act 1995* as part of the local government reform process, to provide clarity that WALGA is not a State Government entity;

40 NOTES the Minutes of the Annual General Meeting of Electors held on 5 March 2024 forming Attachment 1 to this Report.

ALTERNATE RECOMMENDATION

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

1 in relation to Motion No. 1 carried at the Annual General Meeting of Electors:

1.1 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:

1.1.1 NOTES that the City has undertaken a number of activities to increase accessibility for visually impaired members of the community in the Council Chamber in recent years;

1.1.2 NOTES that the request for the Presiding Member to read aloud all motions in full before voting takes place is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;

2 in relation to Motion No. 2 carried at the Annual General Meeting of Electors:

2.1 REAFFIRMS its decision of 19 April 2022 (CJ049-04/22 refers) that:

2.1.1 NOTES the setting of the date and time for the Annual General Meeting of Electors is a matter to be determined by the Council, in accordance with section 5.27 of the *Local Government Act 1995*;

3 in relation to Motion No. 3 carried at the Annual General Meeting of Electors:

3.1 NOTES the City's existing processes for the appropriate selection and recruitment of employees, volunteers, presenters, and performers, including the requirements under the *Working With Children (Screening) Act 2004*;

3.2 NOTES that in response to the findings of the Royal Commission into Institutional Responses to Child Sexual Abuse, the City is currently developing a Child Safety Policy;

- 3.3 REQUESTS the CEO when preparing the Child Safety Policy to give regard to:**
 - 3.3.1 incorporating recommendation 6.5 and 6.6 of the Royal Commission into Institutional Responses to Child Sexual Abuse;**
 - 3.3.2 Motion 3 from the Annual General Meeting of Electors held on 5 March 2024;**
- 4 in relation to Motion No. 4 carried at the Annual General Meeting of Electors:**
 - 4.1 NOTES the advice from ARPANSA on the safe use of wireless technologies in public areas;**
 - 4.2 NOTES that the use of wireless technology will continue as part of City operations and in the delivery of services to the community;**
- 5 in relation to Motion No. 5 carried at the Annual General Meeting of Electors:**
 - 5.1 NOTES the request to stop spending funds on further CCTV devices, software and/or systems and the concerns relating to civilian surveillance systems;**
 - 5.2 NOTES that the City is currently developing a new Community Safety Plan which will be advertised for community consultation;**
- 6 in relation to Motion No. 6 carried at the Annual General Meeting of Electors:**
 - 6.1 NOTES that cash remains a means for customers to pay City notices, or pay for services;**
 - 6.2 NOTES that Council determines what means of payment are accepted in relation to any service provided or notice issued by the City;**
 - 6.3 SUPPORTS the continued use of cash as a means of payment for services provided or in relation to a notice issued by the City;**
- 7 in relation to Motion No. 7 carried at the Annual General Meeting of Electors:**
 - 7.1 NOTES that the City has commenced the process to develop a new Animals Local Law;**
 - 7.2 NOTES that the proposed Animals Local Law 2024 incorporates provisions that respond to the control of cats, as requested in the motion carried at the Annual General Meeting of Electors on 5 March 2024.**
- 8 in relation to Motion No. 8 carried at the Annual General Meeting of Electors:**
 - 8.1 NOTES that the request to be given the opportunity to ask additional questions and present additional motions without notice is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;**

- 9 in relation to Motion No. 9 carried at the Annual General Meeting of Electors:**
- 9.1 REAFFIRMS its decisions of 18 May 2021 (CJ063-05/21 refers), 19 April 2022 (CJ049-04/22 refers) and 23 May 2023 (CJ067-05/23 refers) that:**
- 9.1.1 NOTES the requirements and time limitations under the *Local Government Act 1995* in addressing motions passed at electors' meetings and the City's current processes in place;**
- 9.1.2 NOTES how it deals with electors' motions carried at annual general meetings of electors rests with Council, in view of the provisions within the *Local Government Act 1995* and the procedures set out in the *City's Meeting Procedures Local Law 2013*;**
- 10 in relation to Motion No. 10 carried at the Annual General Meeting of Electors:**
- 10.1 SUPPORTS the inclusion of the number of compliments, feedback and complaints received by the City within the City's Annual Report;**
- 10.2 NOTES that reporting will be in accordance with the proposal accepted by Council at the Council meeting held on 23 November 2023 (CJ227-11/23 refers);**
- 10.3 NOTES that reporting will commence from 2024/25;**
- 11 in relation to Motion No 11. carried at the Annual General Meeting of Electors:**
- 11.1 NOTES that the immunisation clinics the City currently provides is not considered to be a duplication of service already provided by the State Government;**
- 11.2 NOTES that any cessation of service, such as immunisation clinics, should be phased and done in consultation with relevant stakeholders and providers to ensure continuity of services for the City of Joondalup community;**
- 11.3 REQUESTS the CEO prepare a report on phasing out the immunisation clinics the City currently provides, and consulting with relevant stakeholders and providers to ensure continuity of services;**
- 12 in relation to Motion No. 12 carried at the Annual General Meeting of Electors:**
- 12.1 NOTES that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;**
- 12.2 NOTES the request to make a representation to the Government that the Australian Radiation Protection and Nuclear Safety Agency develop a new radiofrequency standard with lower maximum exposure levels but does not support making any representations at this time;**

- 13 in relation to Motion No. 13 carried at the Annual General Meeting of Electors:**
- 13.1 NOTES** there is value in providing Special Purpose Grant funding to Friends' Groups to carry out approved tasks within the City's bushland;
 - 13.2 NOTES** that allowing further funding applications to be received after 1 May would impact on the City's ability to effectively consider and manage the Friends' Groups Special Purpose Grant funding;
 - 13.3 NOTES** that allowing further funding applications to be received after 1 May would impact on the Friends' Groups ability to organise, complete, and acquit the additional works prior to 30 June;
 - 13.4 DOES NOT SUPPORT** the motion that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1 May each financial year be made available to Friends' Groups for additional funding applications;
- 14 in relation to Motion No. 14 carried at the Annual General Meeting of Electors:**
- 14.1 NOTES** that the request to set aside sufficient parts of the standing orders to enable free and open discussion is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;
- 15 in relation to Motion No. 15 carried at the Annual General Meeting of Electors:**
- 15.1 NOTES** that weed management activities across the City will continue to be undertaken in alignment with the adopted Weed Management Plan 2023-2033;
 - 15.2 REQUESTS** the Chief Executive Officer to prepare a report on reducing the amount of glyphosate and other pesticides over a three to five year period with options for targets of 50%, 70% and 90% reductions;
- 16 in relation to Motion No. 16 carried at the Annual General Meeting of Electors:**
- 16.1 NOTES** that weed management across the City's laneways and pedestrian access ways will continue to be undertaken in alignment with the City's adopted *Weed Management Plan 2023-2033* ;
- 17 in relation to Motion No. 17 carried at the Annual General Meeting of Electors:**
- 17.1 NOTES** that the Australian Radiation Protection and Nuclear Safety Agency is the appropriate expert government agency for radiofrequency electromagnetic radiation;
 - 17.2 NOTES** the position of the Australian Radiation Protection and Nuclear Safety Agency in relation to low exposure to RF EME;
 - 17.3 NOTES** the request to make a representation to the Government requesting schools, especially kindergartens, remain hard wired where possible, with wireless devices limited where possible and turned off when not in use, but does not support making any representations at this time;

- 18 in relation to Motion No. 18 carried at the Annual General Meeting of Electors:**
- 18.1 NOTES** that all delegations to the Chief Executive Officer are recorded within the *City of Joondalup's Delegation of Authority Register*;
- 18.2 NOTES** that a review of the Delegation of Authority Register is intended to be presented to the Council Meeting to be held on 28 May 2024, where all delegations to the Chief Executive Officer will be considered by Council;
- 19 in relation to Motion No. 19 carried at the Annual General Meeting of Electors:**
- 19.1 REAFFIRMS** its decision of 23 May 2023 (CJ067-05/23 refers) that:
- 19.1.1 NOTES** the requirements of s. 5.27 and s. 5.54 of the *Local Government Act 1995*, as they pertain to the acceptance of annual reports and setting of meeting dates for annual general meetings of electors, respectively;
- 19.1.2 NOTES** the Council resolution of 7 February 2023 (JSC05-02/23 refers) regarding concerns raised in relation to annual audits undertaken by the Office of the Auditor General;
- 20 in relation to Motion No. 20 carried at the Annual General Meeting of Electors:**
- 20.1 REQUESTS** the Chief Executive Officer to prepare a report on the creation of a Friends of PAW Group program which addresses the provision of public liability insurance and to define the roles and responsibilities of the City and the PAW Friends Group;
- 21 in relation to Motion No. 21 carried at the Annual General Meeting of Electors:**
- 21.1 NOTES** that the Federal Government National Health and Medical Research Council is the appropriate expert government body for water fluoridation;
- 21.2 NOTES** that there is appropriate Federal Government and State Government legislation that exists relating to fluoride in water;
- 22 in relation to Motion No. 22 carried at the Annual General Meeting of Electors:**
- 22.1 NOTES** the City has engaged a consultant to develop an Ongoing Site Management Plan for managing asbestos containing material at Hillarys Dog Beach, in accordance with Department of Water and Environmental Regulations recommendation and requirements;
- 22.2 NOTES** that Unexploded Ordnance is not covered under the *Contaminated Sites Act 2003* and therefore will not be included in an Ongoing Site Management Plan for Hillarys Dog Beach;
- 22.3 REQUESTS** the Chief Executive Officer to prepare a report on the development of the Site Management Plan (SMP) at Hillarys Dog Beach and any other sites where a plan is being developed, to a future Audit and Risk Committee meeting, identifying the current risks to members of the public, current and future risk mitigation measures, and any potential contingent liabilities;

- 23 in relation to Motion No. 23 carried at the Annual General Meeting of Electors:**
- 23.1 DOES NOT SUPPORT** the publication of the CEO's current Key Performance Indicators (KPI's) within three months of the Annual General Meeting of Electors' meeting provided they have been endorsed by Council;
 - 23.2 SUPPORTS** the Council to consider when signing future contracts to include public KPI's;
 - 23.3 NOTES** that the City of Bayswater, Town of Vicent, Shire of Capel have public Chief Executive Officer KPI's;
- 24 in relation to Motion No. 24 carried at the Annual General Meeting of Electors:**
- 24.1 NOTES** the requirements under the City's *Meeting Procedures Local Law 2013* for a member of the public to state their name and full address when asking a public question and/or making a public statement;
 - 24.2 NOTES** the proposed changes to the *Local Government Act 1995* and Regulations to require that a member of the public only provide their name and suburb/locality before asking a question;
- 25 in relation to Motion No. 25 carried at the Annual General Meeting of Electors:**
- 25.1 NOTES** the request to invest in a training program on 'Electromagnetic Fields Awareness' as the local government does not control, or influence matters related to radiofrequency electromagnetic energy, but does not support it at this time;
- 26 in relation to Motion No. 26 carried at the Annual General Meeting of Electors:**
- 26.1 NOTES** that the City supports a number of State Government agencies in responding to water quality issues such as those that have occurred at Mullaloo Beach in early 2024 and remains in regular communication with these relevant expert State Government agencies;
 - 26.2 NOTES** that the City has established procedures to communicate to the public and erect warning signage and undertake other actions when directed by relevant State Government agencies;
 - 26.3 REQUESTS** the CEO to provide a report on the water quality issues that have occurred at Mullaloo Beach in early 2024 and the procedures to communicate to the public and erect warning signage and undertake other actions when directed by relevant State Government agencies;
- 27 in relation to Motion No. 27 carried at the Annual General Meeting of Electors:**
- 27.1 NOTES** that rates requirements for 2024-25 will follow due consideration of budget requirements for services, facilities and projects to be provided in 2024-25;
 - 27.2 NOTES** that any proposal to levy differential rates in 2024-25 will be issued for public comment, which Council must consider prior to any decision to levy rates;

- 27.3 NOTES that 2024-25 is not a GRV revaluation year;**
- 27.4 NOTES the concerns from electors who attended the Annual General Meeting regarding the current cost of living pressures;**
- 28 in relation to Motion No. 28 carried at the Annual General Meeting of Electors:**
- 28.1 REAFFIRMS its decision of 19 February 2019 (CJ088-02/19 refers) and 18 May 2021 (CJ063-05/21 refers) that the current publication timeframes of Briefing Session agendas is sufficient to support:**
- 28.1.1 the decision-making responsibilities of Council;**
- 28.1.2 the legislative provisions in place, with regard to distribution and publishing of agenda material; and**
- 28.1.3 the internal agenda setting processes used at the City;**
- 28.2 SUPPORTS the publication of the briefing session agenda five days before the date of a Briefing Session;**
- 29 in relation to Motion No. 29 carried at the Annual General Meeting of Electors:**
- 29.1 SUPPORTS the expansion of the Waterwise Verge Rebate Program and the Native Plant Giveaway, and requests the Chief Executive Officer to prepare a report within six months on ways to provide additional funding for the programs due to the increased resources required;**
- 29.2 NOTES that the City is implementing a Native Plant Giveaway initiative in 2023/24;**
- 29.3 NOTES that the City is aiming to implement a Native Plant Giveaway initiative in 2024/25.**
- 29.4 NOTES that the City will consider implementing the Waterwise Verge Rebate Program in 2025/26, subject to resourcing and budget approval;**
- 30 in relation to Motion No. 30 carried at the Annual General Meeting of Electors:**
- 30.1 NOTES the request that the Council and Administration should generally not go on overseas trips at the expense of the ratepayers of the City of Joondalup;**
- 30.2 NOTES the benefits of appropriate overseas engagements including activities that seek to achieve local economic growth, investment and attraction, export growth in local goods and services, and return on investment;**

(Alternate Motion lapsed due to not receiving one-third support)

- ~~31 in relation to Motion No. 31 carried at the Annual General Meeting of Electors:~~
- ~~31.1 REVOKES its decision of 16 August 2022 (CJ128-08/22 refers), and 23 May 2023 (CJ067-05/23 refers) regarding the inclusion of additional disclosures in the City's Annual Financial Report and Annual Report pertaining to compensation earned by Elected Members in performing roles as representatives of the City;~~
- ~~31.2 SUPPORTS including within the Annual Report money received by a council member from other entities, when the council member was nominated or appointed to that position by Council;~~

(Officer's Recommendation)

31 in relation to Motion No. 31 carried at the Annual General Meeting of Electors:

31.1 REAFFIRMS its decision of 16 August 2022 (CJ128-08/22 refers), and 23 May 2023 (CJ067-05/23 refers) regarding the inclusion of additional disclosures in the City's Annual Financial Report and Annual Report pertaining to compensation earned by Elected Members in performing roles as representatives of the City;

32 in relation to Motion No. 32 carried at the Annual General Meeting of Electors:

32.1 NOTES that the content of the motion forms part of the current review of the Specified Area Rating Council Policy;

33 in relation to Motion No. 33 carried at the Annual General Meeting of Electors:

33.1 NOTES the City already provides responses to questions taken on notice from the public, both at Briefing Sessions and Council Meetings, through the Council Agenda or Council Minutes process;

33.2 With regard to Elected Member questions taken on notice, REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:

33.2.1 NOTES the City prepares Briefing Notes, with responses to Elected Member's questions taken on notice at a Briefing Session, which are circulated to Elected Members only;

33.2.2 NOTES that should Council wish the Briefing Notes to be published for the public, the Council would need to amend the Procedures for Strategy Sessions, Briefing Sessions, Council/Committee meetings and Electronic Meetings;

33.2.3 NOTES that it is not the City's practice to distribute to the public responses to Elected Member questions taken on notice and/or include in the Council Minutes;

(Alternate Motion lapsed due to not receiving one-third support)

~~34 in relation to Motion No. 34 carried at the Annual General Meeting of Electors:~~

~~34.1 REVOKES its decision of 23 May 2023 (CJ067-05/23 refers) that:~~

~~34.1.1 NOTES that the success of the Pesticide Use Notification Register and Pesticide Exclusion Use Register is highly dependent on accurate contact details of registrants;~~

~~34.1.2 DOES NOT SUPPORT the motion to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;~~

~~34.2 SUPPORTS residents to be kept on the Pesticide Use Notification Register without the need for annual re-registration and until they unsubscribe;~~

~~34.3 SUPPORTS the Pesticide Exclusion Register registration to be advertised at least twice a year;~~

(Officer's Recommendation)

34 in relation to Motion No. 34 carried at the Annual General Meeting of Electors:

34.1 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that:

34.1.1 NOTES that the success of the Pesticide Use Notification Register and Pesticide Exclusion Use Register is highly dependent on accurate contact details of registrants;

34.1.2 DOES NOT SUPPORT the motion to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;

35 in relation to Motion No. 35 carried at the Annual General Meeting of Electors:

35.1 NOTES that the 2023-24 Budget includes a project FNM2095 – Mullaloo North Beach Connection for the construction of beach access from Mullaloo North Beach to the coastal dual use path;

35.2 NOTES that significant progress has been made in the delivery of project FNM2095 – Mullaloo North Beach Connection with a contractor appointed for the supply and installation of a boardwalk;

35.3 NOTES that actual expenditure on project FNM2095 – Mullaloo North Beach Connection was \$84,341 as at 11 April 2024;

35.4 DOES NOT SUPPORT the motion to reconsider the capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds for other purposes;

36 in relation to Motion No. 36 carried at the Annual General Meeting of Electors:

36.1 NOTES that the City has already implemented software that has the capability to create a register of resolutions, and is working on making this register publicly available;

36.2 NOTES that the City is currently working on a solution to import historical resolutions into the register;

37 in relation to Motion No. 37 carried at the Annual General Meeting of Electors:

37.1 INSTRUCTS the Chief Executive Officer to WRITE to the Department of Local Government, Sport and Cultural Industries to consider including provisions for the review and release of confidential items similar to those provided in section 91(9) of the *South Australian Local Government Act 1999*, and if included consider developing guidelines to assist Councils in meeting the objectives of those legislative provisions;

37.2 REQUESTS the Chief Executive Officer to prepare a report on including within the Records Management Council Policy clauses to permit the review and release of confidential agenda items after a designated period, or after five to 10 years;

38 in relation to Motion No. 38 carried at the Annual General Meeting of Electors:

38.1 NOTES that fees, expenses and allowances paid to Elected Members are reported in the City's Annual Financial Report as prescribed in the *Local Government Act 1995* and the *Local Government (Financial Management) Regulations 1996*;

- 38.2** NOTES that the presentation of fees, expenses and allowances paid to Elected Members in the Annual Financial Report follows the presentation in the *Model Financial Statements* issued by the Department of Local Government, Sport and Cultural Industries;
- 38.3** NOTES that any additional disclosure required by section 19BD of the Local Government (Administration) Regulations 1996 in relation to fees, expenses or allowances paid to Elected Members will be presented in the City's Annual Report;
- 39** in relation to Motion No. 39 carried at the Annual General Meeting of Electors:
- 39.1** REQUESTS the Chief Executive Officer to prepare a report on the benefits of members of the Western Australia Local Government Association (WALGA) and impacts of resigning membership, and ways to mitigate any impacts from resigning membership;
- 40** NOTES the Minutes of the Annual General Meeting of Electors held on 5 March 2024 forming Attachment 1 to this Report.

CALL FOR ONE-THIRD SUPPORT

Regulation 10 of the *Local Government (Administration) Regulations 1996* prescribes the following procedure for dealing with revoking or changing decisions made at Council or Committee Meetings:

"If a decision has been made at a Council meeting, then any motion to revoke or change the decision must be supported by at least one-third of the number of officers (whether vacant or not) of members of the Council.

If supported by one-third of the members, then any decision to revoke a resolution of the Council is required to be passed by an Absolute Majority."

Mayor Jacob called for support from one-third of the members of Council for Motions 31 and 34.

The following Council Members gave support for Motion 31 and 34:

- 1 Cr Chester.
- 2 Cr O'Neill.
- 3 Cr Pizzey.
- 4 Cr Raftis.

As one-third of the members of Council was not given to amend Council's resolution in relation to Motion 31 and Motion 34 of Item 12.9 Minutes of the Annual General Meeting of Electors held on 5 March 2024, the Officer's Recommendation was foreshadowed.

EXTENSION OF TIME TO SPEAK

(Resolution No: CJ115-05/24)

The Motion was Put and

CARRIED (8/4)

In favour of the Motion: Mayor Jacob, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May and Cr Vinciullo.

Against the Motion: Cr Chester, Cr O'Neill, Cr Pizzey and Cr Raftis.

OFFICER'S RECOMMENDATION

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

13 in relation to Motion No. 13 carried at the Annual General Meeting of Electors:

- 13.1 NOTES there is value in providing Special Purpose Grant funding to Friends' Groups to carry out approved tasks within the City's bushland;**
- 13.2 NOTES that allowing further funding applications to be received after 1 May would impact on the City's ability to effectively consider and manage the Friends' Groups Special Purpose Grant funding;**
- 13.3 NOTES that allowing further funding applications to be received after 1 May would impact on the Friends' Groups ability to organise, complete, and acquit the additional works prior to 30 June;**
- 13.4 DOES NOT SUPPORT the motion that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1 May each financial year be made available to Friends' Groups for additional funding applications;**

The Motion was Put and

LOST (3/9)

In favour of the Motion: Mayor Jacob, Cr Hill and Cr Jones.

Against the Motion: Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hutton, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

During debate Cr Chester foreshadowed an alternate Part 13.

ALTERNATE RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

13 In relation to Motion No. 13 carried at the Annual General Meeting of Electors:

13.1 NOTES there is value in providing Special Purpose Grant funding to Friends' Groups to carry out approved tasks within the City's bushland;

13.2 APPROVES that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1st of March of each financial year:

13.2.1 Shall be made available for Friends' Groups (who have already received a grant of the annual prescribed maximum amount) to apply during March and April for additional funds so as to double their annual grant amount;

13.2.2 Any successful applicant shall be paid the additional funding requested, or a lesser amount depending on the number of applications received, by the end of the financial year;

13.2.3 Friends groups shall be instructed to place their application for a Special Purpose grant no later than the 1st March. If Friends groups then wish to later apply for any unallocated money that may be available, they shall be instructed to acquit their previous grant and place another application no later than the 1st May of that financial year;

The Alternate Motion was Put and

CARRIED (12/0)

In favour of the Alternate Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Alternate Motion: Nil.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill

14 in relation to Motion No. 14 carried at the Annual General Meeting of Electors:

14.1 NOTES that the request to set aside sufficient parts of the standing orders to enable free and open discussion is a matter for the Presiding Member to consider, and any such requests shall be at the Presiding Members' discretion;

The Motion was Put and

CARRIED (12/0)

Against the Motion: Cr O'Neill, Cr Pizzey and Cr Raftis.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

35 in relation to Motion No. 35 carried at the Annual General Meeting of Electors:

- 35.1 NOTES that the 2023-24 Budget includes a project FNM2095 – Mullaloo North Beach Connection for the construction of beach access from Mullaloo North Beach to the coastal dual use path;**
- 35.2 NOTES that significant progress has been made in the delivery of project FNM2095 – Mullaloo North Beach Connection with a contractor appointed for the supply and installation of a boardwalk;**
- 35.3 NOTES that actual expenditure on project FNM2095 – Mullaloo North Beach Connection was \$84,341 as at 11 April 2024;**
- 35.4 DOES NOT SUPPORT the motion to reconsider the capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds for other purposes;**

The Motion was Put and

CARRIED (12/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

36 in relation to Motion No. 36 carried at the Annual General Meeting of Electors:

- 36.1 NOTES that the City has already implemented software that has the capability to create a register of resolutions, and is working on making this register publicly available;**
- 36.2 NOTES that the City is currently working on a solution to import historical resolutions into the register;**

The Motion was Put and

CARRIED (12/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

ALTERNATE RECOMMENDATION

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

37 in relation to Motion No. 37 carried at the Annual General Meeting of Electors:

- 37.1 INSTRUCTS the Chief Executive Officer to WRITE to the Department of Local Government, Sport and Cultural Industries to consider including provisions for the review and release of confidential items similar to those provided in section 91(9) of the *South Australian Local Government Act 1999*, and if included consider developing guidelines to assist Councils in meeting the objectives of those legislative provisions;
- 37.2 REQUESTS the Chief Executive Officer to prepare a report on including within the Records Management Council Policy clauses to permit the review and release of confidential agenda items after a designated period, or after five to 10 years;

The Alternate Motion was Put and

LOST (3/9)

In favour of the Alternate Motion: Cr Chester, Cr O'Neill and Cr Raftis.

Against the Alternate Motion: Mayor Jacob, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr Pizzey and Cr Vinciullo.

During debate Mayor Jacob foreshadowed the Officer's Recommendation.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

37 in relation to Motion No. 37 carried at the Annual General Meeting of Electors:

- 37.1 INSTRUCTS the Chief Executive Officer to WRITE to the Department of Local Government, Sport and Cultural Industries to consider including provisions for the review and release of confidential items similar to those provided in section 91(9) of the *South Australian Local Government Act 1999*, and if included consider developing guidelines to assist Councils in meeting the objectives of those legislative provisions;

CARRIED (11/1)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Cr O'Neill.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

38 in relation to Motion No. 38 carried at the Annual General Meeting of Electors:

- 38.1 NOTES that fees, expenses and allowances paid to Elected Members are reported in the City's Annual Financial Report as prescribed in the *Local Government Act 1995* and the *Local Government (Financial Management) Regulations 1996*;**
- 38.2 NOTES that the presentation of fees, expenses and allowances paid to Elected Members in the Annual Financial Report follows the presentation in the *Model Financial Statements* issued by the Department of Local Government, Sport and Cultural Industries;**
- 38.3 NOTES that any additional disclosure required by section 19BD of the *Local Government (Administration) Regulations 1996* in relation to fees, expenses or allowances paid to Elected Members will be presented in the City's Annual Report;**

The Motion was Put and

CARRIED (11/1)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Pizzey, and Cr Vinciullo.

Against the Motion: Cr Raftis.

ALTERNATE RECOMMENDATION

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

39 in relation to Motion No. 39 carried at the Annual General Meeting of Electors:

- 39.1 REQUESTS the Chief Executive Officer to prepare a report on the benefits of members of the Western Australia Local Government Association (WALGA) and impacts of resigning membership, and ways to mitigate any impacts from resigning membership;**

The Alternate Motion was Put and

LOST (5/7)

In favour of the Alternate Motion: Cr Chester, Cr Jones, Cr O'Neill, Cr Pizzey and Cr Raftis.

Against the Alternate Motion: Mayor Jacob, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr May and Cr Vinciullo.

During debate Mayor Jacob foreshadowed the Officer's Recommendation.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

39 in relation to Motion No. 39 carried at the Annual General Meeting of Electors:

39.1 DOES NOT SUPPORT the request for the City to resign its membership with the Western Australia Local Government Association (WALGA);

39.2 REAFFIRMS its decision of 23 May 2023 (CJ067-05/23 refers) that the Council **DOES NOT SUPPORT** the proposal for the Office of the Auditor General to conduct financial and performance audits of the Western Australian Local Government Association given:

39.2.1 WALGA is not a recognised state or local government entity and therefore does not fall within the jurisdiction of the functions and powers of the Auditor General;

39.2.2 WALGA's financial auditing is undertaken by Deloitte, one of Australia's largest and most recognised auditing and consulting organisations;

39.2.3 The State Government intends to remove references to WALGA from the *Local Government Act 1995* as part of the local government reform process, to provide clarity that WALGA is not a State Government entity;

The Motion was Put and

CARRIED (7/5)

In favour of the Motion: Mayor Jacob, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr May and Cr Vinciullo.
Against the Motion: Cr Chester, Cr Jones, Cr O'Neill, Cr Pizzey and Cr Raftis.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ117-05/24)

MOVED Cr Raftis, SECONDED Cr O'Neill that Council:

40 NOTES the Minutes of the Annual General Meeting of Electors held on 5 March 2024 forming Attachment 1 to this Report.

The Motion was Put and

CARRIED (12/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.
Against the Motion: Nil.

Reason for departure from officer's recommendation for Motion 3

In accordance with Regulation 11 (da) of the *Local Government (Administration) Regulations 1996*, the reason Council made its decision which was significantly different to what the administration recommended is to reflect the Council taking on board the position of Electors at the Annual General Meeting.

Reason for departure from officer's recommendation for Motion 11

In accordance with Regulation 11 (da) of the *Local Government (Administration) Regulations 1996*, the reason Council made its decision which was significantly different to what the administration recommended is to ensure that the City saves money on immunisation services that are already provided by the State Government.

Reason for departure from officer's recommendation for Motion 13

In accordance with Regulation 11 (da) of the *Local Government (Administration) Regulations 1996*, the reason Council made its decision which was significantly different to what the administration recommended is the work of the Friends Groups is so critical that they need every bit of financial help they can get.

Cr Kingston entered the Chamber at 9.53pm.

12.10 2024 ANNUAL REVIEW OF REGISTER OF DELEGATION OF AUTHORITY (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	07032, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

The purpose of the annual delegations' review is for Council to undertake a formal review of its delegations within the *Register of Delegation of Authority*.

EXECUTIVE SUMMARY

Sections 5.18 and 5.46 of the *Local Government Act 1995* (the Act) require at least once every financial year, delegations are to be reviewed by the delegator. The Council last performed its annual review of the *Register of Delegation of Authority* (the Register) at its meeting held on 27 June 2023 (CJ096-06/23 refers). Therefore, a formal review by Council is required by 30 June 2024. The 2024 review has focused on assessing the suitability and relevance of existing delegations, as well as the need for any additional delegations.

The proposed amendments to the Register are outlined in Attachment 2 (marked up version) and the Register incorporating the proposed amendments is provided at Attachment 3 (clean version).

It is therefore recommended that Council:

- 1 *ENDORSES the review of its delegations in accordance with sections 5.18 and 5.46 of the Local Government Act 1995;*
- 2 *BY AN ABSOLUTE MAJORITY ADOPTS the amended Register of Delegation of Authority as provided in Attachment 3 to this Report.*

BACKGROUND

In accordance with section 5.16 and 5.42 of the Act, a local government can delegate certain functions to a committee of Council, or the Chief Executive Officer. A variety of other legislation also permits the delegations of functions to the Chief Executive Officer, as well as other officers.

Sections 5.18 and 5.46 of the Act require that at least once every financial year delegations are to be reviewed by the delegator, for those delegations under the Act, but opportunity is also provided to review other delegations made under other legislation.

In June 2022 (CJ092-06/22 refers), Council resolved in Part as follows:

- “3 *REQUESTS the Chief Executive Officer provide a full review of the Register of Delegation of Authority that would include, but not be limited to, comparisons with best practice and other similar sized local governments, as well as explanations and examples of the required delegations, with a subsequent report to be tabled to the Audit and Risk Committee by October 2022.*”

The consultant's review was presented to the Audit and Risk Committee on 31 January 2023, and the revised *Register of Delegation of Authority* was endorsed by Council in June 2023 (CJ096-06/23).

A key outcome of the full review of the Register was to provide a schedule of comparative information (against four other similar sized local governments) and expert opinion on the City of Joondalup *Register of Delegation of Authority*, as well as:

- whether the City of Joondalup's Delegations of Authority meets current legislative obligations
- whether the City of Joondalup's Delegations of Authority compares favourably with comparative local governments, identifying key differences
- whether the City of Joondalup's Delegations of Authority are written and constructed in a manner that might be considered good practice, demonstrated by the way each delegation is applied and the efficiency/effectiveness of decision-making with the delegations in place; and identification of any opportunities for improvement
- the implications on the City's operations should the City of Joondalup's Delegations of Authority be removed.

The consultant's report notes that there is considerable diversity in subjects, approaches and conditions taken by each of the Cities and WALGA. As quoted from the consultant's report, *“the fact that some Cities or WALGA have specific delegations may not of itself be a concern to the City of Joondalup because it may reflect specific circumstances, such as absence of a Local Law on a particular function, or even where there is a Local Law, the absence of a particular function within it may be addressed by a delegation, whereas such an approach may not be necessary at the City of Joondalup.”*

The Council last performed its annual review of its delegations at its meeting held on 27 June 2023 (CJ096-06/23 refers) and therefore, a formal review by Council is required before 30 June 2024. A full review of the *Register of Delegation of Authority* has been undertaken in 2024 and focused on assessing the suitability and relevance of delegations, as well as any new delegations that need to be made.

DETAILS

The 2024 annual review of the *Register of Delegation of Authority* was undertaken to determine the following:

- The appropriateness of the existing delegations and whether to amend or delete any delegations.
- The need for any additional delegations.

The proposed amendments reflect the following:

- Amending existing delegations to improve workflow processes and service delivery.
- Revoking of one delegation that has been consolidated into another delegation.
- Addition of six new delegations that align with the WALGA Delegation Register template.
- Minor wording and formatting changes.
- Re-numbering of delegations, to allow for removal of one delegation.

The main proposed changes are provided in the Schedule of Requested Changes (Attachment 1 refers).

The proposed amendments to the Register are outlined in Attachment 2 (marked up version) and the Register incorporating the proposed amendments is provided at Attachment 3 (clean version).

Issues and options considered

Council can either:

- retain the current *Register of Delegation of Authority*
- adopt the revised *Register of Delegation of Authority*, as provided in Attachment 3 to this Report
or
- adopt the revised *Register of Delegation of Authority*, as provided in Attachment 3 to this Report, with additional modifications.

Legislation / Strategic Community Plan / Policy implications

Legislation

Building Act 2011.
Bush Fires Act 1954.
Cat Act 2011.
Dog Act 1976.
Food Act 2008.
Graffiti Vandalism Act 2016.
Local Government Act 1995.
Planning and Development (Local Planning Schemes) Regulations 2015.
Planning and Development Act 2005.
Public Health Act 2016.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-1 Capable and effective - you have an informed and capable Council backed by a highly-skilled workforce.

Policy Not applicable.

Risk management considerations

Council is required to review its delegations under the *Local Government Act 1995* at least once every financial year and to review its delegations made under clause 82 of schedule 2 of the *Planning and Development (Local Planning Schemes) Regulations 2015* every two years. Failure to complete the review would result in non-compliance with its statutory responsibilities under these legislative frameworks.

Financial / budget implications

Not applicable.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

Not applicable.

COMMENT

Where legislation confers a function or power in a “local government” it was generally intended by Parliament to mean Council. However, there are many instances within the Act and other legislation that a function given to a local government is not exercisable, at least on a day-to-day basis by a Council but by the Chief Executive Officer or the local government’s administration. The Act itself makes it clear that:

- a Council’s role is not to exercise administrative (or management powers) but to exercise broader governance powers (section 2.7 of the Act)
- a Chief Executive Officer has the principal administration or management role of the local government - reflected in the specific statutory function to ‘manage the day-to-day operations of the local government (section 5.4(e) of the Act).

In view of this, local governments utilise levels of delegated authority to allow the Chief Executive Officer (and other officers) to undertake day-to-day statutory functions, thereby allowing Council to focus on policy development, representation, strategic planning and community leadership.

The use of delegated authority means the large volume of routine work of a local government can be effectively managed and acted on promptly, which in turn facilitates efficient service delivery to the community. The 2024 review has resulted in refining delegations to ensure the City's continued ability to maintain high standards of service delivery and improved workflow processes.

VOTING REQUIREMENTS

Absolute Majority.

OFFICER'S RECOMMENDATION

That Council:

- 1 ENDORSES the review of its delegations in accordance with sections 5.18 and 5.46 of the *Local Government Act 1995*;
- 2 BY AN ABSOLUTE MAJORITY ADOPTS the amended Register of Delegation of Authority as provided in Attachment 3 to this Report.

Cr Fishwick left the Chamber at 9.55pm and returned at 9.56pm.

ALTERNATE RECOMMENDATION

MOVED Cr Kingston, SECONDED Cr O'Neill that Council:

- 1 **ENDORSES the review of its delegations in accordance with sections 5.18 and 5.46 of the *Local Government Act 1995*;**
- 2 **BY AN ABSOLUTE MAJORITY ADOPTS the amended Register of Delegation of Authority as provided in Attachment 3 to this Report, subject to the following amendments:**
 - 2.1 **Delete section 1.1.5 – Choice of acceptable tender from an expression of interest;**
 - 2.2 **Delete section 1.1.6 – Choice of tender;**
 - 2.3 **Delete section 1.1.9 Disposing of property;**
 - 2.4 **Delete section 1.1.10 – Acquisition of interest in land by lease or other short term instrument;**
 - 2.5 **Delete section 1.1.16 – Authorising payment from the trust fund;**
 - 2.6 **Amend section 1.1.12 – Establishing panels of pre-qualified suppliers, amendment to now read “ Authority extends to the supply of goods and services valued up to \$100,000.”;**

- 2.7 Amend section 1.1.13 – Extension of existing contracts, amendment to now read “Authority to approve any contract extensions on tenders approved by Council valued up to \$250,000.”;**
- 2.8 Amend section 1.1.23 – Waiver of fees and granting of concessions, amendment to now read “Authority to waive or grant a concession in relation to any amount of money under \$2000 which is owed to the City other than rates and service charges.”;**
- 2.9 Amend section 1.1.24 – Write off of monies, amend conditions section to now read “Subject to:**
 - 2.9.1 Individual debtors to \$3000;**
 - 2.9.2 A report being provided to the Audit and Risk Committee on the next sitting of the Audit and Risk Committee upon the exercising of this delegation.”**

During debate it was requested that each Part be voted upon separately.

ALTERNATE MOVED Cr Kingston, SECONDED Cr O'Neill that Council:

- 1 ENDORSES the review of its delegations in accordance with sections 5.18 and 5.46 of the *Local Government Act 1995*;**

The Alternate Motion was Put and

CARRIED (11/2)

In favour of the Alternate Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Alternate Motion: Cr Jones and Cr Kingston.

ALTERNATE MOVED Cr Kingston, SECONDED Cr O'Neill that Council:

- 2 BY AN ABSOLUTE MAJORITY ADOPTS the amended Register of Delegation of Authority as provided in Attachment 3 to this Report, subject to the following amendments:**

- 2.1 Delete section 1.1.5 – Choice of acceptable tender from an expression of interest;**

MOVED Cr Kingston, SECONDED Cr O'Neill that Council:

2 BY AN ABSOLUTE MAJORITY ADOPTS the amended Register of Delegation of Authority as provided in Attachment 3 to this Report.

The Motion was Put and

CARRIED (9/4)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May and Cr Vinciullo.

Against the Motion: Cr Kingston, Cr O'Neill, Cr Pizzey and Cr Raftis.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ118-05/24)

MOVED Cr Kingston, SECONDED Cr O'Neill that Council:

1 **ENDORSES** the review of its delegations in accordance with sections 5.18 and 5.46 of the *Local Government Act 1995*;

2 **BY AN ABSOLUTE MAJORITY ADOPTS** the amended Register of Delegation of Authority as provided in Attachment 3 to this Report.

ATTACHMENTS

1. Schedule of Requested Changes [12.10.1 - 7 pages]
2. Delegation of Authority Register (Marked-up) [12.10.2 - 87 pages]
3. Delegation of Authority Register (Clean) [12.10.3 - 83 pages]

12.11 CORPORATE BUSINESS PLAN 2023–2027 QUARTER 3 REPORT (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	52605, 20560, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to receive the *Corporate Business 2023–2027 Quarter 3 Report*, the *Quarterly Capital Works Progress Report*, and the *Key Capital Works Project Quarterly Status Reports* for the period 1 January 2024 to 31 March 2024.

EXECUTIVE SUMMARY

The City's *Corporate Business Plan 2023–2027*, adopted by Council at the 27 June 2023 Council Meeting (CJ093-06/23 refers), is the City's 5-year medium-term planning document comprising the services, projects and activities developed in response to the vision, goals and outcomes of the City's *10-Year Strategic Community Plan, Joondalup 2032*.

The *Corporate Business Plan 2023–2027 Quarter 3 Report* provides information on the progress of 2023/2024 services, projects, and activities against the quarterly milestones of the *Corporate Business Plan 2023–2027* and is provided as Attachment 1 to this Report.

The *Quarterly Capital Works Progress Report* lists all the projects within the City's *5-Year Capital Works Program*. This report is provided as Attachment 2 to this Report.

The *Key Capital Works Project Quarterly Status Reports* provide quarterly status updates against the key capital works projects identified in the *Corporate Business Plan 2023–2027*. This report is provided as Attachment 3 to this Report.

Several amendments to milestones are proposed for the following non-capital works projects/initiatives listed in the *Corporate Business Plan 2023–2027*, including the following:

- Arts development program.
- Burns Beach café development.
- Community Safety Plan.
- Community, Youth Development and Libraries Plan.
- Digital City Plan.
- Duffy House commercial expression of interest.
- E-petitions system.
- Governance Framework review.
- Integrated Transport Strategy.

- International Economic Development Activities Plan (Global City Plan).
- Investment Attraction Guidelines.
- Joondalup City Centre Development — Boas Place.
- *Local Planning Scheme No. 3.*
- Ocean Reef Marina commercial site development business case.
- Public Art Masterplan and Strategy.

Further information on the specific projects/initiatives is provided in the details below.

It is therefore recommended that Council:

- 1 *RECEIVES the Corporate Business Plan 2023–2027 Quarter 3 Report shown as Attachment 1 to this Report;*
- 2 *RECEIVES the Quarterly Capital Works Progress Report for the period 1 January 2024 to 31 March 2024 shown as Attachment 2 to this Report;*
- 3 *RECEIVES the Key Capital Works Project Quarterly Status Reports for the period 1 January 2024 to 31 March 2024 shown as Attachment 3 to this Report;*
- 4 *APPROVES the removal of the quarter 4 milestones associated with the Arts development program in the Corporate Business Plan 2023–2027;*
- 5 *NOTES the discontinuation of the quarter 3 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;*
- 6 *APPROVES the removal of the existing quarter 4 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;*
- 7 *APPROVES the addition of a new quarter 4 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;*
- 8 *NOTES the discontinuation of the quarter 3 milestone associated with the Community Safety Plan in the Corporate Business Plan 2023–2027;*
- 9 *APPROVES the removal of the quarter 4 milestone associated with the Community Safety Plan in the Corporate Business Plan 2023–2027;*
- 10 *APPROVES the removal of the quarter 4 milestone associated with the Community, Youth Development and Libraries Plan in the Corporate Business Plan 2023–2027;*
- 11 *APPROVES the removal of the quarter 4 milestones associated with the Digital City Plan in the Corporate Business Plan 2023–2027;*
- 12 *APPROVES the addition of a new quarter 4 milestone associated with the Digital City Plan in the Corporate Business Plan 2023–2027;*
- 13 *APPROVES the removal of the quarter 4 milestones associated with the Duffy House commercial expression of interest in the Corporate Business Plan 2023–2027;*
- 14 *NOTES the discontinuation of the quarter 3 milestone associated with the E-petitions system in the Corporate Business Plan 2023–2027;*

- 15 *APPROVES the addition of a new quarter 4 milestone associated with the E-petitions system in the Corporate Business Plan 2023–2027;*
- 16 *NOTES the discontinuation of the quarter 3 milestone associated with the Governance Framework review in the Corporate Business Plan 2023–2027;*
- 17 *NOTES the discontinuation of the quarter 3 milestone associated with the Integrated Transport Strategy in the Corporate Business Plan 2023–2027;*
- 18 *APPROVES the removal of a quarter 4 milestone associated with the International Economic Development Activities Plan (Global City Plan) in the Corporate Business Plan 2023–2027;*
- 19 *NOTES the discontinuation of the quarter 3 milestone associated with the Investment Attraction Guidelines in the Corporate Business Plan 2023–2027;*
- 20 *APPROVES the removal of the quarter 4 milestone associated with the Investment Attraction Guidelines in the Corporate Business Plan 2023–2027;*
- 21 *APPROVES the removal of the quarter 4 milestones associated with the Joondalup City Centre Development — Boas Place in the Corporate Business Plan 2023–2027;*
- 22 *APPROVES the removal of the quarter 4 milestone associated with the Local Planning Scheme No 3 review in the Corporate Business Plan 2023–2027;*
- 23 *NOTES the discontinuation of the quarter 3 milestone associated with the Ocean Reef Marina commercial site development business case in the Corporate Business Plan 2023–2027;*
- 24 *APPROVES the removal of the quarter 4 milestone associated with the Ocean Reef Marina commercial site development business case in the Corporate Business Plan 2023–2027.*
- 25 *NOTES the discontinuation of a quarter 3 milestone associated with the Public Art Masterplan and Strategy in the Corporate Business Plan 2023–2027;*
- 26 *APPROVES the removal of the quarter 4 milestone associated with the Public Art Masterplan and Strategy in the Corporate Business Plan 2023–2027.*

BACKGROUND

The *Corporate Business Plan 2023–2027* was adopted by Council at its meeting held on 27 June 2023 (CJ093-06/23 refers). It contains the services, projects, and activities the City intends to deliver over five years, and quarterly milestones for those the City intends to deliver in the 2023/24 financial year. The *5-Year Corporate Business Plan* demonstrates how the outcomes of the *10-Year Strategic Community Plan, Joondalup 2032*, are translated into a five-year service delivery program.

The *Corporate Business Plan 2023–2027* sits within an Integrated Planning and Reporting Framework which builds in informing, resourcing, planning, and reporting requirements to ensure transparency and evidence of planned achievements. It is also a requirement of the City's Governance Framework 2021 to develop quarterly reports against annual projects and priorities that are presented to Council.

DETAILS

Corporate Business Plan 2023–2027 Quarterly Reports provide information on achievements and performance against the quarterly milestones set at the beginning of each year. The project milestones for each quarter are reported via colour codes to indicate if the milestone has been completed or is behind schedule. The budget status is reported via symbols to indicate if each project or activity is on budget, over budget, or under budget. In addition, a commentary for each milestone provides details on what has been achieved. Note that the report does not include projects and activities that do not have milestones for 2023/24.

Proposed amendments to existing milestones

Arts development program

It is proposed that the quarter 4 milestones associated with the arts development program be removed from the *Corporate Business Plan 2023–2027*. These milestones should be removed because the arts development program is ahead of schedule as the Arts Development Scheme funding was awarded in quarter 2. The table below shows the milestones that are proposed for removal.

Q4	Present the recommended grant recipients for the Arts Development Scheme funding (\$10,000+) to Council seeking endorsement.
	Determine the preferred recipients for the Arts Development Scheme funding (under \$10,000).

Burns Beach café development

It is proposed that the quarter 4 milestones associated with the Burns Beach café development be removed from the *Corporate Business Plan 2023–2027*. The project is currently experiencing delays due to scheduling constraints, and the quarter 3 milestone was not completed due to these delays. It is therefore proposed for Council to note that this quarter 3 milestone will not be rolled over for completion in quarter 4. Additionally, it is also proposed that Council approve the removal of the existing quarter 4 milestone, and the addition of a new quarter 4 milestone, as per the table below.

Q4	Identify the preferred commercial operator and commence negotiations on tender.
	[additional milestone] Progress stage 2 requests for additional information from successful respondents of the expression of interest process.

Community Safety Plan

Due to delays and changes in the method of consultation in the project plan, it is proposed that Council note that the quarter 3 milestone associated with the draft Community Safety Plan 2024–2028 will not be rolled over for completion in quarter 4. Instead, stakeholder consultation will be scheduled for 2024/25. It is also proposed that Council approve the removal of the existing quarter 4 milestone from the *Corporate Business Plan 2023–2027*, and presentation of the draft Community Safety Plan will be scheduled for 2024/25. The table below shows the milestone proposed for removal.

Q4	Present the draft Community Safety Plan 2024–2028 to Council seeking endorsement.
----	--

Community, Youth Development and Libraries Plan

It is proposed that the quarter 4 milestone associated with the Community, Youth Development and Libraries Plan be removed from the *Corporate Business Plan 2023–2027*. Due to competing priorities and staffing constraints, short-term operational requirements have taken priority over long-term planning. Therefore, it is proposed that the quarter 4 milestone to present the draft plan to Council seeking endorsement be removed and scheduled for 2024/25.

Q4	Present the draft Community, Youth Development and Libraries Plan to Council seeking endorsement.
----	--

Digital City Plan

It is proposed that the existing quarter 4 milestones associated with the Digital City Plan be removed from the *Corporate Business Plan 2023–2027*. The development of a new draft Digital City Plan is behind schedule due to delays with the finalisation of the draft Economic Development Strategy, of which the draft Digital City Plan is a subsidiary. Therefore, it is proposed that Council approve the removal of the existing quarter 4 milestones and the addition of a new quarter 4 milestone, as per the table below.

Q4	Present the draft Digital City Plan 2024–2029 to Elected Members seeking feedback.
	Commence implementation of the Digital City Plan 2024–2029.
	[additional milestone] Progress development of a draft Digital City Plan 2024–2029.

Duffy House commercial expression of interest

It is proposed that the quarter 4 milestones associated with the Duffy House commercial expression of interest be removed from the *Corporate Business Plan 2023–2027* and rescheduled for quarter 1 and 2 of 2024/25. The initial delays in finalising the land transfer and tenure arrangements had a flow-on effect with competing priorities, and the project is currently delayed. The quarter 3 milestone will be rolled over for completion in quarter 4 and it is proposed that Council approve the removal of the quarter 4 milestones from the *Corporate Business Plan 2023–2027*, as per the table below.

Q4	Assess submissions received and present the submissions to Council seeking endorsement.
	Identify the preferred commercial operator and commence negotiations on tenure.
	[milestone from previous quarter] Advertise a request for expression of interest for a commercial operator at the site.

E-petitions system

It was expected that the e-petitions system would be launched in quarter 3; however, this did not occur due to changes to the Project Axiom release schedule. It is anticipated that the new e-petitions system will be launched on 1 July 2024. Therefore, it is proposed for Council to note that the quarter 3 milestone will not be rolled over for completion in quarter 4 and for Council to approve the additional quarter 4 milestone, as per the table below.

Q4	[additional milestone] Finalise the development of the e-petitions platform.
----	---

Governance Framework review

Due to delays in internal approvals processes, it is proposed for Council to note that the quarter 3 milestone associated with the Governance Framework review will not be rolled over for completion in quarter 4. It is anticipated that the outcomes of the review will be presented to Council in 2024/25.

Integrated Transport Strategy

It was planned for the draft Integrated Transport Plan 2024–2034 to be presented to Elected Members seeking feedback in quarter 3. However, due to scheduling issues with the March Strategy Session, the project plan was amended to remove the requirement to present the draft plan to Elected Members seeking feedback. Instead, the draft plan will be presented to Council seeking endorsement in quarter 4. Therefore, it is proposed that Council notes that the quarter 3 milestone associated with the draft Integrated Transport Plan 2024–2034 will not be rolled over for completion in quarter 4.

International Economic Development Activities Plan (Global City Plan)

It is proposed that one of the quarter 4 milestones associated with the International Economic Development Activities Plan (Global City Plan) be removed from the *Corporate Business Plan 2023–2027* and rescheduled for 2024/25. The development of a new draft Global City Plan is behind schedule due to delays with the finalisation of the draft Economic Development Strategy, of which the draft Global City Plan is a subsidiary. Therefore, it is proposed that Council approve the removal of one of the existing quarter 4 milestones, as per the table below.

Q4	Implement scheduled actions from the International Economic Development Activities Plan (2017) for the quarter.
	Commence development of a draft Global City Plan 2024–2029.

Investment Attraction Guidelines

It is proposed that the quarter 4 milestone associated with the Investment Attraction Guidelines be removed from the *Corporate Business Plan 2023–2027*. This project is behind schedule due to competing priorities, and it is anticipated that significant progress on the draft Investment Attraction Guidelines will not be achievable until the 2024/25 financial year. It is therefore proposed for Council note that the quarter 3 milestone associated with the Investment Attraction Guidelines will not be rolled over for completion in quarter 4, and to approve the removal of the quarter 4 milestone, as per the table below.

Q4	Present the draft Investment Attraction Guidelines to Elected Members seeking feedback.
----	--

Joondalup City Centre Development — Boas Place

It is proposed that the quarter 4 milestones associated with the Joondalup City Centre — Boas Place project be removed from the *Corporate Business Plan 2023–2027*. The progress of the strategy for investigations into opportunities for the development of the Joondalup City Centre is behind schedule due to delays in liaising with external consultants. Therefore, it is proposed to roll over the quarter 3 milestones for completion in quarter 4 and remove the existing quarter 4 milestones, as per the table below.

Q4	Progress scheduled actions from the endorsed strategy for the quarter.
	Present reports to Elected Members on the progress and status of the project as required
	[milestone from previous quarter] Finalise a strategy for investigations into opportunities for the development of the Joondalup City Centre.
	[milestone from previous quarter] Progress scheduled actions from the endorsed strategy for the quarter.
	[milestone from previous quarter] Present reports to Elected Members on the progress and status of the project as required.

Local Planning Scheme No 3 review

It is proposed that the quarter 4 milestone associated with the Local Planning Scheme No 3 review be removed from the *Corporate Business Plan 2023–2027*. The quarter 4 milestone calls for the City to present a report to Council seeking endorsement to initiate an operational review of the Local Planning Scheme No 3. There is no statutory requirement for Council to endorse the initiation of the review, and a report on the review will be presented to Elected Members in the 2024/25 financial year. Therefore, it is proposed to remove the quarter 4 milestone as per the table below.

Q4	Present a report to Council seeking endorsement to initiate an operational review of the Local Planning Scheme No. 3.
----	--

Ocean Reef Marina commercial site development business case

It is proposed that the quarter 4 milestone associated with the Ocean Reef Marina commercial site development business case be removed from the *Corporate Business Plan 2023–2027*. Due to external delays with DevelopmentWA providing confirmation, the business case was not able to be provided to the proponent in the quarter. As there is no timeframe for Development WA's confirmation, these external delays are expected to continue beyond quarter 4. Therefore, it is proposed that Council note the quarter 3 milestone will not be rolled over for completion in quarter 4, and approve the removal of the quarter 4 milestone, as per the table below.

Q4	Present the business case to Council seeking endorsement.
----	--

Public Art Masterplan and Strategy

It is proposed that the quarter 4 milestone associated with the Public Art Masterplan and Strategy be removed from the *Corporate Business Plan 2023–2027*. Due to delays in the finalisation of the draft masterplan and strategy, it has not yet been presented to Elected Members for feedback nor presented to Council for endorsement. Therefore, it is proposed that Council approve the removal of the quarter 4 milestone from the *Corporate Business Plan 2023–2027*. The quarter 3 milestone to present the draft Public Art Masterplan and Strategy to Elected Members seeking feedback will be rolled over for completion in quarter 4, and it is proposed that Council note that the milestone to present the draft to Council seeking endorsement will not roll over and will be scheduled for 2024/25.

Q4	Commence implementation of the Public Art Masterplan and Strategy 2023–2033.
	[milestone from previous quarter] Liaise with the external consultant to present the draft Public Art Masterplan and Strategy 2023–2033 to Elected Members seeking feedback.

Issues and options considered

Not applicable.

Legislation / Strategic Community Plan / Policy implications

Legislation *Local Government (Administration) Regulations 1996.*
 Local Government Act 1995.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-1 Capable and effective - you have an informed and capable Council backed by a highly-skilled workforce.
 5-4 Responsible and financially sustainable - you are provided with a range of City services which are delivered in a financially responsible manner.

Policy Not applicable.

Risk management considerations

Not applicable.

Financial / budget implications

The 2023/24 services, projects, and activities in the *Corporate Business Plan 2023–2027* were included in the 2023/24 Annual Budget.

Regional significance

Not applicable.

Sustainability implications

The services, projects, and activities in the *Corporate Business Plan 2023–2027* are aligned to the key themes in Joondalup 2032, developed to ensure the sustainability of the City.

The key themes are as follows:

- 1 Community
- 2 Environment
- 3 Place
- 4 Economy
- 5 Leadership

Consultation

Not applicable.

COMMENT

The *Corporate Business Plan 2023–2027* was adopted by Council at its meeting held on 27 June 2023 (CJ093-06/23 refers). The *Corporate Business Plan 2023–2027 Quarter 3 Report* has been included as Attachment 1 to this report. Detailed reports on the progress and the project status of the 5-Year Capital Works Program have been included as Attachments 2 and 3. These reports provide an overview of progress against all the projects and programs in the 2023/24 Capital Works Program.

The *Corporate Business Plan 2023–2027 Quarter 3 Report* provides an explanation when milestones were not met in the quarter. The most common explanations for milestones being behind schedule are clarified as follows:

- **Conflicting/competing priorities** refers to any unexpected increases and divergences of workloads that affect the City's ability to deliver the milestones on schedule.
- **Resourcing/staffing constraints** refers to staff shortages due to vacancies and/or the responsible officer(s) being on leave; and subsequently, workloads are transferred and increased, causing delays in the delivery of milestones.
- **External delays** refer to an inability to meet the milestone(s) due to delays from outside the organisation; usually from the State Government, external stakeholders, and/or other parties in joint initiatives.

- **Scheduling conflicts/delays** refer to issues scheduling presentations, sessions and meetings with Elected Members, Council, and/or internal or external stakeholders or parties, causing delays in the delivery of milestones.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ119-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council:

- 1 **RECEIVES the Corporate Business Plan 2023–2027 Quarter 3 Report shown as Attachment 1 to this Report;**
- 2 **RECEIVES the Quarterly Capital Works Progress Report for the period 1 January 2024 to 31 March 2024 shown as Attachment 2 to this Report;**
- 3 **RECEIVES the Key Capital Works Project Quarterly Status Reports for the period 1 January 2024 to 31 March 2024 shown as Attachment 3 to this Report;**
- 4 **APPROVES the removal of the quarter 4 milestones associated with the Arts development program in the Corporate Business Plan 2023–2027;**
- 5 **NOTES the discontinuation of the quarter 3 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;**
- 6 **APPROVES the removal of the existing quarter 4 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;**
- 7 **APPROVES the addition of a new quarter 4 milestone associated with the Burns Beach café development in the Corporate Business Plan 2023–2027;**
- 8 **NOTES the discontinuation of the quarter 3 milestone associated with the Community Safety Plan in the Corporate Business Plan 2023–2027;**
- 9 **APPROVES the removal of the quarter 4 milestone associated with the Community Safety Plan in the Corporate Business Plan 2023–2027;**
- 10 **APPROVES the removal of the quarter 4 milestone associated with the Community, Youth Development and Libraries Plan in the Corporate Business Plan 2023–2027;**
- 11 **APPROVES the removal of the quarter 4 milestones associated with the Digital City Plan in the Corporate Business Plan 2023–2027;**
- 12 **APPROVES the addition of a new quarter 4 milestone associated with the Digital City Plan in the Corporate Business Plan 2023–2027;**
- 13 **APPROVES the removal of the quarter 4 milestones associated with the Duffy House commercial expression of interest in the Corporate Business Plan 2023–2027;**

- 14 **NOTES** the discontinuation of the quarter 3 milestone associated with the E-petitions system in the Corporate Business Plan 2023–2027;
- 15 **APPROVES** the addition of a new quarter 4 milestone associated with the E-petitions system in the Corporate Business Plan 2023–2027;
- 16 **NOTES** the discontinuation of the quarter 3 milestone associated with the Governance Framework review in the Corporate Business Plan 2023–2027;
- 17 **NOTES** the discontinuation of the quarter 3 milestone associated with the Integrated Transport Strategy in the Corporate Business Plan 2023–2027;
- 18 **APPROVES** the removal of a quarter 4 milestone associated with the International Economic Development Activities Plan (Global City Plan) in the Corporate Business Plan 2023–2027;
- 19 **NOTES** the discontinuation of the quarter 3 milestone associated with the Investment Attraction Guidelines in the Corporate Business Plan 2023–2027;
- 20 **APPROVES** the removal of the quarter 4 milestone associated with the Investment Attraction Guidelines in the Corporate Business Plan 2023–2027;
- 21 **APPROVES** the removal of the quarter 4 milestones associated with the Joondalup City Centre Development — Boas Place in the Corporate Business Plan 2023–2027;
- 22 **APPROVES** the removal of the quarter 4 milestone associated with the *Local Planning Scheme No. 3* review in the Corporate Business Plan 2023–2027;
- 23 **NOTES** the discontinuation of the quarter 3 milestone associated with the Ocean Reef Marina commercial site development business case in the Corporate Business Plan 2023–2027;
- 24 **APPROVES** the removal of the quarter 4 milestone associated with the Ocean Reef Marina commercial site development business case in the Corporate Business Plan 2023–2027.
- 25 **NOTES** the discontinuation of a quarter 3 milestone associated with the Public Art Masterplan and Strategy in the Corporate Business Plan 2023–2027;
- 26 **APPROVES** the removal of the quarter 4 milestone associated with the Public Art Masterplan and Strategy in the Corporate Business Plan 2023–2027.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

12.12 OUTCOMES OF COMMUNITY CONSULTATION - ILUKA-BURNS BEACH FORESHORE RESERVE MANAGEMENT PLAN (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	102082, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider the outcomes of community consultation on the draft Iluka-Burns Beach Foreshore Reserve Management Plan and endorse the final Iluka-Burns Beach Foreshore Reserve Management Plan.

EXECUTIVE SUMMARY

The City is responsible for the management of a diverse number of natural areas and undertakes conservation activities to enhance and protect the biodiversity values within these areas in order to reduce the impact of environmental threats.

The Iluka-Burns Beach Foreshore Reserve Management Plan (Attachment 2 refers) outlines a framework for the environmental management of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve over the next 10 years. The plan describes the potential environmental impacts, risks and threats that are likely to affect the biodiversity values of the site and proposes management strategies to be implemented over the life of the plan to minimise the potential impacts of these threats.

At its meeting held on 12 December 2023 (CJ265-12/23 refers), Council endorsed the release of the draft Iluka-Burns Beach Foreshore Reserve Management Plan for community consultation, for a period of 21 days. The feedback received is outlined within the community consultation summary, shown as Attachment 1 to this Report.

Amendments have been made to the draft Iluka-Burns Beach Foreshore Reserve Management Plan to include feedback, where appropriate.

BACKGROUND

Environmental threats have the potential to degrade natural areas and reduce biodiversity values. Environmental threats include weeds, plant diseases, fire, non-native fauna species, human impacts and inappropriate access. Natural area management plans are developed for the City's major conservation areas in order to provide strategic ongoing management of the City's natural areas and protect native vegetation and ecosystems.

The Iluka-Burns Beach Foreshore Reserve Management Plan outlines a framework for the environmental management of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve (referred to as Iluka-Burns Beach) for the next ten years. Iluka-Burns Beach are classified as Major Conservation Areas due to the high biodiversity values of the area.

Iluka Foreshore Reserve contains a significant State listed priority ecological community 'Coastal shrublands on shallow sands' (Priority 3) and is recognised for its regional environmental significance by being designated as a Bush Forever site (325) by the Western Australian Planning Commission in 2000. Iluka Foreshore Reserve contains the Burns Beach Waugal Aboriginal heritage site (ID 22672) and is also located adjacent to the State Heritage Register listed Marmion Marine Park.

Burns Beach Foreshore Reserve contains a significant State listed priority ecological community 'Coastal shrublands on shallow sands' (Priority 3) and the majority of the site is recognised for its regional environmental significance by being designated as a Bush Forever site (322) by the Western Australian Planning Commission in 2000. Burns Beach Foreshore Reserve is also located adjacent to the State Heritage Register listed Marmion Marine Park.

Environmental threats that were identified at both Iluka Foreshore Reserve and Burns Beach Foreshore Reserve include weeds, pathogens and plant disease, human impacts, access and infrastructure, non-native species and bushfire.

A number of management actions are proposed within the plan to address these environmental threats. These include:

- ongoing weed control and monitoring
- ongoing pathogen management
- feral animal monitoring and control
- bushfire mitigation
- monitoring flora and fauna species through field surveys
- endangered flora species management
- maintaining infrastructure
- the implementation of environmental education initiatives
- supporting the Friends Group.

It is also proposed that the City reviews the risk and management of unexploded ordnances within Burns Beach Foreshore Reserve and coastal hazard risks such as the limestone cliffs across the Iluka-Burns Beach Foreshore Reserve.

The proposed management actions will be implemented in partnership with key stakeholders and community groups, in particular Friends of North Ocean Reef – Iluka Foreshore and other key stakeholders and community groups, where relevant.

DETAILS

The community was invited to provide feedback on the draft Iluka-Burns Beach Foreshore Reserve Management Plan from 25 January 2024 to 15 February 2024. A total of 3 identified stakeholders (including the Department of Biodiversity, Conservation and Attractions, Friends of North Ocean Reef – Iluka Foreshore and City of Wanneroo) and 12 individual community members provided submissions.

Key changes made to the Iluka-Burns Beach Foreshore Reserve Management Plan as a result of community and stakeholder feedback are shown in tracked changes in Attachment 3 and include the following:

- Including 'conservation' in the aim and purpose of the Plan.
- Updating content regarding the City's Pest Plant Local Law to include Golden Crownbeard as a pest plant.
- Emphasising the significant contribution that Friends of North Ocean Reef – Iluka Foreshore make to the conservation of Iluka Foreshore Reserve.

- Adding additional information regarding flora and fauna occurrences on site.
- Adding content regarding the City's plans to upgrade and widen the coastal shared path from Hillarys to Burns Beach.

Comments provided in submissions which did not result in changes in the Iluka-Burns Beach Foreshore Reserve Management Plan and were noted by the City included the following:

- Suggestions not related to the purpose of the Plan.
- Suggestions that were already addressed through the management actions in the Plan.
- Suggestions related to management actions in other City plans such as the Weed Management Plan 2023 – 2033, Pathogen Management Plan 2018 – 2028 and draft Coastal Hazard Risk Management and Adaptation Plan.
- Suggestions to update the mapping and physical environment sections of the Plan which did not impact upon the management actions.
- Suggestions related to the day to day natural area management operations that did not impact upon the management actions in the Plan were provided to the Natural Environment team for consideration.
- Anecdotal information regarding additional flora and fauna that did not impact upon the management actions in the Plan were provided to the Natural Environment team for consideration.
- Advice from the Department of Biodiversity, Conservation and Attractions was discussed with them and it was agreed that no edits were required to the Plan.

Issues and options considered

Council may choose to:

- endorse the Iluka-Burns Beach Foreshore Reserve Management Plan without any amendments
- endorse the Iluka-Burns Beach Foreshore Reserve Management Plan with amendments as shown in Attachment 2. This is the recommended option or
- endorse the Iluka-Burns Beach Foreshore Reserve Management Plan with further amendments.

Legislation / Strategic Community Plan / Policy implications

Legislation *Biodiversity Conservation Act 2016.*
Environment Protection and Biodiversity Conservation Act 1999.
Environmental Protection Act 1986.

10-Year Strategic Community Plan

Key theme 2. Environment.

Outcome 2-1 Managed and protected - you value and enjoy the biodiversity in local bushland, wetland and coastal areas.
2-4 Resilient and prepared - you understand and are prepared for the impacts of climate change and natural disasters.

Policy *Sustainability Council Policy.*

Risk management considerations

A coordinated and planned approach is required to address issues in natural areas and provide strategies for ongoing long-term management. If management plans are not developed to guide the conservation efforts within the City's natural areas, there is a risk that the overall condition of the native bushland areas of the City will become degraded.

Financial / budget implications

Funds are currently allocated within the City's annual operating budget to implement conservation and maintenance activities at Iluka Foreshore Reserve and Burns Beach Foreshore Reserve, however the implementation of some recommendations from the Iluka-Burns Beach Foreshore Reserve Management Plan will have some additional budget implications and these will be subject to the City's annual budget approvals process. The operating budget for conservation and maintenance works at Iluka Foreshore Reserve and Burns Beach Foreshore Reserve is approximately \$80,000 annually. The recommended management actions for further ecological surveys and signage installations are estimated to cost \$70,000 over the life of the plan, subject to approval via the annual budget process.

Opportunities to apply for grant funding will also be investigated, as they arise.

Regional significance

Remnant vegetation within Iluka Foreshore Reserve and Burns Beach Foreshore Reserve has regional and state environmental significance due to the type of vegetation at the site, the limited extent of the vegetation left in its naturally occurring geographic range and the limited amount of this vegetation remaining within the Perth Metropolitan Region.

Sustainability implications

Environmental threats have the potential to degrade natural areas and reduce biodiversity values. The implementation of the Iluka-Burns Beach Foreshore Reserve Management Plan will ensure that measures are taken to address threats within this natural area and provide strategies for ongoing long-term management which will result in protection of the natural environment at Iluka Foreshore Reserve and Burns Beach Foreshore Reserve.

The Iluka-Burns Beach Foreshore Reserve Management Plan includes actions that target community education and awareness to ensure that our community is well-informed regarding the environmental values of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve. The actions proposed will enhance the natural assets of the area while providing the community with passive recreation opportunities.

Consultation

The community was invited to provide feedback on the draft Iluka-Burns Beach Foreshore Reserve Management Plan from 25 January 2024 to 15 February 2024. A total of 3 identified stakeholders (including the Department of Biodiversity, Conservation and Attractions, Friends of North Ocean Reef – Iluka Foreshore and City of Wanneroo) and 12 individual community members provided submissions with the following common themes:

- Requests to continue funding the work of environmental Friends' Groups.
- Support for the management and preservation of conservation areas.
- Specific requests for updates to information in the draft Plan.

The Community Consultation Outcomes Report is provided in Attachment 1 to this Report.

COMMENT

The draft Iluka-Burns Beach Foreshore Reserve Management Plan will inform maintenance schedules by providing prioritised management recommendations to be implemented within Iluka Foreshore Reserve and Burns Beach Foreshore Reserve over a 10 year period. The plan will also increase opportunities for the City to apply for grant funding by having a detailed forward schedule of projects to be carried out within the foreshore reserves.

The implementation of the plan will allow the City to demonstrate leadership in addressing environmental threats, providing strategic ongoing management of natural areas and raise community awareness regarding the need to protect the biodiversity values of the environment in the future.

The plan will be continually monitored to track the progress of implementation and an annual performance review will be undertaken, including an assessment against the Key Performance Indicator. A major review of the plan will be conducted at the end of the 10-year period.

VOTING REQUIREMENTS

Simple Majority.

Cr May left the Chamber at 10.05pm.

The Governance Officer left the Chamber at 10.05pm.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ120-05/24)

MOVED Cr Hill, SECONDED Cr Hutton that Council ENDORSES the Iluka-Burns Beach Foreshore Reserve Management Plan as shown in Attachment 2 to this Report.

The Motion was Put and

CARRIED (12/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

Name / Position	Mayor Hon. Albert Jacob, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.13 – List of Payments made during the month of March 2024.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mayor Jacob does some part time work for Thomson Geer. Mayor Jacob does not work on City of Joondalup matters.

12.13 LIST OF PAYMENTS MADE DURING THE MONTH OF MARCH 2024 (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director of Corporate Services
FILE NUMBER	09882, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to note the list of accounts paid under the Chief Executive Officer's delegated authority during the month of March 2024.

EXECUTIVE SUMMARY

This report shows the list of payments made under delegated authority during March 2024 totaling \$21,234,499.08.

It is therefore recommended that Council NOTES the Chief Executive Officer's list of accounts for March 2024 paid under delegated authority in accordance with Regulation 13(1) of the Local Government (Financial Management) Regulations 1996 forming Attachments 1, 2 and 3 to this Report, totaling \$21,234,499.08.

BACKGROUND

Council has delegated, to the Chief Executive Officer, the exercise of its power to make payments from the City's Municipal and Trust funds. In accordance with Regulation 13 of the *Local Government (Financial Management) Regulations 1996* a list of accounts paid by the Chief Executive Officer is to be provided to Council, where such delegation is made.

DETAILS

The table below summarises the payments drawn on the funds during the month of March 2024. Lists detailing the payments made are appended as Attachments 1 and 2 to this Report.

The vouchers for the month are appended as Attachment 3 to this Report.

FUNDS	DETAILS	AMOUNT
Municipal Account	Municipal Cheques & EFT Payments 113121-113140 & EF118446-EF118447 & EF118453 – EF118795 & EF118800 - EF119185 Net of cancelled payments	\$16,097,248.31
	Vouchers 3728A -3741A	\$5,216,824.87
	Bond Refund Cheques & EFT Payments EF118448 – EF118452 & EF118796 - EF118799 Net of cancelled payments.	\$10,425.90
Total		\$21,234,499.08

Issues and options considered

There are two options in relation to the list of payments.

Option 1

That Council declines to note the list of payments paid under delegated authority. The list is required to be reported to Council in accordance with Regulation 13(1) of the *Local Government (Financial Management) Regulations 1996*, and the payments listed have already been paid under the delegated authority. This option is not recommended.

Option 2

That Council notes the list of payments paid under delegated authority. This option is recommended.

Legislation / Strategic Community Plan / Policy implications

Legislation

Local Government (Financial Management) Regulations 1996.

The Council has delegated to the Chief Executive Officer the exercise of its authority to make payments from the Municipal and Trust Funds, therefore in accordance with Regulation 13(1) of the *Local Government (Financial Management) Regulations 1996*, a list of accounts paid by the Chief Executive Officer is prepared each month showing each account paid since the last list was prepared.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-4 Responsible and financially sustainable - you are provided with a range of City services which are delivered in a financially responsible manner.

Policy Not applicable.

Financial / budget implications

All expenditure from the Municipal Fund was included in the Annual Budget as adopted or revised by Council.

Regional significance

Not applicable.

Sustainability implications

Expenditure has been incurred in accordance with budget parameters, which have been structured on financial viability and sustainability principles.

Consultation

Changes in the treatment of bonds received and repaid, from being held in the Trust Fund to now being reflected in the Municipal Fund, have arisen from a directive by the Office of the Auditor General.

COMMENT

All Municipal Fund expenditure included in the list of payments is incurred in accordance with the City of Joondalup *2023-24 Revised Budget* as adopted by Council at its meeting held on 27 February 2024 (CJ024-02/24 refers) or has been authorized in advance by the Mayor or by resolution of Council as applicable.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION

That Council NOTES the Chief Executive Officer's list of accounts for March 2024 paid under Delegated Authority in accordance with Regulation 13(1) of the *Local Government (Financial Management) Regulations 1996* forming Attachments 1, 2 and 3 to this Report, totaling \$21,234,499.08.

ALTERNATE RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ121-05/24)

MOVED Cr O'Neill, SECONDED Cr Raftis that Council:

- 1 NOTES the Chief Executive Officer's list of accounts for March 2024 paid under Delegated Authority in accordance with Regulation 13(1) of the Local Government (Financial Management) Regulations 1996 forming Attachments 1, 2 and 3 to this Report, totaling \$21,234,499.08;**
- 2 NOTES that payments EF118744 and EF119125 will be reviewed by the internal auditor and a report provided to a future ordinary Audit and Risk Committee Meeting.**

The Alternate Motion was Put and

CARRIED (11/1)

In favour of the Alternate Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Kingston, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Alternate Motion: Cr Jones.

ATTACHMENTS

- 2. Chief Executive Officers Delegated Municipa Payment List (Bond Refunds) for the month March 2024 [12.13.2 - 2 pages]**
- 3. Municipal Vouchers for the month of March 2024 [12.13.3 - 1 page]**

12.14 FINANCIAL ACTIVITY STATEMENT FOR MARCH 2024 (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	07882, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to note the Financial Activity Statement for the period ended 31 March 2024.

EXECUTIVE SUMMARY

At its meeting held on 27 June 2023 (CJ109-06/23 refers), Council adopted the *2023-24 Annual Budget*. Council subsequently amended the budget at its meeting held on 22 August 2023 (CJ146-08/23 refers) and on 28 November 2023 (CJ238-11/23 and CJ241-11/23 refers). Council subsequently revised the budget at its meeting held on 27 February 2024 (CJ024-02/24). The figures in this report are compared to the revised budget.

The March 2024 Financial Activity Statement Report shows an overall favourable variance of \$13,000,051 from operations and capital, after adjusting for non-cash items.

There are a number of factors influencing the favourable variance, but it is predominantly due to timing of revenue and expenditure compared to the budget estimate at the end of March. The notes in Attachment 4 identify and provide commentary on the individual key material revenue and expenditure variances to date.

The key elements of the variance are summarised below:

Key variances for March were:

Materials and Contracts

\$4,207,160

Materials and Contracts expenditure is \$4,207,160 below budget. This is spread across a number of different areas including External Service Expenses \$1,128,516, Professional Fees and Costs \$848,304, Waste Management Services \$569,253, Furniture, Equipment and Artworks \$395,806, Other Materials \$296,283, Public Relations, Advertising and Promotions \$268,151 and Travel, Vehicles and Plant \$228,761. This is partially offset by Computing (\$172,913).

Employee Costs

\$770,811

Employee Costs expenditure is marginally below budget. Variances predominantly arose in Salaries and Wages \$472,418 due to the cumulative impact of vacancies across various teams, lower than estimated expenditure in Staff Training \$194,483 and Agency Employees \$110,775. This is partially offset by Salaries and Wages for Casuals (\$198,552) mainly due to higher casuals costs arising from higher than estimated activity, and revenue, at the Craigie Leisure Centre.

Fees and Charges

(\$123,080)

The marginal unfavourable variance in Fees and Charges is driven mainly by lower than estimated ticketing revenue from the Joondalup Festival (\$102,729).

It is therefore recommended that Council NOTES the Financial Activity Statement for the period ended 31 March 2024 forming Attachment 1 to this Report and the Financial Position Statement at 31 March 2024 forming Attachment 2 to this Report.

BACKGROUND

The *Local Government (Financial Management) Regulations 1996* require a monthly Financial Activity Statement to be prepared according to nature classification and a monthly Financial Position Statement.

DETAILS

Issues and options considered

The Financial Activity Statement for the period ended 31 March 2024 is appended as Attachment 1 to this Report and the Financial Position Statement at 31 March 2024 is appended as Attachment 2 to this Report.

Legislation / Strategic Community Plan / Policy implications

Legislation Section 6.4 of the *Local Government Act 1995* requires a local government to prepare an annual financial report for the preceding year and such other financial reports as are prescribed. Regulation 34(1) of the *Local Government (Financial Management) Regulations 1996* requires the local government to prepare each month a statement of financial activity reporting on the revenue and expenditure as set out in the annual budget. Regulation 35(1) of the *Local Government (Financial Management) Regulations 1996* requires the local government to prepare each month a statement of financial position reporting on the financial position as at the reporting date

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-4 Responsible and financially sustainable.

Policy Not applicable.

Risk management considerations

In accordance with section 6.8 of the *Local Government Act 1995*, a local government is not to incur expenditure from its municipal funds for an additional purpose except where the expenditure is authorised in advance by an absolute majority of Council.

Financial / budget implications

All amounts quoted in this report are exclusive of GST.

Regional significance

Not applicable.

Sustainability implications

Expenditure was incurred in accordance with budget parameters, structured on financial viability and sustainability principles.

Consultation

In accordance with section 6.2 of the *Local Government Act 1995*, the *Annual Budget* was prepared having regard to the Strategic Financial Plan, prepared under Section 5.56 of the *Local Government Act 1995*. The Mid Year Review Budget was prepared in accordance with Regulation 33A of the *Local Government (Financial Management) Regulations 1996*.

KEY INDICATORS

Rates Collection

Rates collections as a percentage of rates issued (debtors) is marginally lower than the previous financial year at the end of March. Collection levels at the end of this financial year are projected to compare favourably with the prior year.

Economic Indicators

Annual Perth CPI fell to 3.6% at the end of the December 2023 quarter reflecting a decline over the 12-month period even though the quarter-on-quarter movement shows that Perth CPI rose by 1.5% in the December 2023 quarter.

Western Australian wages rose 0.8% in Q4 2023, the second strongest annual increase of all states. Western Australian private sector wages increased by 0.8% in the quarter and 4.6% over the year, the most of all states. Public sector wages are up 1.0% quarter on quarter (QoQ) and 5.2% year on year (YoY).

Quarterly information for Q1 2024 is expected in the third week of April 2024.

COMMENT

All expenditure included in the Financial Activity Statement is incurred in accordance with the provisions of the 2023-24 revised budget or has been authorised in advance by Council where applicable.

VOTING REQUIREMENTSSS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ122-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council NOTES the Financial Activity Statement for the period ended 31 March 2024 forming Attachment 1 to this Report and the Financial Position Statement at 31 March 2024 forming Attachment 2 to this Report.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.
Against the Motion: Nil.

12.15 CARD TRANSACTIONS FOR THE MONTH OF MARCH 2024 (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	09882, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

For Council to note card transactions incurred during the month of March 2024.

EXECUTIVE SUMMARY

This report presents the card transactions incurred during the month of March 2024, comprising corporate credit card and fuel card transactions.

It is therefore recommended that Council NOTES the list of card transactions for the month ended 31 March 2024 in accordance with Regulation 13A(1) of the Local Government (Financial Management) Regulations 1996 as shown in Attachments 1 and 2 to this Report.

BACKGROUND

Council has delegated, to the Chief Executive Officer, the exercise of its power to make payments from the City's Municipal and Trust funds. Regulation 13A of the *Local Government (Financial Management) Regulations 1996* a list of payments made by credit, debit, purchasing or other cards by employees is required to be provided to Council.

The Department of Local Government, Sport and Cultural Industries has advised the City that the intent of Regulation 13A is to present transactions incurred in a month, whether payment, that is, transfer of funds from the City to a supplier, has taken place or not.

DETAILS

The City incurred the following card transactions during the month of March 2024.

Corporate credit card transactions	\$51,165.06
Fuel card transactions (Ampol)	\$65,959.51
Total for the month	\$117,124.57

Details of transactions from corporate credit cards and fuel cards are contained in Attachments 1 and 2 respectively.

The City's corporate credit cards are issued and managed in accordance with the Corporate Credit Cards Policy. Suppliers from whom goods or services are procured using the corporate credit cards are paid at the time of purchase by the card issuer who the City subsequently pays for all card transactions during the month. Payment to the card issuer typically occurs at the end of the transaction month or early in the following month. All the City's corporate credit cards have been issued by the City's bankers, Westpac.

Fuel cards are attached to specific vehicles and plant items, such as ride-on mowers, that require fuel. The City has a contract with Ampol engaged through the State Government Common Use Arrangements. Fuel cards are utilised at Ampol outlets under the terms of the contract and record the cost of fuel supplied at the time of the transactions. Ampol invoices the City at the end of each month for all fuel charges incurred via the issued fuel cards. Invoices are typically paid the month after the fuel charges are incurred.

Issues and options considered

Option 1

That Council declines to note the list of card transactions for the month of March 2024. The list is required to be reported to Council in accordance with Regulation 13A(1) of the *Local Government (Financial Management) Regulations 1996*. This option is not recommended.

Option 2

That Council notes the list of card transactions for the month of March 2024. This option is recommended.

Legislation / Strategic Community Plan / Policy implications

Legislation	<i>Local Government (Financial Management) Regulations 1996.</i>
	In accordance with Regulation 13A of the <i>Local Government (Financial Management) Regulations 1996</i> , a list of card transactions is prepared each month showing each amount incurred since the last list was prepared.

12.16 CORPORATE CARD CREDIT LIMIT CHANGE (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	59174, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

To advise Council of action taken by the Chief Executive Officer (CEO) under the *Corporate Credit Cards Council Policy*.

EXECUTIVE SUMMARY

The City's *Corporate Credit Cards Council Policy* prescribes that the CEO may approve increases to the credit limits on any of the City's corporate credit cards, other than that issued to the CEO, as long as this does not cause the combined credit limit on all the City's corporate credit cards to exceed the City's overall corporate credit limit set by the card issuer, Westpac.

The Chief Executive has approved an increase in the credit limit on the City's civic hospitality/catering credit card from \$5,000 to \$6,000, which Westpac has accepted in April 2024. The City's overall corporate credit limit approved by Westpac is \$50,000. The combined credit limits on the City's corporate cards will increase from \$47,000 to \$48,000 as a result of this change.

It is therefore recommended that Council:

- 1 *NOTES the increase in the credit limit on the City's civic hospitality/catering corporate credit card approved by the Chief Executive Officer in accordance with the Corporate Credit Cards Council Policy;*
- 2 *NOTES that the combined credit limit on the City's corporate credit cards remains below the City's overall corporate credit limit approved by Westpac.*

BACKGROUND

Council has approved the *Corporate Credit Card Council Policy* (the policy) which outlines the framework for the use of corporate credit cards issued for City business.

The policy requires that the combined credit limit for all issued corporate credit cards may not exceed the overall card credit limit approved for the City by the card issuer, which is the City's banker, Westpac.

The policy provides that the credit limits on individual corporate credit cards may be amended as follows:

Amendments to individual corporate credit card limits (Corporate Credit Cards Council Policy)		
Details	Who approves?	Conditions
CEO credit card	Council	Combined card credit limits may not exceed Westpac approved overall card credit limit.
All other corporate credit cards	CEO	Combined card credit limits may not exceed Westpac approved overall card credit limit. Report to Council.

DETAILS

The City's civic hospitality/catering corporate credit card is utilised to incur expenses relating to catering provided at Council and Committee meetings, related Elected Member events, and other functions or events where catering may be required, such as citizenship ceremonies.

The credit limit on this card has been \$5,000 for a considerable period of time. In recent months, due to the price pressures being experienced on food and groceries, and the busy civic event calendar, the card limit has been exhausted prior to the end of the month which has, on more than one occasion, required the cardholder to pay for necessary expenses themselves, which the City has then reimbursed.

In order to obviate the need for the officer to use personal funds to procure City goods or services, the CEO approved an increase in the limit on this credit card from \$5,000 to \$6,000. The request was approved and processed by Westpac in early April.

The combined credit limits on the City's corporate credit cards now change as follows

Credit card	Current card limit	New card limit
CEO credit card	\$10,000	\$10,000
Purchasing credit card	\$20,000	\$20,000
Corporate travel credit card	\$12,000	\$12,000
Civic hospitality/catering credit card	\$ 5,000	\$ 6,000
Total	\$47,000	\$48,000

The City's overall card credit limit approved by Westpac is \$50,000. The change to the credit limit on the civic hospitality/catering credit card does not cause this threshold to be exceeded.

The policy further provides that where the CEO approves a change to a corporate card credit limit, this is to be reported to the next Council meeting.

Legislation / Strategic Community Plan / Policy implications

Legislation Not applicable.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-4 Responsible and financially sustainable - you are provided with a range of City services which are delivered in a financially responsible manner.

Policy *Corporate Credit Cards Council Policy.*

Risk management considerations

Not applicable.

Financial / budget implications

Not applicable. The credit limit on the card is available to be used by the cardholder to procure appropriate goods or services for the City up to that value, if required.

The credit limit applies to the gross value of transactions, that is inclusive of GST.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

Not applicable.

COMMENT

The change to the civic hospitality/catering corporate credit card limit has been necessitated by the rise in food and grocery prices over the past several months. The increase has been authorised in accordance with the *Corporate Credit Cards Council Policy*.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ124-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council:

- 1 NOTES the increase in the credit limit on the City's civic hospitality/catering corporate credit card approved by the Chief Executive Officer in accordance with the *Corporate Credit Cards Council Policy*;**
- 2 NOTES that the combined credit limit on the City's corporate credit cards remains below the City's overall corporate credit limit approved by Westpac.**

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

12.17 COMMUNITY FUNDING PROGRAM 2023-24 ROUND TWO (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	50591, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider funding applications for the Community Funding Program Round Two 2023-24.

EXECUTIVE SUMMARY

The Community Funding Program (CFP) aims to provide financial support to incorporated community groups to conduct projects, programs, events or activities that benefit the City of Joondalup community. The CFP was developed after a review of the City's funding programs in 2020-21, and the subsequent adoption of the revised *Community Funding Program Policy* by Council at its meeting held on 17 August 2021 (CJ127-08/21 refers).

Round one of the CFP for 2023-24 was held in August 2023, with \$97,047 in funding allocated. Applications for small grants (\$10,000 and under) and large grants (over \$10,000) were accepted during round two in February 2024, with a total remaining funding pool of \$75,199 available.

During this round, the City received four applications for large grants and 16 applications for small grants, totaling \$200,440 in requested funds. A breakdown of the funds per applicant category is below:

Applicant Category	No. of applications (% of total)	Requested (% of total)	Recommended (% of total)
Arts and Culture	3 (15%)	\$23,298 (12%)	\$3,348 (5%)
Community Development	12 (60%)	\$140,213 (70%)	\$47,415 (66%)
Environment	2 (10%)	\$14,500 (7%)	\$13,999 (19%)
Sport and Recreation	3 (15%)	\$22,429 (11%)	\$6,900 (10%)
TOTAL	20	\$200,440	\$71,662

The applications were assessed, and two of the four large grant applications are recommended for partial funding. The 16 small grant applications received of \$10,000 or less have been considered by the Chief Executive Officer.

The large grant applications are as follows:

Club	Project Title	Requested	Recommended
Al Mustafa Community Association Inc	Eid al-Fitr Celebration	\$64,785.50	\$0.00
Padbury Community Garden Inc	Padbury Community Garden Grand Opening	\$14,808.31	\$7,000.00
Padbury Community Garden Inc	Phase 1b - enhancement of Padbury Community Garden	\$10,489.14	\$9,478.75
Wanneroo Joondalup Lacrosse Club Inc	2024 Senior Men's & Women's National Championships	\$11,165.00	\$0.00
TOTAL		\$101,247.95	\$16,478.75

It is therefore recommended that Council:

- 1 *DOES NOT APPROVE a grant of \$64,785.50 to the Al Mustafa Community Association Inc for its Eid al-Fitr Celebration project;*
- 2 *APPROVES a grant of \$7,000.00 to the Padbury Community Garden Inc for its Padbury Community Garden Grand Opening project;*
- 3 *APPROVES a grant of \$9,478.75 to the Padbury Community Garden Inc for its Phase 1b - enhancement of Padbury Community Garden project;*
- 4 *DOES NOT APPROVE a grant of \$11,165.00 to the Wanneroo Joondalup Lacrosse Club Inc for its 2024 Senior Men's & Women's National Championships project.*

BACKGROUND

The Community Funding Program (CFP) was developed after a review of the City's funding programs in 2020-21, and the subsequent adoption of the revised *Community Funding Program Policy* by Council at its meeting held on 17 August 2021 (CJ127-08/21 refers). A copy of the policy is attached (Attachment 1).

CFP aims to provide financial support to incorporated community groups to conduct projects, programs, events or activities that benefit the City of Joondalup community. All applications for the CFP must meet the following criteria:

- The project, program, event or activity that funding is being sought for must benefit or service the City of Joondalup community.
- The project, program, event or activity must align with one or more of the Community Funding Program Priorities:
 - strengthen community participation
 - encourage connected communities
 - promote healthy and active lifestyles
 - build resilient and sustainable communities.
- The project, program, event or activity has not received financial support through another funding program from the City within the same financial year.
- The applicant must be incorporated under the *Associations Incorporations Act 2015* (or other Australian State Government Incorporations Act).

At its meeting held on 22 August 2023 (CJ160-08/23 refers), Council amended the Community Funding Policy to consider the cumulative value of applications from a single organisation. There is no limit on the number of applications that an organisation can submit, however the Chief Executive Officer may approve applications for funding up to and including \$10,000 (excluding GST), within any 12-month period, while applications for funding greater than \$10,000 (excluding GST) require the approval of Council.

DETAILS

The City received four applications for large grants and 16 applications for small grants this round, totaling \$200,440 in requested funds. Small grant applications which are valued at \$10,000 or less are considered by the Chief Executive Officer.

A breakdown of the funds per applicant category is below:

Applicant Category	No. of applications (% of total)	Requested (% of total)	Recommended (% of total)
Arts and Culture	3 (15%)	\$23,298 (12%)	\$3,348 (5%)

TOTAL	20	\$200,440	\$71,662

Large grant applications

Al Mustafa Community Association Inc

The Al Mustafa Community Association Inc submitted an application for a community event to celebrate Eid al Fitr.

The Al Mustafa Community Association Inc has indicated that approximately 300 City of Joondalup residents will benefit from the event.

The key outcomes of the event include:

- Provide a public event to celebrate Eid al Fitr - a significant religious event for the Muslim community celebrating the end of Ramadan.
- To help their community members integrate into society and demonstrate to Joondalup residents the importance of Eid al-Fitr in the community and promote understanding and harmony.

The costs of the event are itemised in the table below. The Al Mustafa Community Association has not committed any of its own funds to the event.

Al Mustafa Community Association Inc has not previously applied for any grant funding from the City.

Program Items	Amount Requested	Amount Recommended by the City
Catering	\$37,209.50	\$0
Equipment & Marquee Hire	\$19,530.00	\$0
Liability Insurance	\$450.00	\$0
Dance Group	\$4,500.00	\$0
Toilet Hire	\$650.00	\$0
Advertising	\$78.00	\$0
Bin hire	\$208.00	\$0
Security	\$2,160.00	\$0
Total	\$64,785.50	\$0

The panel has recommended not to fund the event as the group has not provided a reasonable budget or quotes. The group has failed to demonstrate how this event meets any of the Community Funding Program priorities. The group has failed to outline project outcomes for the community pertaining to this event.

Padbury Community Garden

The Padbury Community Garden submitted an application that sought funding for the Padbury Community Garden Grand Opening.

The Padbury Community Garden aims to reduce social isolation and loneliness throughout the community, whilst aiming to advance mental health. Providing sanctuary for those seeking solace and support for their mental well-being, a place where people can connect with nature and each other, and truly put into practice the Act Belong Commit ethos promoted by Mentally Healthy WA.

The Padbury Community Garden has indicated that approximately 400 City of Joondalup residents will benefit from the event.

The key outcomes of the event include the following:

- Increase community engagement and social interactions between City of Joondalup residents.
- To increase membership numbers by at least 50% during the 2024/25 membership year.
- Increase Padbury residents' confidence and skills in gardening.
- Increase residents' mental wellbeing by attending the event and the new community garden.
- Greater numbers of residents commit to official roles on Padbury Community Garden committee or sub-committees within 6 months of the event.

The costs of the event are itemised in the table below. Padbury Community Garden has not committed any of its own funds to the event.

Padbury Community Garden has not previously applied for any grant funding from the City but has submitted two applications in this round.

Program Items	Amount Requested	Amount Recommended by the City
Welcome to Country and Smoking Ceremony	\$2,250.00	\$2,250.00
Ribbon for ceremonial cutting	\$8.73	\$0
Workshop presenter	\$715.00	\$715.00
Food providers	\$3,196.82	\$401.33
Band	\$4,000.00	\$0
Childrens entertainer	\$940.00	\$0
Advertising and promotions	\$1,731.40	\$1,731.40
Equipment hire	\$1,902.27	\$1,902.27
Total	\$14,808.31	\$7,000.00

The panel has recommended to partially fund the event. Padbury Community Garden has submitted two applications for funding and identified this application as the second priority. The group has also indicated that they would be willing to accept partial funding. The application addressed the funding priorities, and the panel determined that the project would benefit the Joondalup community; however partial funding is recommended.

Padbury Community Garden

The Padbury Community Garden submitted an application that sought funding for the additional elements required to complete Phase 1 of the establishment of Padbury Community Garden. These elements will enable the community garden to be more inclusive with seating for those that are physically challenged or need a break; provide the finishing touches such as introductory signage; provide soil and plantings for the garden beds; alter reticulation as recommended by the City in preparation for Phase 2; add some unique features to the garden in preparation for its opening and allow this section of the garden to be fully functional for the community.

The Padbury Community Garden aims to reduce social isolation and loneliness throughout the community, whilst aiming to advance mental health. Providing sanctuary for those seeking solace and support for their mental well-being, a place where people can connect with nature and each other, and truly put into practice the Act Belong Commit ethos promoted by Mentally Healthy WA.

The Padbury Community Garden has indicated that approximately 5,000 City of Joondalup residents will benefit from the project.

The key outcomes of the program include:

- increasing Padbury Community Garden membership numbers by at least 50%
- reducing social isolation and enhance mental well-being in the local community
- increasing participation in the physical community garden by 50%
- increasing structured activities run out of the community garden by 50%
- increasing the awareness and use of the garden by residents with additional needs.

The costs of the program are itemised in the table below. The Padbury Community Garden has not committed any of its own funds to the project.

Padbury Community Garden has not previously applied for any grant funding from the City.

Program Items	Amount Requested	Amount Recommended by the City
Signage	\$3,392.57	\$3,392.57
Replacement of PVC pipe	\$1,010.53	\$0
Limestone seating materials and install	\$2,668.18	\$2,668.18
Sundial and install	\$475.00	\$475.00
Raised garden beds	\$1,327.58	\$1,327.58
Tactile Ground Surface Indicators	\$520.10	\$520.10
Bird baths and install	\$689.60	\$689.60
Plants, soil, planning supplies	\$925.68	\$925.68
Total	\$10,489.14	\$9,478.75

Padbury Community Garden were deemed eligible for a grant by the panel under the criteria. The project meets the funding priorities of strengthening community participation, encouraging connected communities, promoting healthy and active lifestyles and building resilient and sustainable communities and was recommended for partial funding.

Project items not recommended for funding include the replacement of PVC pipe. Upon further site inspection, the City's Parks and Natural Areas team advised replacing this pipe was not necessary so the panel has not recommended funding for this line item.

Wanneroo Joondalup Lacrosse Club Inc.

The Wanneroo Joondalup Lacrosse Club Inc. submitted an application that sought funding to deliver the Senior National Lacrosse Championships at Penistone Park. The Senior National Championship is one of the pinnacle events in Australian Lacrosse for men and women. This event sits within Lacrosse Australia's National Participation Framework and attracts state teams from each state across Australia.

The Wanneroo Joondalup Lacrosse Club Inc. is a lacrosse club serving the local community. The Wanneroo Joondalup Lacrosse Club Inc. has indicated that approximately 2,000 City of Joondalup residents will benefit from the project.

The key outcomes of the event include:

- attracting people to the sport of lacrosse and encourage inclusivity to all ages
- increasing visitors to the region
- providing positive exposure for the City of Joondalup locally and regionally.

The costs of the program are itemised in the table below. The Wanneroo Joondalup Lacrosse Club Inc. has committed its own funds to the project. The organisation's contribution of \$1,190 will contribute to the extension of the liquor license, blank t-shirts, bunting and posts and first aid kits.

Wanneroo Joondalup Lacrosse Club Inc. has not previously applied for any grant funding from the City.

Program Items	Amount Requested	Amount Recommended by the City
Championship Hosting Fee	\$3,180.00	\$0
Venue Hire	\$1,300.00	\$0
Ground Hire	\$1,000.00	\$0
Line Marking	\$900.00	\$0
T-shirts	\$150.00	\$0
Sound System / PA	\$340.00	\$0
Miscellaneous	\$1,000.00	\$0
Cleaning products / toiletries	\$1,500.00	\$0
Welcome to Country Ceremony	\$600.00	\$0
Floodlights	\$1,195.00	\$0
Total	\$11,165.00	\$0

The panel has recommended not to fund the project as the application did not provide enough detail on the event but furthermore, that the group's event key outcomes would be better suited to the Corporate Sponsorship program. The City's Corporate Sponsorship Program aims to attract, host or support a wide range of events, programs and activities that enhance the service delivery to the community and attract visitors to the region, while also providing positive exposure for the City's brand, locally and regionally. Previous funding from the City's Corporate Sponsorship Program has supported a wide range of events held in the region from national lawn bowls and basketball events to carols in the park and triathlons. Since the evaluation of the Community Funding Program applications, the Wanneroo Joondalup Lacrosse Club Inc. submitted an application to the Corporate Sponsorship Program, with the City agreeing to provide \$5,000 in funding.

Issues and options considered

The Council may consider each application on its individual merits and approve or not approve as desired.

Legislation / Strategic Community Plan / Policy implications

Legislation Not applicable.

10-Year Strategic Community Plan

Key theme 1. Community.

Outcome 1-2 Inclusive and connected - you enjoy local services and programs that cater for different ages, abilities and backgrounds.

Policy *Community Funding Program Council Policy.*

Risk management considerations

Due to the transient nature of association committees, it is possible that an organisation may find it difficult to maintain and provide reasonable information to complete an acquittal to the standard required in the funding agreement.

This risk is managed by the City being proactive in maintaining contact with organisations who have outstanding grant acquittals to ensure they are completed on time and with the relevant evidence and information.

Financial / budget implications

All amounts quoted in this report are exclusive of GST.

Current financial year impact

Account no.	1.443.A4409.3299.4023
Budget Item	Community Funding Program.
Budget amount	\$ 192,500
Amount spent to date	\$ 172,484.11
Proposed cost	\$ 16,478.75
Balance	\$ 3,537.14

All amounts quoted in this report are exclusive of GST.

Regional significance

Not applicable.

Sustainability implications

The CFP encourages and facilitates opportunities for the development of a healthy, connected, sustainable and involved community.

Consultation

Promotion of this CFP funding round and information sessions were conducted in January and February 2024 via the City's social media channels, e-newsletters, website, and relevant business unit contact lists. Two information sessions were delivered by the City for prospective applicants in January and February 2024.

COMMENT

The panel assessed that one of the four large grant applications met the eligibility criteria and addressed the funding priorities of the Community Funding Program guidelines. The approved application clearly identified project outcomes and provided all required supporting documentation.

The small grants valued at \$10,000 or less have been approved by the CEO, with Elected Members being advised of the outcome of these applications.

Following the introduction of the revised CFP in 2021, the separate funding pools for the four applicant categories was combined to enable the most valuable projects for the Joondalup community to be funded, regardless of the type of initiative. Previously these funding pools were often over or under subscribed, meaning some applications were unable to be funded in some categories while funds were not fully expended in others.

The distribution of funding in this round among the different applicant categories is reflective of this, demonstrating that the combined funding pool model is working effectively and enables the funding to be distributed to areas where it can make the largest community impact.

VOTING REQUIREMENTS

Simple Majority.

Cr May entered the Chamber at 10.11pm.

Cr Chester left the Chamber at 10.14pm and returned at 10.16pm.

OFFICER'S RECOMMENDATION

MOVED Cr Kingston, SECONDED Mayor Jacob that Council:

Disclosure of interest affecting Impartiality

Name / Position	Mayor Hon. Albert Jacob, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 12.18 – Tender 001/24 Percy Doyle Football / Teeball Clubroom – Refurbishment and Extension.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Mayor Jacob's brother provides electrical sub-contracting services to Hickey.

12.18 TENDER 001/24 PERCY DOYLE FOOTBALL / TEEBALL CLUBROOM - REFURBISHMENT AND EXTENSION (WARD - SOUTH)

WARD	South
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	111017, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to accept the tender submitted by Hickey Constructions Pty Ltd for the Percy Doyle Football / Teeball Clubroom - refurbishment and extension.

EXECUTIVE SUMMARY

Tenders were advertised on 9 March 2024 through state-wide public notice and published by Tenderlink for the Percy Doyle Football / Teeball Clubroom - refurbishment and extension. Tenders closed on 28 March 2024. A submission was received from each of the following:

- Hickey Constructions Pty Ltd.
- Kilmore Group Pty Ltd.
- Schlager Group Pty Ltd.
- Construct360 Pty Ltd.
- Infrastructure Development Builders Pty Ltd.

The submission from Hickey Constructions Pty Ltd represents value to the City. The company demonstrated a thorough understanding and appreciation of the City's requirements. It has extensive experience completing community sporting facility construction projects for WA local governments including the Cities of Melville and Joondalup. Hickey Constructions Pty Ltd is well established with significant industry experience and proven capacity to complete the works for the City.

It is therefore recommended that Council

- 1 *ACCEPTS the tender submitted by Hickey Constructions Pty Ltd for the Percy Doyle Football / Teeball Clubroom - refurbishment and extension as specified in Tender 001/24 for the fixed lump sum of \$1,281,727 (excluding GST) for completion of works within 12 months from commencement of contract;*
- 2 *NOTES that the draft 2024-25 Budget will incorporate the funding required for this contract by means of a reallocation of proposed project expenditure within the current draft 2024-25 capital works program budget;*
- 3 *Subject to approval of Part 1 above, AGREES to name the facility to be refurbished at Percy Doyle Reserve, Duncraig, 'Percy Doyle Community Sporting Facility' in accordance with the Naming of Public Facilities Council Policy.*

BACKGROUND

The City has a requirement to engage an appropriately qualified and experienced contractor to undertake works for the extension and refurbishment of the Percy Doyle Football / Teeball clubroom at 46 Warwick Road, Duncraig. The works shall include, but not be limited to following:

- Demolition as per documentation.
- Refurbishment of two toilets.
- Refurbishment of internal UAT.
- Construction of community stores.
- Construction of two new changerooms including toilets.
- Construction of umpire room.
- Construction of park UAT.
- Veranda extension.
- Landscaped surrounds.
- Extension of paving around building extension.
- new septic system.
- Disabled ramp.
- ACROD Bay.

Tender assessment is based on the best value for money concept. Best value is determined after considering whole of life costs, fitness for purpose, tenderers' experience and performance history, productive use of City resources and other environmental or local economic factors.

DETAILS

The tender for the Percy Doyle Football / Teeball Clubroom - refurbishment and extension was advertised through state-wide public notice and published by Tenderlink on 9 March 2024. The tender period was for two weeks with tenders closing on 28 March 2024.

Tender Submissions

A submission was received from each of the following:

- Hickey Constructions Pty Ltd.
- Kilmore Group Pty Ltd.
- Schlager Group Pty Ltd.
- Construct360 Pty Ltd.
- Infrastructure Development Builders Pty Ltd.

A summary of the tender submissions including the location of each tenderer is provided in Attachment 1 to this Report.

A confidential tender summary is provided in Attachment 2 to this Report.

Evaluation Panel

The evaluation panel comprised three members, being:

- one with tender and contract preparation skills
- two with the appropriate operational expertise and involvement in supervising the contract.

The panel carried out the assessment of submissions in accordance with the City's evaluation process in a fair and equitable manner.

Evaluation Method and Weighting

The qualitative weighting method of tender evaluation was selected to evaluate the offers for this requirement. Prior to assessment of individual submissions, a determination was made, based on the selection criteria, of what would be an acceptable qualitative score that would indicate the ability of the tenderer to satisfactorily deliver the services.

The standard minimum acceptable qualitative score for tenders at the City is 50%, but the specific circumstances of tender requirements may, from time to time, require the minimum score to be set higher than 50%, where the specification has complex design or technical requirements. The Percy Doyle Football / Teeball Clubroom - refurbishment and extension project requires works to an existing facility that is likely to present multiple challenges throughout the construction process. As such it is essential to seek a highly qualified contractor that is able to deal with these unexpected challenges professionally. The predetermined minimum acceptable qualitative score for this tender was therefore set at 60%.

The qualitative criteria and weighting used in evaluating the submissions received were as follows:

Qualitative Criteria	Weighting
Demonstrated experience completing community sporting facility construction projects	35%
Demonstrated understanding of the required tasks	35%
Capacity	25%
Social and economic effects on the local community	5%

Compliance Assessment

The following offers received were assessed as fully compliant:

- Hickey Constructions Pty Ltd.
- Kilmore Group Pty Ltd.
- Schlager Group Pty Ltd.
- Construct360 Pty Ltd.

The submission from Infrastructure Development Builders Pty Ltd was assessed as non-compliant. Infrastructure Development Builders Pty Ltd did not submit a response adequately addressing the qualitative criteria and the information provided in its submission was insufficient to enable assessment of its Offer. The submission was eliminated from further evaluation.

Qualitative Assessment

Construct360 Pty Ltd scored 50.4% and was ranked fourth in the qualitative assessment. The company demonstrated some understanding of the required tasks. It is noted the methodology proposed to be used to undertake the works was generic and did not take site specific issue into account. It has experience completing community facility construction projects for state and local governments in WA including the City of Gosnells, Public Transport Authority via Programmed Facility Management and North Metropolitan TAFE. It demonstrated the capacity required to complete the works. However, the number of full-time employees was not stated and afterhours contacts for emergency requirements were not supplied.

Schlager Group Pty Ltd scored 52% and was ranked third in the qualitative assessment. The company has experience completing community sporting facility construction projects for WA local governments including the Town of Claremont and the Cities of Vincent and Swan. It demonstrated the capacity required to undertake the works though it is noted the number of full-time employees was not stated. It did not address afterhours contacts for emergency requirements or the ability to provide additional personnel. It did not fully demonstrate an understanding of the required tasks. Its submission did not include a statement of the method of construction proposed to be used in executing the works.

Kilmore Group Pty Ltd scored 58.1% and was ranked second in the qualitative assessment. The company demonstrated a good understanding of the required tasks. It has experience completing community sporting facility construction projects for various local governments in WA including the Shire of Dardanup and the Cities of Rockingham and Gosnells. It did not fully demonstrate the capacity required to carry out the works. Afterhours contacts for emergency requirements or the ability to provide additional personnel were not addressed. The number of full-time employees, the period of time in business or when the company was established were not stated.

Hickey Constructions Pty Ltd scored 81.4% and was ranked first in the qualitative assessment. The company has extensive experience completing community sporting facility construction projects for WA local governments including the Cities of Melville and Joondalup. It demonstrated a thorough understanding and appreciation of the City's requirements. Hickey Constructions Pty Ltd is well established with significant industry experience and proven capacity to complete the works for the City.

Given the minimum acceptable qualitative score of 60%, Hickey Constructions Pty Ltd qualified for stage two of the assessment.

Price Assessment

The panel carried out a comparison of the lump sum prices offered by each compliant tenderer in order to assess value for money to the City.

Tenderer	Fixed Lump Sum (exclusive of GST)
Hickey Constructions Pty Ltd	\$1,281,727
Schlager Group Pty Ltd	\$1,379,663
Construct360 Pty Ltd	\$1,416,695
Kilmore Group Pty Ltd	\$1,757,053

Evaluation Summary

Tenderer	Weighted Percentage Score	Fixed Lump Sum (exclusive of GST)
Hickey Constructions Pty Ltd	81.4%	\$1,281,727

Based on the evaluation result the panel concluded that the tender from Hickey Constructions Pty Ltd provides value to the City and is therefore recommended.

Issues and options considered

The City has a requirement for the extension and refurbishment of the Percy Doyle Football / Teeball clubroom. The City does not have the internal resources to provide the required services and requires the appropriate external contractor to undertake the works.

Legislation / Strategic Community Plan / Policy implications

Legislation	A state-wide public tender was advertised, opened and evaluated in accordance with regulations 11(1) and 18(4) of Part 4 of the <i>Local Government (Functions and General) Regulations 1996</i> , where tenders are required to be publicly invited if the consideration under a contract is, or is estimated to be, more, or worth more, than \$250,000.
--------------------	--

10-Year Strategic Community Plan

Key theme	1. Community.
Outcome	1-3 Active and social - you enjoy quality local activities and programs for sport, learning and recreation.
Policy	<i>Naming of Public Facilities Council Policy.</i>

Risk management considerations

Should the contract not proceed, the risk to the City will be moderate as there is an expectation from the clubs that the refurbishment will proceed after Council has approved the works.

It is considered that the contract will represent a low risk to the City as the recommended tenderer is well established with significant industry experience and proven capacity to complete the works for the City.

Financial / budget implications

All amounts quoted in this report are exclusive of GST.

Current financial year impact

Account no.	CW004141.
Budget Item	Percy Doyle Football / Teeball Clubroom - refurbishment and extension.
Budget amount 2023/24	\$ 40,000 (design)
Budget 2024/25 (Proposed)	\$ 800,000 (construction)
Amount spent to date	\$ 40,120
Committed	\$ 17,230
Proposed cost	\$ 1,281,727
Contingency	\$ 10,000
Balance	\$ (509,077)

The funds to meet the shortfall in 2024-25 are proposed to be achieved through the rephasing of project timelines for other projects that are likely to be delayed in the draft 2024/25 budget.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

Consultation was undertaken with affected community groups and hirers that regularly use the facility. Broader community consultation was not pursued given the location of the building being a substantial distance from nearby residents, which is consistent with other building refurbishment projects undertaken across Percy Doyle Reserve in recent years.

COMMENT

The evaluation panel carried out the evaluation of the submissions in accordance with the City's evaluation process and concluded that the offer submitted by Hickey Constructions Pty Ltd represents value to the City.

VOTING REQUIREMENTS

Simple Majority.

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ126-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council:

- 1** **ACCEPTS** the tender submitted by Hickey Constructions Pty Ltd for the Percy Doyle Football / Teeball Clubroom - refurbishment and extension as specified in Tender 001/24 for the fixed lump sum of \$1,281,727 (excluding GST) for completion of works within 12 months from commencement of contract;
- 2** **NOTES** that the draft 2024-25 Budget will incorporate the funding required for this contract by means of a reallocation of proposed project expenditure within the current draft 2024-25 capital works program budget;
- 3** Subject to approval of Part 1 above, **AGREES** to name the facility to be refurbished at Percy Doyle Reserve, Duncraig, 'Percy Doyle Community Sporting Facility' in accordance with the *Naming of Public Facilities Council Policy*.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

ATTACHMENTS

- 1.** Summary of Tender of Submissions 001-24 [**12.18.1** - 5 pages]
- 2.** CONFIDENTIAL REDACTED - Tender Summary 001-24 [**12.18.2** - 1 page]

12.19 PROPOSAL FOR LEVYING DIFFERENTIAL RATES FOR THE 2024-25 FINANCIAL YEAR (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	111088, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider a proposal for the setting of differential rates for the Draft Budget for the 2024-25 Financial Year.

EXECUTIVE SUMMARY

As part of the process for the 2024-25 draft budget, it is proposed to continue to apply differential rating introduced in 2008-09. In accordance with section 6.36 of the *Local Government Act 1995* (the Act) Council is required to determine the differential rates to be advertised prior to consideration of the budget.

It is recommended that the proposed differential rates be advertised, and public submissions sought in accordance with section 6.36 of the Act.

BACKGROUND

To set the rates for its budget, Council determines the total rate revenue it needs, in accordance with section 6.2 of the Act, and sets the cents in the dollar that will generate that revenue. The individual property valuations determine what proportion of the total rate requirements are met by each property owner. This proportion will change when a valuation changes.

Differential rates were first introduced in 2008-09 to maintain the distribution of the rate burden between the classes of residential, commercial, and industrial property following a revaluation. The relativities between the differentials have been adjusted at subsequent revaluations in 2011-12, 2014-15, 2017-18, 2020-21 and 2023-24.

In addition to a differential between classes of property the City has applied a differential between improved and vacant land within each of the classes of residential, commercial and industrial property. The City is keen to promote and encourage the development of vacant land. This can be done through a number of positive initiatives and in this regard the City makes a significant contribution to encourage and promote economic development. It can also be done by actively discouraging the holding of vacant and undeveloped land. In respect of the latter, a higher differential rate imposed on vacant land than the rate applicable for improved land is considered an inducement to develop vacant land.

DETAILS

Draft Budget 2024-25

The City is in the final stages of developing and preparing the Draft 2024-25 Budget. This process has encompassed the following:

- Reference and alignment to the Strategic Community Plan.
- Strategic Financial Plan alignment and review.
- Other Plans and Strategies.
- Critical Analysis of 2022-23 and progress in 2023-24 Corporate Business Plan performance.
- Consideration of budget parameters.
- Ongoing review of service delivery and service standards.
- Consideration of the efficiency and effectiveness of services and facilities and implementation of new efficiencies.
- Consideration of operating and capital proposals.
- Assessment of capacity including financial, rating and resources, sustainability, assets and reserves.

The development has been scrutinised by the following:

- Executive through an extensive evaluation process encompassing the Capital Works Program and each Business Unit's draft budget.
- Elected Members, through four Draft 2024-25 Budget Workshops to date (during February, March, April and May 2024).

The final stage of the draft 2024-25 budget process prior to adoption is to consider the setting of the cents in the dollar.

Differential Rates

Section 6.33 of the Act makes provision for the City to be able to levy differential rates based on a number of criteria.

“(1) A local government may impose differential general rates according to any, or a combination, of the following characteristics —

- (a) the purpose for which the land is zoned, whether or not under a local planning scheme or improvement scheme in force under the Planning and Development Act 2005; or*
- (b) a purpose for which the land is held or used as determined by the local government; or*
- (c) whether or not the land is vacant land; or*
- (d) any other characteristic or combination of characteristics prescribed.”*

Section 6.33 of the Act permits Council to levy differential rates such that the highest is no more than twice the lowest differential. A greater difference in differentials may be used but requires Ministerial approval.

Issues and options considered

There are several broad approaches for how the City might consider the rates levy for the 2024-25 Budget.

Cents in the Dollar

There are three options for determining how the cents in the dollar may be set.

Option One – Do not Differentially Rate and Revert to a General Rate

The differential rate was introduced in 2008-09 to compensate for the distortions caused by higher residential property valuation increases compared to commercial and industrial property valuations. These relativities have been adjusted at subsequent revaluations to maintain the relativity between residential compared to commercial and industrial.

Reverting back to a general rate would considerably increase the rate burden falling on residential property owners with a commensurate reduction to commercial and industrial property owners.

This option is not recommended.

Option Two – Apply a Differential Rate but Re-Assess What They Should Be

There needs to be a key driver or basis for setting a differential rate. In 2008-09 the driver was to maintain the proportion of rate revenue derived from each of residential, commercial and industrial property. Applying a higher differential rate for vacant property was introduced to discourage the holding of property in a vacant or undeveloped state.

A change was made to the differential for vacant residential property in 2015-16 to bring it into line with treatment of the differentials for vacant commercial and industrial property. The differential for residential, commercial and industrial vacant property has since been set at a rate that is not more than twice the lowest differential, which is the rate for residential improved property.

Since the differential rates were last considered for the previous year's budget there has been no change in legislative requirements impacting on the application of differential rating in the City of Joondalup and no change in circumstances that would warrant the basic drivers needing to be reconsidered at this time.

This option is not recommended.

Option Three – Apply a Differential Rate Based on the Differentials Set in 2023-24

There has been no change in legislative requirements impacting on the application of differential rating in the City of Joondalup. There are no circumstances suggesting a change to the basic drivers for differential rating. Maintaining the relativity between the differentials, based on those set in 2023-24, would best permit setting appropriate differential rates for 2024-25. This is considered the most appropriate course in the current circumstances.

This option is recommended.

Minimum Payments

The Act provides that a local government may set a minimum payment for rates. That is, regardless of the result of the rate calculation determined by multiplying the cents in the dollar by the valuation, no property should be assessed for rates at an amount below the minimum payment. The cents in the dollar and minimum payment will together determine the minimum property valuation. Properties with a valuation below this will be subject to the minimum payment.

The Act does not provide any guidance as to what an appropriate value for the minimum payment is or how it might be determined. In essence it is whatever the local government may determine. The general philosophy is that every ratepayer should make a reasonable contribution to the services and facilities that a local government provides. There is a statutory limit prohibiting a minimum being set so high that more than 50% of properties in each differential rating category would be on the minimum. The percentage of properties in the City of Joondalup on the minimum is well below this threshold in each differential rating category.

There are three further options.

Option Four – Re-Assess the Setting of Minimum Payments

The minimum payment that the City has been applying each year has not been based on any formula or criteria but simply represents what the City has determined is reasonable as a minimum payment. By way of comparison in the table below for the 2023-24 financial year, the City's current minimum payment for residential improved of \$873 is the lowest of eight larger metropolitan local governments by population noting that two of them do not have a separate refuse charge and include refuse in the rates charge.

Local Government	Residential Improved Minimum Payment 2023-24
City of Joondalup	873.00
City of Stirling	921.00
City of Swan	938.00
City of Gosnells	1,044.00
City of Rockingham	1,322.00
City of Wanneroo	1,073.00
City of Melville*	1,372.65
City of Cockburn*	1,478.00

**Minimum rate includes refuse charge*

In the absence of any specific guidelines and given that the City of Joondalup's minimum payment is near industry norms, the option of re-assessing the setting of minimum payments is not recommended.

Option Five – No Change to Minimum Payments

Leaving the existing minimum payments at the same level in 2023-24 is expected to result in a decrease in the number of properties on the minimum, as a consequence of not adjusting the minimum payments in line with the proposed differential rates for 2024-25. It is therefore not considered appropriate to retain the current minimum payment levels for 2024-25.

This option is not recommended.

Option Six – Apply Changes in Line with the Changes in Rates

It is considered that applying changes to the minimum payment that is in line with the overall City rate change provides the most consistent and equitable approach. The proposed differential rates for 2024-25 represent an increase from the current rates, and it is therefore considered appropriate to make changes to the minimum payments accordingly.

This option is recommended.

Draft 2024-25 Budget Rate Revenue Requirement

The Draft 2024-25 Budget is in the final stages of preparation. Workshops have been held with Elected Members, and the draft Budget expected to be presented to Council in June 2024.

The budget is being developed in a challenging economic environment. The City has a responsibility to minimise the impact of rates levied on property owners along with a responsibility to deliver services, infrastructure and facilities that the community expects. Input costs remain under significant pressure and the City must balance these two outcomes in a financially responsible manner.

The proposed differential rates in 2024-25 represent a 2.9% increase in the cents in the dollar compared to 2023-24. A natural increase in rates revenue of 0.6% compared to 2023-24 is also anticipated, as a result of rates growth arising from property developments in the current year. Cumulatively, this is expected to result in a 3.5% increase in rates revenue compared to 2023-24.

It is recommended that the City base its cents in the dollar on Option Three and its minimum payment on Option Six with rates applying to each property category based on the following criteria:

- That differential rates apply to residential, commercial and industrial improved property.
- That the differential rate on residential, commercial and industrial vacant property be set at no more than twice the lowest differential rate.

Legislation / Strategic Community Plan / Policy implications

Legislation *Local Government (Financial Management) Regulations 1996.*
 Local Government Act 1995.

10-Year Strategic Community Plan

Key theme 5. Leadership.

Outcome 5-4 Responsible and financially sustainable - you are provided with a range of City services which are delivered in a financially responsible manner.

Policy Not applicable.

Risk management considerations

Provided the City complies with the statutory provisions, there are no legislative risk management issues in applying a differential rate.

Financial / budget implications

The application of differential rating is about apportioning rates revenue between different categories of property. No budget implications arise just from applying differential rating. The City would be able to derive the same revenue by applying a single general rate to all categories of property. The intention with differential rating, however, is to maintain the general proportion of rate revenue derived from each category of residential, commercial and industrial property.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

The proposed differential rating has been considered at budget workshops by Elected Members. The recommendations of this report reflect the feedback from those discussions.

The proposed differential rates are required to be advertised and public submissions sought. An appropriate consultation process will be undertaken, including requisite advertising for 21 days. When concluded, a report on the outcomes of the consultation will be prepared and submitted to Council at its June 2024 meeting.

COMMENT

The differential rates and minimum payments that have been recommended are in line with deliberations from the Budget Workshops held to date.

The various differential rates and minimum payments maintain the City's historical approach to apportioning the rate burden between the respective categories of residential, commercial and industrial as well as between vacant and developed residential, commercial and industrial property.

The recommendation relates only to undertaking the prescribed advertising for public submissions on the proposed differential rates and minimum payments. Adopting the recommendation does not commit the Council to the differential rates and minimum payments proposed. Council is required to consider any public submissions received, prior to making its final determination. Adopting this recommendation also does not represent any commitment in relation to the adoption of the 2024-25 Budget.

The proposed differential rates reflect a 2.9% increase in the cents per dollar in each differential rate category and the respective minimum rate. Coupled with a natural 0.6% growth in rates revenue, this is expected to yield a 3.5% rise in rates revenue in the 2024-25 financial year.

VOTING REQUIREMENTS

Simple Majority.

*The Manager Governance left the Chamber at 10.24pm and returned at 10.27pm.
The Manager Community Development and Library Services left the Chamber at 10.29pm.*

OFFICER'S RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ127-05/24)

MOVED Mayor Jacob, SECONDED Cr Hill that Council:

- 1 NOTES the process undertaken for the development of the Draft Budget for the 2024-25 Financial Year;**
- 2 APPLIES differential rates for the Draft Budget for the 2024-25 Financial Year;**
- 3 ADVERTISES in accordance with section 6.36 of the *Local Government Act 1995* for public submission on the proposed differential rates as set out in the table below and makes available to the public, Attachment 1 to this Report setting out the objects and reasons for the differential rates as below:**

	Cents in \$	Minimum Payment \$
<u>General Rate - GRV</u>		
Residential Improved	5.4781	899
Residential Vacant	10.6461	982
Commercial Improved	7.2023	982
Commercial Vacant	10.6461	982
Industrial Improved	6.5261	982
Industrial Vacant	10.6461	982
<u>General Rate - UV</u>		
Residential	1.0966	961
Rural	1.0948	961

- 4 REQUESTS a further report be presented to Council to consider:**
 - 4.1 any public submissions in relation to the proposed differential rates;**
 - 4.2 the adoption of the Budget for the 2024-25 Financial year after the close of public submissions.**

The Motion was Put and

CARRIED (9/4)

In favour of the Motion: Mayor Jacob, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr Pizzey and Cr Vinciullo.

Against the Motion: Cr Chester, Cr Kingston, Cr O'Neill and Cr Raftis.

13 REPORTS OF COMMITTEES

13.1 POLICY COMMITTEE - 30 APRIL 2024

13.1.1 REVIEW OF PEST PLANT LOCAL LAW (WARD - ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Jamie Parry Director Governance and Strategy
FILE NUMBER	102082, 101515
AUTHORITY / DISCRETION	Legislative - includes the adoption of local laws, planning schemes and policies.

PURPOSE

For Council to consider the recommendations made in this report regarding the inclusion of Prickly Lettuce (*Lactuca serriola*) as a pest plant in the City's *Pest Plant Local Law 2012*.

EXECUTIVE SUMMARY

At its meeting held on 20 November 2012 (CJ232-11/12 refers), Council adopted the *City of Joondalup Pest Plant Local Law 2012* (Attachment 1 refers) with one prescribed pest plant species, *Tribulus terrestris*, commonly known as Caltrop. At its meeting held on 26 March 2024 (CJ060-03/24 refers), Council adopted by absolute majority, that Golden Crownbeard (*Verbesina encelioides*) be added to the *City of Joondalup Pest Plant Amendment Local Law 2023* (Attachment 2 refers).

At the Policy Committee meeting held on 27 February 2023, Cr Kingston requested that a report be prepared in relation to the *Pest Plant Local Law 2012* and that Prickly Lettuce be considered a prescribed pest plant within the City of Joondalup.

At its meeting held on 28 March 2023 (CJ040-03/23 refers), Council adopted the *Weed Management Plan 2023–2033* to continue the provision of an integrated approach to the management of weeds within the City. The Plan describes the potential impacts from weeds, weed control methods, the City's current weed management approach and proposed environmental strategies to be implemented to minimise the potential impacts of weeds on the environment and the community.

Within the City of Joondalup, there are 285 identified weeds, including 15 declared pest plants and five Weeds of National Significance. These weed species are often widespread, and without effective management they can alter natural areas and public open spaces reducing biodiversity and amenity.

Prickly Lettuce is not classified as a Weed of National Significance or declared pest in Western Australia. Prickly Lettuce is also not listed as a priority weed in the City's *Weed Management Plan 2023-2033*.

Prickly Lettuce is a biennial, winter, or summer annual which colonises a range of disturbed habitats such as roadsides and residential gardens. Historically, Prickly Lettuce has been grown for its herbal medicinal properties and ornamental value. In favourable environments it can be an invasive weed and is drought tolerant. The weed increases its abundance in post-fire conditions and each Prickly Lettuce plant can produce thousands of seeds. Prickly Lettuce can grow to 2m tall and is identified by its prickly leaves and stem which produce a white, milky sap if damaged.

Within the City of Joondalup and surrounding local government areas, Prickly Lettuce is most abundant within privately owned residential land. Prickly Lettuce is of less concern within natural areas, however it can be found along bushland edges, firebreaks and degraded areas.

Given that Prickly Lettuce is not a priority weed, its limited impact upon natural and urban areas, the City considers that it is not appropriate to include Prickly Lettuce as a prescribed pest plant within the City's *Pest Plant Local Law 2012*.

It is therefore recommended that Council:

- 1 *NOTES that the City currently undertakes control of known infestations of Prickly Lettuce on land managed by the City;*
- 2 *NOTES that the City continues to raise community awareness of environmental weeds, including Prickly Lettuce, through the Environmental Education Program;*
- 3 *NOTES that the City continues to work with the WALGA Local Government Integrated Weed Management Working Group to raise broader awareness of weed management on private property;*
- 4 *NOTES that the City will continue to implement an integrated weed management approach through the Weed Management Plan 2023-2033;*
- 5 *DOES NOT SUPPORT an amendment to the City's Pest Plant Local Law 2012, to include Prickly Lettuce as a prescribed pest plant.*

BACKGROUND

At its meeting held on 20 November 2012 (CJ232-11/12 refers), Council adopted the *City of Joondalup Pest Plant Local Law 2012*, as detailed in Attachment 1 to this Report.

The purpose of the *City of Joondalup Pest Plant Local Law 2012* is to:

Prescribe pest plants within the City of Joondalup district, that, in the local government's opinion, are likely to adversely affect the value of property in the district or the health, comfort or convenience of the inhabitants of the district.

The effect of the *City of Joondalup Pest Plant Local Law 2012* is to:

Require the owner or occupier of private land within the City of Joondalup district to destroy, eradicate or otherwise control pest plants on and in relation to that land in a manner and within a time specified in a notice given by the local government and served on the owner or occupier of the land.

At the Policy Committee meeting held on 27 February 2023, Cr Kingston requested that a report be prepared in relation to the *Pest Plant Local Law 2012* and that Prickly Lettuce be considered as a prescribed pest plant within the City of Joondalup district.

DETAILS

Prickly Lettuce is not classified as a Weed of National Significance or declared pest in Western Australia. Prickly Lettuce is also not listed as a priority weed in the City's *Weed Management Plan 2023-2033*.

Prickly Lettuce is found in limited occurrences along the bushland edges, firebreaks and degraded areas in the City's parks and urban landscaped areas, however Prickly Lettuce is common within residential areas and on privately owned land. Effective weed control on private land is a critical element of effective weed management. Educating residents and raising awareness of the species that should be planted, and the importance of managing weeds on private property is an effective mechanism to encourage weed control on private property.

The City's *Weed Management Plan 2023-2033* provides ongoing direction for an integrated approach to weed management including the delivery of a comprehensive community weed education program.

The City manages Prickly Lettuce by controlling weeds with herbicides or mechanical methods, depending on size of the plant. Weed control methods are tailored to each weed species and stage of growth to ensure effective and long-lasting results.

The City delivers an ongoing Environmental Education Program which includes a series of environmental activities throughout the year to encourage conservation and greater interaction with the natural environment. As part of the Program, the City has developed the 'Being WEEDwise Environmental Weeds' brochure which specifies Prickly Lettuce as a weed to control within residential property.

The City shares weed management information and research as part of the Western Australian Local Government Association (WALGA) Local Government Integrated Weed Management Working Group with other local governments in WA. The Working Group is currently implementing an integrated weed management communications campaign including community education and awareness raising regarding weed management and the various methods used to control weeds.

Caltrop and Golden Crownbeard are the two pest plants listed under the City's *Pest Plant Local Law 2012*. The City maintains a register to document confirmed locations of these weeds on land managed by the City and public property with all locations being inspected annually. The addition of Prickly Lettuce as a pest plant under the *Pest Plant Local Law 2012* would require a significant increase in resources to liaise with property owners and to monitor and record the occurrence of the weed locations within the City. The City will also continue to implement the integrated weed management approach and the community weed education program.

Issues and options considered

With regard to the *Pest Plant Local Law 2012*, Council has the option to:

- note the review of the City's *Pest Plant Local Law 2012* does not recommend including Prickly Lettuce as a prescribed pest plant or
- amend the City's *Pest Plant Local Law 2012* to include Prickly Lettuce as a prescribed pest plant.

Option 1 is the recommended option as Prickly Lettuce is a low priority weed that has limited occurrences within the City's bushland edges, firebreaks and degraded areas and a significant amount of additional resources would be required if it were to be prescribed as a pest plant to monitor and record occurrences on private land. The City will continue to implement an integrated weed management approach including targeting Prickly Lettuce and community education initiatives to encourage weed management on private property.

Legislation / Strategic Community Plan / Policy implications

Legislation *Biosecurity and Agriculture Management Act 2007.*
 City of Joondalup Pest Plant Local Law 2012.

10-Year Strategic Community Plan

Key theme 2. Environment.

Outcome 2-1 Managed and protected - you value and enjoy the biodiversity in local bushland, wetland and coastal areas.

Policy *Sustainability Council Policy.*

Risk management considerations

Prickly Lettuce is not classified as a Weed of National Significance or declared pest in Western Australia. Prickly Lettuce is also not listed as a priority weed in the City's *Weed Management Plan 2023-2033*. As Prickly Lettuce has limited occurrences within the City's bushland edges, firebreaks and degraded areas the risks associated with not listing the plant under the *City of Joondalup Pest Plant Local Law 2012* are minimal.

Financial / budget implications

The addition of Prickly Lettuce as a prescribed plant under the *City of Joondalup Pest Plant Local Law 2012* will have financial implications. Due to the widespread nature of the weed species on private property, additional resources will be required to record and monitor sightings within the City.

The delivery of community education programs to raise awareness of the need to control Prickly Lettuce and other environmental weeds on private property would be at a moderate cost and could be funded through existing operational budgets.

Regional significance

There are a variety of regionally, nationally and internationally significant natural areas located within and adjacent to the City, including the Yellagonga Regional Park and a number of Bush Forever sites which contain species of high conservation value. Weeds can pose a threat to natural areas by degrading vegetation communities. Prickly Lettuce is rarely sighted within natural areas except for degraded areas, bushland edges and firebreaks.

The WALGA Local Government Integrated Weed Management Working Group includes representatives from 27 Local Governments in WA and enables the sharing of information and research to assist local governments to make informed decisions on integrated weed management approaches. A key objective of the Working Group is to build community support for weed control programs.

Sustainability implications

The City implements an integrated weed management approach to protect biodiversity and maintain the amenity and aesthetics of the City's public open spaces. Weed control and management is undertaken to protect biodiversity, reduce bushfire risk, reduce damage to infrastructure and meet community expectations for the amenity and aesthetics of local areas.

Consultation

Not applicable.

COMMENT

The City is committed to the ongoing management and conservation of the City's natural and urban environment, and conducts integrated weed management, inclusive of utilising a suite of weed control techniques and timely interventions to prevent the spread and growth of weeds. An integrated weed management approach is essential to the ongoing protection and enhancement of the City's natural environment and public open spaces.

In alignment with the adopted approach in the City's *Weed Management Plan 2023-2033*, the City prioritises management of weeds that are identified as priority species, as per the list of State declared weed species and Federally listed Weeds of National Significance.

Given the limited occurrences of Prickly Lettuce within the City's bushland edges, firebreaks and degraded areas, the widespread occurrence of Prickly Lettuce within private land, and the significant amount of additional resources that would be required if it were to be prescribed as a pest plant, the City considers it would not be appropriate to include Prickly Lettuce as a prescribed pest plant within the City's *Pest Plant Local Law 2012*.

The City will continue to raise awareness regarding the importance of weed control on private property through the Environmental Education Program and the WALGA Local Government Integrated Weed Management Working Group. This approach will raise awareness of Prickly Lettuce and other weeds and will be targeted towards residents and private landowners.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ128-05/24)

MOVED Cr Jones, **SECONDED** Cr Hill that Council:

- 1** NOTES that the City currently undertakes control of known infestations of Prickly Lettuce on land managed by the City;
- 2** NOTES that the City continues to raise community awareness of environmental weeds, including Prickly Lettuce, through the Environmental Education Program;
- 3** NOTES that the City continues to work with the WALGA Local Government Integrated Weed Management Working Group to raise broader awareness of weed management on private property;
- 4** NOTES that the City will continue to implement an integrated weed management approach through the *Weed Management Plan 2023-2033*;
- 5** DOES NOT SUPPORT an amendment to the City's *Pest Plant Local Law 2012*, to include Prickly Lettuce as a prescribed pest plant.

The Motion was Put and **CARRIED (13/0)** by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

13.1.2 LOCAL HERITAGE SURVEY (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	16086, 101515
AUTHORITY / DISCRETION	Legislative - includes the adoption of local laws, planning schemes and policies.

PURPOSE

For Council to consider the draft Local Heritage Survey (LHS) following advertising, for the purpose of final endorsement.

EXECUTIVE SUMMARY

The *Heritage Act 2018* requires each local government to identify places of cultural heritage significance in a Local Heritage Survey (formally known as a Municipal Heritage Inventory). Additionally, the *Planning and Development (Local Planning Schemes) Regulations 2015* (LPS Regulations) requires local governments to establish and maintain a Heritage List which identifies places which are afforded statutory protection under the local planning scheme.

The City has engaged Element Advisory consultants to prepare its first Local Heritage Survey. At its meeting held on 12 December 2023, Council resolved to approve the public advertising of the draft Local Heritage Survey. The draft Local Heritage Survey was advertised for a period of 21 days, with seven submissions received providing comment on various aspects of the nominations.

Following advertising, minor modifications have been made to the draft Local Heritage Survey in response to the submissions received. It is recommended that Council endorses the modified draft Local Heritage Survey.

BACKGROUND

The *Heritage Act 2018* requires each local government to identify and record places that are, or may become, of cultural heritage significance in the form of a Local Heritage Survey. Local Heritage Surveys are a starting resource for local heritage planning and have no statutory role under the *Planning and Development Act 2005*. The Local Heritage Survey can be used to inform the promotion of heritage places and inclusion of places on the Heritage List which is maintained as part of Local Planning Scheme No. 3 (LPS3).

The City of Joondalup currently relies on the Municipal Heritage Inventory prepared for the then (larger) City of Wanneroo in 1994. The City's Local Planning Strategy identifies the need to review this Municipal Heritage Inventory to ensure the identification, documentation, and, where appropriate, protection of places of heritage significance occurs in compliance with relevant legislation.

The City appointed Element Advisory consultants to prepare its first Local Heritage Survey, including a review of the existing Municipal Heritage Inventory and as well as an assessment of the nominations provided by the community for new heritage places.

The City invited nominations from the community for places to be assessed for their local heritage significance. The community nomination period was undertaken from 16 March 2023 to 18 April 2023 and included direct engagement with landowners of properties included in the existing Municipal Heritage Inventory.

Following an assessment of the nominations received, the draft Local Heritage Survey was prepared in accordance with the Heritage Council of Western Australia's *Local Heritage Survey Guidelines*.

The draft Local Heritage Survey was presented to the Council meeting held on 12 December 2023 (Item 13.1.1 refers) and was subsequently advertised for public comment from 25 January 2024 to 15 February 2024. The draft Local Heritage Survey has been modified in response to submissions received where considered appropriate to do so (Attachment 1 refers).

DETAILS

The draft Local Heritage Survey contains the following:

- Introduction and methodology, discussing what heritage is and explanation of management categories.
- Thematic history, which provides a broad context for understanding the evolution of the City's history and cultural landscape, and the patterns and forces that have shaped it over time.
- Place records for each of the heritage places assessed, including relevant historical information, physical description, historical and current photographs and the assigned classification and management category.
- A recommendation for the places to be included in the City's Heritage List (based on the assigned management category).

Heritage places

The draft Local Heritage Survey includes 20 heritage places, including:

- ten places from the existing Municipal Heritage Inventory
- nine places from community nominations
- one place nominated by Element Advisory.

Each of these heritage places have been assigned management categories, which recognise the varying degrees of importance and intactness of heritage places, provide guidance to the City on the importance of the place, and include recommendations for the level of care that should be taken of that place. The draft Local Heritage Survey outlines five management categories. A summary of these categories, and the assessment of places in the draft Local Heritage Survey, is provided below.

Level of significance to the local area	Classification	Description	Places in draft Local Heritage Survey
Exceptional	Category 1	Essential to the heritage of the locality, as well as being of significance to the State. Rare or outstanding example. Recommended for inclusion in the Heritage List.	1. Luisini Winery Group
Considerable	Category 2	Very important to the heritage of the locality. Recommended for inclusion in the Heritage List.	1. Lake Joondalup Reserve 2. Neil Hawkins Park, Joondalup 3. Shepherds Bush Reserve, Kingsley 4. Galaxy Drive-In Cinema, Kingsley 5. Hepburn Heights, Padbury 6. Duffy House (fmr), Woodvale 7. Pearsall House (fmr), Woodvale
Some/moderate	Category 3	Contributes to the heritage of the locality. Places may be included in Heritage List.	1. Tom Simpson Park, Mullaloo 2. Pinnaroo Valley Memorial Park, Padbury
Little	Category 4	Has elements or values worth noting for community interest but otherwise makes little contribution.	1. Duncraig Leisure Centre 2. Ken Colbung Statue, Duncraig 3. Pinnaroo Point, Hillarys 4. Kingsley Montessori School 5. The Little Pinnacles, Mullaloo 6. Tom's Rock, Ocean Reef
Historic site	Category 5	Has significance for its former use, an event, or its role in the development of the City.	1. Burial Site, Edgewater 2. Parin Park, Greenwood 3. Gibbs House, Joondalup 4. Geneff Park, Sorrento

As noted in the table above, places assigned a classification of Category 1 or Category 2 are recommended for inclusion in the City's Heritage List. Council may also consider including places with a Category 3 classification on the Heritage List.

Heritage list

The Local Heritage Survey itself has no role in respect to the *Planning and Development Act 2005* and should not be used as the basis of decision making on development proposals. This function is served by a Heritage List, which local governments are required to establish and maintain within their local planning scheme under the LPS Regulations.

The Heritage Council's *Guidelines for Establishing a Heritage List* outlines the following in relation to the inclusion of places on a Heritage List:

- Gives the place recognition and protection under the local planning scheme. It requires the local government to give due regard to the heritage significance of the listed place when determining a related development application.
- Owners must submit development applications for proposals that would otherwise be exempt from the requirement for development approval under the LPS Regulations. This includes demolition, applications for internal building works, single dwellings, ancillary buildings, and outbuildings and other external structures.

- May assist in defending a subsequent appeal to the State Administrative Tribunal for a refused development application or a condition of approval imposed on heritage grounds.
- Does not limit or restrict how a local government is to determine an application, or prohibit building works or other development from occurring.

The City currently has one place on its Heritage List, being Duffy House at Lot 69 (108) Duffy Terrace, Woodvale.

As detailed in the table above, the draft Local Heritage Survey has assigned one place with a classification of Category 1, and seven places with a classification of Category 2, meaning these places are recommended for inclusion in the City's Heritage List.

It is noted that the landowners of Pearsall House (former), Woodvale, and Galaxy Drive-In Cinema, Kingsley have advised that they do not support their respective properties being included in the City's Heritage List.

The formal adoption of any additions to the Heritage List in accordance with the LPS Regulations will be progressed separately at the completion of the preparation of the Local Heritage Survey. The LPS Regulations require that any proposed additions to the Heritage List must be advertised to affected owners and occupiers, as well as the broader community, for at least 21 days. The proposed Heritage List will be referred to Council for consideration and determination.

Aboriginal heritage

The *Heritage Act 2018* does not apply to places that have cultural heritage significance solely on account of their connection with Aboriginal tradition or culture. These sites have therefore not been considered as part of the preparation of the draft Local Heritage Survey.

Aboriginal heritage sites are administered under separate legislation and require both specialist archaeological and anthropological skills, as well as cultural sensitivity, which may preclude the disclosure of information to the public.

The Department of Planning, Lands and Heritage (DPLH) and the application of the *Aboriginal Heritage Act 1972* will ensure that significant aspects of Aboriginal history and culture, relating to the period before colonial settlement, are recorded and preserved.

Issues and options considered

Council may choose to:

- endorse the Local Heritage Survey with no modifications
- endorse the Local Heritage Survey with modifications
- or
- not endorse the Local Heritage Survey.

Legislation / Strategic Community Plan / Policy implications

Legislation	<i>Heritage Act 2018.</i> <i>Planning and Development (Local Planning Schemes) Regulations 2015.</i> <i>Planning and Development Act 2005.</i> <i>Local Planning Scheme No. 3.</i>
--------------------	---

10-Year Strategic Community Plan

Key theme	1. Community.
Outcome	1-5 Cultural and diverse - you understand, value and celebrate the City's unique Aboriginal and other diverse cultures and histories.
Policy	Not applicable.

Risk management considerations

Not applicable.

Financial / budget implications

The 2022/23 budget included \$60,000 for the preparation of the Local Heritage Survey, of which \$15,675 (exc. GST) was expended during that financial year on consultancy fees. The remaining \$23,375 (exc. GST) required for consultancy fees is covered by the \$20,000 which has been allocated in the 2023/24 budget and a grant of \$10,000 from DPLH. No additional funding is required for the finalisation of the Local Heritage Survey.

Regional significance

Separate to a local government's Local Heritage Survey or Heritage List, the State Register of Heritage Places (State Register) is a statutory list of places prepared under the *Heritage Act 2018* and managed by the Heritage Council of Western Australia. Inclusion in the State Register is reserved for places of State cultural heritage significance and is the highest recognition afforded at the State level. Heritage places are entered in the State Register after an assessment and registration process which includes consultation with owners, local governments and other stakeholders.

Entry into the State Register means that owners must submit development (planning) applications for proposals that would otherwise be exempt from the requirement for development approval under the LPS Regulations (including demolition and internal building works). Any development applications for that place need to be referred to the Heritage Council for advice. As outlined in the Heritage Council's *Guidelines for Establishing a Heritage List*, all places in the State Register warrant inclusion in a local government's Heritage List.

There is currently one place located within the City on the State Register, being Luisini Winery, Kingsley.

The Galaxy Drive-In Cinema, Kingsley is scheduled to be assessed as part of the Heritage Council's Assessment Program, meaning that the Heritage Council has an interest in the place and it will be assessed and considered for inclusion on the State Register.

Sustainability implications

Not applicable.

Consultation

There is no legislated requirement for advertising of the draft Local Heritage Survey. Notwithstanding, the draft Local Heritage Survey was advertised for a period of 21 days from 25 January to 15 February 2024 utilising the following methods:

- Letters to landowners of places included in the draft Local Heritage Survey.
- Emails to resident and ratepayer groups.
- A notice and documents placed on the City's website.
- A notice in the Community Engagement Network eNewsletter.
- A notice in the Joondalup Voice section of the community newspaper and Joondalup Voice eNewsletter.
- Displays at the City administration building and libraries.
- A notice on the City's social media accounts.

Further details are provided in the Engagement Outcomes Report (Attachment 2 refers).

A total of seven submissions were received during the advertising period. A summary of the matters raised in the submissions, and the City's response, is provided below.

Matters raised in submissions	City response
Kingsley Montessori School is a significant site and should be assigned a higher management category.	Element Advisory has advised that the recommended designation of Category 4 for this site represents its intangible historic, social and representativeness heritage values. Conversely, tangible values, such as aesthetic value, tends to elevate the level of significance for heritage sites.
More should be done to protect endemic plants and wildlife, including notable and historic trees.	A number of parks and natural areas have been identified in the draft Local Heritage Survey. Notwithstanding, the protection of plants and wildlife is outside the scope of the Local Heritage Survey. It is also noted that the City maintains a Significant Tree Register for trees on public land.
The Local Heritage Survey should identify where places fit into the City's timeline.	Appendix 3 of the draft Local Heritage Survey provides an overview of the key time periods in the City's history and identifies the heritage places associated with each of these periods.

Matters raised in submissions	City response
A trail to help locals and visitors find some of the heritage places would be helpful.	This is outside the scope of the Local Heritage Survey however may be investigated by the City in the future.
Incorrect photos included for Luisini Winery place record.	A modification to the draft Local Heritage Survey has been undertaken to update the place record for Luisini Winery with the correct photographs.
<p><u><i>Received on behalf of owners of Galaxy Drive-Ins, Kingsley</i></u> Objection to the Galaxy Drive-Ins, Kingsley being included on the Local Heritage Survey and Local Heritage List on account of:</p> <ul style="list-style-type: none"> • Restrictions to the future development of the site, which would create a financial burden to the owners and potentially devalue the site. • The site is located within a Housing Opportunity Area and has good potential to deliver much needed housing. • Patronage is low, and once operations cease, the site will become inaccessible to the public, rundown and unsightly. • While the property has social and cultural value, this value is not tied to the structures onsite, which are rundown and unsightly. A photographic record and placement of equipment in a museum would be more appropriate. 	<p>Inclusion in the Local Heritage Survey has no impact on the development potential of the site. While including a place on the City's Heritage List (a subsequent process) will give a place recognition under the local planning scheme, it does not limit or restrict how a local government is to determine an application or prohibit building works or other development from occurring.</p> <p>Element Advisory has advised the following:</p> <ul style="list-style-type: none"> • This site is the last drive-in theatre in the Perth metropolitan area and is therefore significant to the history of Western Australia. • The site is scheduled to be assessed as part of the Heritage Council's Assessment Program. It is considered highly likely that, once assessed, the site will be entered into the State Register of Heritage Places. This would mean that the site would be considered a Category 1 heritage place in the City's Local Heritage Survey by default.
<p><u><i>Received from community member who provided nomination for Pinnaroo Point</i></u> The place record for Pinnaroo Point is missing key information from the nomination submitted, including reference to the boat launching facility, sailing history and tavern.</p>	A modification has been undertaken to the draft Local Heritage Survey to update the place record for Pinnaroo Point to reflect these items, including photos of the boat launching facility (which was inaccessible at the time of assessment) and tavern (Hillarys Beach Club).

While no formal submission was received from the owners of Pearsall House during the consultation undertaken for the Local Heritage Survey, it is noted that they have previously advised that they do not support this place being included in the City's Heritage List. The owners will be consulted as part of the advertising period for the Heritage List, and further consideration of any comments received will be included in the reporting to Council as part of this process.

COMMENT

The City has engaged Element Advisory consultants to prepare its first Local Heritage Survey, which includes recommendations for places to be included in the City's Heritage List.

Following advertising, the draft Local Heritage Survey has been updated, where required, in response to the submissions received. The modifications include updates to the following place records:

- Luisini Winery updated to include correct photographs.
- Pinnaroo Point updated to include information regarding the boat launching facility, sailing history and tavern and photographs of the boat launching facility.

It is noted that the landowners of Pearsall House (former), Woodvale, do not support their property being included in the City's Heritage List. The owners of Galaxy Drive-In Cinema, Kingsley do not support their property being included in the Local Heritage Survey or the Local Heritage List.

As identified within this report, a local heritage survey is simply a record of places that are, or may become, of cultural heritage significance to the City. It plays an important role in recognising the history of the City, and those places which have contributed towards the City becoming what it is today. It has no statutory role or implications for development under the *Planning and Development Act 2005*. In light of this, and the assessment undertaken by Element Advisory, it is recommended that the Galaxy Drive-In Cinema, Kingsley, be included in the City's Local Heritage Survey.

While including a place on the City's Heritage List will give that place recognition under the local planning scheme, it does not limit or restrict how a local government is to determine an application or prohibit building works or other development from occurring. The formal adoption of any additional places on the Heritage List will be progressed separately at the completion of the preparation of the Local Heritage Survey. The LPS Regulations require that any proposed additions to the Heritage List must be advertised to affected owners and occupiers, as well as the broader community, for at least 21 days. The proposed Heritage List will be referred to Council for consideration and determination.

It is recommended that Council endorses the draft Local Heritage Survey.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION
(Resolution No: CJ129-06/24)

MOVED Cr Jones, SECONDED Cr Hill that Council endorses the Local Heritage Survey, with modifications, as contained in Attachment 1 to this Report.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

ATTACHMENTS

1. Draft Local Heritage Survey [13.1.2.1 - 108 pages]
2. Engagement Outcomes Report [13.1.2.2 - 67 pages]

Disclosures of interest affecting Impartiality

Name / Position	Cr John Chester.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Chester owns a property in an HOA.

Name / Position	Cr Russ Fishwick, JP.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Fishwick is an owner of property within the HOA 1.

Name / Position	Cr John Raftis.
Meeting Type	Ordinary Meeting of Council.
Meeting Date	28 May 2024.
Item No. / Subject	Item 13.1.3 – Local Planning Strategy Review – Phase 2 Outcomes and Phase 3 Scope.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Raftis owns and resides within a property within HOA 4.

13.1.3 LOCAL PLANNING STRATEGY REVIEW - PHASE 2 OUTCOMES AND PHASE 3 SCOPE (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	109808, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to consider the following:

- The outcomes of the work undertaken as part of Phase 2 of the City's *Local Planning Strategy* review.
- The proposed scope of work to be undertaken in Phase 3 of the review of the City's *Local Planning Strategy*.

EXECUTIVE SUMMARY

At its meeting held on 18 May 2021 (CJ063-05/21 refers), Council resolved to bring forward the review of the housing component of the City's *Local Planning Strategy* to allow resource planning/procurement and project planning to commence in the 2021/22 financial year.

At its meeting held on 19 April 2022 (CJ047-04/22 refers), Council endorsed the project approach for the review of the *Local Planning Strategy* and a scope of works to be undertaken as part of Phase 1 of the project (problem definition and scoping).

Phase 1 of the project undertook technical work and community consultation to identify issues relating to housing in the City of Joondalup, as well as a gap analysis to understand where work would need to be undertaken to ensure the City's *Local Planning Strategy* meets current statutory requirements.

At its meeting held on 25 July 2023 (CJ121-07/23 refers), Council noted the outcomes of the work undertaken in Phase 1 and endorsed the scope of work proposed to be undertaken as part of Phase 2 of the project (aligned and informed understanding).

Phase 2 of the project has undertaken technical work, industry engagement and desktop investigations to consider the issues identified in Phase 1, and where opportunities might exist for these issues to be addressed through the *Local Planning Strategy*.

The outcomes of the work undertaken in Phase 2 are presented in the documents included as attachments to this report. The Issue Investigation Papers (Attachments 1 to 5 refer) provide a summary of investigations undertaken in relation to housing issues in the City of Joondalup which were identified in Phase 1.

The investigations for each of the issues inform the development of the scope for Phase 3, as well as planning actions to be included within the Local Planning Strategy document to be developed in Phase 4.

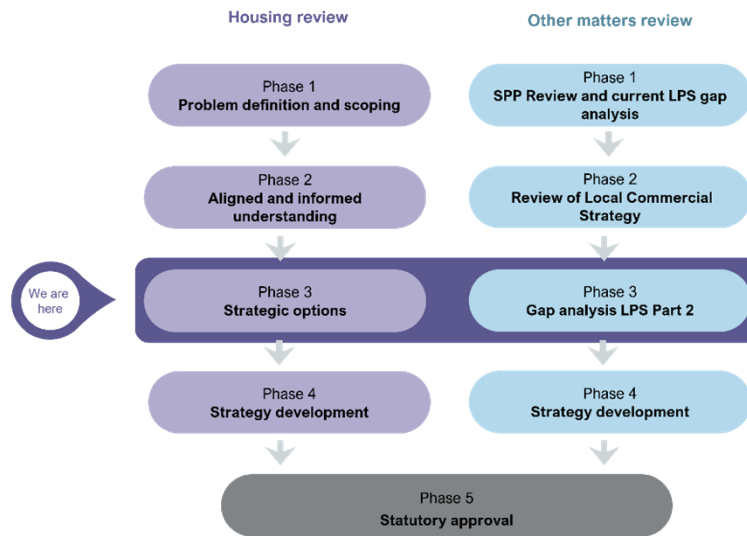

It is therefore recommended that Council endorses the proposed Phase 3 scope of work set out in Attachment 7 to allow for the development of strategic options for the spatial allocation of density to be commenced.

BACKGROUND

At its meeting held on 19 April 2022 (CJ047-04/22 refers), Council endorsed the following:

- The project approach for the review of the City's Local Planning Strategy.
- The scope of works associated with the review of the City's Local Planning Strategy.
- The Stakeholder Strategy for the housing component of the Local Planning Strategy review.
- The scope of works associated with Phase 1 of the Local Planning Strategy review.

The project approach and scope of works associated with the review of the City's Local Planning Strategy is organised in five phases:

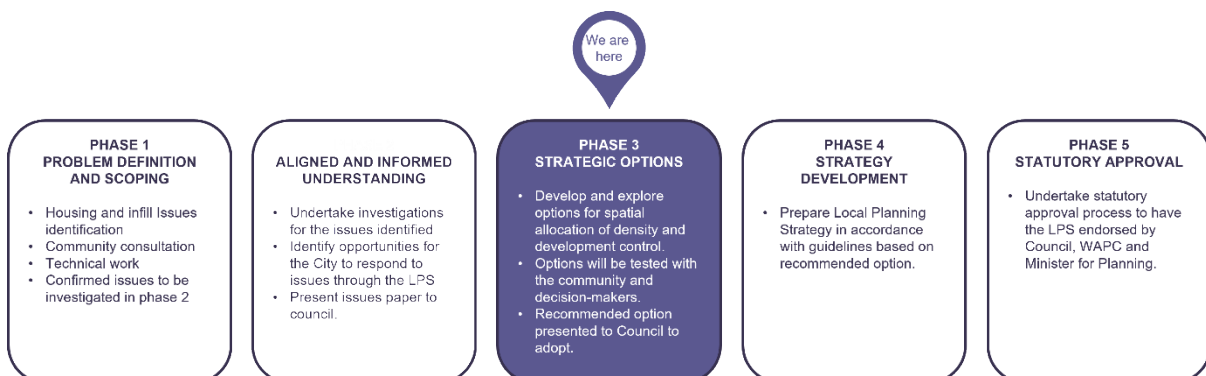

The Local Planning Strategy review involves two sub-projects: a 'housing review' (*Building Sustainable Neighbourhoods*) and an 'other matters review', the outcomes of which will be consolidated into a single statutory process that formally reviews the City's *Local Planning Strategy* and *Local Planning Scheme No. 3*.

The 'housing' review will examine issues relating to housing in the City of Joondalup and make recommendations for how the City's planning framework can best plan for liveable and sustainable development outcomes.

The 'other matters review' will consider and undertake technical work required to be undertaken to review the City's Local Planning strategy, inclusive of bringing the strategy up to date with State Planning Policy requirements.

The project has now concluded Phase 2, the outcomes of which are presented in this report and Attachments 1 – 6. The proposed scope of work, consultation approach and approximate timing associated with Phase 3 of the project is provided in Attachment 7 to this Report.

Phase 1 of the Local Planning Strategy review involved the following:

- Community consultation and technical analyses to identify issues relating to infill and housing in the City of Joondalup.
- Gap analysis of the City's current Local Planning Strategy to identify where strategic actions require updating and where technical investigations are needed.

At its meeting held on 25 July 2023 (CJ121-07/23 refers), an Issues and Actions paper was presented to Council which summarised the issues identified and the outcomes of the gap analysis. Alongside this, the paper identified actions to be undertaken in Phase 2 to investigate issues and understand how they might be able to be addressed through the Local Planning Strategy. These actions formed the scope of Phase 2 which was endorsed by Council.

The following work has been undertaken as part of Phase 2 of the Local Planning Strategy review:

- Desktop investigations into each of the issues and identification of associated opportunities to address issues where possible through the Local Planning Strategy.
- Engagement with industry bodies and residential developers to understand factors influencing the issues identified from a developer perspective.
- Review of the City's Local Commercial Strategy, specifically undertaking a revised activity centre needs assessment and hierarchy review.

Investigations and engagement outcomes are summarised in the Issues Investigation Papers (Attachments 1 to 5 refer). The revised activity centre needs assessment and hierarchy review findings and recommendations are outlined in the report prepared by economic consultants, Pracsys (Attachment 6 refers).

DETAILS

Phase 2 outcomes:

Issues investigation papers:

The issues papers provide the details of investigations undertaken for each of the issues identified in Phase 1. Each issue and its associated investigations have been categorised into the following four investigative papers:

- Issue Paper 1 – Issue Category: Allocation of density.
- Issue Paper 2 – Issue Category: Liveability outcomes for infill housing.
- Issue Paper 3 – Issue Category: Structural issues.
- Issue Paper 4 – Issue Category: Housing supply, demand and affordability.

For each issue, where applicable, the papers outline the following:

- The context within which the issue exists, and therefore the extent to which the issue is able to be addressed through the Local Planning Strategy.
- Mechanisms currently in place, or work being undertaken by the City to address the issue.
- Opportunities and key considerations for approaches to address issues further through the Local Planning Strategy.

The Local Planning Strategy will provide the long-term planning directions and actions to manage land use change and development within the City. The planning directions and actions may include zoning and density changes as well as the application of development controls through local planning policies, structure plans, and local development plans.

Recommendations included for each issue outline how the issue may be addressed through the Local Planning Strategy review project. It is important to acknowledge that in some cases, an issue is not able to be influenced or progressed through land use planning actions, and this is noted in the recommendation.

Recommendations for each issue in the issues investigation paper have/will be used to inform the following components of the Local Planning Strategy review project:

- Development of the scope of work and consultation approach for Phase 3.
- Development of the scope of work to be undertaken in Phase 4.
- Review of the City's current consultation materials for development applications.
- Review of the City's Local Planning Policies in relation to the new Residential Design Codes Volume 1 – Part C (medium density).
- Development of specific actions to be included in the Local Planning Strategy document.

In addition to the above, the issues investigation papers provide robust consideration of each of the issues identified by the community in relation to housing in the City of Joondalup, which provides an informed basis from which information can be drawn upon as the Local Planning Strategy is developed and implemented.

Industry engagement:

Industry engagement was undertaken to inform investigations pertaining to the following issue which was identified through community and technical officer commentary in Phase 1:

- Misaligned developer and policy objectives and lack of policy understanding, influencing built form outcomes.

As developers are the arm through which the majority of housing is provided in Western Australia, this engagement was undertaken to improve the City's understanding of factors which influence developers during the initial planning and development application stages of a development. This will inform how the City can prepare a Local Planning Strategy which influences improved development outcomes while continuing to deliver additional housing to meet local needs and respond to infill and dwelling targets set by the State Government.

Engagement Objectives:

- 1 To understand factors influencing the development industry when designing infill developments in the City of Joondalup.
- 2 To understand how statutory mechanisms might be able to influence better built form outcomes for infill developments.
- 3 To understand what role the market plays in the type and built form for infill housing in the City of Joondalup.

Target Stakeholders:

Engagement was undertaken with the following industry stakeholders:

- Industry representative bodies.
- Large and small-scale residential developers.

Engagement Methods and Content:

Industry representative bodies:

- Industry bodies were contacted and a meeting requested.
- Meetings were held with the Housing Industry Association, and the Planning Institute of Australia to discuss housing trends in the City and factors influencing them, the role of the market in the housing that is delivered and best practice statutory planning approaches to infill development.

Large and small-scale residential developers:

- A sample of developers were selected from a list of applicants who had lodged development applications for infill developments in the City within the last two years.
- The sample list included large home builders and smaller residential developers.
- Developers were emailed a survey with questions relating to development viability factors, statutory planning mechanisms, market influences and industry ideas to address the issues identified.

Engagement outcomes:

Key takeaways from this engagement are summarised below:

Topic	Summarised Feedback
Housing trends	
	<ul style="list-style-type: none"> • In the Australian housing market, larger houses have a higher value. Developers and landowners will seek to maximise their return on investment by maximising the value and therefore size of their dwelling. • Infill development is typically a product developed for downsizing/low maintenance living. • Development typologies are largely dictated by housing preferences (i.e. preference for 3 bed, 2 bath, double garage).
Market influence	
	<ul style="list-style-type: none"> • Land value directly impacts the ability for a landowner to develop a particular dwelling type on a lot (e.g. double storey). • Banks are typically hesitant to finance a development where it is considered to either be an overcapitalisation for the lot (based on lot size and location) or where there is no precedent for that typology in the area. • This can result in inconsistencies between what is able to be developed on a lot and what a planning instrument requires for a development. For example, minimum landscaping, deep soil area, room size, onsite parking requirements etc can only be achieved on a small, subdivided lot where a development is double storey, or has a smaller typology (i.e. 2 bed 1 bath). In areas where land values are low, this typology is typically not able to be financed, or is unaffordable for the landowner.

Statutory Planning Mechanisms	
	<ul style="list-style-type: none"> Provisions included within the amended R-Codes Volume 1 for small dwellings should work to incentivise greater dwelling diversity for infill developments. Policy provisions for larger room sizes, increased street setbacks, increased landscaping, tree planting impacts the overall affordability of infill developments. Changes to the building code to introduce higher standards for energy efficiency will improve sustainability outcomes. Incentives in policy are considered a best practice approach to achieving good planning outcomes for infill development.
Best Practice	
	<ul style="list-style-type: none"> The revised <i>Residential Design Codes</i> strikes a reasonable balance of practicality from a development perspective, whilst delivering sustainable and liveable built form outcomes. Feedback from Local Government on the overall vision and goals for infill development areas is crucial for developers. Opportunity for engagement with developers when designing policy provisions would be very beneficial.

A more detailed summary of industry feedback is provided in Issues Paper 2 (Attachment 3 refers).

Implications for the Local Planning Strategy Review:

There are some key takeaways which are important for the City to consider when preparing the Local Planning Strategy and development control around infill development, these are as follows:

- Affordability implications from policy provisions have a real impact on landowners in the City when looking to develop housing within infill areas. While it is important that the City ensures new development meets community expectations by way of liveability and sustainability, the City also has a role to provide additional housing to meet the needs of the community and broader State Government planning directions. It is therefore important to ensure that development controls for infill development are not so onerous that they render development of affordable housing products to be unviable. This indicates opportunity for the City to test any revised development controls with the development industry before implementing future changes as part of the Local Planning Strategy review.
- The City can draw upon the recently amended *Residential Design Codes* Volume 1 (R-Codes) to ensure that development achieves a balance of delivering well designed liveable and sustainable homes while still allowing additional housing to be developed to meet community need. Noting that the State Government undertook robust industry testing of development controls for the amended R-Codes and therefore minimal deviation from these provisions through local planning policies is recommended.
- Development of an overall vision for infill areas would assist with communicating to the development industry the overall intended outcomes for infill areas. This vision should be developed with community input and can be considered as part of future actions undertaken as part of Phase 3 of the Local Planning Strategy review.

Service provider engagement:

Service provider engagement was undertaken to inform investigations pertaining to the following issue which was identified through community consultation feedback in Phase 1:

- Capacity of established infrastructure to service population growth due to infill development.

Engagement was undertaken to understand how organisations responsible for the delivery of public services and infrastructure forward plan for infill development in established urban areas and where the City may need to liaise with service and infrastructure providers to ensure that infill development is considered in forward planning for public services and infrastructure.

Engagement Objectives:

- 1 Understand how service authorities are forward planning for population growth and increased residential density.
- 2 Understand how infrastructure portfolios are planning for sustainable infrastructure provision to cater for increased residential density.

Target Stakeholders:

Feedback was provided by the following service providers/infrastructure bodies:

- ATCO Gas.
- Infrastructure WA.
- Main Roads Western Australia.
- Public Transport Authority/Department of Transport.
- Water Corporation.
- Western Power.

Engagement Methods and Content:

- Service providers were emailed a survey with questions relating to how the organisation plans for additional service/infrastructure capacity to cater for infill housing development in existing urban areas and what strategic information they draw upon to identify where future capacity building may be required.

Engagement outcomes:

Detailed information pertaining to how each service provider/infrastructure body plans for future infill development is outlined in Issues Paper 2 (Attachment 3 refers).

Key takeaways from this engagement are summarised as follows:

- State government service providers forward plan for future infrastructure provision as population densities increase within established urban areas as a result of infill development.
- Service provider bodies are generally guided by State and Local Government strategic planning documents and demand modelling as uptake of density occurs over time.
- The City has a number of strategic plans and initiatives to address infrastructure provision to cater for the City's growing population.

- A Local Planning Strategy is a land use planning instrument, and is therefore limited in its ability to affect the delivery and provision of infrastructure projects. It can however be guided in its strategic aspirations by established and future planning for transport, social and service infrastructure.
- The Department of Education did not respond to the City's survey. Information from the Western Australian Planning Commission's Operational Policy 2.4 – Planning for School Sites, which provides guidance on the strategic planning for school sites in existing urban areas, has been considered as part of this investigation.

Implications for the Local Planning Strategy Review:

The review of the Local Planning Strategy will require continued engagement with State Government service providers as the project identifies a preferred strategic approach for the spatial allocation of density and prepares the new Local Planning Strategy document.

It is anticipated that once a preferred strategic approach to the allocation of density is confirmed through Phase 3, the City will undertake necessary technical studies to inform infrastructure provision where applicable. This is anticipated to include further engagement with State Government service providers, as well as studies such as a transport impact assessment to consider the impacts of any changes to the spatial allocation of density on the local road network.

The project will continue to have input from the City's technical teams in relation to strategic land use planning to inform future infrastructure delivery through the capital works program to accommodate future population growth.

Needs assessment and hierarchy review:

Overview:

Phase 1 of the 'other matters review' component of the project involved a gap analysis of the City's current *Local Planning Strategy* and a review of current State Planning Policy requirements to identify where actions or strategic directions set out in the local planning strategy require updating.

The outcomes of the other matters review identified the need to undertake a review of the City's Local Commercial Strategy to align with the new and updated requirements of *State Planning Policy 4.2 – Activity Centres*.

The WAPC's Local Planning Strategy Guidelines document has been updated since the City's current Local Planning Strategy was adopted and now does not require the preparation of separate Local Housing and Local Commercial Strategies. Instead matters concerning planning for housing and commercial development are to be addressed cohesively within the Local Planning Strategy itself guided by applicable State Planning Policies.

As such the need was identified to undertake a review of key components of the City's Local Commercial Strategy, specifically reviewing the existing activity centre hierarchy and retail needs assessment to address the updated requirements of *State Planning Policy 4.2 – Activity Centres* for the revised Local Planning Strategy.

The purpose of the activity centre hierarchy set out in *State Planning Policy 4.2 – Activity Centres*, is to provide a classification for activity centres which is consistent with their current or future planned intensity, strategic role and characteristics. The hierarchy sets out future service population, transport connectivity, land use, urban form and residential density aspirations for centres based on their centre classification, as well as providing major development thresholds for centres to ensure that development of activity centre land uses in centres occurs at an appropriate intensity for the centre and does not undermine the performance of other centres in the area.

A needs assessment was required to inform the City's activity centre hierarchy and to provide indicative projections for activity centre land use floorspace in each centre to guide future development. This information can also be used to inform strategic decisions about appropriate residential densities around walkable catchments for each centre.

The City engaged economic consultants Pracsys to undertake this work. The outcomes of this are provided in the Activity Centre Needs Assessment and Hierarchy Review report (Attachment 6 refers).

Outcomes:

The Activity Centre Needs Assessment and Hierarchy Review report provides the following key components to address the requirements of *State Planning Policy 4.2 – Activity Centres*:

- Activity centre needs assessment which projects estimated supportable floorspace for each of the City's activity centres in five-year intervals over a 20-year period to 2043.
- Confirmed the hierarchy of Activity Centres in the City of Joondalup informed by the outcomes of the activity centre needs assessment and *State Planning Policy 4.2 – Activity Centres*.

Implications for the LPS:

- The outcomes of the needs assessment and hierarchy review confirm the hierarchy of activity centres to address the requirements of *State Planning Policy 4.2 – Activity Centres* for the Local Planning Strategy.
- The needs assessment hierarchy review can be drawn upon in conjunction with *State Planning Policy 4.2 – Activity Centres*, to provide strategic input into the development of strategic options for the spatial allocation of density, and development control in Phase 3.

Proposed Phase 3 scope of work:

Attachment 7 to this report provides a flow chart overview of key components of work proposed to be undertaken as part of Phase 3 of the project.

The proposed scope of work associated with Phase 3 of the Local Planning Strategy includes community consultation and technical work to inform the development of a number of strategic options for the spatial allocation of residential density in the City and associated dwelling typologies for areas identified for infill development. Strategic options can then be tested with the community and the Department of Planning, Lands and Heritage to identify a preferred option to form the basis of the revised Local Planning Strategy.

This approach provides a strategic review of the spatial allocation of density in the City which is informed by community input and state set strategic planning requirements, while not assuming the existence of the current Housing Opportunity Areas, and therefore remaining consistent with the intent of Council's request.

It is proposed that the City engages appropriately experienced consultants to undertake community consultation activities and technical work to develop options for strategic approaches for infill development in the City. It is proposed that City officers will work collaboratively with the appointed consultant to develop strategic options. This approach is taken to ensure that best practice is provided through the engagement of subject matter experts who are independent of the City, while still allowing for option development to be informed by the local experience and knowledge of City officers.

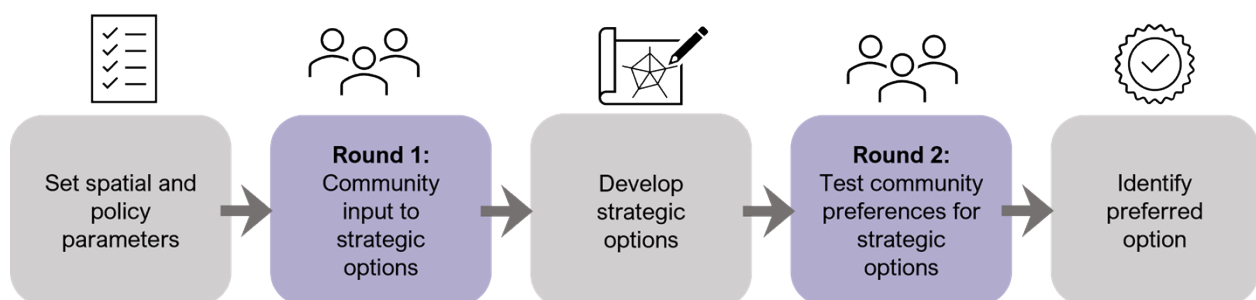

Technical work:

The technical scope of work associated with the proposed Phase 3 scope of work will include the following:

- Identification of spatial and policy parameters to provide input into strategic options.
- Development of spatial and strategic options (in collaboration with consultant) and informed by community consultation.
- Preparation of a multi-criteria analysis of developed options to identify a preferred option considering:
 - State Government planning requirements
 - Community consultation outcomes
 - Department of Planning Lands and Heritage feedback
 - Best practice planning inputs from consultants.

Consultation:

The figure below outlines how community consultation is proposed to fit within the overall approach for Phase 3 of the Local Planning Strategy Review. The approach proposes two rounds of consultation which will provide community input into the development of strategic options for the location and type of density in the City, and test strategic options with the community once they are developed.

It is intended that the City will engage appropriately experienced consultants to prepare a consultation plan and undertake community consultation activities alongside City officers for Phase 3 of the Local Planning Strategy review. It is also intended that the draft community consultation plan will be presented to Council for endorsement ahead of consultation activities taking place.

Attachment 7 to this Report includes the overall consultation approach and the associated objectives for each consultation point.

Issues and options considered:

Council may choose the following:

- Note the outcomes of the work undertaken in Phase 2 (Attachments 1 to 6 refer) and endorse the proposed Phase 3 scope of work and consultation approach (Attachment 7 refers).
- Note the outcomes of the work undertaken in Phase 2 (Attachments 1 to 6 refer) and modify the proposed Phase 3 scope of work and consultation approach (Attachment 7 refers).
- or
- Note the outcomes of the work undertaken in Phase 2 (Attachments 1 – 6 refer) and not endorse the proposed Phase 3 scope of work and consultation approach (Attachment 7 refers).

Council's endorsement of the proposed Phase 3 scope of work is required for the project to progress.

Legislation / Strategic Community Plan / Policy implications

Legislation *Planning and Development Act 2005.*
 Planning and Development (Local Planning Schemes) Regulations 2015.

10-Year Strategic Community Plan

Key theme 2. Environment.

Outcome 2-2 Clean and sustainable - you are supported to minimise waste and live sustainably in a clean environment.

Key theme 3. Place.

Outcome 3-1 Connected and convenient - you have access to a range of interconnected transport options.
 3-2 Well-planned and adaptable - you enjoy well-designed, quality buildings and have access to diverse housing options in your neighbourhood.
 3-3 Attractive and leafy - you have access to quality public open spaces and enjoy appealing streetscapes.

Key theme 5. Leadership.

Outcome 5-2 Proactive and represented- you are confident that the City is advocating on your behalf for initiatives that benefit the community.
 5-3 Engaged and informed - you are able to actively engage with the City and have input into decision-making.

Risk management considerations

The investigation of issues through Phase 2 allows for a robust process which has considered in depth the issues which were raised by the community in relation to housing. This manages the risk of the project outcomes not responding to stakeholder concerns and reducing confidence in decision making. The Issue Investigation Papers identify where issues may not be able to be addressed through actions within the Local Planning Strategy, which provides transparency and reduces risk of misaligned expectations being set with the community.

Financial / budget implications

The project budget for the 2023/24 financial year is \$150,000. Total expenditure for Phase 2 of the project has been \$54,780.

An amount of \$170,000 is proposed in the 2024/25 annual budget for consultant work to be undertaken as part of Phase 3.

Regional significance

Perth is currently home to more than two million people, and this is anticipated to grow to 3.5 million by 2050.

The future growth of the Perth and Peel metropolitan areas is guided by the *Perth and Peel @ 3.5 million* suite of documents, wherein the sub-regional frameworks provide strategic direction and certainty for land use planning and infrastructure provision. This suite of documents aims to guide the future growth of the Perth and Peel regions to accommodate 3.5 million people by 2050 and in doing so, limit unsustainable urban sprawl and encourage greater housing diversity to meet changing community needs.

The frameworks provide strategic guidance to local governments to inform the development of planning instruments. Specific to the City of Joondalup is the *North-West Sub-regional Planning Framework* which sets infill development targets for the City to achieve through its *Local Planning Strategy*.

Local governments within Perth and Peel are required to ensure that the broader metropolitan aspirations for urban consolidation that are set out in *Perth and Peel @ 3.5 million* are reflected in strategic planning documents prepared to guide development and housing provision locally.

Sustainability implications

Sustainability was a key issue raised in the consultation undertaken in Phase 1. Issue Paper 2 (Attachment 3 refers) investigates sustainable design for infill developments and provides an overview of actions currently in place to address the issue and opportunities as to how this issue can be considered through the Local Planning Strategy review.

Consultation

Community consultation was not undertaken as the purpose of Phase 2 was to investigate the issues raised through community consultation in Phase 1.

Phase 3 proposes to undertake two rounds of community consultation as outlined in the preceding sections of this report.

COMMENT

The investigations undertaken in Phase 2 contribute to addressing the project objective of providing a robust, transparent and defensible review of the City's Local Planning Strategy.

Phase 2 investigations provide consideration of each of the key issues identified by the community and how they are best able to be addressed through actions in the Local Planning Strategy. This provides certainty for decision makers in progressing with the next stage of the project.

The activity centre needs assessment and hierarchy review (Attachment 6 refers) addresses the statutory requirements of the State Government planning framework, while providing strategic input into the development of options for the spatial allocation of density by confirming the City's hierarchy of centres.

Phase 3 represents the largest and most significant phase of the project which will define how the City's local planning framework plans for the delivery of additional housing to meet community need and state government requirements. It will also consider how infill housing is best delivered through development controls to ensure infill development outcomes meet best practice standards and community expectations for liveability and sustainability.

Given the strategic importance of the project and to remain consistent with the approach undertaken in Phase 1, it is proposed that community consultation plans for each round of consultation are presented to Council for endorsement prior to consultation activities being undertaken. While adding additional time to this phase of the project, this approach reduces the risk of the project not meeting community expectations in terms of consultation and provides for a defensible robust process. An approximate timing plan for the progression of the work associated with Phase 3 is provided in Attachment 7.

Council's endorsement of the proposed Phase 3 scope of work and consultation approach will enable the following steps to commence:

- 1 Engagement of consultants to prepare the consultation plan for the first round of community consultation and to undertake technical work to inform the development of strategic options.
- 2 Commencement of technical planning work to develop strategic options for the spatial allocation of density and housing typologies.
- 3 Continued engagement with the Department of Planning Lands and Heritage on strategic directions relating to the Local Planning Strategy review.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ130-05/24)

MOVED Cr Jones, SECONDED Cr Hill that Council:

- 1 NOTES the outcomes of Phase 2 as outlined in Attachments 1 to 6 of this Report;**
- 2 ENDORSES the proposed scope of work and consultation approach for Phase 3 of the *Local Planning Strategy* review as provided in Attachment 7 of this Report.**

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

13.1.4 PROPOSED AMENDMENT TO LOCAL PLANNING SCHEME NO. 3 - LOT 36 (95) AND LOT 28 (67) WOODVALE DRIVE, WOODVALE - CONSIDERATION FOLLOWING ADVERTISING (WARD - CENTRAL)

WARD	Central
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	111003, 101515
AUTHORITY / DISCRETION	Legislative - includes the adoption of local laws, planning schemes and policies.

PURPOSE

For Council to consider a proposed amendment to *Local Planning Scheme No. 3* to rezone a portion of Lot 36 (95) Woodvale Drive, Woodvale from 'Rural' to 'Residential' and a portion of Lot 28 (67) Woodvale Drive, Woodvale, from 'Private Community Purposes' to 'Residential' following public advertising.

EXECUTIVE SUMMARY

The City has received an application for an amendment to *Local Planning Scheme No. 3* (LPS3) on behalf of the owner of Lot 36 (95) Woodvale Drive, Woodvale.

The scheme amendment proposes to rezone the western portion of Lot 36 from 'Rural' to 'Residential' and a portion of Lot 28 from 'Private Community Purposes' to 'Residential'. Lot 36 includes two residential dwellings, one of which is vacant, and ancillary structures while Lot 28 encompasses the Woodvale Baptist Church and associated buildings. The proposed scheme amendment applies a residential density coding of R30 to the subject area.

The City's current *Local Planning Strategy* recommends that the two remaining 'Rural' zoned lots within the City be rezoned to reflect the surrounding residential uses. Lot 28 was rezoned to 'Private Community Purposes' when LPS3 was gazetted however a portion of Lot 36 Woodvale Drive remains zoned 'Rural', which is inconsistent with the 'Urban' zoning under the Metropolitan Region Scheme (MRS). This proposed scheme amendment will address this inconsistency and align with the recommendation of the City's *Local Planning Strategy*.

At its meeting of 25 July 2023 (CJ125-07/23 refers), Council resolved to advertise the proposed scheme amendment for public comment, and it was subsequently advertised for 42 days, closing on 28 March 2024.

A total of 83 submissions were received, comprising two submissions of support, 79 submissions objecting to the proposal and two submissions which provided comment only. Two submissions from external service authorities were also received, one of which provided comment on the proposal, and one stating no objection to the proposal.

The comments in support of the proposed scheme amendment primarily relate to the opportunity for more housing and the consideration given to environmental matters. The comments received objecting to the proposal relate to environmental impacts, the proposed residential coding of R30, impacts on traffic and the possible continuation of Waterview Drive from the adjoining 'The Sanctuary' residential estate.

It is considered that the zoning of the site under the MRS as 'Urban', the recommendation of the *Local Planning Strategy*, and advice from the Environmental Protection Authority that a formal assessment is not required, provides certainty around the appropriateness of rezoning the subject sites from 'Private Community Purposes' and 'Rural' to 'Residential'.

It is therefore recommended that Council SUPPORTS the proposed amendment to Local Planning Scheme No. 3 and forwards it to the Western Australian Planning Commission for consideration.

BACKGROUND

Suburb/Location	Lot 36 (95) and Lot 28 (67) Woodvale Drive, Woodvale.
Applicant	Urbis.
Owner	Woodvale Baptist Church; Riverswan Holdings Pty Ltd.
Zoning	Rural; Private Community Purposes.
LPS	Urban; Parks and Recreation.
MRS	
Site area	43,648m ² (Lot 36) and 10,717m ² (Lot 28)
Structure plan	Not applicable.

The western portion of Lot 36 (95) Woodvale Drive is zoned 'Rural' under LPS3 and 'Urban' under the Metropolitan Region Scheme (MRS). The eastern portion of the lot extends into Yellagonga Regional Park and is reserved 'Parks and Recreation' under the MRS (Attachments 1 and 2 refer). Lot 36 comprises two residential dwellings, one of which is unoccupied, and associated ancillary structures.

Lot 28 (67) Woodvale Drive is zoned 'Private Community Purposes' under LPS3. Lot 28 encompasses Woodvale Baptist Church and associated buildings including an auditorium and caretakers dwelling.

Both lots are bound by Woodvale Drive and Yellagonga Regional Park to the west and east respectively. Lot 36 also adjoins 'The Sanctuary' residential estate to the south which comprises of a mix of R20, R25 and R40 coded lots (Attachments 1 and 2 refer).

At the time of adoption of the City's *Local Planning Strategy*, both Lot 36 and Lot 28 were zoned 'Rural' under the then District Planning Scheme No. 2, and the strategy noted that the rural zoning was no longer appropriate for these lots in the context of the surrounding residential uses and recommended that the lots be rezoned to reflect the surrounding uses.

While Lot 28 was rezoned to 'Private Community Purposes' as part of the implementation of LPS3, Lot 36 remained zoned 'Rural' as the western portion of the lot was still zoned 'Rural' under the MRS zoning that applied at the time. The MRS zoning of the western portion of Lot 36 has since been amended to 'Urban'.

At its meeting of 25 July 2023 (CJ125-07/23 refers), Council resolved to proceed to advertise the proposed scheme amendment to LPS3 for 42 days.

DETAILS

Applicant's submission

The proposal seeks to amend LPS3 to rezone the following:

- The western portion of Lot 36 (95) Woodvale Drive, Woodvale from 'Rural' to 'Residential'.
- A 967m² portion of Lot 28 Woodvale Drive, Woodvale from 'Private Community Purposes' to 'Residential'.
- Apply a residential density coding of R30 to the above (Attachment 2 refers).

In relation to Lot 36, the amendment only refers to the portion of the site zoned 'Rural' under LPS3, with the eastern portion to remain as the 'Parks and Recreation' reserve under the MRS. The 'Rural' zone portion represents 24,088m² or 54% of the overall lot area.

The applicant notes that in relation to Lot 28, the amendment only refers to a portion of the site which is surplus to the needs of the Woodvale Baptist Church and the inclusion of this portion will facilitate a more logical and coordinated subdivision layout.

A full copy of the applicant's submission is provided as Attachment 3 to the report.

Issues and options considered

Key themes and issues

The key themes and issues arising from the submissions received as part of consultation, and the applicant's response to those issues, are detailed in Attachment 4 to this report. The main areas of concern raised in the submissions are outlined below.

Environmental impacts

Submissions raised concerns regarding the loss of local fauna habitat, impact on the adjoining Yellagonga Regional Park and removal of existing mature trees associated with future development of the site.

As part of the application, the applicant provided an Environmental Assessment Report (Attachment 5 refers), which found that residential development can be undertaken on site without significant environmental impact. The key findings of the report are as follows:

- The vegetation is rated as being in a completely degraded condition and does not meet the definition of any Threatened or Priority Ecological Communities.
- Remnant native trees contain no native understorey species.

- The native trees on the site provide 0.615ha of potential foraging habitat for black cockatoos, although no evidence of foraging on site was observed at the time of assessment.
- The site contains 20 Marri, Jarrah and Tuart trees that meet the definition of breeding habitat for black cockatoos, though no evidence of breeding on site was observed.
- The site contains a portion of Walluburnup Swamp which is a Conservation Category Wetland. The preparation of a Wetland Management Plan, showing a 50m buffer between the wetland boundary and the proposed dwellings, is recommended as a condition of any future subdivision.

The report notes that any vegetation clearing that would have a significant impact on black cockatoos is required to be referred to the Commonwealth Department of Climate Change, Energy, the Environment and Water under the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)*. As the site contains 20 potential black cockatoo breeding habitat trees, which would likely be cleared as part of future residential development, the report recommends that a referral be made under the *EPBC Act*. It is the responsibility of the applicant to make this referral, and obtain approval where required, under the *EPBC Act*. The applicant has advised that this referral has been made.

As required under the LPS Regulations, the amendment was referred to the Environmental Protection Authority (EPA). In considering the amendment, the EPA initially advised that further information was required, demonstrating the following:

- How the EPA's mitigation hierarchy, which sets out a sequence of actions to help reduce adverse environmental impacts, had been considered.
- How environmental impacts could be managed through additional provisions in LPS3.

The applicant provided an assessment against the mitigation hierarchy, which was submitted to the EPA together with potential scheme provisions requiring any application for subdivision or development on the site to be accompanied by a suite of environmental management plans. After reviewing this further information, the EPA advised that the amendment was considered unlikely to have a significant impact on the environment, and that a formal assessment under the *Environmental Protection Act 1986* was not required. A copy of the EPA determination and advice is included as Attachment 6 to this Report.

Notwithstanding the above, in order to mitigate potential future impacts on environmental values, the EPA recommended that the proposed scheme amendment be modified to incorporate the following provisions within Table 6 (additional site and development requirements) of LPS3:

Any application for subdivision or development of the site shall include the following:

- Identification of potential threatened fauna habitat trees within the site proposed for retention.*
- 'Public Open Space' areas identified with an objective of retaining key environmental values.*
- Management plans which are to be endorsed by the City of Joondalup, with or without conditions, prior to any site works, and thereafter implemented:*
 - Urban Water Management Plan demonstrating on-site retention and treatment of stormwater.*
 - Wetland Management Plan, including wetland buffer assessment.*
 - Re-vegetation Management Plan including proposed planting of native vegetation that may provide future habitat for threatened fauna species, within the wetland buffer and 'Parks and Recreation' reserve.*

The EPA advice notes that the portion of Lot 28 within the amendment area is completely void of vegetation, and that their advice only pertains to the western portion of Lot 36. In accordance with the advice received from the EPA, it is recommended that the scheme amendment be modified to incorporate the abovementioned provisions, to be applied to any future recommendation to the WAPC on an application for subdivision, or as a condition of any development approval for Lot 36.

It is noted that when the amendment was considered by Council at their 25 July 2023 meeting (CJ125-07/23 refers), Council's resolution included the following:

In the event the scheme amendment proposal is approved and the subsequent subdivision of the site does not allow for the retention of the existing Marri, Jarrah and Tuart trees, REQUESTS the proponent to appropriately revegetate the eastern portion of Lot 36 (95) Woodvale Drive, Woodvale zoned 'Parks and Recreation' to offset the loss of the trees and NOTES that this will be recommended to the Western Australian Planning Commission through a condition of subdivision approval.

In considering the proposed scheme amendment, the EPA reviewed this resolution and advised that the scope of revegetation could be expanded to include revegetation of any future public open space areas within the amendment area. It is recommended that the above wording be modified to address this EPA advice.

As discussed above, the concerns raised by submissions regarding the environmental impacts of the proposed amendment have been addressed by the following:

- Modifying the amendment as per advice from the EPA, to include environmental conditions for any future application for subdivision or development of Lot 36.
- A recommendation that any future subdivision of Lot 36 consider revegetation of the 'Parks and Recreation' portion of the lot, as well as revegetation of areas of public open space within the lot.

Impact on kangaroos

In addition to the abovementioned environmental concerns, several submissions raised concern with the impact of the proposed amendment on the local kangaroo population, specifically in relation to loss of kangaroo habitat and impact on kangaroo movements through Yellagonga Regional Park.

Comments from the Department of Biodiversity, Conservation and Attractions (DBCA; discussed in further detail in the 'Sustainability implications' section of this Report) notes that it is likely that the amendment area currently provides grazing habitat for kangaroos and that the removal of this habitat will displace kangaroos into the adjoining regional park.

While advice from DBCA notes that a referral under the EPBC Act is required due to the impact on habitat for threatened black cockatoo species, no advice was provided to indicate that such a referral would be required in relation to the impact of the proposed amendment on kangaroos. Similarly, while the EPA made recommendations for modifications to the amendment to mitigate potential impacts on cockatoo habitat values, no such advice was received in relation to kangaroos.

While kangaroos may currently graze within the western portion of Lot 36, it is important to note that this area is privately owned and does not form part of Yellagonga Regional Park. The proposed scheme amendment would facilitate residential development of this western portion of the lot, consistent with the 'Urban' zoning of this portion under the MRS. As noted in the Background section of this report, Lot 28 and the western portion of Lot 36 were rezoned from 'Rural' to 'Urban' under the MRS in recognition that the rural zoning is no longer appropriate for these lots in the context of the surrounding residential land uses.

Conversely, the eastern portion of Lot 36 (which represents 46% of the overall site area) forms part of the Yellagonga Regional Park, reflected by the 'Parks and Recreation' reservation for this portion under the MRS. This area will remain available to local fauna, including kangaroos, and will provide a connection to adjacent areas reserved for 'Parks and Recreation' to the north and south (Attachment 2 refers). The EPA's proposed modifications to the proposed scheme amendment (namely those relating to the identification of a wetland buffer and public open space areas which retain key environmental values) would provide separation between residential development on the subject site and the area reserved for 'Parks and Recreation'.

Notwithstanding the above, the identification and relocation of any fauna onsite, including kangaroos, may be addressed through a recommendation for a Fauna Management Plan as part of any future subdivision application received for the site, which would be assessed and endorsed by the appropriate authority. It is recommended to include the requirement for a Fauna Management Plan to be included as an additional scheme provision in the same way as other management plans (that is; Urban Water Management Plan, Wetland Management Plan and Re-vegetation Management Plan) have been recommended by the EPA.

Residential density

The amendment proposes a residential density coding of R30 for the subject area. Submissions raised concern with this density coding on the basis that it will allow for lot sizes and development outcomes which are incompatible with the surrounding area and suggested that a coding of R20 or R25 would be more appropriate.

Existing residential development directly adjoins the southern boundary of Lot 36 and consists of lots coded 'R20', 'R25' and 'R40'. The proposed density of R30 is considered appropriate in this context and will allow for a range of lot and dwelling sizes to be provided adjoining an established residential area.

Traffic

Submissions raised concern with the additional vehicle traffic that would be generated by residential development within the amendment area and noted the existing traffic congestion experienced along Woodvale Drive. Concerns were also raised about whether the Transport Impact Assessment (TIA) (Attachment 7 refers) submitted with the application considered morning and afternoon traffic associated with the nearby Woodvale Secondary College.

The TIA considers the proposed rezoning in the context of 38 additional residential lots, with an indicative concept plan proposing two new intersections on Woodvale Drive (Figure 2-3, page 6, Attachment 7). The TIA provides an assessment of peak hour traffic flows in the vicinity of the subject site, including school traffic, and indicates that the proposed amendment would result in minimal traffic impacts on the internal and external transport network.

Separate to this scheme amendment proposal, a technical assessment has been undertaken on Woodvale Drive. Following this assessment a Local Traffic Management project has been listed for consideration in the 2024-25 financial year to install a traffic management treatment on the section of Woodvale Drive from the boundary that the City shares with the City of Wanneroo to Duffy Terrace. The proposed treatment includes a flush red asphalt median, raised median with trees, a pedestrian refuge median to connect to the northern path access into Yellagonga Regional Park, and a two-metre wide concrete footpath on the southern verge. The existing slow point will be retained.

The City of Wanneroo also has plans to treat its section from Wanneroo Road to the boundary with the City and is understood to be similar to the treatment proposed by the City. Timing as to when this will occur is not confirmed at this time.

Concept road layout

Submissions raised concern with Waterview Drive being extended into the subject site, noting the potential impact on the amenity of the adjoining 'The Sanctuary' residential estate, and on pedestrian and wildlife safety.

It is noted that detailed road and lot configurations are not part of the scheme amendment assessment process. Notwithstanding, the City has reviewed the TIA and noted some concerns with the alignment of the proposed intersections on Woodvale Drive as proposed in the concept plan, however, is comfortable that the alignment of these intersections can be suitably modified so as not to compromise future residential development at the site. The proposed concept plan also resolves an existing waste vehicle access issue at the adjoining southern residential area by proposing to continue Waterview Drive into the subject site, providing a connection for waste trucks back through to Woodvale Drive.

The suitability of internal road layouts and intersection details will be assessed in detail as part of any future application for the subdivision of the site.

Options

Council may choose the following:

- support the amendment to the local planning scheme with no modifications
- support the amendment to the local planning scheme with modifications
or
- not support the amendment to the local planning scheme.

Legislation / Strategic Community Plan / Policy implications

Legislation *City of Joondalup Local Planning Scheme No. 3.
Planning and Development (Local Planning Schemes) Regulations
2015.
Planning and Development Act 2005.*

10-Year Strategic Community Plan

Key theme 3. Place.

Outcome 3-2 Well-planned and adaptable – you enjoy well-designed, quality buildings and have access to diverse housing options in your neighbourhood.

Policy Not applicable.

Planning and Development Act 2005 and Planning and Development (Local Planning Schemes) Regulations 2015

Part 5 of the *Planning and Development Act 2005* (Planning Act) along with the *Planning and Development (Local Planning Schemes) Regulations 2015* (LPS Regulations) enables a local government to prepare or amend a local planning scheme and sets out the process to be followed.

Under the LPS Regulations, scheme amendments are classified as being basic, standard or complex amendments. In resolving to proceed with an amendment, Council needs to specify the amendment type and explain the reason for that classification. As the proposed scheme amendment will result in the subject site aligning with a recommendation of the City's *Local Planning Strategy* and the *Metropolitan Region Scheme*, it is considered a standard amendment under the LPS Regulations.

At its meeting held on 25 July 2023 (CJ197-12/22 refers), Council resolved to proceed to advertise the proposed amendment to LPS3 for 42 days. The proposed amendment was referred to the EPA to decide whether a formal review was necessary. The EPA did not consider that the amendment should be assessed under Part IV Division 3 of the *Environmental Protection Act 1986* and as such public advertising of the proposed scheme amendment was able to proceed.

Upon closure of the advertising period, Council is required to consider all submissions received and to either support the amendment, with or without modifications, or not support the amendment. The decision is then forwarded to the WAPC, which makes a recommendation to the Minister for Planning. The Minister can either grant final approval to the amendment, with or without modifications, or refuse the amendment.

Local Planning Scheme No. 3

Clause 16 (Table 2 Zone objectives) of LPS3 sets out the objectives of the 'Residential' zone as follows:

Zone name	Objectives
Residential	<ul style="list-style-type: none"> To provide for a range of housing and a choice of residential densities to meet the needs of the community. To facilitate and encourage high quality design, built form and streetscapes throughout residential areas. To provide for a range of non-residential uses, which are compatible with and complementary to residential development.

Risk management considerations

Not applicable.

Financial / budget implications

The applicant has paid fees of \$7,034.43 (including GST) to cover all costs associated with the assessment of the scheme amendment. The fees do not include the cost of advertising as the applicant is required to cover these costs separately.

Regional significance

Yellagonga Regional Park is a class A reserve, Bush Forever site and a conservation category wetland. Yellagonga Regional Park is jointly managed by the Department of Biodiversity, Conservation and Attractions (DBCA) and both the City of Joondalup and City of Wanneroo. The *Yellagonga Integrated Catchment Management Plan 2021-2026* prepared jointly by the City of Joondalup and the City of Wanneroo provides a comprehensive and integrated approach to managing the Park and its catchment.

The eastern portion of Lot 36 Woodvale Drive is part of the Yellagonga Regional Park which is reflected by the 'Parks and Recreation' reservation under the MRS. This portion of land is still in private ownership, however the tenure arrangements may be reviewed by the Western Australian Planning Commission (WAPC) in the event that a subdivision proposal for the western portion of the lot is submitted to the WAPC.

Sustainability implications

Environmental

As required under the LPS Regulations, the proposed scheme amendment was referred to the EPA. The EPA advised that the amendment was considered unlikely to have a significant impact on the environment, and that a formal assessment under the *Environmental Protection Act 1986* was not required. As part of its advice, the EPA recommended that the amendment be modified to incorporate scheme provisions in order to mitigate potential impacts on environmental values at future planning stages. It is recommended that the amendment be modified to incorporate these provisions.

The amendment was also referred to the Department of Water and Environmental Regulation (DWER) and the Department of Biodiversity, Conservation and Attractions (DBCA). DWER advised that it had no objection or comment on the proposed scheme amendment. DBCA provided the following comment in relation to issues to be addressed at future planning stages, should the amendment be approved, including:

- species selection for revegetation of the wetland buffer should reflect historical and surrounding vegetation, rather than being selected to minimise fire risk
- the provision of public open space outside of the wetland buffer, as indicated on the concept plan provided with the applicant's submission (Figure 2-3, page 6, Attachment 7 refers), is appropriate
- the Bushfire Management Plan will need to consider revegetation of the wetland buffer.
- Removal of kangaroo habitat for development purposes will displace the kangaroos into the adjoining regional park
- the proposed amendment area contains habitat for threatened black cockatoo species. A referral under the EPBC Act should be undertaken by the proponent.

As noted by DBCA, these matters may be addressed at future planning stages (that is; subdivision and development). A summary of these issues raised, as well as the applicant's and City's comment, is included as Attachment 4 to this Report.

Due to the potential impact on black cockatoos, the applicant has referred the amendment to the Commonwealth Department of Climate Change, Energy, the Environment and Water under the EPBC Act. If subsequent approval under the EPBC Act is required, it is the responsibility of the applicant to obtain this approval.

Consultation

The amendment was advertised for a period of 42 days, from 15 February 2024 to 28 March 2024, by way of the following:

- 73 letters to adjoining and nearby landowners.
- Letters to relevant service authorities.
- Two signs on site.
- A notice in the local newspaper.
- A notice and documents placed on the City's website.
- A notice on the City's social media platforms.

A total of 83 submissions were received, consisting of two submissions of support, 79 submissions objecting to the proposal and two submissions which provided comment only. Two submissions from external service authorities were also received, one of which provided comment on the proposal, and one which stated no objection to the proposal.

The main comments of support raised in the general submissions were as follows:

- Opportunity for more housing in the area.
- Appropriate consideration given to environmental matters.

The main issues of objection were as follows:

- Negative environmental impacts, including loss of mature trees, impact on local fauna (especially kangaroos and black cockatoos) and impact on Yellagonga Regional Park.
- Insufficient capacity of the local road network to accommodate additional traffic, noting existing traffic congestion experienced along Woodvale Drive.
- Objection to Waterview Drive being extended into the subject site, noting the potential impact on the amenity of the adjoining 'The Sanctuary' residential estate, and on pedestrian and wildlife safety.
- Objection to R30 density coding, with preference instead for R20 or R25.

A summary of the issues raised, as well as the applicant's and City's comment, is included as Attachment 4 to this Report.

COMMENT

The proposed scheme amendment to rezone a portion of Lot 36 (95) Woodvale Drive, Woodvale from 'Rural' to 'Residential' and a portion of Lot 28 (67) Woodvale Drive, Woodvale, from 'Private Community Purposes' to 'Residential', is considered appropriate.

The proposed scheme amendment is consistent with the recommendation of the City's *Local Planning Strategy* and will assist in providing additional residential development within a well-established network.

The amendment has been modified in response to advice received from the EPA, and this modification is considered to address concerns raised in submissions relating to the environmental impact of the amendment.

On this basis it is recommended that Council supports the proposed scheme amendment, with modifications, and forwards it to the WAPC for consideration.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION

MOVED Cr Kingston, **SECONDED** Mayor Jacob that Council:

- 1** Pursuant to section 75 of the *Planning and Development Act 2005* and Part 5 of the *Planning and Development (Local Planning Schemes) Regulations 2015*, **SUPPORTS** Scheme Amendment No. 15 to the *City of Joondalup Local Planning Scheme No. 3*, as modified, to:

- 1.1** rezone the western portion of Lot 36 (95) Woodvale Drive, Woodvale from 'Rural' to 'Residential' and a 967m² portion of Lot 28 (67) Woodvale Drive, Woodvale from 'Private Community Purposes' to 'Residential', as depicted in Attachment 2 to this Report, and applying the 'R30' residential density code to this area;
- 1.2** insert requirement No. 5 to Table 6 'Additional requirements that apply to land in the Scheme area';

No.	Description of land	Requirement
5	Lot 36 (No. 95) Woodvale Drive, Woodvale	<p>Any application for subdivision or development of the site shall include the following:</p> <ul style="list-style-type: none"> a) Identification of potential threatened fauna habitat trees within the site proposed for retention. b) 'Public Open Space' areas identified with an objective of retaining key environmental values. c) Management plans which are to be endorsed by the City of Joondalup, with or without conditions, prior to any site works, and thereafter implemented: <ul style="list-style-type: none"> i. Urban Water Management Plan demonstrating on-site retention and treatment of stormwater. ii. Wetland Management Plan, including wetland buffer assessment. iii. Re-vegetation Management Plan including proposed planting of native vegetation that may provide future habitat for threatened fauna species, within the wetland buffer and 'Parks and Recreation' reserve. iv. Fauna Management Plan including consideration of relocation practices for existing fauna identified on-site.

- 1.3** amend the scheme map accordingly;
- 2** In the event that the scheme amendment proposal is approved and the subsequent subdivision of the site does not allow for the retention of the existing Marri, Jarrah and Tuart trees, **REQUESTS** the proponent to appropriately revegetate the eastern portion of Lot 36 (95) Woodvale Drive, Woodvale zoned 'Parks and Recreation', and any areas of public open space within the 'Residential' zoned portion of the site, to offset the loss of the trees and **NOTES** that this will be recommended to the Western Australian Planning Commission through a condition of subdivision approval;

- 3 **AUTHORISES** the affixation of the Common Seal and signing of the documents associated with the Scheme Amendment No. 15 to the *City of Joondalup Local Planning Scheme No. 3*;
- 4 Pursuant to Part 5 of the *Planning and Development (Local Planning Schemes) Regulations 2015* **FORWARDS** Scheme Amendment No. 15 and Council's decision to the Western Australian Planning Commission for consideration.

The Director Infrastructure Services left the Chamber at 11.06pm and returned at 11.08pm.

AMENDMENT MOVED Cr Pizzey, SECONDED Cr May that the Motion be AMENDED to read as follows:

"1.2 *insert requirement No. 5 to Table 6 'Additional requirements that apply to land in the Scheme area';*

No.	Description of Land	Requirement
5	Lot 36 (No. 95) Woodvale Drive, Woodvale	<p>Any application for subdivision or development of the site shall include the following:</p> <ul style="list-style-type: none"> a Identification of potential threatened fauna habitat trees within the site proposed for retention. b Public Open Space' areas identified with an objective of retaining key environmental values. c An internal road network that does not connect with existing Waterview Drive. d Management plans which are to be endorsed by the City of Joondalup, with or without conditions, prior to any site works, and thereafter implemented: <ul style="list-style-type: none"> i Urban Water Management Plan demonstrating on-site retention and treatment of stormwater. ii Wetland Management Plan, including wetland buffer assessment. iii Re-vegetation Management Plan including proposed planting of native vegetation that may provide future habitat for threatened fauna species, within the wetland buffer and 'Parks and Recreation' reserve. iv Fauna Management Plan including consideration of relocation practices for existing fauna identified on-site.

PROCEDURAL MOTION – THAT THE MOTION BE NOW PUT
(Resolution No: CJ131-05/24)

MOVED Mayor Jacob, SECONDED Cr Hamilton-Prime that the Motion be now PUT as per 10.1(b) of the *Meeting Procedures Local Law 2013*.

The Motion was Put and

CARRIED (11/2)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr May, Cr O'Neill, Cr Raftis and Cr Vinciullo.

Against the Motion: Cr Kingston and Cr Pizzey.

AMENDMENT MOVED Cr Pizzey, SECONDED Cr May that the Motion be AMENDED to read as follows:

“1.2 insert requirement No. 5 to Table 6 ‘Additional requirements that apply to land in the Scheme area’;

No.	Description of Land	Requirement
5	Lot 36 (No. 95) Woodvale Drive, Woodvale	<p>Any application for subdivision or development of the site shall include the following:</p> <ul style="list-style-type: none"> a Identification of potential threatened fauna habitat trees within the site proposed for retention. b Public Open Space’ areas identified with an objective of retaining key environmental values. c An internal road network that does not connect with existing Waterview Drive. d Management plans which are to be endorsed by the City of Joondalup, with or without conditions, prior to any site works, and thereafter implemented: <ul style="list-style-type: none"> i Urban Water Management Plan demonstrating on-site retention and treatment of stormwater. ii Wetland Management Plan, including wetland buffer assessment. iii Re-vegetation Management Plan including proposed planting of native vegetation that may provide future habitat for threatened fauna species, within the wetland buffer and ‘Parks and Recreation’ reserve. iv Fauna Management Plan including consideration of relocation practices for existing fauna identified on-site.

The Amendment was Put and

LOST (5/8)

In favour of the Amendment: Cr Fishwick, Cr Jones, Cr May, Cr Pizzey and Cr Raftis.

Against the Amendment: Mayor Jacob, Cr Chester, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Kingston, Cr O'Neill and Cr Vinciullo.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ132-05/24)

MOVED Cr Kingston, SECONDED Mayor Jacob that Council:

- 1 Pursuant to section 75 of the *Planning and Development Act 2005* and Part 5 of the *Planning and Development (Local Planning Schemes) Regulations 2015*, SUPPORTS Scheme Amendment No. 15 to the *City of Joondalup Local Planning Scheme No. 3*, as modified, to:**

- 1.1 rezone the western portion of Lot 36 (95) Woodvale Drive, Woodvale from 'Rural' to 'Residential' and a 967m² portion of Lot 28 (67) Woodvale Drive, Woodvale from 'Private Community Purposes' to 'Residential', as depicted in Attachment 2 to this Report, and applying the 'R30' residential density code to this area;**
- 1.2 insert requirement No. 5 to Table 6 'Additional requirements that apply to land in the Scheme area';**

No.	Description of land	Requirement
5	Lot 36 (No. 95) Woodvale Drive, Woodvale	<p>Any application for subdivision or development of the site shall include the following:</p> <ul style="list-style-type: none"> a) Identification of potential threatened fauna habitat trees within the site proposed for retention. b) 'Public Open Space' areas identified with an objective of retaining key environmental values. c) Management plans which are to be endorsed by the City of Joondalup, with or without conditions, prior to any site works, and thereafter implemented: <ul style="list-style-type: none"> i. Urban Water Management Plan demonstrating on-site retention and treatment of stormwater. ii. Wetland Management Plan, including wetland buffer assessment. iii. Re-vegetation Management Plan including proposed planting of native vegetation that may provide future habitat for threatened fauna species, within the wetland buffer and 'Parks and Recreation' reserve. iv. Fauna Management Plan including consideration of relocation practices for existing fauna identified on-site.

- 1.3 amend the scheme map accordingly;**
- 2 In the event that the scheme amendment proposal is approved and the subsequent subdivision of the site does not allow for the retention of the existing**

Marri, Jarrah and Tuart trees, REQUESTS the proponent to appropriately revegetate the eastern portion of Lot 36 (95) Woodvale Drive, Woodvale zoned 'Parks and Recreation', and any areas of public open space within the 'Residential' zoned portion of the site, to offset the loss of the trees and NOTES that this will be recommended to the Western Australian Planning Commission through a condition of subdivision approval;

- 3 AUTHORISES the affixation of the Common Seal and signing of the documents associated with the Scheme Amendment No. 15 to the *City of Joondalup Local Planning Scheme No. 3*;**
- 4 Pursuant to Part 5 of the *Planning and Development (Local Planning Schemes) Regulations 2015* FORWARDS Scheme Amendment No. 15 and Council's decision to the Western Australian Planning Commission for consideration.**

The Motion was Put and

CARRIED (9/4)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Jones, Cr Kingston, Cr Raftis and Cr Vinciullo.

Against the Motion: Cr Hutton, Cr May, Cr O'Neill and Cr Pizzey.

13.1.5 IMPLEMENTATION OF THE AMENDED RESIDENTIAL DESIGN CODES (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	106380, 101515
AUTHORITY / DISCRETION	Information – includes items provided to Council for information purposes only that do not require a decision of Council (that is for 'noting').

PURPOSE

To provide information on the amendments to the Residential Design Codes to include new provisions related to medium density housing, and to outline the implications for the City's local planning framework.

EXECUTIVE SUMMARY

On 8 March 2024, the State Government released the amended *State Planning Policy 7.3 Residential Design Codes* (R-Codes). The amended R-Codes took effect on 10 April 2024. The amended R-Codes were to be implemented in September 2023 however this was deferred and the R-Codes further revised.

The amended R-Codes include a new Part C section with provisions that seek to improve the quality of medium density housing. Part C of the R-Codes will apply to single houses with a residential density code of R50 and above, grouped dwellings with a residential density code of R30 and above, and multiple dwellings with a residential density code of R30 to R60 (inclusive).

The previous R-Codes applied until 10 April 2024. From 10 April 2024 to 10 April 2026, a special transitional period will be in place whereby the amended R-Codes are in effect, however there are transitional arrangements for specific provisions of the R-Codes.

Existing local planning policies that modify the R-Codes also continue to apply until 10 April 2026 however these local planning policies will need to be reviewed and endorsed prior to this date to continue to have effect. This includes the City's *Residential Development Local Planning Policy* (RDLPP) and *Development in Housing Opportunity Areas Local Planning Policy* (HOALPP).

The amended R-Codes trigger the requirement for the review the City's local planning framework and the development controls that currently apply to residential development. Part A of the amended R-Codes and the Western Australian Planning Commission's (WAPC) *Planning Bulletin 114* provide guidance on this, outlining that priority should be given to local planning policies that modify provisions of the R-Codes. A review of the HOALPP and RDLPP has commenced and other local planning policies that cross-reference clause numbers of the R-Codes, such as the *Planning Consultation Local Planning Policy*, will also require review.

In addition to local planning policies, the City also has a number of structure plans, activity centre plans and local development plans that reference and replace requirements of the R-Codes. The requirements of structure plans, activity centre plans and local development plans will continue to apply until these documents expire or are otherwise modified. At this stage, it is intended that the currency and appropriateness of these documents will be considered through the report of review on the City's *Local Planning Scheme No.3* (LPS3), which is being undertaken as part of the *Local Planning Strategy* review project.

It is therefore recommended that Council notes the implementation of the amended R-Codes and associated review of the City's the local planning framework.

BACKGROUND

The R-Codes are a State Planning Policy that provides planning and design provisions for residential development across Western Australia.

As part of the *Action Plan for Planning Reform*, the State Government's Design WA initiative was introduced to ensure good design is at the centre of all development in Western Australia. Previous stages of Design WA have included the introduction of *State Planning Policy 7.0 – Design of the Built Environment*, *State Planning Policy 7.3 – Residential Design Codes Volume 2 – Apartments*, *State Planning Policy 7.2 – Precinct Design* and the *Design Review Guide*. The amendments to the R-Codes to introduce a new Part C section relate to medium density housing and are the latest policy change implemented under this initiative.

The State Government undertook consultation on the draft amended R-Codes between November 2020 and April 2021. At its meeting on 20 April 2021 (CJ043-04/21 refers), Council endorsed the City's submission on the proposed amendments. Following the consultation period, City officers have participated in working groups held by the Department of Planning, Lands and Heritage (DPLH) to assist in refining the provisions.

The amended R-Codes were to be implemented on 1 September 2023. However, this did not proceed following a request from the Minister for Planning to the WAPC that implementation be deferred in light of concerns around the housing market and supply pressures currently being experienced and the potential impacts of policy changes to the R-Codes at this time.

DETAILS

The amended R-Codes and explanatory guidelines are available at Attachments 1 and 2. The inclusion of specific provisions in new Part C section of the R-Codes seeks to improve the quality of that type of development by providing for the following:

- Greater housing diversity.
- Reduced household running costs.
- Better solar passive design improving occupant amenity.
- Better access to garden and open spaces.
- Greater tree canopy and trees on private lots.

The amended R-Codes are divided into five parts:

R-Codes volume and part	Title	Description
R-Codes Volume 1 – Part A	Operation of the Code	Explanatory section establishing the purpose, application and operation of the R-Codes Volume 1.

R-Codes volume and part	Title	Description
R-Codes Volume 1 – Part B		Applies to single houses in areas coded R40 and below, grouped dwellings and multiple dwellings in areas coded R25 and below.
R-Codes Volume 1 – Part C		Applies to single houses in areas coded R50 and above, grouped dwellings in areas coded R30 and above, and multiple dwellings in areas coded R30 to R60 (inclusive).
R-Codes Volume 1 – Part D	Land	<p>Sets out the site area and dwelling yields for single houses and grouped dwellings for all density codes, and multiple dwellings up to R60.</p> <p>This section includes an average site area for multiple dwellings in areas coded up to R60 (inclusive). Currently multiple dwellings in areas coded R40-R60 are based on plot ratio area under R-Codes Volume 2 – Apartments.</p>
R-Codes Volume 2	Apartments	Applies to multiple dwellings in areas coded above R60.

The amendments to the R-Codes Volume 1 – Part A and R-Codes Volume 2 - Apartments are generally unchanged, with only consequential amendments made given the introduction of the Part C of the R-Codes.

The Part C provisions are a new set of development provisions and are divided into three sections: 'the garden', 'the building', and 'neighbourliness', with some of the key inclusions outlined in the table below.

Section	Section inclusions	Key design element requirements
The Garden	<ul style="list-style-type: none"> Gardens and trees Private open space Water management 	<ul style="list-style-type: none"> Consolidated uncovered garden area relative to the site area (not based on density code). Tree planting and deep soil areas. Landscaping percentage for the site.
The Building	<ul style="list-style-type: none"> Indoor amenity Function Housing diversity 	<ul style="list-style-type: none"> Internal amenity – size and layout of dwellings and rooms. Solar access for primary living space. Maximum covered parking provisions. Universal design for silver and gold level accessible dwellings. Ancillary dwellings permitted for all dwelling types.
Neighbourliness	<ul style="list-style-type: none"> Built form and character Neighbourhood context Community 	<ul style="list-style-type: none"> Simplified lot boundary setback provisions. Driveway/communal street dimensions. New provisions for retaining existing dwellings. Overshadowing for narrow lots and to diagonally adjacent lots. Visual privacy.

For each design element there are objectives, design principles, and deemed-to-comply requirements. Where a development meets the deemed-to-comply requirements it is automatically considered to meet the corresponding design principle and objective. Where a development does not meet the deemed-to-comply requirement, the decision maker is to consider the merits of the proposal and determine whether the design principle and objective have been met. The deemed-to-comply and design principle pathway is the same approach currently taken in the R-Codes.

Transitional arrangements for implementing the amended R-Codes

The amended R-Codes were released on 8 March 2024 and came into effect on 10 April 2024.

The amended R-Codes will be subject to transitional arrangements as set out in Part A of the R-Codes Volume 1 and Planning Bulletin 114/2024 (Attachment 3 refers).

From 10 April 2024 to 10 April 2026, the amended R-Codes are in effect, noting the following:

- Local planning policies that include provisions that modify any R-Code standard will continue to apply. This includes the City's HOALPP and RDLPP.
- Specific transitional development provisions will apply to the site cover provisions in Part C, and to single house development coded R50 or above in areas subject to a structure plan or local development plan.

From 10 April 2026, local planning policies that modify any R-Code standard and have not been reviewed and endorsed since the gazettal of the amended R-Codes will cease to have effect.

With the transitional arrangements, it is expected that local governments will undertake a review of their local planning framework between now and 10 April 2026 and seek to align requirements with the amended R-Codes.

Impact on the local planning framework

Most of the residential properties within the City of Joondalup are zoned 'Residential' (approximately 80%) and are coded R20 or lower, and therefore will not be affected by the new Part C provisions of the R-Codes. The remainder of the 'Residential' zone (approximately 20%) includes small areas of medium density and the Housing Opportunity Areas (HOA) which are coded R20/R25, R20/R30, R20/R40 and R20/R60. Therefore, all HOAs, except HOA3 which is coded R20/R25, will be affected by the implementation of the new Part C provisions.

Local planning policies

Local planning policies that amend, augment or replace provisions of the R-Codes will continue to apply until 10 April 2026. After this time, these policies will cease to have effect unless reviewed and endorsed prior to this date. The transitional arrangements recommend that local governments prioritise review of relevant local planning policies, and where a policy requires WAPC approval, the DPLH should also prioritise the assessment.

The HOALPP and RDLPP contain development provisions that modify the R-Codes, with the HOALPP including provisions that required WAPC approval. Therefore, these policies need to be reviewed as a priority.

The R-Codes still allow for local governments to prepare local planning policies that modify the R-Codes, however there are very few development standards in the new Part C section that can be modified without WAPC approval.

The review of HOALPP and RDLPP will consider the new requirements of the R-Codes, in addition to operational improvements that have been identified since the policies came into effect. It is expected that a report on the review of the City's planning framework and recommended amendments will be presented to a meeting of the Policy Committee in early 2025.

There are several other local planning policies that are relevant to review in light of the amended R-Codes, including the following:

- *Subdivision and Dwelling Development Adjoining Areas of Public Space Policy*
- *Planning Consultation Local Planning Policy*
- *Consulting Rooms Local Planning Policy*
- *Non-Residential Development in Residential Areas Local Planning Policy*
- *Medium Density Single House Development Standards Local Planning Policy.*

A review of these policies will also be undertaken, however, in the interim the policies will continue to apply as adopted as they do not replace provisions of the R-Codes.

Local Planning Scheme No. 3

Clause 26 of LPS3 has development provisions that vary the requirements of the R-Codes, including:

- the minimum frontage for dual coded areas in an HOA
- maximum overshadowing from single house, grouped dwelling and multiple dwelling developments in dual coded areas in an HOA
- the minimum lot size for multiple dwellings in dual coded areas in an HOA
- allowing aged and dependent persons' dwellings outside an HOA to develop at the R40 density when certain criteria are met.

In conjunction with the review of the local planning policies, these provisions will also be reviewed and if necessary, an amendment to LPS3 will be progressed.

Structure plans and local development plans

Local governments are encouraged to review structure plans, activity centre plans and local development plans with an expiry date after 19 October 2025, and align these with the amended R-Codes within five years of the amended R-Codes being gazetted (such as by April 2029). Where possible, this review should align with the report of review for a local planning scheme.

The City has a number of structure plans, activity centre plans and local development plans that reference and replace requirements of the R-Codes, and in accordance with the transitional arrangements, the provisions of the relevant plan will remain valid until the expiry date of that plan. A review is currently being undertaken to determine any impact the amended R-Codes provisions may have on the relevant plans, and if necessary, an amendment to the plan will be progressed. Where there is no impact, it is intended that the currency and appropriateness of these documents will be considered through the report of review on LPS3 which is being undertaken as part the *Local Planning Strategy* review project.

Issues and options considered

The review of the local planning framework will consider the implications of the new development standards that apply to applicable developments in the City's local context. Issues and options regarding these implications will be set out for Council's consideration as part of this review.

Legislation / Strategic Community Plan / Policy implications

Legislation *Local Planning Scheme No. 3.
Planning and Development (Local Planning Schemes) Regulations
2015.*

10-Year Strategic Community Plan

Key theme 3. Place.

Outcome 3-2 Well-planned and adaptable - you enjoy well-designed, quality buildings and have access to diverse housing options in your neighbourhood.

Policy *Residential Design Codes Volume 1 Council Policy.
State Planning Policy 7.3 – Volume 2 – Apartments (R-Codes).*

Risk management considerations

To ensure that the City's local planning framework remains current with the state planning framework, a review of the framework has commenced. In particular, a review of the HOALPP and RDLPP is required as these policies modify provisions of the R-Codes and will cease to have effect unless reviewed and endorsed prior to 10 April 2026.

Financial / budget implications

Not applicable.

Regional significance

The R-Codes is a state planning policy and as such the provisions impact residential development throughout Western Australia.

Sustainability implications

The new Part C section of the R-Codes include development standards that expand on sustainability initiatives. These include the following:

- An increase in deep soil areas and trees for medium density single house and grouped dwellings.
- Incentives regarding the retention of trees.
- Built form provisions to better access sunlight and cross ventilation to reduce reliance on artificial heating and cooling of dwellings.

Consultation

Consultation on any amendments to the City's local planning framework will be undertaken in accordance with the City's *Planning Consultation Local Planning Policy*. Proposed consultation will be outlined in the relevant reports to Council.

COMMENT

The introduction of Part C into the R-Codes is intended to improve the design quality for single houses with a residential density code of R50 and above, grouped dwellings with a residential density code of R30 and above, and multiple dwellings with a residential density code of R30 to R60 (inclusive). These provisions are intended to provide for greater housing diversity, better solar access and private landscaping and trees.

In accordance with the transitional arrangements to implement the amended R-Codes, a review of the City's local planning framework will be undertaken. Priority will be given to the City's HOALPP and RDLPP as these modify provisions of the R-Codes, with a review of other relevant local planning policies, structure plans, and local development plans also to be undertaken.

It is recommended that Council notes the implementation of the amended R-Codes and the review of the local planning framework.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION

(Resolution No: CJ133-06/24)

MOVED Cr Jones, **SECONDED** Cr Hill that Council **NOTES** the implementation of the amended *State Planning Policy 7.3 Residential Design Codes Volume 1* and the review of the local planning framework as outlined in this Report.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

13.1.6 PROPOSED REVOCATION OF GREENWOOD LOCAL STRUCTURE PLAN (WARD – SOUTH-EAST)

WARD	South-East
RESPONSIBLE DIRECTOR	Mr Chris Leigh Director Planning and Community Development
FILE NUMBER	104828, 101515
AUTHORITY / DISCRETION	Legislative - includes the adoption of local laws, planning schemes and policies.

PURPOSE

For Council to consider advertising a proposal to revoke the *Greenwood Local Structure Plan*. The proposed revocation is to be progressed as an amendment to *Local Planning Scheme No. 3*.

EXECUTIVE SUMMARY

As part of the approval of the City's current planning scheme, *Local Planning Scheme No. 3* (LPS3), the Western Australian Planning Commission (WAPC) advised the City that a separate review of the City's existing structure plan areas should be undertaken to assess whether existing structure plans are still relevant and required. The City has been progressing this review since LPS3 came into effect in October 2018.

The *Greenwood Local Structure Plan* (the structure plan) was adopted by Council at its meeting held on 17 August 2015 (CJ050-04/15 refers) and approved by the Western Australian Planning Commission (WAPC) on 15 February 2016. The structure plan was developed to facilitate the subdivision, zoning, and allocation of density for the former East Greenwood Primary School site. The structure plan area has six vacant lots remaining.

The structure plan area is zoned 'Urban Development' under LPS3 and specifies that land use permissibility is in accordance with the zones and reserves listed in the scheme. The structure plan also requires that development provisions be set out in a Local Development Plan. Following modifications, the final *Greenwood Local Development Plan* was approved by Council at its meeting of 20 October 2020 (CJ142-10/20 refers), as such there are no development provisions within the structure plan area that need to be retained and incorporated into LPS3.

In accordance with the *Planning and Development (Local Planning Scheme) Regulations 2015* (the LPS Regulations), an amendment to LPS3 to incorporate the zonings outlined in the structure plan will automatically revoke the structure plan where a statement to that effect is included as part of the scheme amendment proposal. This type of scheme amendment is classified as a 'basic' amendment and there is no statutory provision to advertise this form of amendment.

Although the formal planning process to revoke the structure plan does not require public consultation, it is recommended that Council agrees to seek feedback on the proposal from the landowners within the structure plan area, prior to Council's further consideration of initiating a basic amendment to LPS3 to rezone the land within the structure plan area to facilitate the revocation of the structure plan.

BACKGROUND

Suburb/Location	Greenwood, including Assembly Way, Mulligan Drive, Carnival Lane, Dargin Place, Quadrangle Lane and Reilly Way.
Owner	Various.
Zoning	LPS Urban Development.
	MRS Urban.
Site area	3.86 hectares
Structure plan	<i>Greenwood Local Structure Plan.</i>

Local Structure Plan review project

As part of the approval of LPS3, the WAPC advised that a separate review of the City's existing structure plan areas should be undertaken to assess the current status of each structure plan. This would determine if a structure plan covered an area including:

- where development is still occurring, and the structure plan is still relevant and needs to be retained
- where development is complete or nearing completion, in which case the structure plan can be revoked via an amendment to LPS3 to rezone the area. This may include introducing relevant development provisions from the structure plan into the scheme.

The City has been progressing this review since LPS3 came into effect, with a number of structure plans revoked or in the process of being revoked.

Greenwood Local Structure Plan

The *Greenwood Local Structure Plan* applies to the land bounded by Dargin Place to the west, Reilly Way to the north, Assembly Way to the south and Mulligan Drive to the east (Attachment 1 refers). The structure plan area encompasses the site of the former East Greenwood Primary School site which was identified in 2007 as being surplus to the needs of the Department of Education. In 2010 the site was subsequently rezoned to 'Urban Development' under the former *District Planning Scheme No. 2* (DPS2) to facilitate residential development ranging in density from R40 to R80.

The structure plan and associated *Greenwood Local Development Plan* (LDP) was adopted by Council at its meeting of 17 August 2015 (CJ132-08/15 refers) and the structure plan approved by the WAPC on 15 February 2016. The current LDP was formally approved on 26 October 2020, following modifications made subsequent to the original LDP approved (CJ163-12/19 and CJ142-10/20 refer).

The LDP sets out the specific built form provisions for the lots within the structure plan area and will remain applicable following revocation of the structure plan. The subject area is now nearing completion, with six lots remaining vacant, including two sites intended for multiple dwelling (apartment) development. All remaining lots are under the same ownership.

DETAILS

It is proposed that the structure plan be revoked as the estate is nearing completion, and the structure plan is not relevant to the development of the remaining lots as the development standards are captured under the provisions of the LDP.

Under the LPS Regulations, an amendment to the planning scheme to incorporate the zoning indicated in the structure plan will also revoke the structure plan, provided a statement is included to that effect. This means that the approval of an amendment to LPS3 to rezone the structure plan area from 'Urban Development' to those outlined in the structure plan, for example 'Residential' zone and 'Public Open Space' reserve, will automatically revoke the structure plan. Such a scheme amendment is classified as 'basic' under the LPS Regulations. There is no statutory provision to advertise this class of amendment.

However, prior to initiating the amendment to rezone the land within the structure plan area, it is considered appropriate to advertise the proposal to revoke the structure plan to the landowners within the structure plan area and seek feedback, prior to Council's further consideration.

Issues and options considered

Current need for the *Greenwood Local Structure Plan*

The structure plan consists of the 'Residential' zone, 'Public Open Space' reserve (Dandjoo Park) and 'Road' reserves. The 'Residential' zone consists of three density codes, being R40, R60 and R80 (Attachment 2 refers).

The structure plan was developed to facilitate the subdivision of the estate, setting the land use zones, residential density, dwelling yield and public open space requirements. All provisions of the structure plan have been met and addressed through the subdivision of the estate and as such it is not considered necessary to include any of the provisions within the scheme.

Specific development provisions for the dwellings are incorporated in the Greenwood LDP, with the LDP remaining applicable for future development of the remaining vacant lots.

Zoning

The land within the structure plan area is zoned 'Urban Development' under LPS3. If the proposed revocation of the structure plan is supported, it is proposed to rezone this land to 'Residential R40', 'Residential R60', 'Residential R80' and the 'Public Open Space' and 'Local Road' reserves in accordance with the structure plan map (Attachment 2 refers).

Land use permissibility

The structure plan states that land use permissibility is in accordance with the zones and reserves listed in the scheme. If a scheme amendment is supported and the structure plan revoked, land use permissibility will be in accordance with the 'Residential' zone of LPS3 which is similar to that of the previous planning scheme.

Options

The options available to Council in considering revoking the *Greenwood Local Structure Plan* are as follows:

- advertise the proposal to revoke the structure plan to existing landowners within the structure plan area
or
- not advertise the proposal to revoke the structure plan to existing landowners within the structure plan area.

Council can proceed with an amendment to LPS3 to rezone the land within the structure plan area without first advertising the proposal to revoke the structure plan, however this is not recommended.

Legislation / Strategic Community Plan / Policy implications

Legislation *City of Joondalup Local Planning Scheme No. 3.
Planning and Development (Local Planning Schemes) Regulations
2015.*

10-Year Strategic Community Plan

Key theme 3. Place.

Outcome 3-2 Well-planned and adaptable - you enjoy well-designed, quality buildings and have access to diverse housing options in your neighbourhood.

Policy Not applicable.

Planning and Development (Local Planning Schemes) Regulations 2015

Clause 28 of the deemed provisions of the LPS Regulations states that structure plans have effect for 10 years from their date of approval. The WAPC may extend the period of approval of a structure plan, revoke a structure plan or amend the planning scheme that covers a structure plan area which automatically revokes the structure plan.

The LPS Regulations state that an amendment to a scheme map that is consistent with an approved structure plan is a 'basic' amendment if the scheme includes the zones outlined in the structure plan. A statement must be included within the amendment proposal specifying that when the amendment takes effect the approval of the structure plan is to be revoked.

Structure Plan Framework

The Structure Plan Framework outlines the manner and form in which a structure plan and activity centre plan is to be prepared under the LPS Regulations. Clause 16 of the framework outlines that the WAPC may revoke its approval of a structure plan under the deemed provisions of the LPS Regulations and provides for common circumstances in which this would occur, including where the zoning of the land is covered within the scheme and following finalisation of the subdivision of the land.

Local Planning Scheme No. 3

The objectives of the 'Residential' zone in LPS3 are:

Zone name	Objectives
Residential	<ul style="list-style-type: none"> To provide for a range of housing and a choice of residential densities to meet the needs of the community. To facilitate and encourage high quality design, built form and streetscapes throughout residential areas. To provide for a range of non-residential uses, which are compatible with and complementary to residential development.

The objectives of the 'Public Open Space' and 'Local Road' reserves in LPS3 are:

Reserve name	Objectives
Public Open Space	<ul style="list-style-type: none"> To set aside areas for public open space, particularly those established under the <i>Planning and Development Act 2005</i> s. 152. To provide for a range of active and passive recreation uses such as recreation buildings and courts and associated car parking and drainage
Local Road	<ul style="list-style-type: none"> To set aside land required for a local road being a road classified as an Access Road under the Western Australian Road Hierarchy.

Risk management considerations

Not applicable.

Financial / budget implications

The City will be required to cover the costs associated with any advertising of the proposal to revoke the structure plan. Approximately 70 letters would be sent to landowners within the structure plan area with a direct cost of approximately \$105.

Regional significance

Not applicable.

Sustainability implications

Not applicable.

Consultation

There are no provisions within the LPS Regulations or Structure Plan Framework which require consultation to be undertaken prior to a structure plan being revoked. However, it is considered appropriate that the landowners within the structure plan area be informed of the proposal to revoke the structure plan and obtain any feedback which can be reported back to Council, prior to an amendment to rezone the land within the structure plan area being considered by Council.

The revocation of the *Greenwood Local Structure Plan* is proposed to be advertised for 14 days by way of letter to all 70 property owners within the structure plan area.

COMMENT

The area encompassed by the *Greenwood Local Structure Plan* is nearing completion with six lots remaining to be developed. The provisions of the *Greenwood Local Development Plan* are considered sufficient to ensure that any further development or redevelopment has an appropriate built form outcome.

While there is no requirement to advertise a proposal to revoke a structure plan, it is considered appropriate to advertise the proposal to the landowners within the structure plan area and seek any feedback, prior to Council's further consideration of an amendment to rezone the land within the structure plan area.

It is therefore recommended that Council advertises the proposed revocation of the *Greenwood Local Structure Plan* to the landowners within the structure plan area for a period of 14 days.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Policy Committee at its meeting held on 30 April 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ134-06/24)

MOVED Cr Jones, **SECONDED** Cr Hill that Council **ADVERTISES** the proposal to revoke the *Greenwood Local Structure Plan* to landowners within the structure plan area, for a period of 14 days.

The Motion was Put and CARRIED (13/0) by Exception Resolution after consideration of Item 13.2.1.

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

Item No. / Subject	Item 13.2.1 – Joondalup City Centre Development – Boas Place Project Philosophy and Parameters.
Nature of Interest	Interest that may affect impartiality.
Extent of Interest	Cr Vinciullo is President of the Joondalup Symphony Orchestra. The Joondalup Symphony Orchestra offices are based in Lotteries House.

13.2.1 JOONDALUP CITY CENTRE DEVELOPMENT - BOAS PLACE PROJECT PHILOSOPHY AND PARAMETERS (WARD – ALL)

WARD	All
RESPONSIBLE DIRECTOR	Mr Mat Humfrey Director Corporate Services
FILE NUMBER	103036, 101515
AUTHORITY / DISCRETION	Executive - The substantial direction setting and oversight role of Council, such as adopting plans and reports, accepting tenders, directing operations, setting and amending budgets.

PURPOSE

For Council to endorse the Project Philosophy and Parameters for the Joondalup City Centre Development – Boas Place project.

EXECUTIVE SUMMARY

At its meeting held on 13 December 2022 (CJ231-12/22 refers), Council resolved to endorse a new vision for the Joondalup Central Business District (CBD) Project Cluster and noted the preliminary actions to achieve this vision. One of these projects included the Joondalup City Centre Development – Boas Place which relates to the redevelopment of City of Joondalup owned land within the Joondalup City Centre.

A Project Philosophy and Parameters report has been prepared to enable the City to secure resources to manage the project, evaluate options and progress a business case. The philosophy and parameters articulate the intent of Council progressing the project and addressing objectives and the reason the project is proposed. The philosophy and parameters are designed to be flexible and can be amended as the project progresses as decided by Council.

If endorsed by Council, the City will progress the Joondalup City Centre Development – Boas Place project by preparing a business case.

It is therefore recommended that Council:

- 1 *ENDORSES the Joondalup City Centre Development – Boas Place Project Philosophy and Parameters as detailed in Attachment 1 to this Report, to articulate the intent and purpose of Council progressing the project;*
- 2 *NOTES that status reports will be presented to the Major Projects and Finance Committee.*

BACKGROUND

At its meeting held on 25 May 2010 (CJ083-05/10 refers), Council endorsed the Project Philosophy and Parameters for what was previously named the Joondalup City Centre Commercial Office Development Project. This project formed the basis of what was subsequently referred to as the 'Boas Place' project.

Between April 2008 and March 2020, substantial work was undertaken by the City to bring the project to fruition. A summary of the investigations and key events during this period are summarised as follows:

- A commercial feasibility study undertaken by Jones Lang LaSalle Property Consultants.
- Creation of an Office Development Committee to provide advice and make recommendations to Council on the project.
- Two separate expressions of interest (EOI) processes were initiated by the City to identify potential development partners for the project.
- Subsequent, appointment of Devwest Group Pty Ltd (Devwest) as the preferred partner for the project.
- Submission of a response to the State Government's request for EOI for a Joondalup Office Accommodation proposal (which was eventually awarded to Primewest for the construction of the Department of Water and Environmental Regulation office building on the corner of Davidson Terrace and Shenton Avenue).
- Development of draft design guidelines and multiple concept plans for the subject area.
- Due to a number of reasons, the City and Devwest were unable to reach an agreement on the future direction of the project and in 2018 ceased its partnership.
- An Order of Magnitude Business Case (OMBC) was prepared by NS Advisory and presented to the Major Projects and Finance Committee for consideration.

The City has now prepared a new approach to the coordination of various major projects through the creation of functional project clusters. The Joondalup CBD Project Cluster consists of the following projects:

- Multi Storey Car Park City Centre.
- Joondalup City Centre Development - Boas Place.
- Land Acquisition Strategy.
- Joondalup Performing Arts Centre.

At its meeting held on 13 December 2022 (CJ231-12/22 refers), Council endorsed a new vision for the Joondalup CBD Projects Cluster which included the following:

1 *ENDORSES the Vision for the CBD cluster as outlined below:*

“The Joondalup City Centre is an iconic and recognisable business address known for its exciting innovation, technology, education and health industries. The outlook is dominated by quality, well-designed, sustainable buildings that complement the natural surroundings. The Joondalup City Centre offers abundant and varied employment opportunities for a locally-based workforce. Residents, workers and visitors enjoy high-amenity community spaces that have a vibrant, lively atmosphere. Places are integrated and interconnected and there is overall sense of flow.”

2 *NOTES the actions to achieve this vision requires the City of Joondalup to:*

- *Promote the City Centre as a desirable location for long-term capital investment.*
- *Encourage and support development projects that generate ongoing employment opportunities in the City Centre.*
- *Progress the development of cultural and artistic venues and spaces in the City Centre.*
- *Deliver distinctive, high amenity public open spaces in the City Centre.*

The philosophy and parameters have subsequently been reviewed and is the first step prior to the preparation of a business case for the project.

DETAILS

The Joondalup City Centre Development – Boas Place project (subject area) relates to the land where the City of Joondalup Administration Building, Joondalup Reception Centre, Civic Centre, Joondalup Library and Lotteries House building are currently located. The subject area is 34,807m² and is bound by Boas Avenue to the north, Central Walk (south) to the west, Central Park to the south and Lakeside Drive to the east.

The Joondalup City Centre Development – Boas Place project is listed as a key non-capital priority project for 2023/24 financial year under the City’s Corporate Business Plan, with the milestone being:

“Investigations into future opportunities for the development of Boas Place in the Joondalup City Centre to incorporate a variety of land uses.”

As a result, a new Project Philosophy and Parameters report has been developed (Attachment 1 refers) which includes a review of the previous 2010 Project Philosophy and Parameters to ensure they align with the City’s *Strategic Community Plan 2022-2032*, Corporate Business Plan and the Project Vision for the Joondalup City Centre endorsed by Council at its meeting held on 13 December 2022 (CJ231-12/22 refers).

Although Boas Place has been identified as the focal point for the future redevelopment of the City’s land, the new Project Philosophy and Parameters allows for a more holistic and strategic approach to the project should other development opportunities arise on other City-owned land throughout the City centre.

The Project Philosophy and Parameters align with the first stage of the approval process for a major project being the preparation of a business case. The preparation of a business case will include project milestones and timelines, property and market analysis and review of the work previously done on the project including the previous feasibility studies, concept design and financial evaluation.

Issues and options considered

Council has the option to:

- endorse the project philosophy and parameters for the Joondalup City Centre Development – Boas Place (recommended)
- not endorse the project philosophy and parameters for the Joondalup City Centre Development – Boas Place (not recommended)
or
- endorse amended the project philosophy and parameters for the Joondalup City Centre Development – Boas Place (not recommended).

Legislation / Strategic Community Plan / Policy implications

Legislation *Local Government Act 1995.*

10-Year Strategic Community Plan

Key theme 3. Place.

Outcome 3-2 Well-planned and adaptable - you enjoy well-designed, quality buildings and have access to diverse housing options in your neighborhood.

Key theme 4. Economy.

Outcome 4-2 Innovative and confident - you are attracted to the City's unique characteristics and potential and feel confident in investing.

4-3 Appealing and welcoming - you welcome residents, and local and internal visitors to the City.

Policy Not applicable.

Risk management considerations

The risk considerations for the Joondalup City Centre Development – Boas Place project will be investigated as the project progresses.

Potential risk factors include the following:

- Managing community/stakeholder expectations.
- The ability to secure a partnership with a joint venture partner and/or developer.
- Financial implications on the City by progressing a project of the scale envisioned.

Financial / budget implications

As the project is in its initial stages of feasibility it is not yet defined as a capital project. Costs associated with the actions undertaken in the preparation of a business case are budgeted as operating costs.

Current financial year impact

Account no.	1-220-A2201-3074
Budget Item	Boas Place
Budget amount	\$ 115,237
Amount spent to date	\$ 44,043
Proposed cost	\$ N/A
Balance	\$ 71,194

Future financial year impact

The business case will detail the financial implications of the project moving forward.

All amounts quoted in this report are exclusive of GST.

Regional significance

It is envisaged that the project will enhance Joondalup as the major activity centre for the north-west corridor of the Perth metropolitan area. The project will reinforce and promote Joondalup as a key commercial and social hub and assist in growing the local economy.

Sustainability implications

Sustainability implications including matters of social, economic and environmental sustainability will be considered and incorporated into the business case for the project.

Consultation

The City has previously undertaken public consultation through the approval of the Joondalup Activity Centre Plan, *Strategic Community Plan (Joondalup 2032)* and the Joondalup City Centre Activation Strategy. It is considered that the philosophy and parameters of the project are generally consistent with the objectives and vision for the Joondalup City Centre incorporated within these strategies and plans.

Further community and stakeholder engagement will need to be undertaken in the preparation of a business case for the project. This will include identification of, and ongoing liaison with, various stakeholders throughout the process, and the preparation of a community consultation strategy in accordance with the City's Community Consultation Protocol and *Community Consultation Policy*.

COMMENT

The Joondalup City Centre has been identified as a key activity centre within the Perth metropolitan area. It is critical that the ambitions and vision for the project reflect the regional significance of the centre.

As a result, the Joondalup City Centre Development – Boas Place project will explore avenues to activate the city centre by facilitating various commercial opportunities, increasing the local resident base, and enhancing the social/cultural characteristics of the area.

The Project Philosophy and Parameters aim to develop a high quality, activated urban environment which provides a mix of high intensity land uses within the city centre. It is considered the project is critical in achieving the Joondalup CBD Project Cluster vision as endorsed by Council.

Pending a decision by Council to endorse the Project Philosophy and Parameters as recommended in this report, the City will progress the steps required for the preparation of a business case.

VOTING REQUIREMENTS

Simple Majority.

COMMITTEE RECOMMENDATION

The committee recommendation to Council for this Report (as detailed below) was resolved by the Major Projects and Finance Committee at its meeting held on 6 May 2024.

The committee recommendation is the same as recommended by City officers.

COMMITTEE RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ135-05/24)

MOVED Cr Hill, SECONDED Cr Hutton that Council:

- 1 ENDORSES the Joondalup City Centre Development – Boas Place Project Philosophy and Parameters as detailed in Attachment 1 to this Report, to articulate the intent and purpose of Council progressing the project;**
- 2 NOTES that status reports will be presented to the Major Projects and Finance Committee.**

The Motion was Put and

Nil.

15 URGENT BUSINESS

Nil.

16 MOTIONS OF WHICH PREVIOUS NOTICE HAS BEEN GIVEN

16.1 NOTICE OF MOTION NO. 1 – CR CHRISTOPHER MAY, JP – ELECTRIC VEHICLE (EV) CHARGING STATIONS

In accordance with Clause 4.6 of the *City of Joondalup Meeting Procedures Local Law 2013*, Cr Christopher May, JP. has given notice of his intention to move the following Motion at the Council meeting to be held on 28 May 2024:

That Council:

- 1 REQUESTS the Chief Executive Officer investigate options to permit the provision of a small number of electric vehicle charging stations at key City-managed off-street parking destinations to provide convenience and encourage visitation and activations;
- 2 REQUESTS the Chief Executive Officer investigate options to permit electric vehicle charging to be either cost neutral or revenue positive, with users to pay their electricity usage;
- 3 NOTES the City supports the State Government's *Electric Vehicle Strategy for Western Australia* and aims to install infrastructure to transition the City owned fleet to electric vehicles;
- 4 NOTES the City is not responsible for providing electric vehicle charging infrastructure or power for public use however, is able to permit charging infrastructure at carparks in key locations.

REASON FOR MOTION

The City of Joondalup is a forward-looking City and aims to be the CBD of Perth's North.

Electric vehicle uptake globally is expected to continue growing, with the State Government rolling out charging infrastructure regionally, and private operators relied upon to roll out such infrastructure within the metropolitan area.

Major shopping centres such as Karrinyup, Lakeside and Carousel offer charging bays, with Tesla Superchargers rolled out at Fremantle and Karrinyup. Some centres offering fee-free charging to attract visitors.

In regional towns, such as Kojonup, Williams, Bunbury and elsewhere in WA's southwest, EV charging infrastructure encourages visitors to stay longer, utilise hospitality venues and explore the surrounding area.

Joondalup CBD and the proposed Percy Doyle Adventure Hub are envisioned to be regional destinations.

Having a small number of chargers at Lakeside shopping centre only, only one within the CBD of Joondalup, will only encourage more to park in, and use, the shopping centre, rather than explore and utilise the businesses within the CBD - particularly around Davidson Terrace.

Many families visiting will have electric vehicles and may wish to conveniently charge while utilising the Adventure Hub. A small number of charging bays (ie: 4 - 6) at Craigie Leisure Centre will also provide added convenience to users of the centre, as well as visitors to Craigie Bushland and the new expanded Cafe.

I believe key locations can serve to be activated by facilitating EV charging, to be operated by a third party and with the aim of being cost neutral to the City. These locations could include (but not limited to):

- Craigie Leisure Centre
- Percy Doyle Reserve
- Boas Place Carpark, bordering Central Park
- Mullaloo Beach.

By having charging only at places such as petrol stations, little amenity is provided to users, whereas charging infrastructure in the heart of the CBD close to hospitality and retail such as Davidson Terrace or Reid Promenade will encourage people to explore while charging.

Further charging infrastructure can be rolled out in future years as required, with the benefit of the City having experience with permitting EV infrastructure at key locations should the intent of this motion become a reality.

OFFICER'S COMMENT

A report can be prepared.

The State Government has developed an [Electric Vehicle \(EV\) Strategy](#) to support the growth in ownership of electric vehicles, underpinned by a range of rebates and incentives that aim to grow the network of charging infrastructure.

In addition, The Western Australian Planning Commission (WAPC) recently released [WAPC Position Statement: Electric Vehicle Charging Infrastructure](#) in March 2024.

The position statement aims to:

- assist proponents and decision-makers by advocating for a streamlined approvals process for EV charging infrastructure
- provide guidance on development applications, public works, appropriate locations and recommended levels of provision for various land uses, including residential development.

In the lead up to the release of the position statement, the City has been investigating a City of Joondalup position that responds to the position statement as well as responding to the needs of the City of Joondalup. This would include the City's position on the use of City owned and managed land for electric vehicle charging infrastructure.

The Notice of Motion aligns well with the work that the City is currently progressing and the City can include into its current investigations options to permit the provision of a small number of electric vehicle charging stations at key City-managed off-street parking destinations to provide convenience and encourage visitation and activations and include options to permit electric vehicle charging to be either cost neutral or revenue positive, with users to pay their electricity usage.

Mayor Jacob left the Chamber at 11.18pm and the Deputy Mayor assumed the Chair.

Mayor Jacob entered the Chamber at 11.21pm.

Cr Hamilton-Prime left the Chamber at 11.21pm and returned at 11.24pm.

COUNCIL RESOLUTION
(Resolution No: CJ137-05/24)

MOVED Cr May, SECONDED Cr Pizzey that Council:

- 1 REQUESTS the Chief Executive Officer investigate options to permit the provision of a small number of electric vehicle charging stations at key City-managed off-street parking destinations to provide convenience and encourage visitation and activations;**
- 2 REQUESTS the Chief Executive Officer investigate options to permit electric vehicle charging to be either cost neutral or revenue positive, with users to pay their electricity usage;**
- 3 NOTES the City supports the State Government's *Electric Vehicle Strategy for Western Australia* and aims to install infrastructure to transition the City owned fleet to electric vehicles;**
- 4 NOTES the City is not responsible for providing electric vehicle charging infrastructure or power for public use however, is able to permit charging infrastructure at carparks in key locations.**

The Motion was Put and

CARRIED (9/4)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hutton, Cr Kingston, Cr May, Cr Raftis and Cr Vinciullo.

Against the Motion: Cr Hill, Cr Jones, Cr O'Neill and Cr Pizzey.

16.2 NOTICE OF MOTION NO. 2 - CR KINGSTON - OCEAN REEF ROAD CROSSING

In accordance with Clause 4.6 of the *City of Joondalup Meeting Procedures Local Law 2013*, Cr Daniel Kingston has given notice of his intention to move the following Motion at the Council meeting to be held on 28 May 2024:

That Council:

- 1 **NOTES** that Ocean Reef Road between Marmion Avenue and the boundary of the City of Joondalup and the City of Wanneroo is a State Road under the care and control of Main Roads WA;
- 2 **REQUESTS** Main Roads WA to construct a pedestrian crossing at the intersection of Ocean Reef Road and Trappers Drive, or such other location deemed appropriate by Main Roads WA, to safely connect the communities of Edgewater and Woodvale;
- 3 **REQUESTS** the Chief Executive Officer to investigate options to connect the local path networks in Edgewater and Woodvale to the pedestrian crossing in accordance with Part 2 above;
- 4 **NOTES** that works identified in accordance with Part 3 above will be considered as part of the annual budget development process.

REASON FOR MOTION

Ocean Reef Road between Joondalup Drive and Wanneroo Road has over 46,000 traffic movements per day and is one of the busiest roads in the district and the Perth Metropolitan Area.

Between Joondalup Drive and Wanneroo Road there is no controlled pedestrian crossing. Providing a pedestrian crossing at the intersection of Trappers Drive and Ocean Reef Road will allow residents and visitors to travel between Edgewater and Woodvale safely.

In May 2023, it was recorded that 157 crossings are made each day east of Trappers Drive. However, many local residents avoid crossing Ocean Reef Road altogether as they feel unsafe crossing without a signal-controlled crossing.

	Pedestrians	Cyclists
Southbound crossings	23	77
Northbound crossings	9	48
Total	157	

Table 1: Number of crossings of Ocean Reef Rd east of Trappers Dr from Main Roads WA

The benefits of providing a safer crossing include greater connectivity for users of dual use path within Yellagonga Regional Park, and school students from Edgewater traveling to Woodvale Secondary College.

This section of Ocean Reef Road is under the care and control of Main Roads WA, so it is proposed to request them to construct the pedestrian crossing.

A map of Ocean Reef Road with the proposed pedestrian crossing location is provided in Attachment 1.

OFFICER'S COMMENT

The *Integrated Transport Plan 2024-2034*, endorsed by Council at its meeting held on 23 April 2024 (CJ090-04/24 refers), guides multi-modal transport planning and informs strategic policy, advocacy and infrastructure decisions in the City of Joondalup. Outcome 4 of the Plan, is to encourage active transport with safe, accessible and connected routes.

The City has been in discussions with Main Roads WA (MRWA) regarding the provision of safe passage for pedestrians and cyclists crossing Ocean Reef Road between Edgewater Drive and the City's boundary with the City of Wanneroo. Pedestrians and cyclists experience a challenging situation trying to cross the road despite there being an existing pedestrian crossing east of the Trappers Drive intersection.

Options discussed included the possibility of providing a pedestrian phase at the signals with Trappers Drive, noting that this crossing point would require connection to the local path networks in Edgewater and Woodvale.

The motion as proposed will assist the City in progressing these discussions with MRWA and as such, can be supported.

COUNCIL RESOLUTION (Resolution No: CJ138-05/24)

MOVED Cr Kingston, SECONDED Cr Jones that Council:

- 1 NOTES that Ocean Reef Road between Marmion Avenue and the boundary of the City of Joondalup and the City of Wanneroo is a State Road under the care and control of Main Roads WA;**
- 2 REQUESTS Main Roads WA to construct a pedestrian crossing at the intersection of Ocean Reef Road and Trappers Drive, or such other location deemed appropriate by Main Roads WA, to safely connect the communities of Edgewater and Woodvale;**
- 3 REQUESTS the Chief Executive Officer to investigate options to connect the local path networks in Edgewater and Woodvale to the pedestrian crossing in accordance with Part 2 above;**
- 4 NOTES that works identified in accordance with Part 3 above will be considered as part of the annual budget development process.**

The Motion was Put and

CARRIED (13/0)

In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.

Against the Motion: Nil.

17 ANNOUNCEMENTS OF NOTICES OF MOTION FOR THE NEXT MEETING

Cr Pizzey – Implementation of Life Vac and Airway Clearance Devices in City of Joondalup Facilities

Cr Pizzey requested a Notice of Motion in relation to implementing Life Vac, and airway clearance devices being implemented with all of the defibrillators in City of Joondalup facilities and education on how to use them.

18 CLOSURE

There being no further business, the Mayor declared the meeting closed at 11.35pm the following Elected Members being present at that time:

13 February 2024

State Administrative Tribunal
GPO Box U1991
PERTH WA 6845

Attention: Member Rochelle Lavery

Dear Rochelle

**APPLICATION FOR REVIEW OF DECISION (AMENDED PLANS – RECONSIDERATION)
ADDITIONS & ALTERATIONS TO EXISTING RESTAURANT/CAFÉ (LITTLE H CAFÉ)
LOT 702 (No.24/34) MARRI ROAD, DUNCRAIG
CITY OF JOONDALUP
(REF: DR153/2023)**

Reference is made to the outcome of the Mediation Hearing held on 19 December 2023 and subsequent Orders issued by the State Administrative Tribunal regarding the abovementioned application wherein it:

1. *The applicant is to provide additional information as discussed at mediation to the respondent by 5 February 2024.*
2. *Pursuant to s 31(1) of the State Administrative Tribunal Act 2004 (WA) the respondent is invited to reconsider the decision on or before 6 May 2024.*
3. *The matter is listed to a directions hearing to be conducted by teleconference at 9.30am on 10 May 2024.*

Having due regard for the above Orders, additional information (including revised patronage numbers and floor plan) and a car parking survey have been prepared in support of the application for the Tribunal and City of Joondalup's consideration (see copy attached herewith). It is contended that the revised proposal has followed the direction of the discussions held between the parties at the Mediation Hearing on 19 December 2023 in that it addresses the key concerns raised by the City in regard to car parking demand generated by the existing café on the subject land.

In light of the above, the following information is provided in support of the application for consideration by the Tribunal and the City of Joondalup:

BACKGROUND

The subject land is located on the south-eastern corner of the intersection of Marri Road and Cassinia Road, within the Duncraig Activity Centre. The Activity Centre contains a wide range of services including retail uses, entertainment uses, a primary school and private recreation uses. It should be noted that the activity centre does not comprise any public car parking that is typically found within similar centres throughout the Perth Metropolitan Area.

The subject land has been developed to accommodate a three (3) storey mixed use development, with non-residential uses on the ground level ('Educational Establishment' 'Restaurant/Café' & 'Private Recreation'), twenty (20) multiple dwellings on the upper levels and an undercroft/basement level comprising on-site car parking. This application relates to Unit 24, which has been approved for 'Restaurant/Cafe' purposes and is operated by 'Little H Café'.

The subject land is classified 'Commercial' zone under the City of Joondalup's current operative Local Planning Scheme No.3 (LPS No.3). Under the terms of the City's LPS No.3 the use of land classified 'Commercial' zone for 'Restaurant/Cafe' purposes is identified as a permitted ("P") use.

The application lodged with the City of Joondalup on 2 May 2023 (Ref: DA23/0281) seeking City's retrospective approval to:

1. Increase the maximum allowable seating numbers for the approved restaurant/cafe from forty (40) to eight (80) seats at any one given time; and
2. Increase the approved dining area from 60.34m² to 101m².

At its meeting held on 22 August 2023, the Joondalup City Council considered the development application for the subject land and resolved the following:

- 1 **APPROVES** under clause 68(2)(c) of Schedule 2 of the Planning and Development (Local Planning Schemes) Regulations 2015 an aspect of the application for development approval to amend DA17/1226, dated 2 May 2023 submitted by CF Town Planning, the applicant, for the RESTAURANT/CAFÉ (modifications to DA17/1226 – retrospective) at Lot 702 (24/34) Marri Road, DUNCRAIG:

- 1.1 This approval only relates to the following elements of the proposal:

- 1.1.1 modification to the approved landscaping onsite to accommodate a fixed bar-style table as shown on the approved plans;
- 1.1.2 modification to condition 1 of DA17/1226 to remove the restriction relating to the permitted dining area; It does not relate to the proposed increase in customer seating from 40 to 80 persons.

- 1.2 DA17/1226 approved on 17 November 2018 remains a valid approval and all conditions and advice notes of that approval remain applicable with exception to condition 1 which is modified to:

"A maximum of 40 dining seats are permitted within the internal and external floor space."

- 2 **NOTES** that the City will implement a trial of 15 minute parking restrictions for the two on-street bays on Cassinia Road.

OVERVIEW OF CAFE OPERATIONS

The following is a brief overview of the operation of the café:

- The operating hours of Little H Café are between 6am to 3pm daily (seven days per week);
- The kitchen closes at 2.30pm daily, with no meal orders taken after this time. The kitchen tends to take orders and commence from 7.00am daily;

- The café provides a dine-in and take-away service;
- The café provide a service to the local community (i.e. meeting spot) and adds to the vibrancy of the Duncraig Activity Centre;
- Whilst the café does attract traffic from outside of the immediate area, it does have a large walkable catchment and clientele from the surrounding residential area, the adjoining commercial development (shopping centre) and the residents within the complex above the café;
- Peak periods are during the weekends between 8.30am and 11.30am (breakfast for Saturday and lunch for Sunday); and
- The café is located within a mixed used development that contains a number of other commercial uses that operate at different times.

AMENDED PROPOSAL

Following discussion between the parties at the Mediation Hearing held on 19 December 2023, the following revised proposal is provided for the operation of the existing café on the subject land for consideration by the City of Joondalup and the Tribunal:

1. Increase the seating numbers for the approved restaurant/cafe from forty (40) to the following maximum seating (i.e. staggered seating arrangements):
 - i) Monday to Thursday: Fifty (50) seats at any one given time; and
 - ii) Friday to Sunday: Sixty (60) seats at any one given time.

Appendix 1 contains a copy of the revised plans illustrating the abovementioned seating numbers.

2. Construction of two (2) on-street car parking bays within the Marri Road road reserve abutting Lot 2 (No.50) Marri Road, Duncraig in accordance with the indicative plans prepared by the City of Joondalup (see Appendix 2).
3. Request the City of Joondalup to allow for a payment plan for the on-street car parking construction to assist financially with the café operator. This will allow for the café operator to pay for the construction of one (1) car parking bay immediately and the cost of the second car parking being paid over a 2 year period.

Additional information

In addition to the above proposal, the Café has already undertaken the following tasks to address the City of Joondalup's concerns:

- i) Contacted suppliers and waste collection services to provide instructions to drivers to attend the premises on-site or along the southern side of Marri Road road reserve and not along the northern side of the Marri Road road reserve abutting the residential properties. The purpose of this is to reduce any impacts on local residents along Marri Road;
- ii) Control/monitor bookings and patron arrival/departure times to ensure a smooth transition of customers and avoid cues;
- iii) Improve communications and notices to customers to be mindful of local residents;
- iv) Since Council decision in August 2023, the seating numbers of the café have been reduced from

CF Town Planning & Development

the previous unauthorized numbers of eight (80) at any one given time to sixty (60) at any one given time to reflect this revised proposal. Since adopting this approach, the operator of the café has observed a decline in the City's Ranger Services attending the area; and

- v) Appoint Donald Veal Consultants (DVC) to undertake a car parking survey during the peak period of the café (i.e. Saturday morning). A copy of the car parking survey is attached for the City and Tribunal's review. It should be noted that DVC reviewed the Marri Road verge area abutting Lot 2 (No.50) Marri Road, Duncraig and identified that seven (7) on-street car parking bays could be constructed in lieu of the two (2) car parking bays identified by the City of Joondalup. This provides an opportunity for the City of Joondalup to provide some public parking within the Activity Centre.

JUSTIFICATION IN SUPPORT OF PROPOSAL

The following general comments are provided in support of the café operating under the revised numbers (i.e. increase from 40 seats to 50 and 60 seats);

- i) Little H Café is a successful business that has become an iconic venue within the Duncraig Activity Centre and provides for a vital community venue, allowing for people to socially interact (i.e. provide a meeting spot for the local community);
- ii) The café provides activation and adds to the vibrancy to the Duncraig Activity Centre and surrounding public open space reserves;
- iii) The café has been operating at sixty (60) seats at any one given time since August 2023 and has reduced its previous activity of operating with eighty (80) seats at any one given time;
- iv) The peak periods of the café are during the weekend. As previously outlined to the City of Joondalup, one of tenancies within the mixed use development on the subject land (Kip McGrath – 'Educational Establishment') does not operate on the weekends and is closed during school holidays and weekends. Furthermore, the business does not operate until after the café is closed (i.e. after 3pm). As such, the two (2) businesses do not clash during their individual operating hours. This reduces the on-site car parking usage/demand for the site over the weekend period and therefore makes those bays allocated to the educational establishment being made available for the café. The landowner has provided a letter confirming that the hours of operation for Kip McGrath and the allowance to utilise the surplus bays during the period when Kip McGrath is not operating (see Appendix 3);
- v) In addition, the 'Best Body' business ('Recreation-Private') on the subject land operates during the week between 6.00am and 11.30am and then between 4.00pm to 8.00pm, Saturdays between 7.00am and 12.00 noon and on Sunday between 8.00am to 12.00 noon. The recreational use operates on a booking system for each class during the opening period of the venue and if a class does not have sufficient patrons, it does not proceed. Whilst 'Best Body' and the café may share some periods of identical operating hours, the recreational use is not always operating (given empty/cancelled classes) and therefore allows for less usage/demand of on-site car parking. This further assists the café;
- vi) In light of the above two (2) points, the commercial uses on the subject land have little clashes with the operating hours of the café and therefore allows for greater sharing of bays;
- vii) Based on our weekly staggered seating approach proposed as part of this application (50/50/50/50/60/60/60), the café has achieved an average weekly seating capacity of 54.28 seats;
- viii) Through discussions with the City of Joondalup, the number of resident complaints to the City's Ranger Services since August 2023 has been only four (4) which represents a 92% fall in

CF Town Planning & Development

complaints (previously totalling 50 with the bulk appearing to have come during the advertising period of the application). It could be assumed that any complaints received by the City since August 2023 could have stemmed from the car parking works associated with the adjoining shopping centre; and

- ix) The applicant has attempted on a number of occasions to engage the Hawaiian Property Group.

Car Parking Calculation

The existing development on the land currently provides thirteen (13) on-site car parking bays for the commercial tenancies and two (2) on-street bays constructed as part of the previous approval granted for the café in November 2018. The development also comprises twenty (20) on-site car parking bays within the undercroft level for the multiple dwellings.

As previously mentioned, this application proposes to construct two (2) additional on-street car parking bays within the Marri Road road reserve abutting Lot 2 (No.50) Marri Road, Duncraig in accordance with the indicative plan prepared by the City of Joondalup (see Appendix 2). A such, a total of seventeen (17) bays will be available for the commercial uses on the land and a total of thirty seven (37) for the entire development (including the residential component).

This application proposes to change the maximum allowable seating numbers from the approved maximum of forty (40) at any one given time to a staggered approach to reflect the following:

- Monday to Thursday: Fifty (50) seats at any one given time; and
- Friday to Sunday: Sixty (60) seats at any one given time.

The following car parking calculations are provided for the entire development to assist the City's assessment and reconsideration of its previous decision. It should be noted that the private recreational use operating on the subject land has not been included (provided with an allocation of parking), as it does not operate at the same time as the café and therefore the two (2) uses do not compete for parking:

Table 1 – Car Parking Calculation (Monday to Friday)

LAND USE	PRESCRIBED PARKING STANDARD	No. DWELLINGS, PERSONS OR FLOOR AREA	PARKING BAYS REQUIRED
Residential dwellings	One (1) bay per dwelling	20 dwellings	20 bays
Residential visitor bays	0.25 bays per dwelling	20 dwellings	5 bays
Recreation-Private	1 bay per 4 patrons	10 people	2.5 bays
Educational establishment	1 bay per 3 students	Not open	Nil
Restaurant/cafe	1 bay per 4 seats	50 seats	12.5 bays
Total number of on-site parking bays required			40 bays
Total number of on-site bays provided, plus two (2) on-street bays			37 bays
Total on-site shortfall			3 bays

Table 2 – Car Parking Calculation (Friday, Saturday & Sunday)

LAND USE	PRESCRIBED PARKING STANDARD	No. DWELLINGS, PERSONS OR FLOOR AREA	PARKING BAYS REQUIRED
Residential dwellings	One (1) bay per dwelling	20 dwellings	20 bays
Residential visitor bays	0.25 bays per dwelling	20 dwellings	5 bays
Recreation-Private	1 bay per 4 patrons	10 people	2.5 bays
Educational establishment	1 bay per 3 students	Not open	Nil
Restaurant/cafe	1 bay per 4 seats	60 seats	15 bays
Total number of on-site parking bays required			43 bays
Total number of on-site bays provided, plus two (2) on-street bays			37 bays
Total on-site shortfall			6 bays

As outlined within the above tables, the maximum shortfall in car parking is six (6) on Friday, Saturday and Sunday.

In addition to the above, the previous development approval granted by the City in November 2018 accepted an on-site car parking shortfall of eight (8) bays for forty (40) seats at any one given time. The construction of the two (2) new on-street car parking bays and the non-operation of the educational establishment on the subject land has resulted in the shortfall car parking being reduced on the weekend peak period, which is a good planning outcome for the site/area.

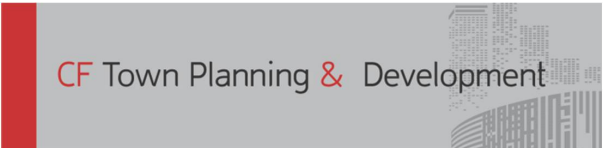

The period comprising an increase in car parking shortfall is on Friday only, with the period between Monday to Thursday maintaining the current approved shortfall for the site granted in November 2018.

Car Parking Survey

A car parking survey has been undertaken by Donald Veal Consultants (DVC) in support of this application to review the car parking demand and behaviour within the vicinity of the café on Saturday 13 January 2024 from 8:30 am until 10:30 am (during the peak period of the café). It should be noted that a similar survey was undertaken by DVC on Saturday 18 March 2023. It should be noted that the 2023 survey was based on the café having eighty (80) seats at the time.

Following the survey, DVC concludes the following:

- The 2024 survey results show parking for the Duncraig Shopping Centre (Zones C to G) start the period at about 56% capacity, climbing to 94% by the last beat period. However, parking adjacent to the café (Zone A) was at its peak at the start of the survey (92%) and fell to 77% by the end. This suggests that as demand is gaining for parking at the shopping centre over the survey period, it is easing off for the café.*
- The two on street bays on Cassinia Road (Zone B) proved popular and verge parking on the north side of Marri Road (Zone I) was largely practiced by residents.*

CF Town Planning & Development

- iii) *The main changes from 2023 are the loss of verge bays in Zone H along Marri Road, which were previously well used with all 12 parking spaces used from 9am onwards. As verge parking has since been banned, this parking demand has been absorbed by the remaining bays in the vicinity. Peak parking demand overall has reduced from 162 in 2023 to 154 in 2024.*
- iv) *We understand that consideration is being given by the City of Joondalup to provide two parallel bays along Marri Road (Zone H) and indeed, has developed a concept design. These bays will add to the overall parking supply.*

Further to the above findings from DVC, we conclude the following:

- i) It is noted that the car parking survey clearly illustrates that there is available car parking bays in Areas A & B (associated with the commercial use on the subject land) and that the bays are not 100% occupied throughout the peak period of the café. In most intervals between 8.30am to 10.15am, there are between one (1) and four (4) bays available;
- ii) Occupancy rate of the verge bays in Area B range from 50% to 100% (peaking during the mid-morning);
- iii) Occupancy rate for the on-site commercial bays in Area A ranges from 77% to a maximum occupancy rate of 92% during this peak period;
- iv) Given the above point, there is availability or a surplus of bays during this peak period;
- v) The provision of two (2) additional on-street car parking bays will further increase the availability and surplus of car parking bays being made available for customers of the café;
- vi) The occupancy rate of the verge bays in Area B has decreased since the March 2023 survey. It is viewed that the occupancy rate of these bays will decrease further once the City has implemented/erected signage restricting parking times of these bays; and
- vii) The occupancy rate of the on-site commercial bays in Area A has slightly increased as a result of the City of Joondalup introducing parking restrictions along the adjoining road verges.

In light of the above, the survey clearly indicates that during the period of the café on a Saturday, there is available bays for customers of the café and that not all bays technically available for the café are occupied. This demonstrates that the maximum number of sixty (60) seats at any one given time for the café can be accommodated without having an adverse impact on car parking and vehicle movements throughout the area. As such, it could be supported by the City of Joondalup.

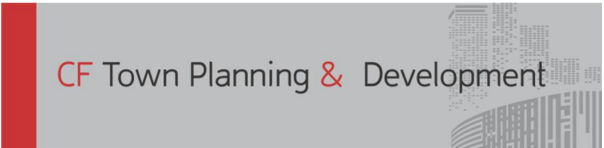

Justification for Car Parking Shortfall

As outlined above, this application proposes the following car parking shortfalls, as a result of the proposal to change the seating numbers for the café:

- Monday – Thursday: 3 bay shortfall (less than the current approved shortfall)
- Friday, Saturday – Sunday: 6 bay shortfall (reduces the current approved shortfall for the site)

The following justification is provided in support of the on-site car parking shortfall

- i) Generally, the proposed change in the seating numbers has resulted in little change to the current approved on-site car parking shortfall on the land (with the exception of Friday). As such, the construction of the new on-street bays along Marri Road will facilitate the increase in customer

CF Town Planning & Development

numbers of the café without adversely impacting the amenity of the area or vehicle movements along the local road network;

- ii) The café has been operating at sixty (60) seats at any one given time since August 2023, without resulting in any key concerns being raised. As previously mentioned within this report, the number of complaints received by the City has decreased and the ranger activity within and around the café has notably reduced. As such, it could be concluded that the revised operations of the café has addressed the car parking concerns within the immediate area;
- iii) The café serves breakfast and lunch, not a dinner service (the café closes at 3pm, with a peak period in the morning/midday period). It is viewed that the proposed tavern and the shopping centre have a peak period in the afternoon and evening (i.e. the peak periods do not clash with the café);
- iv) It is viewed that the peak period of the Activity Centre would be during weekdays (i.e. office, educational establishment and a number of the shops). As such, the café is proposing a seating number during the week to reflect the increased movements within the Activity Centre (i.e. a lower seating number). Furthermore, the peak period of the café is during the morning of the weekend, where the Activity Centre would experience less movements/patronage;
- v) Whilst it is recognized that the Duncraig Activity Centre does not comprise any public parking or reciprocal rights of access/parking easements over individual lots. In addition the Activity Centre contains a number of various commercial and mixed use developments. As such, the precinct would experience an informal reciprocal parking usage as patrons undertake multi-task trips (i.e. attend the café and the shopping centre on the adjoining lot as one trip). This will reduce the overall car parking demand. This is typical within an Activity Centre;
- vi) The educational establishment on the subject land does not operate before 3pm and does not operate on the weekends. This allows for the car parking bays calculated for that use to be made available to the café;
- vii) The café is a valuable community venue within the immediate location that provides a 'meeting spot' for local residents and business owners. The use contributes to providing a diversity of uses and vibrancy within the Duncraig Activity Centre. As such the additional seating is required to cater for the needs/demands of the local community;
- viii) Staggered maximum seating numbers throughout the week allows the café (which is successful and well recognized) to continue operating and be economically viable given the ever increasing operating costs;
- ix) The café enjoys a good local walkable catchment, with a number of customers walking, riding and using e-scooters attend the venue;
- x) The development includes nine (9) bicycle bays, which is used by patrons of the restaurant/café; and
- xi) There appears to be a number of local residents using the on-street car parking for longer term purposes and/or for visitor parking. In addition, it is contended that the largest contributor to the local parking issues within the area may be associated with the apartments, which only provide 1 bay per dwelling and have enclosed parking bays. The following can be drawn in regard to the apartments of the subject land (20 units):
 - If we look the twenty (20) apartments on the subject land, if 20% of the apartment occupants have more than 1 car (which is likely), then four (4) cars are being parked on the road;
 - Then there are visitors associated with the apartments. Only five (5) visitor bays are provided. If 50% of the apartments have one (1) visitor throughout the day or a ride share/food delivery

CF Town Planning & Development

service (which is likely), then there are another five (5) additional cars that will be placed on the streets; and

- The above can be applied to the existing apartment development on adjoining No.22 Cassinia Road (another 21 units, which could add another 9-10 cars parking along the street).

In light of the above, the City must note that the car parking issues within the Activity Centre have not solely emerged from Little H Café.

CONCLUSION

The operators of Little H Café are conscious of the local residents within the area, which are customers of the café. As such, the operators have been willing to work with the City of Joondalup to resolve the issues raised by a small number of local residents (one in particular) to ensure the café remains operating without adversely impacting the surrounding area but remains viable. Furthermore, it should be recognised that Little H Café provides a positive outcome for the area and the Duncraig Activity Centre by providing a venue for the local community to socialise, whilst providing activation of the Activity Centre. As the same time, the Café utilises local businesses for supplies (i.e. the IGA on the adjoining shopping centre site) and therefore allows for local businesses to thrive.

This application proposes to stagger the customer numbers for the café throughout the week and weekend which will result in less conflicts with the high movements/patronage experienced within the Activity Centre. Given this, the proposal outlined within this submission addresses the car parking concerns raised by the City of Joondalup and would not result in any adverse impact on the local residents and/or the local road network. Furthermore, the amended plans and information prepared in support of this application addresses the concerns and requests made by the City of Joondalup and reflects those discussions undertaken at the Mediation Hearing held on 19 December 2023.

In light of the above information and justification, we respectfully request the City of Joondalup and Tribunal's favourable consideration of the application at its earliest possible convenience.

Should you have any queries or require any additional information regarding any of the matters raised above please do not hesitate to contact me on 0407384140 or carlof@people.net.au.

Yours faithfully,

Carlo Famiano

LITTLE H CAFÉ

Parking Survey Analysis

TECHNICAL NOTE 1

18.01.2024

1. INTRODUCTION

Donald Veal Consultants (DVC) was commissioned to conduct a parking beat survey in the vicinity of the Little H Café on Saturday 13th January 2024 from 8:30 am until 10:30 am. Parking beats were repeated approximately every 15 minutes over the two-hour period. The survey covered the same parking area and survey time period as a previous beat survey carried out on Saturday 18th March 2023. This enables a direct comparison to be made between the two sets of survey results.

2. SITE VISIT & PARKING INVENTORY

The café was quite full during the survey period with vacant tables quickly filled by walk-in customers or those with pre-bookings. We understand the café is currently operating with a 60 seat capacity on Saturdays.

There were some changes to parking inventory along Marri Road and within the Duncraig Shopping Mall car park. The parking beat zones are shown in **Figure 1**. New verge signs advising of no stopping on the carriageway or verge have been installed along Marri Road, as shown in **Photo 1**. These effectively ban the verge parking in Zone H that was previously observed in the March 2023 survey.

Additional formal parking bays have been introduced to the Duncraig Shopping Centre car park near Roche Road (Zone C), replacing the previous verge parking in this location. To access the area, four bays have been lost in Zone D. Changes have also been made along the parking aisle and drive-through of the 'Nourish and Feed Duncraig' outlet, adding one bay to Zone G.

Zone A included only the 13 commercial car bays and not the basement parking bays reserved for residents. During the surveys DVC observed that all tenancies were operating with the exception of the Kip McGrath tutoring centre, which was closed for the holiday period.

Overall, the available parking bay capacity has decreased from approximately 184 bays in March 2023 to 168 bays in January 2024.

Figure 3: Parking Occupancy Graph 2023

Client: Little H

Project: Little H Café 2024 Parking Survey

5. FINDINGS

The 2024 survey results show parking for the Duncraig Shopping Centre (Zones C to G) start the period at about 56% capacity, climbing to 94% by the last beat period. However, parking adjacent to the café (Zone A) was at its peak at the start of the survey (92%) and fell to 77% by the end. This suggests that as demand is gaining for parking at the shopping centre over the survey period, it is easing off for the café.

The two on street bays on Cassinia Road (Zone B) proved popular and verge parking on the north side of Marri Road (Zone I) was largely practiced by residents.

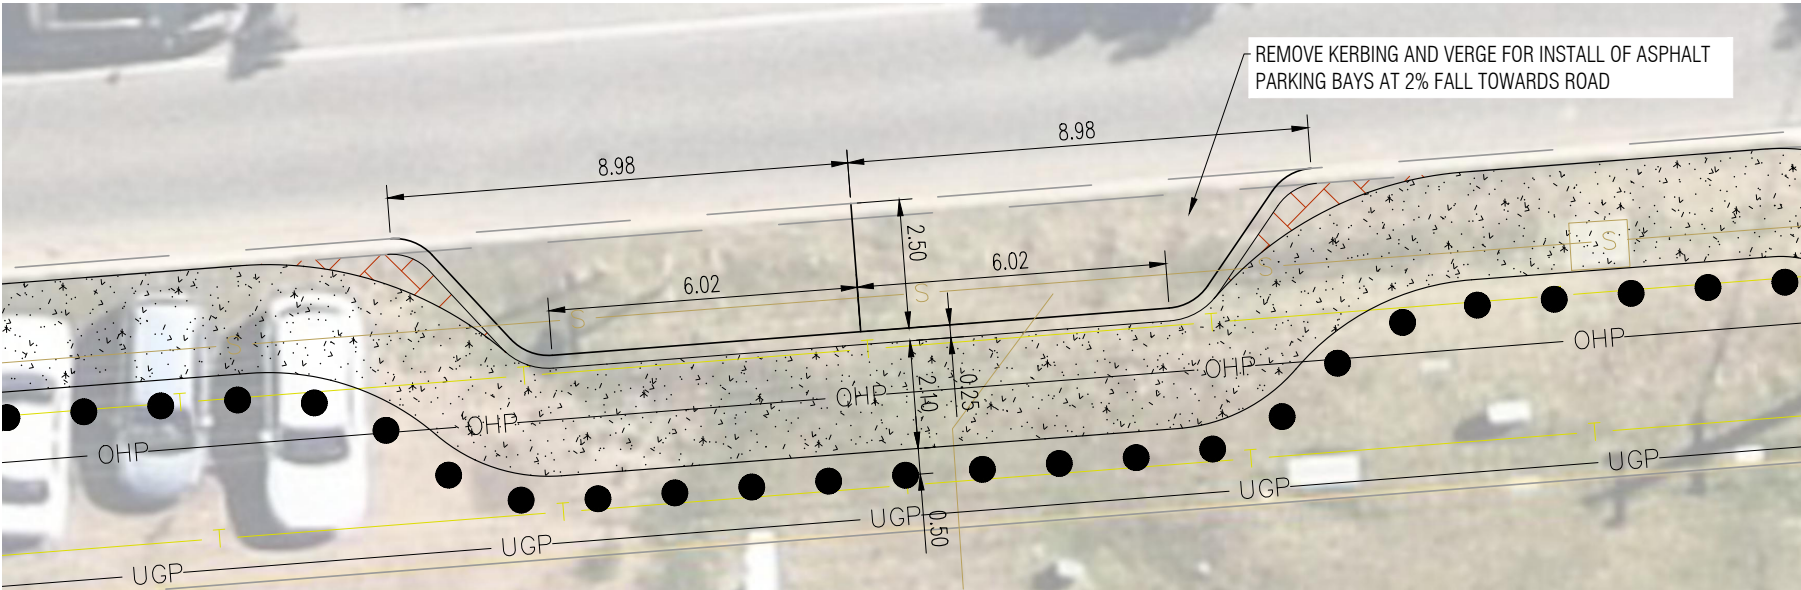

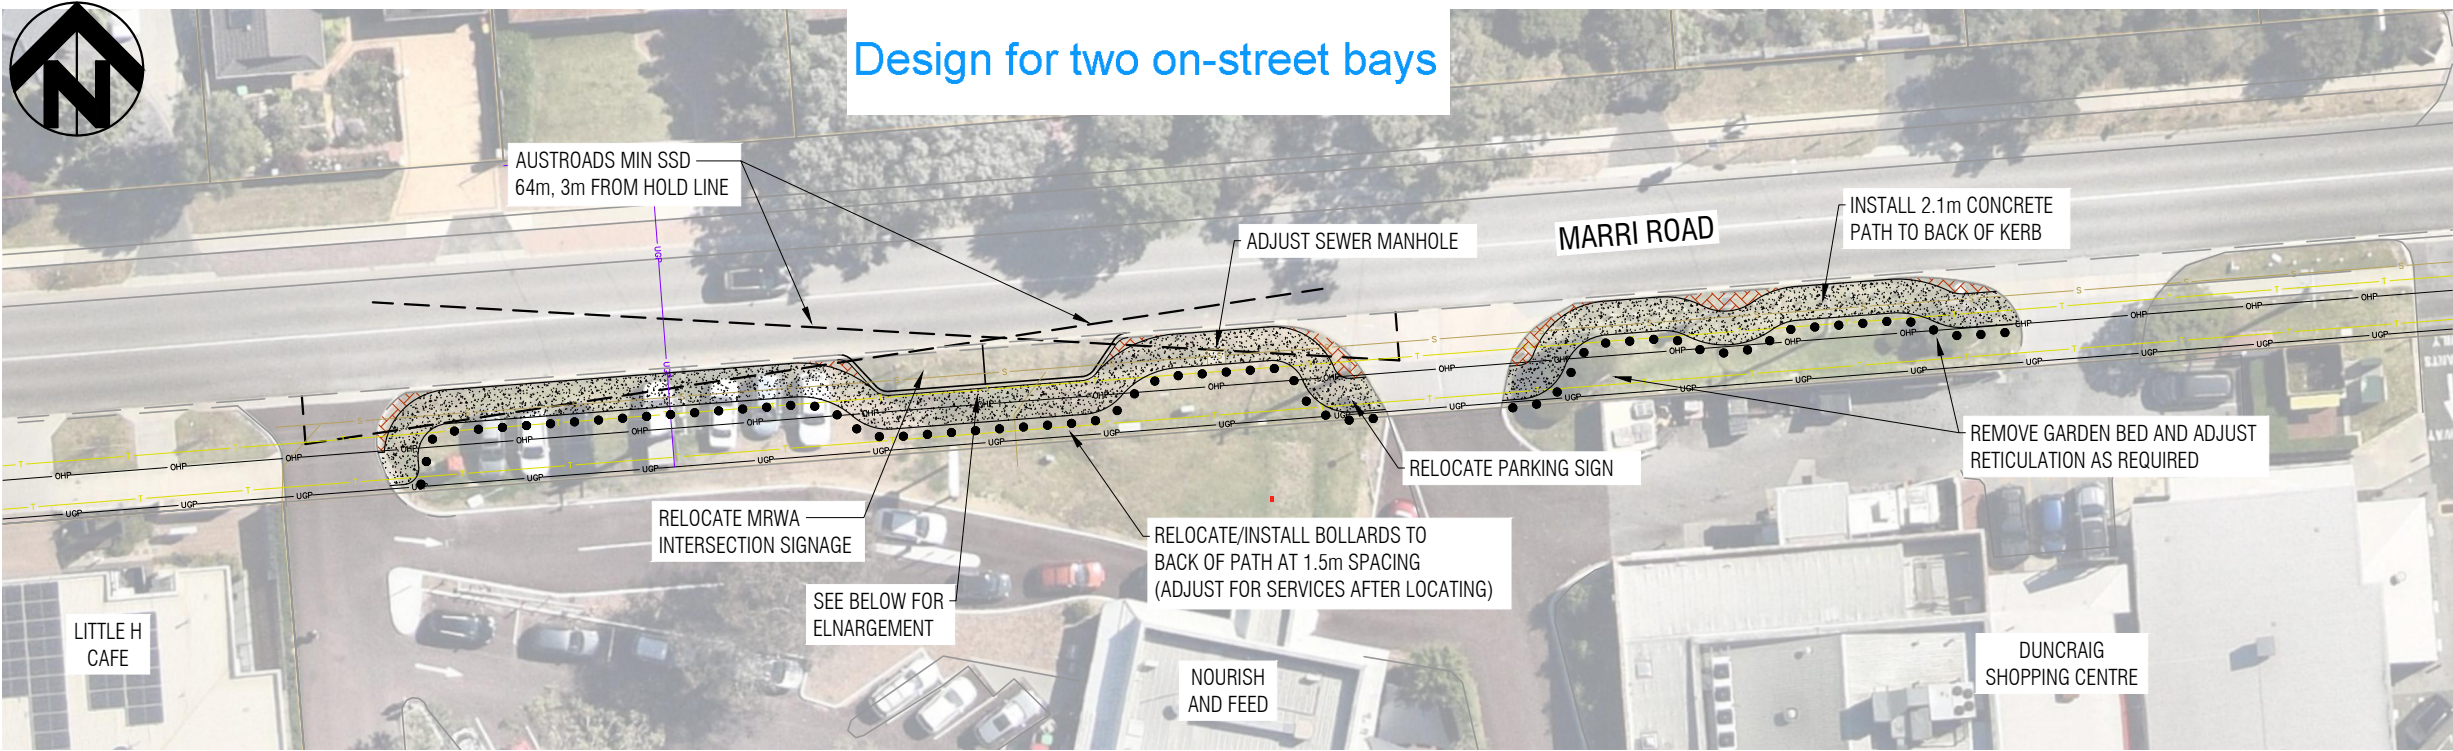

The main changes from 2023 are the loss of verge bays in Zone H along Marri Road, which were previously well used with all 12 parking spaces used from 9am onwards. As verge parking has since been banned, this parking demand has been absorbed by the remaining bays in the vicinity. Peak parking demand overall has reduced from 162 in 2023 to 154 in 2024.

We understand that consideration is being given by the City of Joondalup to provide two parallel bays along Marri Road (Zone H) and indeed, has developed a concept design. These bays will add to the overall parking supply.

CON0084-01

Schedule of Submissions – No.34 Marri Road, Duncraig (Little H Café)

Concern raised	Summary of submission	Applicant response
Number of seats proposed	<p>Concerns with increased seating numbers proposed from Friday to Sunday, particularly on Saturday and Sunday mornings.</p> <p>Parking with the Duncraig Shopping Centre carpark reaches its highest capacity on Friday, Saturday and Sunday mornings, which is when the café is proposing its maximum seating capacity.</p>	<ul style="list-style-type: none"> • The comment regarding the objector's concern with the increase seating numbers is noted. As demonstrated to the City of Joondalup, there are commercial uses on the subject land that will not operate on Saturday and Sunday. This results in the car parking bays allocated to other uses (i.e. educational establishment) to be available for use by the café. This will assist with covering the demand for parking as a result of the increased number of patrons to the café. • The café has a good walkable catchment and is not solely reliant on car parking for customers. Therefore there is less parking demand generated. • It should be noted that the shopping centre and future tavern does and will generate greater parking demand and congestion within the immediate area compared with that of the café on the subject land. As such, the issues experienced by the shopping centre should not be addressed as part of this application. • It should be noted that the café on the subject land does not propose to use or rely on the usage of car parking bays within the Duncraig Shopping Centre. Furthermore, the application does not justify the new patronage numbers based on the availability of car parking within the shopping centre. • The café is proposing to construct two (2) new on-street car parking bays along Marri Road, which can be used by the general public (including the shopping centre customers). • The café operator has engaged an independent qualified traffic engineer to survey parking supply for the area and on the subject land. The survey demonstrates that on-site parking

availability during the café peak period and at the maximum proposed seating increase number of 60. The survey has not factored in the construction of the proposed two (2) new car parking bays along Marri Road. It should be noted that the survey concludes that there are car parking bays available on the subject land (i.e. not all bays are being used).

- Factually, this statement regarding parking supply for the Duncraig Shopping Centre could be misleading because more than 50% of the Duncraig Shopping Centre tenants do not operate on Sundays (i.e. Newsagent, Optometrist, Physio, Nail Salon, Ladies Hair Salon, Men's Hair Salon, Dentist, Red Cross, Pharmacy, Cosmetic Clinic and small Fruit & Veg Operator are not open Sundays). Some don't open Saturdays either (refer to the Duncraig Shopping Centre Website: <https://www.hawaiian.com.au/shopping-centres/duncraig>). Given this, parking required for the shopping centre on Sundays would be significantly less.
- If the shopping centre has a lack of available car parking bays, then it can be viewed that it has insufficient parking to accommodate its tenants and that the site is overdeveloped. Given this, the proposed tavern for the site should not have been approved due to the lack of car parking (as identified by the objector). It is anticipated that the tavern will result in car parking issues within the Duncraig Activity Centre.
- It is concerning that the shopping centre owners on one hand claim a lack of car parking on its own site to outline its objection to the application for Little H Café, but then claims sufficient car parking when seeking approvals from the City of Joondalup for the expansion of the shopping centre.
- It should be noted that the café forms part of an Activity Centre where all businesses benefit from patrons being able to complete multi-task trips from café on the subject land and the

		<p>adjoining shopping centre site. Ultimately, where patrons choose to consume from first is merely at their discretion.</p> <ul style="list-style-type: none"> We note that the shopping centre owners have raised concerns regarding Little H Cafe. Through discussions with the shopping centre owners, it is established that the concerns (or objection to Little H Café) is due to the shopping centre protecting their own tenants (including an existing café within the shopping centre). This can be viewed as being an economic factor or attempting to limited competition in the area, which are both not valid planning arguments. <p>In light of the above responses, the comments should be dismissed.</p>
Issues with verge parking	Continued unauthorised parking on residents' verges along the northern side of Marri Road, which obstructs the footpath along Marri Road and obstructs vehicle sightlines for residents existing their driveways.	<ul style="list-style-type: none"> Respectfully acknowledged. Little H Café does not condone unauthorised parking. However, this should not be isolated to the café in every instance. This application seeks to offer a solution in this regard by paying for the construction of two (2) additional public car parking bays along Marri Road. Little H Café has endeavoured to educate its patrons to not park vehicles on verge areas and be mindful of the local community. Some residents that occupy properties along Marri Road also use their verges for their own personal parking which could be considered 'authorised parking'. Due to the significant rental shortage in Perth at present it would not be unreasonable to contend that there are more residents living under shared arrangements than there is parking available for each property. The City via its database should be able to verify that the property located at No.35 Marri Rodd (directly opposite the café) is presently under construction which means various trades are coming and going and using the verges close to the property to park their vehicles. It could be misconstrued that these trades people are primarily café customers.

		<ul style="list-style-type: none"> Follow discussions with the landowner along Marri Road (the objector), it was confirmed that they cannot confirm that the unauthorised verge parking is associated with the café (therefore the claim may not be related to this application). The objector also mentioned that he observed a person parking on the verge to attend another venue and not the café. To assume that all unauthorised verge parking is associated with the café is misleading and unsubstantiated. <p>In light of the above responses, the comments should be dismissed.</p>
	<p>Inadequate parking/no-parking signage is in place along Marri Road to help manage verge parking issues.</p>	<ul style="list-style-type: none"> Comment noted. Several parking signage has been recently erected by the City of Joondalup along Marri Road. The City would need to determine if further signage is appropriate for the area. The issue of signage along the local road network is a matter that needs to be reviewed by the City of Joondalup and relates to the functioning of all uses within and around the Activity Centre. As such, the comment is not directly related to this application. <p>In light of the above, the comment does not relate to this application and should be dismissed.</p>
<p>Availability of onsite parking</p>	<p>Overall the site requires 5 bays for resident visitor parking, 3 bays for the pilates studio, 5 bays for the Educational establishment and 15 bays for the café (based on patron numbers). This totals a parking requirement of 28 bays.</p> <p>There are a total of 13 on-site bays which are insufficient to accommodate the 28 bay demand.</p>	<ul style="list-style-type: none"> Revised parking calculations have been provided to the City in support of the application. The objector has failed to consider reciprocal parking arrangements (differing operating hours etc) and the construction of two (2) new verge car parking bays along Marri Road. In addition, objector has not considered the historical shortfall granted by the City of Joondalup for the site. In fact,

		<p>this application reduces the extent of the previously approved on-site car parking shortfall.</p> <p>In light of the above responses, the comments are not accurate and should be dismissed.</p>
	<p>Concerns that the parking survey provided with the revised proposal has included an analysis of the car park belonging to Duncraig Shopping Centre on the adjoining lot.</p>	<ul style="list-style-type: none"> • This application does not seek to justify the proposed seating increase using the Duncraig Shopping Centre parking supply. As such, the concerns raised by the owners of the shopping centre should be dismissed. • It is reiterated that this application is retrospective, with the café significantly scaling back operations to accommodate established and recurring customer demand. The café has been operating at the proposed seating numbers since the first Council determination in August 2023 without detrimentally impacting our neighbours.
	<p>Car parking on-site is already at capacity with the existing approval for 40 seats. There should not be scope to increase the number of seating any further.</p>	<ul style="list-style-type: none"> • The objector has failed to review the parking survey undertaken in support of this application, which concludes that the on-site car parking is not at full capacity/use and that there is some availability during parts of the peak period. In addition, the objector has failed to recognise that the café will be constructed two (2) more on-street car parking bays along Marri Road to address any concerns.
	<p>The addition of only two on-street parking bays is insufficient to accommodate the increase in seating proposed.</p>	<ul style="list-style-type: none"> • This is incorrect. The additional on-street parking and availability of on-site parking is sufficient to service the cafe. <p>In light of the above responses, the comments should be dismissed.</p>
	<p>Lack of car parking on the subject site, has resulted in the car park at Duncraig Shopping Centre becoming an 'overflow' car park for café patrons.</p>	<ul style="list-style-type: none"> • The comment is unsubstantiated. Notwithstanding this, it is respectfully acknowledged that it is very difficult to distinguish the purpose for which patrons are choosing to park every time

	<p>Overflow parking from the café is impacting on the availability of carparking at Duncraig Shopping Centre and the businesses which require that car parking for their own customers.</p>	<p>unless you ask each patron that visits the Activity Centre which is just not within anyone's operating scope. The same theory could be applied in reverse for the parking on the subject land being labelled an 'overflow' car park for shopping centre patrons for which we require parking for our own commercial tenancies.</p> <ul style="list-style-type: none">• Further to the above point, the traffic survey demonstrates that the café has parking available on subject land at the maximum proposed seating capacity, during peak hours. This will be strengthened once the two (2) new on-street car parking bays are constructed along Marri Road.• It should be noted that this application does not rely on the use of car parking on the adjoining shopping centre site.• As outlined above, the café does not propose or mention the use of the shopping centre car parking area to support the patronage numbers of the café.• The comment (clearly from the shopping centre owner) also fails to understand multi-task trips where by patrons of the shopping centre (i.e. frequenting the IGA), park in the shopping centre car parking area, walk over to Little H Café to purchase a take-away coffee and then proceed to do their tasks at the shopping centre. This cannot be deemed as overflow parking for the café.• It is clear that the shopping centre has a lack of available parking bays (as outlined by the owners of the shopping centre) and that it is currently over-developed. As such, the shopping centre should not be permitted to expand its floor area or introduce additional higher order uses that require more car parking. This includes the recently approved tavern, which should not have been approved given the parking concerns raised by the shopping centre itself.
--	---	--

		<ul style="list-style-type: none"> Little H Café is a very small business that does not operate all day, unlike the shopping centre and future tavern. <p>In light of the above responses, the comments should be dismissed.</p>
Relationship between café and other uses on-site	<p>The education establishment on-site does operate on Saturday's (8:30am – 12:00pm) according to their website. It is incorrect to state it does not operate on weekends.</p> <p>The peak time of the café coincides with operation of the pilates studio on the same site, which is also busy in the mornings.</p>	<ul style="list-style-type: none"> The City's approval for the Educational Establishment limits the use to weekdays only and not the weekend. As such, the comment within the report prepared in support of the application is correct. In the instance that the Educational Establishment is operating outside of its approval, it will need to be addressed by the City of Joondalup and not through this application. The parking calculations provided are in accordance with the car parking standards prescribed within the City's planning framework, based on maximum patronage numbers for the approved 'Recreation-Private' use (i.e. pilates). The objector is assuming that the scheduled classes for the pilates studio is full each time which may be unrealistic. Noticeably, the busiest classes are very early mornings and late afternoons which coincide with patrons getting their physical activity out of the way before starting the day and or after work hours. As such, the café peak periods differ. It should also be acknowledged that the café is located on the same property and that patrons of the pilates classes are also café customers and vice versa. The café does achieve a harmonising tenancy mix. Lastly, it would also be unreasonable to assume that the café is operating at its maximum capacity during all its operating hours <p>In light of the above responses, the comments should be dismissed.</p>

Concern raised	Summary of submission	City's response
Number of seats proposed	<p>Concerns with increased seating numbers proposed from Friday to Sunday, particularly on Saturday and Sunday mornings.</p> <p>Parking with the Duncraig Shopping Centre carpark reaches its highest capacity on Friday, Saturday and Sunday mornings, which is when the café is proposing its maximum seating capacity.</p>	<p>The City is not supportive of the seating increase from 40 to 60 seats proposed from Friday to Sunday, as outlined in the body of the report.</p>
Issues with verge parking	<p>Continued unauthorised parking on residents' verges along the northern side of Marri Road, which obstructs the footpath along Marri Road and obstructs vehicle sightlines for residents exiting their driveways.</p> <p>Inadequate parking/no-parking signage is in place along Marri Road to help manage verge parking issues.</p>	<p>The City is aware of an ongoing issue with unauthorised verge parking occurring within the vicinity of the café.</p> <p>Additional no-standing signage was installed in December 2023 within the verge on the southern side of Marri road (adjacent to Duncraig Shopping Centre), in addition to no-standing signage also installed in 2023 along Cassinia Road, to help address this issue.</p> <p>The proposal seeks to create three additional formalised on-street parking bays within the Marri Road verge which will assist with parking within the Activity Centre.</p>
Availability of onsite parking	<p>Overall the site requires 5 bays for resident visitor parking, 3 bays for the pilates studio, 5 bays for the Educational establishment and 15 bays for the café (based on patron numbers). This totals a parking requirement of 28 bays.</p> <p>There are a total of 13 on-site bays which are insufficient to accommodate the 28 bay demand.</p>	<p>The demand for parking at the site should consider that the Educational Establishment is not approved to operate at the same times as the café (i.e. café closes at 3:00pm and the Educational Establishment opens at 4:00pm).</p> <p>The publicly available parking also includes to the two existing on-street bays along with three additional on-street bays proposed through the application. The available car parking is considered to be adequate to cater for in increase to 54 seats, however is considered insufficient to cater for the demand of patrons associated with an increase to 60 seats.</p>

	<p>Concerns that the parking survey provided with the revised proposal has included an analysis of the car park belonging to Duncraig Shopping Centre on the adjoining lot.</p> <p>Car parking on-site is already at capacity with the existing approval for 40 seats. There should not be scope to increase the number of seating any further.</p> <p>The addition of only two on-street parking bays is insufficient to accommodate the increase in seating proposed.</p>	<p>The parking survey undertaken by the applicant has assessed parking at the subject site, whilst also providing data for parking on-street (both informally and within the existing on-street bays) and on the adjoining shopping centre site. The survey has provided this information to demonstrate the parking situation within the immediate vicinity of the café, rather than including parking on the shopping centre's site as justification for a shortfall of on-site parking on the café's property.</p>
	<p>Lack of car parking on the subject site, has resulted in the car park at Duncraig Shopping Centre becoming an 'overflow' car park for café patrons.</p> <p>Overflow parking from the café is impacting on the availability of carparking at Duncraig Shopping Centre and the businesses which require that car parking for their own customers.</p>	<p>The car parking at Duncraig Shopping Centre has not been included in the City's assessment of car parking available to café users.</p> <p>The available car parking to users of the café is considered to be adequate to cater for an increase to 54 seats, however is considered insufficient to cater for the demand of patrons associated with an increase to 60 seats.</p>
Relationship between café and other uses on-site	<p>The education establishment on-site does operate on Saturday's (8:30am – 12:00pm) according to their website. It is incorrect to state it does not operate on weekends.</p> <p>The peak time of the café coincides with operation of the pilates studio on the same site, which is also busy in the mornings.</p>	<p>The Educational Establishment has approval to operate between 4:00pm and 7:00pm Monday to Friday only.</p> <p>Operation of the Educational Establishment on a Saturday morning was brought to the City's attention during consultation and is currently being investigated as a Compliance matter.</p> <p>The approved operating hours for the Recreation – Private (pilates studio) does coincide with the café's hours of operation which have been considered in the main body of the report.</p>

Dynamic Planning & Developments
Po Box 688
INGLEWOOD WA 6932

Dear Sir/Madam,

Proposed Development:	CONSULTING ROOMS (removal of condition of approval)
Property Details:	34 Seacrest Drive SORRENTO WA 6020
Land Parcel(s) Details:	Lot 504 P 14388 Vol 1656 Fol 423
Owner(s) Details:	Physiotherapy & Rehabilitation Pty Ltd

I refer to your Application for Approval to Commence Development, received by the City of Joondalup on 29 May 2014.

You are advised that approval has now been **granted** under the provisions of the City of Joondalup District Planning Scheme No 2 and the Metropolitan Region Scheme.

Prior to commencing any works whatsoever, you may be required to obtain a Building Permit from the City in accordance with the requirements of the Building Act 2011. For further information please contact Compliance and Regulatory Services on 9400 4961.

This Approval to Commence Development requires the development to be undertaken in accordance with the submitted application and is subject to compliance with the following conditions:

1. **No more than one (1) health consultant generating their own patient load shall be permitted to operate from the premise at any given time.**
2. **Client visits must be during the hours of 8am – 6pm Monday to Friday and 9am – 5pm Saturday only.**
3. **No on-street parking is permitted for clients or employees; all parking is to be provided on-site.**
4. **Any signage shall be the subject of a separate development application.**

Advice notes:

1. **The development is approved as a “Consulting Room” as defined by the City of Joondalup District Planning Scheme No. 2.**

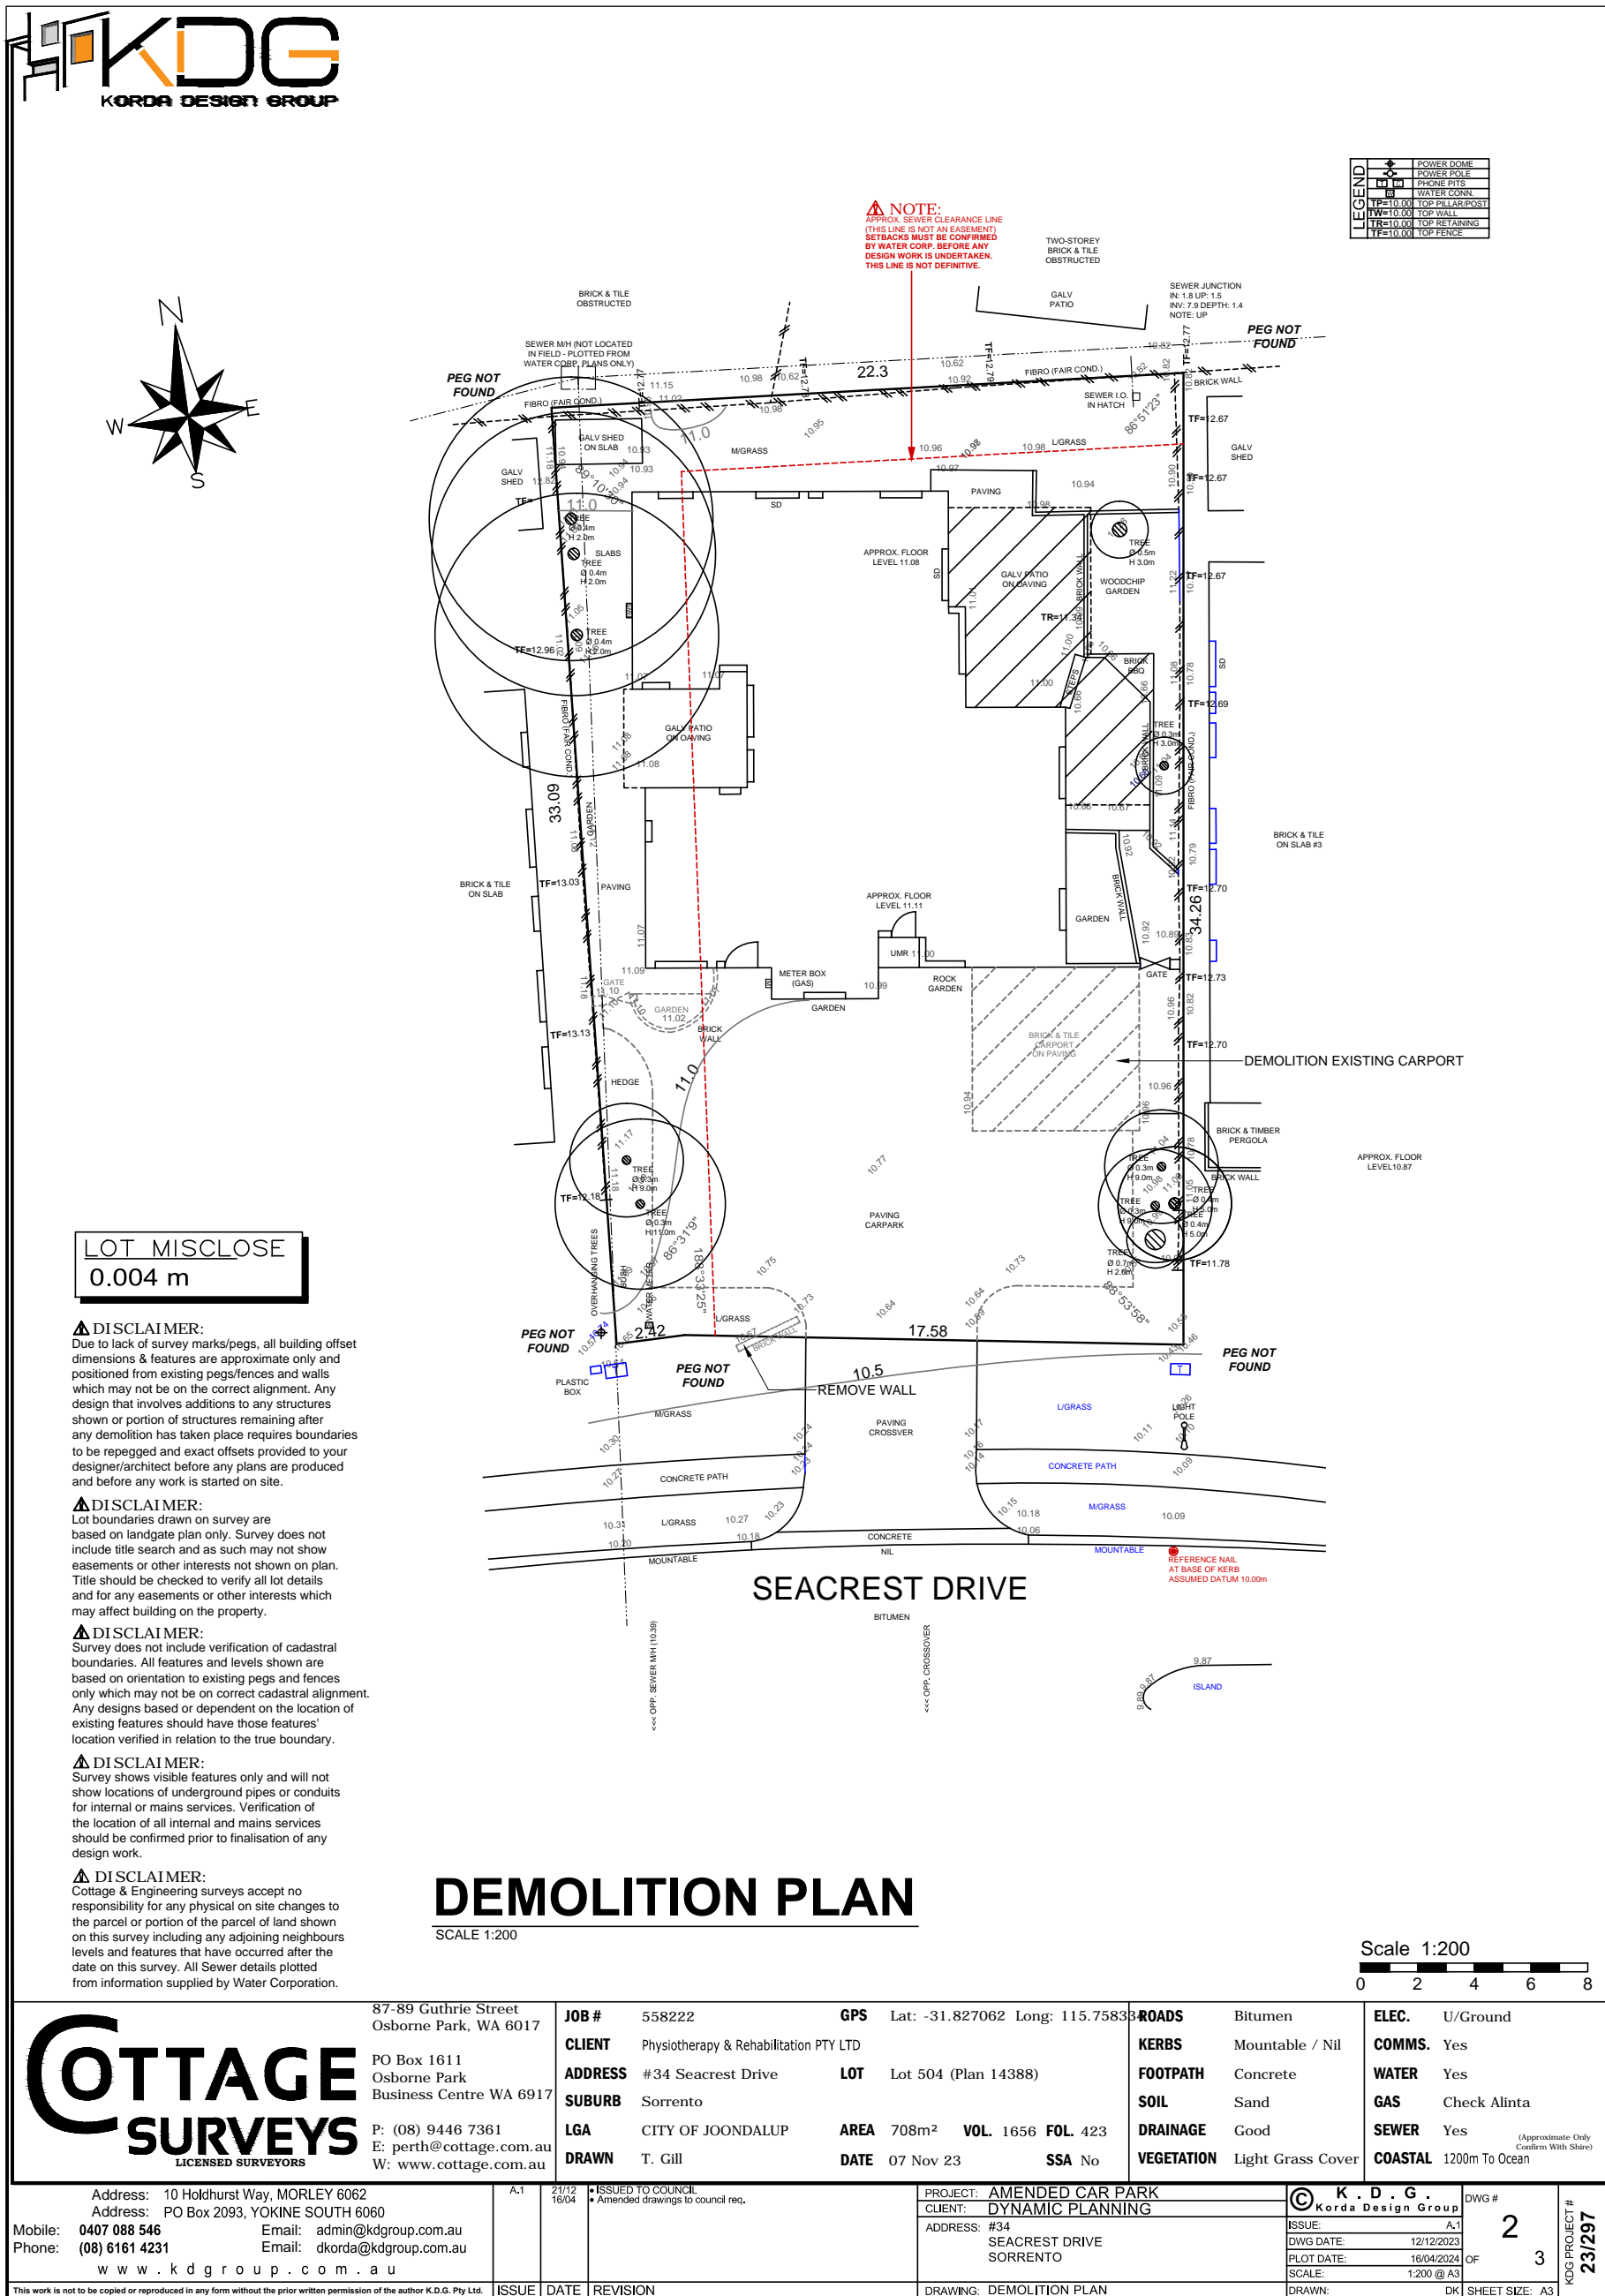

2. **The City of Joondalup District Planning Scheme No. 2 defines Consulting Room as “a building used by no more than one health consultant for the investigation or treatment of human injuries or ailments and for general patient care.”**
3. **The land use ‘Consulting room’ under District Planning Scheme No. 2 is appropriate in this instance.**

If you are aggrieved by this decision, then a right of appeal may exist. Such appeal rights exist under Section 252 of the *Planning and Development Act 2005* and should be made within 28 days from the date of decision in accordance with the *State Administrative Tribunal Act 2004*.

Planning approval does not, however, remove the need for approvals, licences, permits, etc, that may be required under other legislation. The subject lot may also be affected by caveats, covenants or other private restrictions. It is recommended that you make your own enquiries in this regard.

Yours sincerely,

EMMA BRACKNELL

DISCLAIMER:
Due to lack of survey marks/pegs, all building offset dimensions & features are approximate only and positioned from existing pegs/fences and walls which may not be on the correct alignment. Any design that involves additions to any structures shown or portion of structures remaining after any demolition has taken place requires boundaries to be repegged and exact offsets provided to your designer/architect before any plans are produced and before any work is started on site.

DISCLAIMER:
Lot boundaries drawn on survey are based on landgate plan only. Survey does not include title search and as such may not show easements or other interests not shown on plan. Title should be checked to verify all lot details and for any easements or other interests which may affect building on the property.

DISCLAIMER:
Survey does not include verification of cadastral boundaries. All features and levels shown are based on orientation to existing pegs and fences only which may not be on correct cadastral alignment. Any designs based or dependent on the location of existing features should have those features' location verified in relation to the true boundary.

DISCLAIMER:
Survey shows visible features only and will not show locations of underground pipes or conduits for internal or mains services. Verification of the location of all internal and mains services should be confirmed prior to finalisation of any design work.

DISCLAIMER:
Cottage & Engineering surveys accept no responsibility for any physical on site changes to the parcel or portion of the parcel of land shown on this survey including any adjoining neighbours levels and features that have occurred after the date on this survey. All Sewer details plotted from information supplied by Water Corporation.

	Ordinary Meeting of Council	1.3	C125-11/21 - NOTICE OF MOTION NO. 1 – CR	On Hold	Action from Minutes - Report Request - Council Meeting - 16 November 2021	15/09/2023 Report due TBA		

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
			MAY – PROVISION OF BASKETBALL FACILITIES		<p>That Council:</p> <p>1 REQUESTS the Chief Executive Officer to investigate and prepare a report on the best location for the provision of a basketball pad at one of the following parks in Craigie: a Otago Park, Craigie; b Camberwarra Park, Craigie; or c Albion Park, Craigie;</p> <p>2 REQUESTS the Chief Executive Officer to investigate and prepare a report on the provision of a basketball pad at one of the following parks in Kallaroo: a Whitfords-West Park, Kallaroo; or b Bridgewater Park, Kallaroo;</p> <p>4 Considers the provision of a basketball pad at either Bridgewater Park, Kallaroo or Whitfords-West Park, Kallaroo in the context of the Youth Outdoor Recreation Strategy and Business Case for Interconnected Mountain Bike Trails.</p>	<p>23/10/2023</p> <p>Following Council's decision regarding the provision of a basketball facility at Braden Park, Marmion (CJ133-08/22 refers), this report is on hold enabling the consideration of the DWER Guidelines on basketball facilities in public open spaces.</p>		
	Ordinary Meeting of Council	1.4	CJ185-12/21 - INSTALLATION OF UNDERGROUND POWER AND LED UPGRADES	In Progress	<p>Action from Minutes - Report Request - Council Meeting - 14 December 2021</p> <p>8 REQUESTS the Chief Executive Officer to prepare a business case detailing: 8.1 Converting an area to smart-metered, LED City owned streetlights; 8.2 Converting an area from overhead power lines to underground power including the installation of smart metered, LED City owned streetlights.</p>	<p>15/09/2023</p> <p>Report due TBA</p> <p>16/04/2024</p> <p>The City has commenced the development of a business case as requested by Council. To inform the options identified, the City included two projects, being STL2140 Relighting Dampier Avenue, Mullaloo and STL2142 Relighting of Venturi Drive, in the 2023-24 Capital Works Program and the draft 2024-25 Capital Works Program to convert two small areas to smart-metered, LED City owned streetlights. The purpose of these projects is to develop a handover process between Western Power (current owner) and the City of Joondalup. Western Power has now indicated that they are no longer supportive of handing over these assets to the City. The City is currently reviewing the assumptions underpinning the business case.</p>		
	Ordinary Meeting of Council	1.5	C56-05/22 - NOTICE OF MOTION NO. 2 - CR CHRISTOPHER MAY - MITCHELL FREEWAY WIDENING WORKS	In Progress	<p>Action from Minutes - Report Request - Council Meeting - 17 May 2022</p> <p>5 REQUESTS the CEO to prepare a report regarding adopting the position of supporting the retention of all existing land between the Mitchell Freeway and residential areas, acting as a buffer, and encourage Main Roads WA to adopt the efficient use of land minimising the footprint of future infrastructure such as cycle paths and noise walls to preserve vegetation;</p>	<p>15/09/2023</p> <p>Report due 26/03/2024</p> <p>06/11/2023</p> <p>The City is progressing the investigation into the matter raised in the Notice of Motion and compiling information to inform a report to Council in 2024.</p>		
	Ordinary Meeting of Council	1.6	CJ133-08/22 - BRADEN PARK BASKETBALL FACILITY	On Hold	<p>Action from Minutes - Report Request - Council Meeting - 6 August 2022</p> <p>4 REQUESTS the Chief Executive Officer to investigate alternate age appropriate infrastructure for Braden park and report back to Council for its consideration if noise compliance as per Part 2 above cannot be achieved.</p>	<p>15/09/2023</p> <p>Report due TBA</p> <p>18/10/2023</p> <p>Report currently on hold pending the outcome of the proposed guidelines for community basketball facilities from DWER.</p>		
	Ordinary Meeting of Council	1.7	C150-12/22 - NOTICE OF MOTION NO.2 – CR CHRISTOPHER MAY – PEDESTRIAN ACCESSIBILITY	In Progress	<p>Action from Minutes - Report Request - Council – 13 December 2022</p> <p>MOTIONS OF WHICH PREVIOUS NOTICE HAS BEEN GIVEN</p> <p>C150-12/22 NOTICE OF MOTION NO.2 – CR CHRISTOPHER MAY – PEDESTRIAN ACCESSIBILITY</p> <p>That Council:</p>	<p>15/09/2023</p> <p>Report due 28/11/2023</p> <p>27/10/2023</p> <p>Report currently being prepared for Quarter 3 of 2023-24.</p> <p>30/04/2024</p>		

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
					<p>That Council REQUESTS the Chief Executive Officer to prepare a report on options to consider a Pedestrian Accessibility and Amenity Improvement Program within higher density areas, particularly infill (HOA) areas, considering the following:</p> <p>1 Missing footpath connections and pedestrian refuges on distributor roads leading to neighbourhood centres, parks, high frequency bus routes and other amenities;</p> <p>2 Footpath width in areas considered to have higher pedestrian usage – such as outside of major parks/sporting ovals, schools and neighbourhood centres;</p> <p>3 Analysis of what additional budgetary impact to prioritise additional footpath and pedestrian infrastructure within high density areas would have.</p>	Report rescheduled to Quarter 1 of 2024-25 due to resourcing requirements.		
	Ordinary Meeting of Council	1.9	C99-09/21 - NOTICE OF MOTION NO. 4 - CR HAMILTON-PRIME, JP - MICRO MOBILITY AND E-RIDEABLE USAGE WITHIN THE CITY OF JOONDALUP	In Progress	<p>Action from Minutes - Report Request - Council Meeting - 21 September 2021</p> <p>That Council REQUESTS the Chief Executive Officer:</p> <p>1 Prepare a report investigating the implementation of a trial for an e-scooter ride-sharing service with the City of Joondalup, partnering with a commercial operator/s to conduct e scooter services within designated areas and strategic locations;</p>	<p>15/09/2023</p> <p>Report due 28/11/2023</p> <p>30/11/2023</p> <p>Report to be prepared and proposed to Council in Q4 of 2023-24.</p>		
	Ordinary Meeting of Council	1.10	C17-03/21 - NOTICE OF MOTION NO.1 – CR THOMPSON – AGED AND DEPENDENT PERSONS' DWELLINGS	In Progress	<p>Action from Minutes - Report Request - Council Meeting - 16 March 2021</p> <p>That Council REQUESTS the Chief Executive Officer to prepare a report on the provision of aged and dependent persons' dwellings under clause 26 (3) of the City of Joondalup Local Planning Scheme No. 3 and specifically, what additional mechanisms may be available to ensure they are developed in locations appropriate for their intended occupants.</p>	<p>15/09/2023</p> <p>Report due 19/09/2023</p> <p>19/09/2023</p> <p>The matter is currently on hold pending the Department of Planning progress on the planning reform.</p> <p>24/11/2023</p> <p>Work has been undertaken to investigate options that may be available in response to the Notice of Motion and these were made available to Elected Members for comment in November 2022. It was then intended to further progress this work following the implementation of State Planning Policy 7.3 – Residential Design Codes Volume 1 to introduce a medium density code, which had been planned for 1 September 2023.</p> <p>In August 2023 the Minister for Planning announced a deferral on the implementation of the medium density code. Work will recommence following the release of further amendments to State Planning Policy 7.3 – Residential Design Codes Volume 1, currently anticipated to occur sometime in early 2024.</p> <p>22/01/2024</p> <p>The City is still awaiting the announcement in relation to further amendments to State Planning Policy 7.3 – Residential Design Codes Volume 1 and progression of changes to land use.</p> <p>19/03/2024</p> <p>Amendments to State Planning Policy 7.3 - Residential Design Codes were released by the State Government on 8 March 2024. It is envisaged a report on this matter will be presented to Council in late 2024.</p>	10/12/2024	
	Ordinary Meeting of Council	1.11	C66-06/23 Notice of Motion No. 1 - Cr Christopher May -	Completed	Action from Minutes - Actions - Council - 27 June 2023	<p>06/11/2023</p> <p>Report currently being prepared for Quarter 3 of 2023-24.</p>		

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
			Cyclist/Pedestrian Pathways Whitfords Avenue		<p>That Council:</p> <p>1 NOTES the lack of cyclist/pedestrian path infrastructure running parallel to Whitfords Avenue, eastbound between Whitfords East Park and Marmion Avenue;</p> <p>2 REQUESTS the Chief Executive Officer to prepare a report to Council on the construction of a Principal Shared Path running parallel to Whitfords Avenue, eastbound from Marmion Avenue/Whitfords East Park to Eddystone Avenue, Craigie, including appropriate crossings to connect to the existing path and Principal Shared Path network on the Padbury/westbound side of Whitfords Avenue, considering the following:</p> <p>2.1 Priority rating assessed against similar projects;</p> <p>2.2 Potential for State and/or Federal funding contributions;</p> <p>2.3 Report to include preliminary costs of construction of a Principal Shared Path including earthworks, any crossing/s and retaining wall/s;</p> <p>2.4 Any opportunities to cooperate with Main Roads WA and other stakeholders in delivery of this or similar</p>	<p>16/04/2024</p> <p>A report to Council in response to the Notice of Motion is to be considered by Council at its meeting scheduled for 23 April 2024.</p> <p>01/05/2024</p> <p>A report in response to the Notice of Motion was considered by Council at its meeting held on 23 April 2024 (CJ089-04/24 refers).</p>		
	Ordinary Meeting of Council	1.12	CJ100-06/23 Ocean Reef Artificial Surf Reef Pre-Feasibility Proposal	Completed	<p>Action from Minutes - Actions - Council - 27 June 2023</p> <p>That Council:</p> <p>2 SUPPORTS the development of a pre-feasibility assessment for an artificial surf reef between Mullaloo Point and the southern breakwater at the Ocean Reef Marina;</p> <p>3 LISTS FOR CONSIDERATION an amount of \$50,000 in the 2023-24 Budget for the pre -feasibility assessment as detailed in Part 2 above.</p>	<p>06/11/2023</p> <p>The next opportunity to list this project for consideration by Council will be at the 2023-24 Mid-Year Budget Review, scheduled for February 2024.</p> <p>Once the budget is approved by Council, the City will commence a procurement process which may include seeking quotes or a public tender process to engage the services of a consultant to undertake the works.</p> <p>07/03/2024</p> <p>An amount of \$50,000 for the pre -feasibility assessment has been incorporated in the 2023-24 Mid-Year Review Budget considered by Council at its meeting held on 27 February 2024.</p>		07/03/2024
	Ordinary Meeting of Council	1.15	CJ131-08/22 Review of Bulk Waste Services	Completed	<p>Action from Minutes - Actions - Council Meeting - 16 August 2022</p> <p>That Council:</p> <p>5 SUPPORTS the continuation of an on-request bulk hard waste collection service;</p> <p>6 REQUESTS the Chief Executive Officer to include the options for a loose collection or a containerised collection service in the next request for tender for the bulk hard waste collection service, noting that the decision on whether the on-request bulk hard waste collection service will be via a loose collection or via a containerised service will be made as part of the procurement process;</p> <p>7 SUPPORTS the introduction of an on-request bulk green waste collection service;</p> <p>8 NOTES that a decision on whether the on-request bulk green waste collection service will be via a loose collection or via a containerised service will be made as part of the procurement process;</p> <p>9 NOTES that the City will seek to align the collection service contracts for both bulk hard waste and bulk green waste.</p>	<p>06/11/2023</p> <p>The request for alignment of the Hard / Green bulk waste contracts in the report is noted. Both contracts are in extension and will expire 30 June 2024, to enable future contracts to be synchronised.</p> <p>The request for options to include both loose and containerised in the next bulk hard waste tender has also been noted and recorded.</p> <p>16/04/2024</p> <p>Tender for the bulk hard waste collection service and bulk green waste collection services considered by Council at its meeting scheduled for 23 April 2024.</p>	30/04/2024	23/04/2024

27/02/2024	27 February 2024 - Ordinary Meeting of Council - MINUTES ONLY	16.3	NOTICE OF MOTION NO. 3 – CR CHESTER – INSTALLATION OF ‘COCKITROUGH WATERING STATIONS’	Completed	<p>NOM 3</p> <p>OFFICER’S RECOMMENDATION / COUNCIL RESOLUTION (Resolution No: CJ029-02-24)</p> <p>MOVED Cr Chester, SECONDED Cr Hamilton-Prime that Council REQUESTS the Chief Executive Officer investigate the feasibility of installing elevated watering stations, away from busy roads and predators, for the benefit of our abundant birdlife. With a warming and drying climate, many bird species struggle in the extreme heat and this is particularly true of our threatened and endangered black cockatoos.</p> <p>The Motion was Put and CARRIED (13/0)</p> <p>In favour of the Motion: Mayor Jacob, Cr Chester, Cr Fishwick, Cr Hamilton-Prime, Cr Hill, Cr Hutton, Cr Jones, Cr Kingston, Cr May, Cr O'Neill, Cr Pizzey, Cr Raftis and Cr Vinciullo.</p> <p>Against the Motion: Nil.</p>	<p>04/04/2024</p> <p>The City is supportive of installing elevated watering stations for the benefit of the abundant birdlife within its borders, as shown by its application in September 2023 to the Department of Climate Change, Energy, the Environment and Water (DCCEEW) for a Saving Native Species grant for the installation of these stations within the City of Joondalup. The application to the Department included revegetation works to provide additional Black Cockatoo feeding habitat at Trigonometric Park and monitoring of existing artificial Black Cockatoo nesting tubes.</p> <p>The City identified two suitable locations being, one at Hepburn Conservation Area near the water fountain at the O'Leary Road entry and one at Craigie Bushland near the overflow carpark on the western side of the leisure centre.</p> <p>The City determined that the Cockitrough Bird Waterer (Bird Waterer) designed and supplied by the Town of Victoria Park would be a feasible solution to provide elevated watering stations for birdlife. The Bird Waterers are locally designed and manufactured on a non-for-profit basis, are simple and cost effective and are designed to blend into the natural landscape.</p> <p>Unfortunately, the City was unsuccessful with this grant application.</p> <p>The installation of elevated watering stations will be considered by Elected Members as part of the 2024-25 Capital Works Program budget development.</p> <p>The cost to install a Bird Waterer is estimated at \$20,000, subject to availability of water and other location specific requirements.</p> <p>16/04/2024</p> <p>The installation of elevated watering stations within natural areas across the City has been listed in the draft Five Year Capital Works Program for consideration by Elected Members under project FNM2096 - Elevated Watering Stations with an amount of \$25,000 listed for 2025-26, 2026-27 and 2027-28.</p>

			RESERVE, HILLARYS (WARD – SOUTH-WEST)					
26/03/2024	26 March 2024 - Ordinary Meeting of Council - MINUTES ONLY	12.3	47 SPORING WAY, HILLARYS - FOUR MULTIPLE DWELLINGS (WARD – SOUTH-WEST)	Completed	<p>MOVED Cr Pizzey, SECONDED Cr Kingston that Council APPROVES under Clause 68(2) of Schedule 2 of the <i>Planning and Development (Local Planning Schemes) Regulations 2015</i> the application for development approval dated 20 November 2023 submitted by Alpha Developments (WA) Pty Ltd, the applicant, for MULTIPLE DWELLINGS (four new dwellings) on Lot 179 (47), Sporing Way HILLARYS, subject to the following conditions:</p> <ol style="list-style-type: none"> 1 This approval relates to the multiple dwelling development (four multiple dwellings) and associated works only and development shall be in accordance with the approved plan(s), any other supporting information and conditions of approval. It does not relate to any other development on the lot; 2 All stormwater shall be collected on-site and disposed of in a manner acceptable to the City; 3 All development shall be contained within the property boundaries; 4 The car parking bays, driveways and/or access points/crossovers shown on the approved plans are to be designed, constructed, drained and marked in accordance with the <i>Australian Standards AS2890</i>, prior to the occupation of the development and thereafter maintained to the satisfaction of the City; 5 The designated on-site visitor bay shall be marked and permanently made available and accessible for visitor parking at all times. A Security and Access Management Plan detailing security gate operation, management of intercom controls, signage and other methods to direct and enable visitor access to private areas shall be submitted to the City for approval prior to occupation of the development, and shall be implemented in accordance with the approved plan; 6 The applicant shall remove the existing crossover and make good the verge to the satisfaction of the City, within 28 days of the completion of construction of the new crossover; 7 Two bicycle parking spaces shall be designed and installed in accordance with the <i>Australian Standard for Off-street Car parking – Bicycles (AS2890.3-1993)</i>, prior to occupation of the development and thereafter maintained to the satisfaction of the City; 8 The fencing infill panels within the street setback area indicated on the approved plans shall be visually permeable (as defined in the <i>Residential Design Codes</i>); 9 No solid walls, fences or other structures higher than 0.75 metres shall be constructed within 1.5 metres of where the driveway meets the street boundary; 10 A full schedule of colours and materials for all exterior parts to the building is to be submitted to and approved by the City prior to the commencement of development. Development shall be in accordance with 	<p>12/04/2024</p> <p>The City will advise the applicant of the Council's resolution.</p>		12/04/2024

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
					<p>the approved schedule and all external materials and finishes shall be maintained to a high standard, including being free of vandalism, to the satisfaction of the City;</p> <p>11 A detailed landscaping plan shall be submitted to and approved by the City prior to the commencement of development. The plan is to address the applicable element objectives of clause 4.12 of the <i>Residential Design Codes Volume 2 - Apartments</i>, and indicate the proposed landscaping treatment(s) of the subject site and the adjoining road verge(s), and shall:</p> <p>11.1 be drawn at an appropriate scale of either 1:100, 1:200 or 1:500;</p> <p>11.2 Include the provision of three small trees and two medium trees (including species) provided on-site in accordance with the requirements set out in table 3.3b of <i>State Planning Policy 7.3: Residential Design Codes Volume 2 – Apartments</i>;</p> <p>11.3 Show landscaping within the verge, including two new street trees to the specification of the City;</p> <p>11.4 provide plant species, mature height and spread, plant spacing, pot size and quantities and an irrigation design by a Certified Irrigation Designer;</p> <p>11.5 be based on water sensitive urban design and designing out crime principles;</p> <p>11.6 identify existing vegetation to be retained and information on the proposed manner in which this will be managed throughout construction;</p> <p>Landscaping shall be planted installed prior to occupation of the dwelling(s) and thereafter maintained in accordance with the approved plan, to the satisfaction of the City;</p> <p>12 Landscaping and reticulation shall be established in accordance with the approved landscaping plans, Australian Standards and best trade practice prior to the occupation of the development and thereafter maintained to the satisfaction;</p> <p>13 This approval permits the removal of one street tree located centrally within the Sporing Way road reserve. Any remaining street trees shall be maintained and protected to the satisfaction of the City;</p> <p>14 Lighting shall be installed along all driveways and pedestrian pathways and in all common service areas prior to the development first being occupied, to the satisfaction of the City. A lighting plan shall be submitted to the City for approval prior to the commencement of construction. The lighting design is to minimise light spillage onto the surrounding residential properties and be in accordance with the requirements of <i>Australian Standard AS4282</i>;</p> <p>15 All privacy screening as shown on the approved plans, including obscured glazing, shall be installed prior to the occupation of the dwelling and maintained to the satisfaction of the City. All screening shall be in accordance with clause 3.5 of the <i>Residential Design Codes Volume 2</i>;</p> <p>16 A Construction Management Plan shall be submitted to and approved by the City prior to the commencement of development. The management plan shall include details</p>			

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
					<p>regarding mitigation measures to address impacts associated with construction works and shall be prepared to the specification and satisfaction of the City. The construction works shall be undertaken in accordance with the approved Construction Management Plan;</p> <p>17 A Waste Management Plan indicating the method of rubbish collection and that collection is to be undertaken by the City is to be submitted prior to the commencement of development, and approved by the City prior to the development first being occupied and thereafter implemented to the satisfaction of the City;</p> <p>18 Acoustic treatments being provided to the habitable room windows to the western elevation of the ground floor (Unit 2) as indicated on the approved plans, prior to the occupation of the dwellings;</p> <p>19 Any proposed building plant and equipment, including air conditioning units, piping, ducting and water tanks shall be located so as to minimise any visual and noise impact on surrounding landowners screened from view from the street and, where practicable, from adjoining buildings. Details of building plant and equipment shall be submitted to and approved by the City prior to the commencement of development. Development shall be in accordance with these approved details;</p> <p>20 Prior to occupation of the dwellings, each dwelling shall be provided with an adequate area for clothes drying facilities that is screened from view from the street to the satisfaction of the City. Clothes drying is not permitted on balconies or in courtyards;</p> <p>21 Except on waste collection days, bins shall be stored in a location that is not located in a 'landscape area' or visible from the street, to the satisfaction of the City;</p> <p>22 Sustainability initiative(s) details in accordance with element 4.15 (Energy Efficiency) of Volume 2 <i>State Planning Policy 3.7 Residential Design Codes</i> are to be submitted to and approved by the City prior to commencement of development. The initiative(s) shall be incorporated into the development and implemented prior to occupation;</p> <p>23 A minimum of one dwelling shall be designed to meet Silver Level requirements as defined in the <i>Liveable Housing Design Guidelines</i> (Liveable Housing Australia). Details shall be submitted to and approved by the City prior to commencement of development, and works shall be undertaken in accordance with the approved details;</p> <p>24 Dwellings shall be individually metered for water usage;</p> <p>25 The development shall be fibre-to-premises ready, including the provision for installation of fibre throughout the site and to every dwelling;</p> <p>26 A minimum of one dwelling shall be designed to meet Silver Level requirements as defined in the <i>Liveable Housing Design Guidelines</i> (Liveable Housing Australia). Details shall be submitted to and approved by the City prior to commencement of development, and works shall be undertaken in accordance with the approved details.</p>			

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
					<p><u>Advice Notes</u></p> <p>1 Further to condition 1, the <i>State Planning Policy 7.3 Residential Design Codes</i> defines the following:</p> <p>"Multiple dwellings" as:</p> <p><i>'a dwelling in a group of more than one dwelling on a lot where any part of the plot ratio area of a dwelling is vertically above any part of the plot ratio of any other but:</i></p> <ul style="list-style-type: none"> <i>• does not include a grouped dwelling; and</i> <i>• includes any dwellings above the ground floor in a mixed use development'.</i> <p>2 The City encourages the applicant/owner to incorporate materials and colours to the external surface of the development, including roofing, that have low reflective characteristics to minimise potential glare from the development impacting the amenity of the adjoining or nearby neighbours.</p> <p>3 In regard to condition 4, the applicant is advised that the associated crossover (including crossover wings) is to be wholly contained within the verge directly adjacent to the subject site, and designed and constructed in accordance with the City's Crossover Guidelines.</p> <p>4 In regard to condition 8, the Residential Design Codes define visually permeable as:</p> <p><i>In reference to a wall, gate, door, screen or fence that the vertical surface when viewed directly from the street or other public space has:</i></p> <ul style="list-style-type: none"> <i>• continuous vertical or horizontal gaps of 50mm or greater width occupying not less than one third of the total surface area;</i> <i>• continuous vertical or horizontal gaps less than 50mm in width, occupying at least one half of the total surface area in aggregate; or</i> <i>• a surface offering equal or lesser obstruction to view.</i> <p>5 Any existing infrastructure/assets within the road reserve (e.g. footpath, kerbing and street trees) are to be retained and protected during construction of the development and are not to be removed or altered. Should any infrastructure or assets be damaged during the construction of the development, it is required to be reinstated to the satisfaction of the City.</p> <p>6 The <i>Construction Management Plan</i> shall be prepared using the City's <i>Construction Management Plan</i> template which can be provided upon request.</p> <p>7 Further to condition 11:</p> <ul style="list-style-type: none"> <i>• The Development in Housing Opportunity Areas Local Planning Policy</i> defines 'landscape area' as: <i>• "land developed with garden beds, shrubs and trees, or by the planting of lawns. Landscape area does not include</i> 			

Meeting Date	Document	Item No.	Item	Status	Action Required	Action Taken	Due Date	Completed (Overdue)
					<p>rockeries, ornamental ponds, swimming pools, driveways, uncovered car parking, bin areas, alfresco areas or other areas finished with a nonpermeable surface".</p> <ul style="list-style-type: none"> The trees required on-site are to be a minimum pot/bag size of 100 litres for the small trees and 200 litres for the medium trees and preferably native species which is appropriate for the soil and climate conditions of the area. The City's Preferred Tree Species List can be found on the City's website for further guidance: joondalup.wa.gov.au. Verge treatments are to comply with Housing Opportunity Area requirements outlined in the City's <i>Street Verge Guidelines</i>. A copy of the Guidelines can be obtained at https://www.joondalup.wa.gov.au/verge-treatments/. In accordance with the Street Verge Guidelines, no additional hardstand areas (including synthetic turf) are permitted exclusive of the proposed footpaths and crossovers. The detailed design for the street tree shall indicate two (2) tree preparation zones within the verge and nominate one of the following tree species: <ul style="list-style-type: none"> Eucalyptus torquata (Coral Gum) Tridradica sebiferum (Chinese Tallow) Callistemon KPS (Bottlebrush) Planting of trees abutting service infrastructure may require approval from the relevant agency and should be taken into consideration when selecting species. 			
		8	In regard to condition 11, the two existing trees proposed to be retained onsite (towards the rear of the property) are to be protected during construction to avoid damaging or removal of the trees. Should the trees not survive, replacement trees of a similar size at maturity will need to be planted onsite (and thereafter maintained) by the landowners to ensure compliance with this condition of development approval.					
		9	In regard to condition 13 the applicant should contact the City's Work Operations Centre on 9400 4000 to arrange for the removal of the existing verge tree.					
		10	In relation to condition 15, the Residential Design Codes require screening to be at least 1.6 metres in height above the finished floor level of the dwelling and balconies, at least 75% obscure, made of a durable material and restrict view in the direction of overlooking into any adjoining property. The Residential Design Codes define screening as: <i>"Permanently fixed external perforated panels or trellises composed of solid or obscured translucent panels".</i>					
		11	This approval does not include the dividing fence(s). You are advised that in accordance with the <i>Dividing Fences Act 1961</i> you are required to reach agreement with the

9 CHIEF EXECUTIVE OFFICER REPORTS
--

9.1	FINANCIAL STATEMENT FOR THE PERIOD ENDED 29 FEBRUARY 2024
Reference:	GF-23-000000019
Appendix(s):	Attachment 1
Date:	12 March 2024
Responsible Officer:	Executive Manager Corporate Services

SUMMARY

The purpose of this report is to provide Council with a set of financial reports in line with statutory requirements, which provides information on the financial performance of the Mindarie Regional Council (MRC).

BACKGROUND

Financial Management Regulations 34 of the Local Government (Financial Management) Regulations 1996 defines reporting requirements.

The financial statements presented for each month consist of:

- Statement by Comprehensive Income by Nature and Type
- Operating Income Statement by Program
- Statement of Financial Position
- Statement of Cashflows
- Statement of Financial Activity
- Statement of Reserves
- Statement of Investing Activity
- Cash and Cash Equivalents and Schedule of Investments
- Tonnage Report

DETAIL

The attached reports provide an overview of the MRC's financial performance for the period ending 29 February 2024, and have been prepared in accordance with the Local Government Act 1995, the Local Government (Financial Management) Regulations 1996 and the Australian Accounting Standards. The report fairly represent, in all material respects, the results of the MRC's operations for the month being reported.

The Financial Report for the period ended 29 February 2024 is attached at **Attachment 1** to this Item. The Schedule of Investments and Tonnage Report up to 29 February 2024 are also contained within the Attachment 1.

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

Summary of results for the year to date period ended 29 February 2024

	YTD Budget	YTD Actual	Variance
	t	t	t
Tonnes – Members	118,355	119,123	770
Tonnes – Others	19,048	16,582	(2,466)
TOTAL TONNES	137,403	135,705	(1,696)
	\$	\$	\$
Revenue – Fees & Charges	21,933,449	21,891,245	(42,204)
Revenue – Other	4,372,062	5,122,507	750,445
TOTAL REVENUE	26,305,511	27,013,752	708,241
Expenses	(22,341,994)	(21,726,459)	615,535
Net profit	3,963,517	5,287,293	1,323,776
Net profit on sales of assets	1,000	287,682	286,682
NET SURPLUS	3,964,517	5,574,975	1,610,458

Variances Year to Date

Mindarie Regional Council's financial result for the period ending 29 February 2024 reflects its performance from 1 July 2023 to 29 February 2024. Council's operations have been conducted in line with the adopted budget. As per the MRC's 2023/2024 budget approved at the OCM 13 July 2023 and in line with materiality adopted by the Council, variances below \$50k do not attract comments.

MRC recorded net profit of \$5.6m for the period ended 29 February 2024 against a budgeted profit of \$3.9m resulting in a favourable variance of 41% or \$1.6m.

This overall positive position came as a result of interest earning, materials and contracts, insurance, other expenses and profit on sale of assets.

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

REVENUE

User Charges

Total actual tonnage is aligned closely to budget year to date. Actual tonnage of 119,122 tonnes is slightly higher than the tonnage at the same time last year of 117,231 tonnes.

Casual and Trade revenue continue to show a negative variance of \$188k resulting from 2,466 less tonnage delivered to date. This is a permanent variance and addressed at mid-year budget review.

Interest Earnings

Interest earning continues to outperform current budget. Period ended 29 February 2024 closed at \$715k higher than budgeted, which is mainly attributed to raising RBA interest rate. The RBA cash rate has moved from 4.10% to 4.35%. Expected weighted average interest rate of the current investment portfolio is 5.04%. As term deposits mature, MRC has and will continue to secure improved rates on new term deposits, improving interest returns.

Profit on sale of asset

A positive variance of \$287k, which is a direct result of profit arising from disposal of assets for the period up to 29 February 2024.

EXPENDITURE

Materials and Contracts

Materials and Contracts expenditure shows a positive variance of \$419k compared to the budget.

This variance is driven by a combination of several factors, lower-than-anticipated costs in DWER landfill levy (\$247k lower) being the major reason. DWER landfill levy is payable to the Department of Water and Environment Regulation and has a direct relationship to tonnage collected.

Utilities

Utilities recorded a positive variance of \$81k due to the fact that Synergy incorrectly recorded lower consumption and invoiced lower fees. Synergy is expected to rectify this error in March 2024.

Insurance

Insurance expenses performed \$65k better than budget year to date. This position is a result of lower property insurance and public liability insurance, \$42k and 26k respectively.

Other expenses

Other expenses are \$98k lower than budgeted reflecting Elected Members expenses timing variance of \$71k.

STATEMENT OF FINANCIAL POSITION

End of February 2024 the MRC's cash position is solid due to collection of fees and charges and positive earnings from the investments. Capital expenditure timing and increases to the RBA rate have improved both the rate of investments and the amount reinvested.

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

Current Liabilities

Current Liabilities as of 29 February 2024 is \$1m higher compared to the previous month. Trade payables (Mainly DWER levy payable) contributed towards this increase.

Capital Expenditure

Leachate treatment project continues to progress with a further \$122k movement since the last reporting period.

Reserve Accounts

Increase in the reserve accounts for the period ended 29 February 2024 is \$1.95m. This reflects the proportionate transfers to reserves including interest earned on the investments.

STATUTORY IMPLICATIONS

Section 6.4 of the Local Government Act 1995 and regulation 34(1) of the Local Government (Financial Management) Regulations 1996.

VOTING REQUIREMENT

Simple Majority

RESPONSIBLE OFFICER RECOMMENDATION

That Council:

Receive the Financial Statements set out in Attachment 1 for the month ended 29 February 2024.

Moved Cr Gobbert, seconded Cr Creado

RESOLVED

That the recommendation be adopted

(CARRIED UNANIMOUSLY 9/0)

Where possible give preference to institutions that do not finance the fossil fuel industry and consider ethical, social and environmental aspects.

As of February 2024, MRC's interest earnings are \$715k above budget year-to-date. In February 2024, the Reserve Bank held the cash rate at 4.35%

As of February 29, 2024, MRC's total cash and investments amounted to \$71.7 million. \$47.6 million was invested in term deposits and \$15.8m invested in the CBA saver account. It should be noted that MRC had its ESG term deposits with CBA who have withdrawn those products in December as MRC ESG term deposit matured. MRC is looking for replacements with other financial institutions.

4.0 Tonnage Report for the period ended 29 February 2024

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

9.2 LIST OF ACCOUNTS PAID – FOR THE PERIOD ENDED 29 FEBRUARY 2024	
File No:	GF-23-000019
Appendix(s):	Attachment 1
Date:	12 MARCH 2024
Responsible Officer:	Executive Manager Corporate Services

SUMMARY

The purpose of these reports is to provide details of payments made during the period identified above. This is in line with the requirement under the delegated authority to the Chief Executive Officer (CEO), that a list of payments made from the Municipal Fund since the last Ordinary Council meeting be presented to Council.

DETAILS

In accordance with section 13(1) of the Local Government Financial Management Regulations 1996, Council has delegated to the Chief Executive Officer (CEO) the exercise of its power to make payments from its Municipal and Trust Funds. A list of accounts paid by the CEO is to be prepared each month (Fin Reg 13(2)) and be presented to the next Ordinary Council Meeting following such payments (Fin Reg 13(3)). The lists of accounts paid for the month ended 29 February 2024 are attached at Appendix 2 to this Item.

A new regulation 13A has been added to the Local Government Financial Management Regulations 1996 to increase transparency and accountability in local government through greater oversight of incidental spending. Regulation covers purchasing cards such as Bunnings and Fuel cards issued by local government to their employees. Under the new regulation, a transaction listing is included for the MRC's fuel cards and Bunnings Power Pass cards.

Month Ended	Account	Vouchers	Amount
29 February 2024	General Municipal	Cheques	\$610.00
		EFT	\$881,414.18
		DP	\$489,418.69
		Inter account transfers	-
		Total	\$1,371,442.87

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

9.3	ADOPTION OF 2023 COMPLIANCE AUDIT RETURN
File No:	GF-23-0000142
Appendix(s):	Attachment 1 Compliance Audit Return
Date:	11 March 2023
Responsible Officer:	Chief Executive Officer

SUMMARY

The purpose of this report is to provide Council with information on the completed Compliance Audit Return (1 January 2023 – 31 December 2023).

BACKGROUND

The Compliance Audit Return was placed on the agenda for the Audit and Risk Committee meeting held on 06 March 2024.

The Audit and Risk Committee considered the Return and resolved the following:

That the Audit and Risk Committee recommends that Council endorse the Compliance Audit return for the 2023 calendar year, as presented.

Moved Cr Ferrante, seconded Cr Hatton

RESOLVED

That the recommendation be adopted.

(CARRIED UNANIMOUSLY 3/0)

For: Crs Hatton, Ferrante and Mr Kumar

Against: Nil

The 2022 Local Government Compliance Audit Return (CAR) covers the calendar year from 1 January to 31 December 2023.

The Return should be lodged with the Department of Local Government before 31st March, 2024

The 2023 Compliance Audit Return is mandatory pursuant to the *Local Government (Audit) Regulations 1996* which requires all local governments to complete a Compliance Audit Return annually.

Local governments not only have to explain or qualify cases of non-compliance, but also provide details of any remedial action taken or proposed to be taken in regard to instances of non-compliance. The Administration has completed the Return.

DETAIL

The Compliance Audit covers a range of matters that require specific actions to be completed by Local Government authorities in performing their functions.

The Compliance Audit Return requires the responsible officer to indicate against each item whether the required action is relevant to Mindarie Regional Council (MRC) and if it has been completed by either answering;

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

- (a) Yes; or
- (b) No; or
- (c) N/A – Not applicable

Local Governments are required to provide feedback or comments on areas of non-compliance. This assists the Department of Local Government to have a better understanding of any problems or issues relating to a Local Government's inability to achieve full compliance in a particular area.

The Compliance Audit Return for calendar year 2023 is at **Attachment 1**.

The Local Government is to submit the Compliance Audit Return to its Audit and Risk Committee for consideration so that it has the opportunity to examine the Return and report to council the results of that review.

A joint certification is also required to be completed by the Chairperson and Chief Executive Officer to the effect that the information contained in the Return is true and correct to the best of their knowledge. Several other requirements must be met in the Return process and these include: -

- The particulars of all matters of concern raised by Council should be recorded in the minutes of the meeting and a copy of the relevant page(s) attached to the Compliance Audit Return as an appendix; and
- The completed Compliance Audit Return and appendices should be forwarded to the Director General of the Department of Local Government by 31 March 2024.

The Section dealing with the Joint Certification by the Chairperson and Chief Executive Officer requires inter alia that:

- each Councillor has had the opportunity to review the return and to make comment to the Council;
- particulars of any matters of concern relating to the return have been recorded in the minutes of the meeting; and
- a true and correct copy of the relevant sections of the minutes covering Council's consideration of the return must be attached to it.

CONSULTATION

Nil

STATUTORY ENVIRONMENT

Regional Councils are required to carry out a Return in accordance with the Local Government (Audit) Regulations 1996. The requirements set for the Return are contained in s.14 and 15 of the Regulations, which read as follows:

"14. Compliance audits by local governments

- (1) *A local government is to carry out a compliance audit for the period 1 January to 31 December in each year.*
-

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

- (2) *After carrying out a compliance audit the local government is to prepare a compliance audit return in a form approved by the Minister.*
- (3A) *The local government's audit committee is to review the compliance audit return and is to report to the council the results of that review.*
- (3) *After the audit committee has reported to the council under sub regulation (3A), the compliance audit return is to be —*
 - (a) *presented to the council at a meeting of the council; and*
 - (b) *adopted by the council; and*
 - (c) *recorded in the minutes of the meeting at which it is adopted.*

15. *Certified copy of compliance audit return and other documents to be given to Departmental CEO*

- (1) *After the compliance audit return has been presented to the council in accordance with regulation 14(3) a certified copy of the return together with —*
 - (a) *a copy of the relevant section of the minutes referred to in regulation 14(3)(c); and*
 - (b) *any additional information explaining or qualifying the compliance audit,**is to be submitted to the Departmental CEO by 31 March next following the period to which the return relates.*
- (2) *In this regulation —*

certified *in relation to a compliance audit return means signed by —*

 - (a) *the mayor or president; and*
 - (b) *the CEO.*

POLICY IMPLICATIONS

Nil

FINANCIAL IMPLICATIONS

Nil

STRATEGIC IMPLICATIONS

Nil

COMMENT

In order to comply with Regulations 14 and 15 of the *Local Government (Audit) Regulations 1996* it is necessary for the MRC to complete the Local Government Compliance Audit Return in the form approved by the Minister.

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

The results contained in the Compliance Audit Return required by the Department of Local Government for the period 1 January to 31 December 2023 indicates that the Council is continuing to operate within the Local Government Legislative requirements.

The Audit and Risk Committee, at its meeting held on 06 March 2024, recommended that the Council adopts the Compliance Audit Return.

It is recommended that the Return be adopted by the Council and that the component comprising the form approved by the Minister be certified by the Chairperson and Chief Executive Officer and be forwarded to the Director General, Department of Local Government.

VOTING REQUIREMENT

Simple Majority

Cr Vernon entered the Chambers at 6.39 pm

RESPONSIBLE OFFICER RECOMMENDATION

That Council:

1. **adopt the Local Government Compliance Audit Return in the form approved by the Minister for the period 1 January to 31 December 2023 as contained within the Attachment in accordance with the provisions of *Regulation 14(3) of the Local Government (Audit) Regulations 1996* and in line with the recommendation from the Audit and Risk Committee;**
2. **authorise the Chairperson and the Chief Executive Officer to complete the Joint Certification contained in the adopted Return detailed in (1) above; and**
3. **authorise the Chief Executive Officer to submit the adopted Return detailed in (1) to the Director General, Department of Local Government.**

Moved Cr Hatton, seconded Cr Ferrante

RESOLVED

That the recommendation be adopted

(CARRIED UNANIMOUSLY 11/0)

9.4	MINDARIE REGIONAL COUNCIL INTERNAL AUDIT FUNCTION
File No:	GF-23-0000142
Appendix(s):	Nil
Date:	12 March 2023
Responsible Officer:	Chief Executive Officer

SUMMARY

The purpose of this report is to advise Council of the proposal to extend the internal audit function.

The proposal was placed on the Agenda for the Audit and Risk Committee meeting held on 06 March 2024.

The Committee considered the proposal and resolved the following:

That the Audit and Risk committee recommends to Council:

That Council:

- 1. Endorse the CEO's proposed internal audit function for Mindarie Regional Council.*
- 2. Request the CEO to provide a further report detailing the three-year work plan that will be the basis of a contract for the Internal Audit service.*

Moved Cr Hatton, Seconded Cr Ferrante

RESOLVED

That the recommendation be adopted

(CARRIED UNANIMOUSLY 3/0)

For: Crs Hatton, Ferrante and Mr Kumar

Against: Nil

BACKGROUND

The WA Auditor General recognises that there are four lines of defence which underpin a strong governance framework. Internal audit is the third line of defence; see below:

- First line of defence – internal controls, policies, procedures, information systems and culture and ethics
- Second line of defence – Internal oversight, monitoring and reporting, risk management and compliance, financial reporting and certification
- Third line of defence – Internal Audit CEO financial and non-financial reviews
- Fourth line of defence – Auditor General external audits

The Local Government (Audit) Regulations 1996 regulation 17 (Audit Regulation 17) requires the CEO to undertake a review of the appropriateness and effectiveness of systems and procedures in relation to risk management, internal control and legislative compliance once in every 3 years and report to the audit committee the result of that review. The last review was undertaken in February 2024 by an external consultant, Civic Legal.

In addition, the Local Government (Financial Management) Regulations 1996, regulation 5 (FM Regulation 5) requires the CEO to undertake a review of the appropriateness and effectiveness

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

of the financial management systems and procedures regularly (and not less than once in every three financial years) and report to the local government the results of that review. The last review was undertaken in May 2021 and a review has been scheduled for March 2024 by an external consultant, Macri Partners.

The four lines of defence model assists local governments to understand if there are any gaps in assurance activities that manage key risks or whether there is a duplication of effort, this helps inform the internal audit program, improve efficiencies and assists the Audit and Risk Committee and Council in their oversight responsibilities.

The MRC propose integrating and expanding the existing Internal Audit function of FM Regulation 5 and Audit Regulation 17 to provide a 3 year plan, of independent and objective assurance provided by external consultants, to achieve a continuous audit cycle that is regularly reviewed.

Local governments can use different models for their internal audit services; these can be in-house, co-sourced or fully outsourced. Establishing an in-house audit department is unlikely due to the relatively small size of the MRC, therefore the engagement of internal audit services from an experienced, qualified and reputed accounting professional firm in Western Australia is sought.

The three-year plan will be developed following an analysis of FM Reg 5 and Audit Reg 17 audits and identifying the higher order risks within the risk register. The development of a three-year plan provides assurance that key risks are identified and controlled effectively.

Through this initiative, the MRC seeks to establish a robust internal audit framework that aligns with its commitment to transparency and accountability to provide a richer understanding of financial management, compliance, risk management and internal controls.

The business improvements that result from an effective internal audit function will ultimately add value to the way the MRC runs its business.

This report, in the first instance seeks to gain in principle support for integrating and extending the internal audit function on a three-year rolling plan.

DETAIL

The internal audit function is independent from operational functions, systems and processes.

To be most effective the function must be free from management control that may adversely impact on this independence and the auditing and reporting function.

For local government, responsibility for the internal audit function rests with the CEO, who also reports to the Audit and Risk committee and Council.

The internal audit function will report directly to the CEO to eliminate undue influence on audit activities, findings and reporting. It is good practice for the internal auditor to also have a direct line of communication to the audit and risk committee (a functional reporting relationship). Through the scope, it is proposed that the external auditor will have the ability to liaise directly with the Chair of the Audit and Risk Committee to discuss reports included in Committee agendas, and will be able to communicate with the wider Committee through attendance at Committee meetings.

The Local Government (Financial Management) Regulations 1996 prohibits an employee, to whom responsibility for the day-to-day accounting or financial management operations of a local government is delegated, to also be delegated the responsibility for conducting an internal audit.

The use of independent internal audit provides the following important benefits to the MRC:

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

- Independent assurance for management, Council and the Office of the Auditor General that internal controls in place are working effectively.
- Provision of advisory information on areas that may need further strengthening.
- Independent review of the efficiency and effectiveness of financial and non-financial controls
- Independent review the MRC's compliance with legislative requirements.

The objectives of the internal audit function are to ensure that MRC attains:

- **Increased Operational Efficiency:** Regular internal audits can identify inefficiencies in processes and recommend improvements, leading to cost savings and resource optimisation.
- **Strengthened Compliance:** Internal audit ensures compliance with applicable laws, regulations, and policies, reducing the likelihood of legal and regulatory penalties. Further, demonstrating a commitment to compliance fosters stakeholders' trust and confidence.
- **Improved Financial Accountability:** Internal audit ensures that financial transactions are conducted in accordance with established policies and procedures, minimising the risk of mismanagement or fraud. By regularly reviewing financial records and internal controls, we can identify and rectify potential issues before they escalate, ensuring the responsible use of public funds.
- **Enhanced Risk Management:** Internal audit helps identify and assess risks associated with various operations, allowing proactive measures to mitigate these risks.
- **Accountability and Transparency:** Internal audit provides an independent and objective evaluation of effective design of internal controls activities, promoting transparency and accountability.
- **Continuous Improvement:** Internal audit fosters a culture of continuous improvement by providing constructive feedback and recommendations for better governance.

Process

The CEO will present to the Audit and Risk Committee, with a subsequent recommendation to Council, a three year internal audit plan which sets out the recommended scope of the internal audit for the period.

The CEO is responsible for the contract management and facilitating the audit and ensuring that staff and resources are available to implement and monitor Internal Audit recommendations.

Reporting and Communication

The internal auditor will provide the CEO with comprehensive audited reports detailing their key observations and findings.

The CEO will provide the reports and a recommended action plan to the Audit and Risk Committee.

The Audit and Risk Committee will receive the reports of the Internal Auditor, consider the CEOs recommendations arising from the reports, and monitor the implementation of agreed recommendations, making recommendations to Council.

Contractual Term

Contract terms will be considered and further advice provided to ensure flexibility in the term of appointment to ensure contract performance can be monitored and managed.

9.5 CORPORATE BUSINESS PLAN PERIODICAL REPORTING	
File No:	GF-23-0000310
Attachment (s)	Nil
Date:	29 February 2024
Responsible Officer:	Chief Executive Officer

PURPOSE

The purpose of this report is to provide Council a periodical reporting overview of the Corporate Business Plan performance, for endorsement.

The Corporate Business Plan progress report was placed on the Agenda for the Audit and Risk Committee meeting held on 06 March 2024.

The Committee considered the report and resolved the following:

*That the Audit and Risk Committee recommends that Council:
Endorse the Corporate Business Plan progress report, as presented.
Moved Cr Kumar, seconded Cr Hatton
RESOLVED
That the recommendation be adopted
(CARRIED UNANIMOUSLY 3/0)
For: Crs Hatton, Ferrante and Mr Kumar
Against: Nil*

The report provides information on achievements and performance against the milestones outlined in the MRC's 4-year Corporate Business Plan 2023-2027 (CBP). The CBP is the MRC's medium-term planning document which contains the services, projects and activities which have been developed in response to the Vision, Mission and Objectives of the organisation's 10-year Strategic Community Plan 2023-2032.

BACKGROUND

The MRC's CBP 2023-2027 (CBP) was adopted by Council at its meeting on 22 June 2023. The CBP is required to be reviewed every four years under the requirements of the *Local Government (Administration) Regulations 1996*.

On 27 April 2023 Council adopted the Strategic Community Plan 2023-2032 (SCP) providing the MRC with its long term strategy which informed the CBP together with the informing plans: Long Term Financial Plan, Asset Management Plan and Workforce Plan.

The CBP Strategic Objective 3.1.2, Ensure compliance with all legislative probity and regulatory requirements, requires the introduction of CBP periodical reporting to the Audit and Risk Committee.

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

DETAIL

The MRC Leadership Team completed a periodical review of the CBP at a meeting held on 30 January 2024. This review tracks the status of individual key actions to ensure activities are in progress to meet the planned timeframes.

Performance is ranked using the following coloured traffic lights status:

Completed	Action completed, with no further action required.
In progress – on track	Action commenced and on track to be completed within timeframe.
In progress – belated	Action commenced and belated, risk of not meeting timeframe.
Not Commenced	Action due not commenced, risk of not meeting timeframe.
Scheduled 2024/25	Action not due in the reporting period.

28 March 2024

1.5.3 Allocate budget to address implementation plan						
Deliver environmental sustainable recommendations endorsed by Council	Scheduled 2024/25			√	√	Business case under development 24/25 budget.
2.1 Identify and access infrastructure for the resource recovery of member councils' materials in alignment with the state waste strategy						
2.1.1 Assess processing facilities within the district for the following streams (FOGO, Residual Waste, and Commingled Recyclables)						
Research and identify alternative waste processing opportunities within the district (FOGO)	In progress - on track	√	√			FOGO on track, tender released closing March 2024. Evaluation Quarter 4.
Research and identify alternative waste processing opportunities within the district (District Residual WtE Solution)	In progress - belated	√	√			WtE preferred tenderer nominated, contract negotiations on going for completion Quarter 4.
Research and identify alternative waste processing opportunities within the district (District Commingled Recyclables)	Scheduled 2024/25			√	√	
2.1.2 Deliver opportunities above, as resolved by Council						
Deliver recommendations endorsed by Council	Scheduled 2024/25		√	√	√	Pending above outcomes FOGO, WtE
Key Actions	Status	Planned Actions				Comments
		23/24	24/25	25/26	26/27	
						Review completed 30 January 2024
2.2 Build the circular economy within the district						
2.2.1 Investigate potential and feasibility of other revenue generating resource recovery facilities within the district (Tamala Park, MRC Neerabup site, etc.)						
Develop a waste resource flow model for MRC and its member councils	Scheduled 2024/25		√	√		Business case under development 24/25 budget. Waste Audit considered Quarter 4 / Quarter 1 2025

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

Develop Circular Economy Options Report for Tamala Park	Scheduled 2024/25		√	√		Business case under development 24/25 budget
Develop Circular Economy Options Report for Neerabup Site	Scheduled 2024/25		√	√		Business case under development 24/25 budget
Develop a Circular Economy Master Plan	Scheduled 2024/25			√		Business case under development 24/25 Budget
2.2.2 Deliver opportunities above, as resolved by Council						
Deliver circular economy Master Plan as endorsed by Council	Scheduled 2024/25			√	√	Pending above
2.2.3 MRC to advocate for the establishment of a circular economy						
Support the member Councils advocacy for their circular economy objectives through digital platforms	In progress - on track	√	√	√	√	Review of communication and media presence commenced, included in the Midyear budget review
2.2.4 Collaborate with external stakeholders including federal and state government, private sector, and not-for-profit sector						
Utilise CEO forums to actively participate in the circular economy establishment within the wider industry	In progress - on track	√	√	√	√	LG Professionals & CEO connections forums. CEO attends WALGA Regional Council Working Group with all other Perth and Peel Regional Council CEOs.
2.3 Maximise use of MRC's assets and technical capabilities						
2.3.1 Future options appraisal of the Tamala Park site						
Develop Future Use Feasibility Study for Tamala Park	In progress - on track	√	√			Void space model completed, Critical Infrastructure Plan (CIP) 50%, service review underway.

Review of MRC Services and desired outcomes	Not commenced	√	√	√	√	Discussions to commence Councillor Workshop Feb 24.
Review of previous Draft Establishment Agreement with consideration given to a regional authority model						
Develop New Establishment Agreement for Council endorsement	Scheduled 2024/25		√	√		
3.3.2 Explore opportunities for alternative revenue generation and return to members						
Based on endorsed circular economy / commercial opportunities, maintaining positive unrestricted cash and investment balance	Not commenced	√	√	√	√	Planning commenced with purchase of shredder in consideration budget 24/25
Key Actions	Status	Planned Actions				Comments
		23/24	24/25	25/26	26/27	
3.3.3 Promote and support greener supply chains						
Review and deliver procurement processes that support sustainable procurement objectives	In progress - on track	√	√	√	√	Updated policy to include more sustainable procurement activity. Implemented issues register to monitor performance of contracts with a KPI for greener supply chains. Update to the vehicle policy includes the consideration for electric vehicles.

STATUTORY ENVIRONMENT

The SCP is a requirement of the Local Government Act 1995 and the Local Government (Administration) Regulations 1996

POLICY IMPLICATIONS

Nil

FINANCIAL IMPLICATIONS

The CBP 2023-2027 details the services, projects and capital programs to be delivered, and is informed by the Long Term Financial Plan and annual budgets covering the period of the plan.

STRATEGIC IMPLICATIONS

Strategic Community Plan:

Objective 3.1 Maintain efficient and equitable governance

3.1.2 Ensure compliance with all legislative, probity, and regulatory requirements

- Introduce Corporate Business Plan periodical reporting to the Audit and Risk Committee

COMMENT

During the Audit and Risk Committee meeting held on 06 March 2024, the Committee noted that there was an opportunity to review the Corporate Business Plan reporting methodology to gain greater clarity on progress against individual targets. Administration will investigate reporting methodology prior to the next scheduled review.

OFFICER AND AUDIT AND RISK COMMITTEE RECOMMENDATION

That Council endorse the Corporate Business Plan progress report, as presented.

Moved Cr Wright, seconded Cr Hatton

RESOLVED

That the recommendation be adopted

(CARRIED UNANIMOUSLY 11/0)

For: Crs Castle, Creado, Ferrante, Gobbert, Hatton, Jacob, Mack, Miles, Proud, Vernon and Wright

File No:	GF-22-0000442
Appendix(s):	Nil
Date:	12 March 2024
Responsible Officer:	Executive Manager Operations

SUMMARY

This report aims to present a concise overview of the strategic workshop session on the Critical Infrastructure Plan (CIP) conducted with the Mindarie Regional Council (MRC) on February 29, 2024.

BACKGROUND

The MRC's Tamala Park Landfill cells are likely to reach capacity within the term of the current Strategic Community Plan, which will significantly affect the current landfill operations across the Tamala Park Waste Management Facility (TPWMF). As a result, the MRC is currently involved in a forward planning exercise to determine what decisions and steps are necessary to determine how the TPWMF operates now and into the future.

One of the Planned Actions outlined in the MRC's Corporate Business Plan (CBP) is the development of a Tamala Park Master Plan within the 2023/24 financial year. The Master Plan is a strategic document designed to outline future goals for site assets utilisation and to inform Council of future land use planning choices.

During the recent strategic workshop, Council acknowledged the significance of establishing a distinct strategy for the future advancement of infrastructure situated at Tamala Park

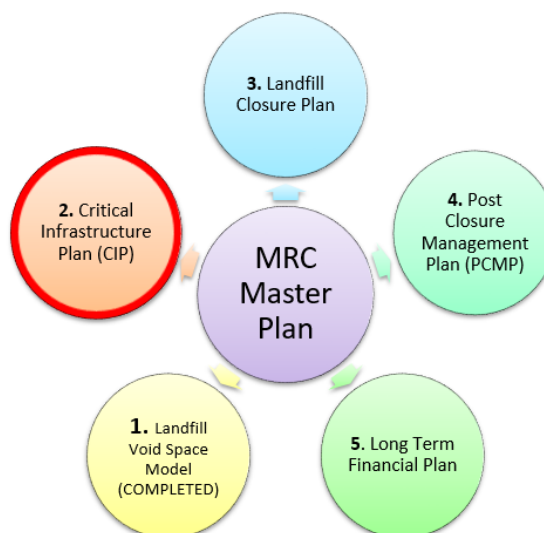

A number of key pieces of infrastructure were discussed with Council during the workshop session which the Administration sought feedback upon, to better inform how best to move forward with future planning. Discussion on these points with Council highlighted that the potential exists for substantial capital to be deployed in the near future to meet the MRC's and Member Councils' needs.

DETAIL

The foundation of a Master Plan lies in comprehending the significance of waste disposal assurance for the local economy and the environmental consequences of rehabilitating a landfill site. Hence, it is crucial to have a thorough comprehension of the development, execution, and management of the Tamala Park Landfill infrastructure.

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

The Tamala Park Master Plan has five separate phases, as illustrated in the diagram below:

Master Plan Development Process

The initial phase of the program entails creating a model of the void area in a landfill (referred to as Item #1 in the above diagram). The landfill void space model is utilised to forecast the point at which the landfill airspace and cover material in Tamala Park will be exhausted. The Landfill Void Space model is influenced by numerous elements, with the potential for a future Waste to Energy contract being the most significant consideration. Negotiations are currently in progress with a preferred tenderer and representatives from all member councils are well informed. The details of any future WTE contract are likely to define the rates at which landfill airspace will be consumed in the future.

The second stage in the development of the Master Plan involves completing a Critical Infrastructure Plan (CIP), which was the subject of the recent strategic workshop and which the Administration proposes be brought before Council for endorsement when complete.

Endorsement, if received, will allow the administration to proceed with the next step in the sequence, which is the development of the Landfill Closure Plan. Following this step, the Post Closure Management Plan (PCMP) outlines the specific assets, infrastructure, and services after the closing of the landfill. The last element of the Master Plan is the impact of all of the variables highlighted in the previously steps and any changes required to the MRC's Asset Management Plan and Long Term Financial Plan.

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

Critical Infrastructure Plan Development

The infrastructure on site plays a crucial role in planning of the following essential functions of Tamala Park:

- MRC Services to Community and Local Economy
- Leachate Management
- Landfill Gas Management
- Waste Volume Intake and Processing Capabilities
- MRC Services to Member Councils
- Landfill Licence Compliance (DWER)
- MRC Administrative Functions
- Landfill Cover Material Management
- Site Rehabilitation
- Tamala Park Future Use Options

An evaluation of the existing site uses, including their location and layout, has been conducted in order to produce the CIP. Metrics considered throughout the assessment process were:

- Infrastructure Effectiveness
- Infrastructure Location
- Infrastructure Useful life
- Asset Renewal/ Upgrade
- Service Delivery Requirements
- Regulatory Requirements
- Legislative requirements
- Upkeep Costs
- Social Impact
- Environmental Impact
- Legal Requirements

The assessment's findings helps to determine the prospective locations and spatial needs for future use at the site. A significant number of the site's 17 assets were built or acquired during the 1990s, well in advance of any future planning for landfill closure. Some of these assets are now inappropriately positioned, in terms of current operations and their ability to contribute value future operations.

The Administration has evaluated all Assets and Infrastructure using the same criteria and ranked them in order of their level of importance, ranging from Critical to Negligible. The following 6 items were classified as high risk and necessitated a discussion with Council at the recent strategic workshop:

1. Leachate Processing Infrastructure
 2. Transfer Station Requirements, Post-Closure
 3. Location of Workshop and Crib Rooms
 4. Reuse Shop Requirements, Post-Closure
 5. Limestone Requirements
 6. Landfill Gas Management
-

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

During those discussions, it became evident that each of the issues mentioned above necessitates additional research and inquiries before Council is able to make a decision on how to approach these assets in the future. Concise summaries of the outcomes of each item's discussion are listed below:

1. *Leachate Processing Infrastructure*
 - Finalise the external technical assessment of potential leachate treatment options
 - Finalise the external assessment of the necessary approvals process for any future leachate processing solution. Once the above actions are completed, prepare an options report for Council that summarises the available choices and the financial implications of each alternative.
 2. *Transfer Station Requirements, Post-Closure*
 - Assess the present and projected future use and expenses associated with the asset's operation.
 - Conduct a risk assessment of the Asset in its current condition.
 - Conduct a comprehensive capital cost evaluation for a potential enhancement of the asset.
 - Identify the geographical split of individuals or entities utilising the facility and quantify the volume of waste generated by the asset.
 - Decide on the strategy for a Community Consultation plan in the event that the closure of the Asset and/or its improvement is being considered.
 3. *Location of Workshop and Crib Rooms*
 - Prepare high level cost assessment for a potential asset relocation.
 - Determine future use options for any legacy asset following relocation.
 4. *Reuse Shop Requirements, Post-Closure*
 - Assess the present and projected future use and expenses associated with the Asset's operation.
 - Conduct a risk assessment of the Asset in its current condition.
 - Conduct a comprehensive cost evaluation for a potential enhancement of the asset.
 - Identify the geographical split of individuals or entities utilising the facility and quantify the volume of waste generated by the asset.
 - Decide on the strategy for a Community Consultation plan in the event that the closure of the Asset and/or its improvement is being considered.
 5. *Limestone Requirements*
 - Create a model to illustrate the amount of the existing stockpile acting as a buffer screen that will remain after extraction of any necessary materials.
 - Conduct a cost analysis comparing the expenses of imported cover material with those of on-site material.
 - Undertake a review to assess and plan for any issues associated with the site leasing agreement and any regulatory factors.
 - Develop a strategy for community consultation to manage the effects of a reduction in the limestone stockpile.
-

**MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024**

6. Landfill Gas Management

- Conduct a high-level evaluation of the condition of the current site assets to identify which components require upgrade or renewal as the current landfill gas management contract in place expires.
- Verify the validity of all existing agreements and contracts.
- Consider leasing arrangements to offset the required capital investment at the end of the contract
- Model scenario based on the assumptions on revenue and costs.
- Consider future use requirements pertaining to behind the meter power supply and other revenue generating considerations

It is proposed that the Critical Infrastructure Plan will be presented to Council at its ordinary Council meeting held in May 2024, for resolution.

CONSULTATION

A strategic workshop was held with Council on 29 February. The Strategic Working Group was consulted prior to the workshop held with Council.

STATUTORY ENVIRONMENT

Nil

POLICY IMPLICATIONS

Nil

FINANCIAL IMPLICATIONS

The financial implications of any future Master Plan will be tabled at a future Ordinary Council Meetings.

STRATEGIC IMPLICATIONS

STRATEGIC COMMUNITY PLAN 2023 - 2032	
Strategic Objective 1: Deliver best practice services	
Strategy 1.1	Operate waste management activities effectively
Strategy 1.2	Utilise best practice waste diversion and resource recovery solutions
Strategic Objective 2: Position MRC to provide world class waste management options	
Strategy 2.3	Maximise use of the MRC's assets and technical capabilities

MINDARIE REGIONAL COUNCIL
ORDINARY COUNCIL MEETING MINUTES
28 March 2024

Strategic Objective 3: Deliver best practice governance processes and structures	
Strategy 3.2	Ensure responsible use of organisational resources
Strategy 3.3	Retain financial sustainability with a commercial focus

COMMENT

The Administration notes the consensus view expressed during the workshop regarding the significance of the CIP and its timely completion in order to move to the next phase in the development of the MRC Master Plan.

In light of the outcomes of the strategic workshop, the Administration expects that the Critical Infrastructure Plan will be formally i tabled to Council at the May 2024 OCM, for consideration.

10. COMMITTEE REPORTS

AUDIT AND RISK COMMITTEE (11 APRIL 2024)

10.1 2024/2025 DRAFT BUDGET ASSUMPTIONS

Moved Cr Migdale, Seconded Cr Wallace.

That the Council SUPPORTS utilising the budget assumptions as listed in the Comments section of this report as the basis for preparation of the CRC 2024/2025 Budget.

The Motion was put and declared CARRIED (10/0).

For: Councillors Anderson, Bedworth, Chester, Coetzee, Cutler, Hutton, Krsticevic, Lagan, Migdale, and Perkov.

Against: Nil.

10.2 REGULATION 17 REVIEW - SYSTEMS AND PROCEDURES

Moved Cr Migdale, Seconded Cr Lagan.

That the Council NOTE:

- 1. The findings of the CEO's review of the Catalina Regional Council's (CRC) risk management, internal controls and legislative compliance as detailed in this report (Reg 17 Review).**
- 2. That the CEO's review found that:**
 - **A high level of understanding of risk and compliance exist within the CRC staff;**
 - **The CRC's internal systems, policies and protocols to manage risk and compliance are appropriate for an organisation of the size, scale and complexity of the CRC;**
 - **Further work is required to develop internal procedures and checklists to ensure that compliance is maintained/achieved at all times and to ensure that corporate knowledge re systems operations is stored/retained.**

The Motion was put and declared CARRIED (10/0) by exception resolution.

Minutes Ordinary Meeting of Council – 18 April 2023

For: Councillors Anderson, Bedworth, Chester, Coetzee, Cutler, Hutton, Krsticevic, Lagan, Migdale, and Perkov.

Against: Nil.

10.3 REVIEW OF CRC POLICIES

Moved Cr Migdale, Seconded Cr Lagan.

That the Council:

1. **DELETES the Information and Technology Acceptable Use Policy.**
2. **RE-ADOPTS the Legislative Compliance Policy unchanged with the exception of updating references to TPRC with CRC. Policy to be reviewed in two years.**
3. **RE-ADOPTS Procurement Policy unchanged with the exception of updating references to TPRC with CRC. Policy to be reviewed in two years.**

The Motion was put and declared CARRIED (10/0) by exception resolution.

For: Councillors Anderson, Bedworth, Chester, Coetzee, Cutler, Hutton, Krsticevic, Lagan, Migdale, and Perkov.

Against: Nil.

11. ELECTED MEMBERS MOTIONS OF WHICH NOTICE HAS BEEN GIVEN

Nil

12. QUESTIONS BY ELECTED MEMBERS OF WHICH DUE NOTICE HAS BEEN GIVEN

Nil

13. URGENT BUSINESS APPROVED BY THE CHAIR

Nil

14. GENERAL BUSINESS

Nil

15. DECISION TO MOVE INTO CONFIDENTIAL SESSION

Moved Cr Wallace, Seconded Cr Coetzee.

That Item 15.1 – TENDER - DESIGN AND CONSTRUCTION OF THE CATALINA GREEN SUSTAINABILITY DEMONSTRATION HOME (03/2024) be CONSIDERED Behind Closed Doors in accordance with Sections 5.23(2)(c) and (e) of the Local Government Act 1995,

Minutes Ordinary Meeting of Council – 18 April 2023

which permits the meeting to be closed to the public for business relating to the following:

- c) *A contract entered into, or which may be entered into, by the CRC and which relates to a matter to be discussed at a meeting (section 5.23(2)(c)); and*
- e) *A matter that if disclosed, would reveal –*
 - i. Information that has a commercial value to a person; or*
 - ii. Information about the business, professional, commercial, or financial affairs of a person where the information is held by, or is about, a person other than the CRC (section 5.23(2)(e)).*

The Motion was put and declared CARRIED (10/0).

For: Councillors Anderson, Berry, Chester, Coetzee, Hutton, Krsticevic, Lagan, Migdale, Perkov and Wallace.

Against: Nil.

At 6:29pm the meeting was closed to the public, and all attendees who were not required left the meeting prior to consideration of Item 15.1.

Cr Cutler joined the meeting at 6:36pm.

15.1 CONFIDENTIAL: TENDER - DESIGN AND CONSTRUCTION OF THE CATALINA GREEN SUSTAINABILITY DEMONSTRATION HOME (03/2024)

Moved Cr Chester, Seconded Cr Berry.

That the Council:

1. **PROCEEDS** with the confidential recommendation as outlined in the Confidential Agenda.
2. **RESOLVES** that this report, attachments and resolution remain confidential in accordance with section 5.23(2)(c) and (e) of the *Local Government Act 1995*.

The Motion was put and declared CARRIED (7/4).

For: Councillors Anderson, Berry, Chester, Coetzee, Cutler, Krsticevic and Wallace.

Against: Councillors Hutton, Lagan, Migdale and Perkov.

Moved Cr Migdale, Seconded Cr Berry.

That the meeting be REOPENED to the public.

The Motion was put and declared CARRIED (11/0).

For: Councillors Anderson, Berry, Chester, Coetzee, Cutler, Hutton, Krsticevic, Lagan, Migdale, Perkov and Wallace.

Against: Nil.

At 6:48pm the meeting was reopened to the public.

Minutes Ordinary Meeting of Council – 18 April 2023

16. FORMAL CLOSURE OF MEETING

The Chair declared the meeting closed at 6:41pm.

City of
Joondalup

minutes

Annual General Meeting of Electors

MEETING HELD ON

TUESDAY 5 MARCH 2024

Acknowledgement of Traditional Custodians

The City of Joondalup acknowledges the traditional custodians of the land, the Whadjuk people of the Noongar nation, and recognises the culture of the Noongar people and the unique contribution they make to the Joondalup region and Australia. The City of Joondalup pays its respects to their Elders past and present and extends that respect to all Aboriginal and Torres Strait Islander peoples.

1 DECLARATION OF OPENING AND ANNOUNCEMENT OF VISITORS

The Mayor declared the meeting open at 5.30pm.

Mayor:

HON. ALBERT JACOB, JP

Councillors:

CR ADRIAN HILL	North Ward	<i>absent from 8.37pm to 8.39pm</i>
CR LEWIS HUTTON	North Ward	<i>from 5.33pm</i>
CR DANIEL KINGSTON	North Central Ward	<i>absent from 7.27pm to 7.29pm</i>
CR REBECCA PIZZEY	Central Ward	<i>absent from 8.28pm to 8.31pm</i>
CR RUSS FISHWICK, JP	South Ward	<i>absent from 7.12pm to 7.19pm</i>
CR JOHN RAFTIS	South Ward	<i>from 5.33pm</i>
		<i>absent from 7.46pm to 7.55pm</i>
CR CHRISTINE HAMILTON-PRIME, JP	South-West Ward	<i>absent from 6.00pm to 6.26pm</i>
		<i>to 7.04pm</i>
CR PHILLIP VINCIULLO	South-West Ward	<i>absent from 5.53pm to 6.03pm</i>
		<i>absent from 7.47pm to 7.52pm</i>
CR JOHN CHESTER	South-East Ward	
CR ROHAN O'NEILL	South-East Ward	<i>absent from 7.33pm to 7.38pm</i>

Officers:

MR JAMES PEARSON	Chief Executive Officer
MR JAMIE PARRY	Director Governance and Strategy
MR MAT HUMFREY	Director Corporate Services
MR NICO CLAASSEN	Director Infrastructure Services
MR CHRIS LEIGH	Director Planning and Community Development
	<i>absent from 7.41pm to 7.44pm</i>
MRS REBECCA MACCARIO	Manager Strategic and Organisational Development
	<i>to 6.24pm</i>
MRS KYLIE BERGMANN	Manager Governance
MR DANIEL DAVINI	Media Advisor
MRS VIVIENNE STAMPALIJA	Governance Coordinator
	<i>absent from 7.36pm to 7.38pm</i>
MRS DEBORAH GOUGES	Senior Governance Officer
MRS SUSAN HATELEY	Governance Officer <i>absent from 6.47pm to 6.54pm</i>

In Attendance:

MS CHRISTINE ROBINSON	Manager Audit, Risk and Executive Services
MR BLIGNAULT OLIVIER	Manager City Projects
MS SAMER AL JANABI	General Counsel

There were 60 members of the public and no member of the press in attendance.

2 ADDRESS BY THE MAYOR

The Mayor welcomed members of the public to the Annual General Meeting of Electors.

The Mayor advised that the meeting is being held in accordance with section 5.27 of the *Local Government Act 1995*.

The Mayor advised the meeting was advertised as follows:

- In Perth Now newspaper on 8 February 2024.
- Social Media posts (Facebook, Twitter and LinkedIn) on 14 February 2024.
- Joondalup Voice on 22 February 2024.
- Public notices on the City's website and public notice boards.

The Annual Report was made available for public viewing after the Special Meeting of Council held on 31 January 2024 (CJ002-01/24 refers), where Council adopted the *2022-23 Annual Report*.

3 APOLOGIES AND LEAVE OF ABSENCE

3.1 LEAVE OF ABSENCE PREVIOUSLY APPROVED

Cr Nige Jones	4 to 7 March 2024 inclusive.
Cr Christopher May, JP	4 to 8 March 2024 inclusive.
Cr Christine Hamilton-Prime, JP	10 to 26 March 2024 inclusive.
Cr Russ Fishwick, JP	11 to 15 March 2024 inclusive.
Cr Daniel Kingston	12 to 14 March 2024 inclusive.
Cr Nige Jones	12 to 19 March 2024 inclusive.
Mayor Albert Jacob, JP	25 to 28 March 2024 inclusive.
Cr Russ Fishwick, JP	25 March to 1 April 2024 inclusive.
Cr Phillip Vinciullo	3 to 13 April 2024 inclusive.
Cr Adrian Hill	28 June to 15 July 2024 inclusive.

4 PROCEDURES AT ELECTORS' MEETINGS

The Mayor outlined the requirements for voting and speaking at an Electors' Meeting and the definition of an Elector.

5 VIDEO PRESENTATION

A video presentation was given outlining the events, activities and achievements of the City of Joondalup for the 2022-23 financial year.

6 CONTENTS OF THE 2022-23 ANNUAL REPORT

The Mayor advised that the purpose of the Annual General Meeting of Electors was to discuss the contents of the Annual Report and raise any general business that Electors may have. In accordance with the *Local Government Act 1995*, Council adopted the Annual Report at its Special Meeting of Council held on 31 January 2024 (CJ002-01/24 refers).

The following summarised questions were submitted verbally at the Annual General Meeting in relation to the Annual Report:

M Kwok, Ocean Reef:

Re: Annual Financial Report – Payments to Elected Members.

Q1: On page 37 of the Annual Financial Report the total figure for “all other Council Member’s travel and accommodation expenses” is \$49,727. On page 68 of the Annual Report, the “Travel/Child Care Reimbursement” is shown as \$9,938.

Can the City advise why the figure in the Annual Financial Report is five times higher than the figure in the Annual Report?

A1: During the meeting the Director Corporate Services took the question on notice. The City has since confirmed the figures provided in the Annual Report relate only to those costs reimbursed to Elected Members. The figures provided in the Annual Financial Report include all travel and accommodation expenses, whether reimbursed to the Elected Member or incurred directly by the City.

Re: Deputy Mayoral Allowance.

Q2: According to the Annual Financial Report, the Deputy Mayoral allowance is \$22,999. Can the City advise why it appears in the Annual Report that Cr Hamilton- Prime received an amount over the Deputy Mayoral Allowance?

A2: During the meeting the Director Corporate Services took the question on notice. The City has since confirmed that the figure of \$8,779 reported in the Annual Report for Cr Hamilton-Prime’s Deputy Mayor allowance is incorrect. It should be \$6,863. The total paid for the Deputy Mayoral allowance between Cr Logan and Cr Hamilton-Prime is \$22,999 which is accurately reflected in the Annual Financial Report.

M Dickie, Hillarys:

Re: Greenhouse Gas Emissions.

Q1: In reference to page 113 of the Annual Financial Report, can the City explain the basis of the 17.4% reduction in greenhouse gas emissions and is this in line with the trajectory set out in the Climate Change Strategy 2014-2019?

- A1: The Manager Strategic and Organisational Development responded that the reduction in greenhouse gas emissions is the net amount, consisting of the City's corporate greenhouse gas emissions minus any offset. It was added that the reduction is in line with, and exceeds, the targets that were set through the *Climate Change Strategy*. During the meeting the Manager Strategic and Organisational Development committed to provide additional information.

The City has since confirmed that the City's greenhouse gas emissions decreased by a significant amount in 2022/23 as compared to 2021/22 due to a reduction in electricity usage, increased usage of renewable energy and a change in emissions factors.

The *Climate Change Strategy 2014 - 2019* included a corporate mitigation target to reduce net greenhouse gas emissions by 5% per capita below 2012/13 emissions by 2018/19. Net greenhouse gas emissions for 2018/19 reduced by 16% per capita in comparison to the 2012/13 baseline year. The City's total greenhouse gas emissions in 2018/19 decreased by 30% from 2012/13 emissions.

The City has developed a draft Climate Change Plan 2024 – 2034 which is aimed to be finalised in 2024.

Re: *City of Joondalup Climate Action Plan.*

- Q2: *Mr Dickie spoke on behalf of Mr Dowling, given the increasing danger of climate change related weather events, will the City pursue a more ambitious Climate Action Plan to dramatically cut the City's emissions, including divesting ratepayer funds from banks that fund fossil fuels, and using more renewable energy?*

- A2: The Director Governance and Strategy responded that the Draft Climate Change Strategy, considered by Council towards the end of 2023, has been referred for further discussions with Elected Members regarding the greenhouse gas emissions' total target. The City is therefore unable to suggest any outcome before community consultation has commenced. There will be opportunity to provide comment on the City's direction regarding the Climate Change Strategy.

Mayor Jacob advised that a major barrier to more ambitious greenhouse gas emissions' reduction is the fact that the City is not currently responsible for the choice of street lighting. The City would ideally be able to, through cooperation, convert street lighting to LED lights and thereby ensure the single largest reduction to greenhouse gas emissions.

Mayor Jacob went on to say, the City's Leafy City Program does have extensive impact and would make an even greater difference through underground power that will allow for increased urban canopy.

B Hewitt, Edgewater:

Re: *Greenhouse gas emissions offsets.*

- Q1: *Can the City advise what the offsets consist of, to achieve the 17% reduction in greenhouse gas emissions?*

A1: The Manager Strategic and Organisational Development responded that the City currently offsets fleet emissions, with the cost being around \$30,000 per year. There is a proposal, with the Draft Climate Change Plan, to purchase additional renewable energy, and this is being referred back to the City to work on with the Elected Members.

Re: Leafy City Program.

Q2: *In regard to the Leafy City Program, the City has quoted that 4,500 trees have been planted. Can the City advise whether the number of trees planted, that have subsequently died, has been included in this number?*

A2: The Director Infrastructure Services responded that the City does review the attrition rate of trees planted by the City. There is approximately a loss of around 10% of trees planted, and these are replaced on an annual basis as part of the City's tree planting program.

A Arrah, Craigie:

Re: Carbon Offsets.

Q1: *Can the City advise, when the City refers to carbon, is this specifically carbon dioxide?*

A1: The Manager Strategic and Organisational Development advised that when monitoring, reporting and offsetting the City uses an industry standard calculation that considers a number of different emissions to determine a carbon dioxide equivalent.

7 GENERAL BUSINESS

The Mayor commented that any questions of a general nature raised at the Annual General Meeting of Electors would be responded to and questions requiring a more detailed response would be taken on notice.

The following summarised questions were received in writing prior to the Annual General Meeting of Electors:

M Van Dyk, Connolly:

Re: CJ181-12/21 – Installation of CCTV at Underpasses.

Q1 *Can the City advise if the above CCTV installation has been put out to tender?*

A1 Council considered a report (CJ071-05/223 refers) at its meeting held on 23 May 2023 in response to CJ181-12/21 where Council resolved, in part, to support the installation of permanent CCTV infrastructure at the Whitfords West Park underpass.

In October 2023 the City requested quotes for a suitable contractor to undertake the installation of permanent CCTV infrastructure at the Whitfords West Park underpass with the works occurring in December 2023.

Re: SMART Cards.

Q2 The Government started trialling Cashless Debit Cards CDC's in 2018. Is the Council aware of this trial?

A2 Yes.

Q3 Has Council been informed of the results of the trial at the end of the trial on 6 March 2023, and that it would be replaced by an Enhanced Income Management Account, until the people get a SMART card?

A3 No more than what has been reported in the media.

Q4 Is the Council aware that the Government used people who are on Centrelink for these trials, they could only access their 'money' by using these trial cards. They were only allowed to use the cards for what the Government decided they could buy and only at certain businesses?

A4 The City understands that for those on the Cashless Welfare Card, 80% of their welfare payment was linked to their Cashless Welfare Card, while the remaining 20% was paid into their usual bank account.

Q5 Mid 2020 - 38.7% of people aged between 15-64 years old are on Centrelink. Does Council have any communications from the Government that the above SMART Card system will be rolled out in the City of Joondalup?

A5 No.

M Kwok, Ocean Reef:

Re: Weed Management.

Q1 In relation to Council's decision (CJ063-05/21) in Part, made at the Council meeting held on 18 May 2021, as follows:

"11.3 SUPPORTS the City phasing out the use of glyphosate and other pre-emergent and residual chemicals deemed as confirmed carcinogens or otherwise detrimental to human health in public areas by 31 December 2025, except for the use in:

11.3.1 sump sites and other areas not accessible by the public;

11.3.2 natural areas (where it is required for conservation purposes in removing invasive exotic weeds), ovals and playing fields and road reserves and medians (where no footpath is present)"

Can the City advise how does the City propose to meet the deadline by December 2025 to phase out the use of toxic weed killers?

A1 In developing the *Weed Management Plan 2023 - 2033* consideration was given to previous Council decisions, outcomes of the Strategic Community Reference Group meeting held in May 2021 and community concerns regarding herbicide use, including two petitions that were open at the time.

Council adopted the *Weed Management Plan 2023-2033* at its meeting held on 28 March 2023 (CJ040-03/23 refers). In adopting the management plan Council endorsed the management actions described within the plan which includes the continued use of herbicides such as glyphosate as part of an integrated approach to weed management. The use of chemical weed control as a tool to maintain amenity, biodiversity and reduce the risk of fire within the community is an important element of the City's approach to weed management.

As per the objectives of the Plan, the City will continue to reduce reliance of herbicide use by increasing non-chemical weed control methods where appropriate including trialling alternative forms of weed control and utilise non-chemical weed for hardstand areas within 50 meter radius of schools and within playspaces. Additionally, non-chemical control will be used within kerbs, footpaths, hardstand median islands, mulched median islands and general paved areas within the City's Central Business Precinct.

Council's adoption of the *Weed Management Plan 2023-2033* provides future direction for weed management within the City and supersedes previous decisions and management actions relating to weed management.

Re: *Question Taken on Notice at Ordinary Meeting of Council held on 27 February 2024.*

Q2 *Director Planning and Community Development took the following question on notice at the Ordinary Meeting of Council held on 27 February 2024:*

"Is there any evidence that CCTV deter or prevent anti-social behaviour?"

Can the City please supply a response to the above question?

A2 It has been established through Crime Prevention Through Environmental Design (CPTED) principles that the perception of safety is increased through the installation of CCTV systems, increased lighting, activation and patrols. CCTV can act as a functional and productive tool to help deter potential criminal activity and can assist in the detection, investigation and prosecution of crimes.

Where people feel safe in a space there is more likely to be activation in that area which may result in less opportunities for antisocial behaviour.

Re: *Annual Financial Statement 2022/2023.*

Q3 *Can the City please advise when the Annual Financial Statement 2022/2023 were released by the Auditor?*

A3 The Annual Financial Statement 2022/23 was released by the Auditor on 1 December 2023.

Re: *CMAKTECH Lighting.*

Q4 *Referring to the invoice paid to CMAKTECH on 31 May 2023: Invoice 2211 Lighting - Joondalup City Centre for \$119,632.82. Can we have a breakdown of the \$119,632.82 please?*

- A4 This payment is for Whitfords Nodes CCTV. Unfortunately, the Invoice Description on the List of Payments considered by Council at its Ordinary Meeting held on 22 August 2023 (page 534 refers) incorrectly stated "2211 – Lighting Joondalup City Centre".

Please find a breakdown of the invoice in the table below:

Description	Amount
Hardware including connectors, cabling, switches and cameras	\$45,904.69
Poles	\$27,333.22
Installation and commissioning	\$27,945.24
Project management and documentation	\$3,475.00
Powder coating	\$4,098.96
SUB TOTAL	\$108,757.11
GST	\$10,875.71
INVOICE TOTAL	\$119,632.82

- Q5 *As the City of Joondalup is implementing SMART City technology, is the CBD Lighting program by CMAKTECH part using Wi-Fi and Li-Fi technology for data transmission and data harvesting?*
- A5 CMAKTECH are not involved with the City for smart lighting throughout the City of Joondalup.

L Crawford, Duncraig:

Re: CCTV – Security Cameras.

- Q1 *Can the City please define what is involved in CCTV as a 'service solution' (I refer to Question from B Gould 25/2/24, A2 – Payment Details - CMAKTECH, 4/12/23)?*
- A1 Using Software as a Service (SaaS) technology, CCTV as a service allows the software to be accessed through a web browser instead of installing it on a computer. It also ensures Enterprise Level security for the Genetec Security Desk platform services, while keeping local servers and storage capacity. SaaS technology is installed in the 'cloud', which is a network of remote servers.
- Q2 *As far as I am aware there are currently security cameras in operation in the City of Joondalup that could read number plates, if and when they do this, where is this information stored?*
- A2 The license plate data is stored directly on the cameras and is progressively overwritten once the storage capacity is reached.
- Q3 *With reference to Q2, has the Council given serious consideration to possible safety concerns. For example, if this information is accessed unlawfully via a hack, or malice, it may mean that people will know the whereabouts of residents at multiple times of the day whilst they are in the area?*

- A3 The City takes data security seriously and enforces network security as well as physical security at each server and camera location.

P Navas-Parejo:

Re: CCTV Camera Network.

- Q1 *Can the City please advise on how many instances during 2023 did the WA Police request footage from the City's CCTV network?*

A1 56.

- Q2 *Can the City please advise how long does the City hold the footage collected through the CCTV network?*

A2 32 days before it is automatically deleted unless specific footage has been exported as part of an official request. The requested footage is then stored in accordance with record keeping legislation.

- Q3 *Can the City please advise where the footage is stored?*

A3 On local servers within the City of Joondalup.

- Q4 *Can the City please advise what is the procedure the City follows for deletion of footage?*

A4 Footage is automatically deleted after 32 days without manual intervention.

I Anthony, Ocean Reef:

Re: CCTV Camera Network.

- Q1 *Can the City please advise if the City is collecting public information via CMAKTECH?*

A1 The City is not collecting public information via CMAKTECH.

- Q2 *Can the City please advise what type of public information has been collection by CMAKTECH?*

A2 Not applicable.

- Q3 *Has the City got any data to show that CCTV prevents crimes?*

A3 The City does not collect specific crime data however does capture information on antisocial behaviour (which depending on the nature of the behaviour may have a criminal element) when reported by community members. This information then forms part of the consideration when identifying suitable locations to deploy the City's mobile CCTV infrastructure.

It has been established through Crime Prevention Through Environmental Design (CPTED) principles that the perception of safety is increased through the installation of CCTV systems, increased lighting, activation and patrols. CCTV can act as a functional and productive tool to help deter potential criminal activity and can assist in the detection, investigation and prosecution of crimes.

M Sideris, Mullaloo:

Re: Draft Coastal Hazard Risk Management and Adaptation Plan (CHRMAP).

Q1 *At the meeting held on 12 December 2023, Council agreed to prepare a new draft Coastal Hazard Risk Management and Adaptation Plan in alignment with State Planning Policy 2.6, and relevant guidelines, developed by a multi-disciplinary team of suitably qualified persons; and others. Can the City please provide a status update?*

A1 At the Council meeting held on 27 February 2024, Council endorsed amendments to the *Corporate Business Plan 2023–2027* including changes to milestones for the Coastal Hazard Risk Management and Adaptation Plan project. As per the updated milestones a project plan is proposed to be presented to Elected Members in quarter 4.

Re: Lot 501 Pinnaroo Point.

Q2 *As the CEO has Delegated authority to Dispose of Property up to the value of \$900,000, can the City please advise why the CEO brought the sub-lease of Lot 501 Pinnaroo point to Council to approve?*

A2 A delegation allows an officer to make a decision in place of the Council, subject to any policy requirements, however an officer is not obliged to exercise that delegation in every instance. In this case, the public interest in the project was such that it was considered appropriate that the decision be made by the Council and not under delegation.

Re: Beach Closure.

Q3 *Can the City please advise who and what authority directed the second beach closure at Mullaloo Beach?*

A3 The City assumes that reference to the 'second beach closure at Mullaloo Beach' relates to the instance that occurred on Friday, 2 February 2024. This being the case the City understands that representatives of Surf Life Saving Western Australia took action pursuant to the *City of Joondalup Local Government and Public Property Law 2019*.

Re: Ticketed event held on the lawn in front of the Hillarys Beach Club (HBC) and outside the Lot 501 Crown lease area on Australia Day.

Q4 *Can the City please advise if the Hillarys Beach Club (HBC) had City approval for that event and the ability to exclude the public from use of that area?*

- A4 The Hillarys Beach Club requested a booking of an area of lawn immediately adjacent to their premises and the City issued a permit for the space. The Hillarys Beach Club were provided with approval for their event and the exclusive access to the area for the purposes of their liquor license area.
- Q5 *Can the City please confirm that the City approved the appropriate event liquor licence, and various permissions and insurances to provide a petting zoo and bouncy castle on public open space?*
- A5 The Department of Racing, Gaming and Liquor approved the relevant extended trading permit. The City received a copy of the certificate of currency issued to Hillarys Beach Club (WA) Pty Ltd for public and property liability, prior to approving the use of the lawn area for the event.

The following summarised questions in respect to General Business were asked verbally at the Annual General Meeting of Electors:

I Anthony, Ocean Reef:

Re: The Grooming of Children.

Q1: *Would the City of Joondalup allow the exposure of children to drag queens and the grooming of young children?*

A1: Mayor Jacob responded that the City would not allow the grooming of young children.

A Arrah, Craigie:

Re: The Grooming of Children.

Q1: *Can the City please provide a definition for the "City not allowing the grooming of children"?*

A1: Mayor Jacob reiterated that the City would not allow anything that would involve the grooming of children.

M Sideris, Mullaloo:

Re: Freedom of Information (FOI).

Q1: *In relation to a question submitted previously, whereby the CEO answered that the decision for Pinnaroo Point being brought to Council was because it was in the public interest. Can the CEO explain why an FOI which goes back to 2014, which I claim is in the public interest, has not been released?*

A1: The CEO responded that decisions relating to FOI are not the responsibility of the CEO, as such decisions are referred to the State Government Department the Office of the Information Commissioner.

Cr Vinciullo left the Chamber at 5.53pm.

Re: Fireworks in High-Risk Bushfire Prone Area.

Q2: In relation to the use of park land surrounding Hillary's Beach Club for activities on Australia Day, can the City advise who authorised the fireworks in a designated high risk bushfire prone area?

A2: The Director Corporate Services responded that the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) issued the permit for fireworks and the City was consulted. During the meeting, the Director Corporate Services committed to provide further information – now included on page 16 below.

M Van Dyk, Connolly:

Re: Family Friendly City Events.

Q1: As it was stated that City programs are family friendly, do events with drag queens constitute family friendly activities?

A1: Mayor Jacob responded that it is the duty of the City to represent all of the 165,000 residents. The City would not facilitate anything that would endanger children and takes the protection of children very seriously.

As City events are provided from ratepayer funds, the City does seek to provide as many services and activities as possible for the entire community. It is for individuals to choose which events to attend, or not attend, and the information can be found in the City of Joondalup's event calendar. The City provides a broad spectrum of opportunities for a range of different interests.

Re: Use of Glyphosate.

Q2: Can the City advise, does the City spray glyphosate close to primary schools?

A2: The Director Infrastructure Services responded that the City has an exclusion zone around primary schools where glyphosate will not be sprayed.

Cr Hamilton-Prime left the Chamber at 6.00pm

M Kwok, Ocean Reef:

Re: Financial Report 2022/23.

Q1: In regard to the question submitted previously to the City, "can the City please advise when the Annual Financial Statement 2022/23 was released by the auditor?" The City's response being "that the Annual Financial Statement was released by the auditor on the 1st of December, 2023".

Can the City explain why the Chief Executive Officer signed off on the Financial Report on the 30th of November 2023?

- A1: The Director Corporate Services responded that once details have been confirmed with the Office of the Auditor General, a copy of the Annual Financial Report is sent for the CEO to sign. In 2023, the City received that copy on or about 27 November 2023, and it was signed by the CEO on 30 November 2023. After being submitted to the Office of the Auditor General, the Audit Report was then released on 1 December 2023.

Re: Payments for CCTV at Whitfords Nodes.

- Q2: *In relation to a question previously submitted, there is an entry of \$45,904 for cameras, cabling, and switches as well as an entry of \$56,000 for Whitfords Nodes cameras. Can the City advise whether the \$45,904 is in addition to the \$56,000 for cameras at Whitfords Nodes?*

- A2: During the meeting, the Director Infrastructure Services took this question on notice.

The City has since confirmed that the invoice referred to in the question was the first progress claim for the installation of CCTV cameras at Whitfords Nodes. Please find below a breakdown of this first invoice:

Progress claim 1

Description	Amount
Hardware including connectors, cabling, switches and cameras	\$45,739.08
Poles	\$0
Installation and commissioning	\$4,657.54
Project management and documentation	\$695.00
Powder coating	\$0
SUB TOTAL	\$51,091.62
GST	\$5,109.16
INVOICE TOTAL	\$56,200.78

D Vincent, Joondalup:

Re: Freemasons.

- Q1: *Can the City advise how many of the Elected Members are Freemasons?*

- A1: Mayor Jacob responded that he cannot respond on behalf of Elected Members. Questions to Elected Members can be forwarded to their individual email addresses.

M Sideris, Mullaloo:

Re: Fireworks in High-Risk Bushfire Prone Area.

- Q1: *In relation to the approval of fireworks, did the City advise the Department of Mines, Industry Regulation and Safety (DMIRS) that the Hillarys Beach Club facility is in a high-risk bushfire prone area?*

- A1: The Director Corporate Services responded that the City advised the DMIRS that the area was in the dunes system and in close proximity to people's homes. During the meeting, the Director Corporate Services committed to provide further information – now provided below.

The City did not advise DMIRS that the Hillarys Beach Club facility is in a high-risk bushfire prone area, as this is not the City's role in the approval process. Fireworks permits are obtained through the Department of Energy, Mines, Industry Regulation and Safety. The approval process consists of the fireworks contractor supplying scaled site plans, inclusive of exclusions zones and a firework event notice signed by WA Police, Department of Fire and Emergency Services, the local government authority, and in some instances, the Civil Aviation Safety Authority.

Re: Property value in relation to disposal of land by lease.

- Q2: *As part of recent correspondence regarding a Lease Agreement, the City stated that the CEO has delegated approval to dispose of property up to, not exceeding, the value (in this case it was \$600,000). The City advised that the threshold was not reached because it was a Peppercorn Lease.*

Can the City provide a written definition of "property value", particularly in relation to disposal of land by lease?

- A2: During the meeting, Mayor Jacob responded that the question will be taken on notice and a written response provided.

The City has since confirmed the details of a proposed disposition under the *Local Government Act 1995* is described as "*the consideration to be received by the local government for the disposition.*" The consideration for the relevant lease agreement relates to the total value of the rent received, not the value of the property.

Cr Vinciullo entered the Chamber at 6.03pm.

A Arrah, Craigie:

Re: United Nations' Sexuality Education Agenda.

- Q1: *Is the City of Joondalup a signatory of or opposed to the United Nations' child sexuality education agenda?*

- A1: Mayor Jacob responded that the City is not a signatory to such a document.

The CEO responded that local governments are not usually legally or constitutionally in a position to become a signatory to a United Nations' document, as that is usually the preserve of National Governments.

Mayor Jacob responded that choices concerning such matters are for individual parents to make, not for local governments to regulate.

Re: Drag Story Hour.

Q2: Can the City advise how age appropriateness of drag queen reading time materials is determined, and what is the educational benefit of drag queen reading time for the children within the City of Joondalup?

A2: During the meeting, the Director Planning and Community Development took the question on notice.

The City has since confirmed that it considers its programming based on a number of factors including community interest, previous programming feedback and industry experience. Programming is also guided by the City's Access and Inclusion Plan, in particular elements of Social Inclusion which is defined by the plan as:

"Everyone can participate in the same activities, in the same space. True social inclusion is a cultural change. It is the change of attitude towards those who have been historically excluded."

In view of this, programming that is delivered by the City is broad and provides options for the community. It is a proactive choice by someone to attend a City program, or in the case of children's programming, a parent or guardian has chosen on behalf of the child to attend and participate.

M Kwok, Ocean Reef:

Re: AGM Motions.

Q1: As a mover for a motion, is it possible to change to a different motion?

A1: Mayor Jacob responded that the motions that have been submitted are to be worked through, otherwise a request can be made to withdraw a motion.

Q2: Will the City be opening to the floor for further motions if people missed out because the deadline was moved?

A2: Mayor Jacob responded that although the deadline was moved, extra notice was given. The residents of the City of Joondalup have ample opportunity to put motions forward. As the City has other business during the evening, further motions would be at the discretion of the Presiding Member.

The following summarised statements were made verbally at the Annual General Meeting of Electors:

I Anthony, Ocean Reef:

Re: Drag Story Hour.

Ms Ileana Anthony raised concerns regarding the possibility of drag queen led story time in local libraries, as has occurred in other Councils. Ms Anthony expressed agreement with Mayor Jacob's statement that individual parents make choices on how to raise their children. Ms Anthony emphasised that drag queens represent a form of adult entertainment, and expressed the concern that exposure of children is a form of grooming.

Ms Anthony asked the City whether drag queen story time would be allowed in the City of Joondalup, when there are alternative options such as Indigenous Australians or other cultures presenting stories to children.

Ms Anthony explained that certain restrictions are placed upon children for their protection and urged the City to view the potential exposure of children to drag queens as requiring a comparable level of protection.

M Kwok, Ocean Reef:

Re: Scrutiny of the Western Australian Local Government Association (WALGA).

Ms Michele Kwok spoke in relation to the Western Australian Local Government Association (WALGA) and described a need for scrutiny of this body based on the extensive public funding it receives. Ms Kwok outlined a discrepancy between the requirement for Elected Members and City Administration to declare accepted gifts or donations, and the fact that gifts exchanged between WALGA and City staff do not need to be declared. Ms Kwok highlighted that the City paid a \$112,955.58 membership fee in 2023, and emphasised that such a significant amount of public funding requires the certainty that WALGA is operating appropriately.

Ms Kwok raised the concern that as WALGA is not a State or local government entity, it does not fall within the jurisdiction of the Auditor General and escapes being scrutinised. Ms Kwok reminded the Council that WALGA can give consent to a request for scrutiny, under the *Auditor General Act 2006*.

A Arrah, Craigie:

Re: Drag Story Hour.

Mr Andrew Arrah urged the Councillors and City staff to research, become informed and stand with their convictions regarding the possibility of drag queen story time.

Mr Arrah expressed no personal objection to adults partaking in drag, and suggested that senior citizens would likely enjoy the entertainment provided by drag queens. However, Mr Arrah strongly questioned the intentions behind drag queen story time and suggested that such events constitute a form of grooming of young children.

P Navas-Parejo, Greenwood:

Re: Carbon Dioxide.

Mr Pedro Navas-Perez addressed the Council to state that carbon dioxide is valuable for its' capacity to make various parts of life, such as plants and farm produce, thrive.

Mr Navas-Perez urged the City to put an end to "the farce" in relation to the approach to carbon emissions involved in the climate change strategy.

M Van Dyk, Connolly:

Re: Use of Glyphosate.

Ms Marietta Van Dyk expressed concerns over the spraying of glyphosate within the City of Joondalup, amidst a context of court cases in which individuals have attributed cancer to glyphosate exposure.

Ms Van Dyk questioned why the City continues to use glyphosate in every suburb, in areas where children run with bare feet. Ms van Dyk stated that she has footage of glyphosate being sprayed in proximity to Connolly Primary School.

Ms Van Dyk challenged the City to consider the adequate evidence and research that supports a stop to the carcinogenic spraying of glyphosate.

D Vincent, Joondalup:

Re: Freemasons.

Mr Daniel Vincent spoke of a potential conflict of interest, if any Elected Members of the Council are also freemasons, as an oath of allegiance to their secret society may conflict with the interests of residents. Mr Vincent insisted that if any individuals within the City are freemasons, this should be disclosed.

8 MOTIONS FOR THE ANNUAL GENERAL MEETING OF ELECTORS

The Mayor invited Electors to move motions and commenced by inviting those Electors who had submitted motions in writing to the City prior to the Annual General Meeting to come forward when called.

MOTION 1 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the City that all motions from electors this evening and at all future Annual Electors' Meetings be read aloud by the Presiding Member and displayed on the large screens in the Council Chambers, so as to ensure all attendees are able to fully understand the wording proposed and be clear about what they are voting on.

The Motion was Put and

CARRIED

Manager Strategic and Organisational Development left the Chamber at 6.24pm.

Cr Hamilton-Prime entered the Chamber at 6.26pm.

MOTION 2 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer from 2025 to schedule all Annual Electors' Meetings as stand-alone events, not held before another public meeting within the City of Joondalup or immediately after a public holiday.

The Motion was Put and

CARRIED

MOTION 3 – J Hope, Beldon

MOVED J Hope, SECONDED A Arrah that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to prepare a report on a proposed policy having regard to the following:

That all Indoor and Outdoor Events that are organised, supported and/or approved and funded by the City of Joondalup, where children under the age of 18 years are involved in, or have access to, be adherent to a Policy, made by the City of Joondalup where, and which includes all points below:

- 1 All organising and presenting staff (paid and voluntary) are to have current "Working with Children" Clearances;
- 2 No sexualised, inferred sexualised or politicised content in activities, presentations and/or in the materials (including books and videos) is to be used, as adult themes or inferred adult themes are not suitable for children, who have developing minds;

- 3 Presenters and staff (paid and voluntary) are to be of good character (no sexualised or politicised websites, all of which are unsuitable for children);
- 4 Presenters and staff (paid and voluntary) must have three professional "character references" to support their good character, thus proving to be good role models for our children.

AMENDMENT MOVED M Kwok, SECONDED J Grorud that the Motion be AMENDED to read as follows:

"That all Indoor and Outdoor Events that are organised, supported and/or approved and funded by the City of Joondalup, where children under the age of 16 years are involved in, or have access to, be adherent to a Policy, made by the City of Joondalup where, and which includes all points below:"

The Amendment was Put and

CARRIED

The Original Motion as Amended being:

That all Indoor and Outdoor Events that are organised, supported and/or approved and funded by the City of Joondalup, where children under the age of 16 years are involved in, or have access to, be adherent to a Policy, made by the City of Joondalup where, and which includes all points below:

- 1 All organising and presenting staff (paid and voluntary) are to have current "Working with Children" Clearances;
- 2 No sexualised, inferred sexualised or politicised content in activities, presentations and/or in the materials (including books and videos) is to be used, as adult themes or inferred adult themes are not suitable for children, who have developing minds;
- 3 Presenters and staff (paid and voluntary) are to be of good character (no sexualised or politicised websites, all of which are unsuitable for children);
- 4 Presenters and staff (paid and voluntary) must have three professional "character references" to support their good character, thus proving to be good role models for our children.

The Amended Motion was Put and

CARRIED

MOTION 4 – L Crawford, Duncraig

MOVED L Crawford, SECONDED P Navas-Parejo that the Electors of the City of Joondalup REQUEST that Council instructs the City to limit where possible, the use of wireless technology in council areas, where there are a lot of activities involving children and pregnant women, for example community centres and libraries.

The Motion was Put and

CARRIED

MOTION 5 - P Navas-Parejo, Greenwood

MOVED, P Navas-Parejo, SECONDED A Arrah that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to stop spending funds on further CCTV devices, software and/or systems, and consider the following:

- 1** That residents and ratepayers are under financial stress with increasing interest rates, increasing council rates, increasing fuel prices, energy prices, food prices and inflation to name a few;
- 2** That residents and ratepayers **DO NOT** want the City spending council rates on a civilian surveillance system that has not been proven to reduce or deter antisocial behaviour or crime;
- 3** That residents and ratepayers **DO NOT** want the City tracking vehicles through City roads, or storing any form of data relating to our vehicles, such as number plates, current location, distance travelled, carbon footprint, as this would be subject to potential hacks and other threats;
- 4** The Council **AGREES** instead to lower the council rates, which would be much more welcomed by its ratepayers.

AMENDMENT MOVED M Kwok, SECONDED M Van Dyk that an additional Part be **ADDED** to the Motion to read as follows:

“5 That the CEO investigates having fake cameras and lights to deter antisocial behaviour and consider passive surveillance while designing public areas to improve public safety for community members.”

The Amendment was Put and

CARRIED

The Original Motion as Amended being:

MOVED, P Navas-Parejo, SECONDED A Arrah that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to stop spending funds on further CCTV devices, software and/or systems, and consider the following:

- 1** That residents and ratepayers are under financial stress with increasing interest rates, increasing council rates, increasing fuel prices, energy prices, food prices and inflation to name a few;
- 2** That residents and ratepayers **DO NOT** want the City spending council rates on a civilian surveillance system that has not been proven to reduce or deter antisocial behaviour or crime;
- 3** That residents and ratepayers **DO NOT** want the City tracking vehicles through City roads, or storing any form of data relating to our vehicles, such as number plates, current location, distance travelled, carbon footprint, as this would be subject to potential hacks and other threats;
- 4** The Council **AGREES** instead to lower the council rates, which would be much more welcomed by its ratepayers;
- 5** That the Chief Executive Officer investigates having fake cameras and lights to deter antisocial behaviour and consider passive surveillance while designing public areas to improve public safety for community members.

The Amended Motion was Put and

CARRIED

Governance Officer left the Chamber at 6.47pm and returned at 6.54pm.

MOTION 6 - M Van Dyk, Connolly

MOVED M Van Dyk, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the City to ENSURE the option for cash payment is maintained in all City venues and facilities.

The Motion was Put and

CARRIED

MOTION 7 – M Norman, Sorrento

MOVED M Norman, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the City to develop a Cat Local Law (similar to that recently adopted by the City of Wanneroo) specifying the following:

- 1 Cat-prohibited natural areas;
- 2 That a cat found in natural areas can be seized and impounded by the City;
- 3 That the owner deemed to be committed of an offence, will have the relevant penalty applied.

The Motion was Put and

CARRIED

MOTION 8 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup MOVE that ratepayers be given the opportunity to ask additional questions and present additional motions without notice.

The Motion was Put and

CARRIED

Cr Hamilton-Prime left the Chamber at 7.04pm.

MOTION 9 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer that all motions from the Annual General Meeting of Electors this year, and in all future years, are addressed fully and separately with individual reports and are voted on separately when presented to Council.

The Motion was Put and

CARRIED

Cr Fishwick left the Chamber at 7.12pm.

MOTION 10 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer that in all future City of Joondalup Annual Reports ensure that a record is included from the Customer Service Feedback, which should include, at a minimum:

- 1** the number of compliments;
- 2** feedback and complaints provided through the customer feedback;
- 3** report on the outcomes of these figures in terms of the City's response to customer feedback.

The Motion was Put and

CARRIED

MOTION 11 – M Van Dyk, Connolly

MOVED M Van Dyk, SECONDED J Grorud that the Electors of the City of Joondalup **REQUEST** that Council instructs the City **DO NOT** duplicate services already provided by the State Government such as Immunisation Clinics.

The Motion was Put and

CARRIED

MOTION 12 – L Crawford, Duncraig

MOVED L Crawford, SECONDED J Hope that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to make a representation to the government to request that:

- 1** The Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) take the science on non-thermal biological effects of Radiofrequency Electromagnetic Radiation (RF-EMR) into consideration;
- 2** Develop a new RF standard which is divided into three categories with much lower maximum exposure levels than the current ARPANSA RF standard.

The Motion was Put and

CARRIED

Cr Fishwick entered the Chamber at 7.19pm.

MOTION 13 – M Norman, Sorrento

MOVED M Norman, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the City that any money budgeted for the Friends' Groups Special Purpose Grants that remains unallocated on 1st of May of each financial year:

- 1** Shall be made available for Friends' Groups (who have already received a grant of the annual prescribed maximum amount) to apply during May for additional funds so as to double their annual grant;
- 2** Any successful applicant shall be paid the additional funding requested, or a lesser amount depending on the number of applications received, by the end of the financial year.

The Motion was Put and

CARRIED

MOTION 14 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup **MOVE** that sufficient parts of Standing Orders be set aside to enable free and open discussion on any matter raised by electors without notice.

The Motion was Put and

CARRIED

Cr Kingston left the Chamber at 7.27pm.

MOTION 15 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to prepare a comprehensive program this year to phase out the use of glyphosate and other pesticides within the City of Joondalup. Making an incremental shift to non-chemical weeding methods, such as hydrothermal, manual and mechanical weeding, over the next three years.

The Motion was Put and

CARRIED

Cr Kingston entered the Chamber at 7. 29pm.

Cr O'Neill left the Chamber at 7. 33pm.

MOTION 16 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City to investigate replacing chemical weeding (excluding the use of hydrothermal) methods along laneways and pedestrian access ways with non-chemical weeding methods.

The Motion was Put and

CARRIED

Governance Coordinator left the Chamber at 7.36pm.

MOTION 17 – L Crawford, Duncraig

MOVED L Crawford, SECONDED J Grorud that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to make a representation to the Government requesting schools, especially kindergartens remain hard wired where possible, with wireless devices limited where possible and turned off when not in use.

The Motion was Put and

CARRIED

Cr O'Neill entered the Chamber at 7.38pm.

Governance Coordinator entered the Chamber at 7.38pm.

MOTION 18 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council significantly reduce the current maximum property value of \$900,000 that the Chief Executive Officer has delegated authority to dispose of under the current Delegated Authority Register, and that all property under consideration for disposal and valued greater than \$100,000 be reported to Council for review.

The Motion was Put and

CARRIED

Director Planning and Community Development left the Chamber at 7.41pm.

MOTION 19 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to ensure that the Annual Report is to be prepared and ready to be signed off by the Council before 31 December each year.

The Motion was Put and

CARRIED

Director Planning and Community Development entered the Chamber at 7.44pm.

MOTION 20 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup REQUEST that Council instructs the City to develop a Citywide Friends of PAWs group for interested residents who would like to participate in the care, planting and maintenance of their local PAWs, so that members may be covered under the City's own public liability insurance and supported by the City in this valuable work.

The Motion was Put and

CARRIED

Cr Raftis left the Chamber at 7.46pm.

Cr Vinciullo left the Chamber at 7.47pm.

MOTION 21 – L Crawford, Duncraig

MOVED L Crawford, SECONDED J Hope that the Electors of the City of Joondalup REQUEST that Council instructs the Chief Executive Officer to write to the Minister for Health with regard to the serious deleterious effects of fluoride in our drinking water, especially in children and pregnant women.

The Motion was Put and

CARRIED

Cr Vinciullo entered the Chamber at 7.52pm.

MOTION 22 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to establish with high priority a Management Plan for dealing with the asbestos and unexploded ordnance (UXO) currently buried at Pinnaroo Point and now being exposed due to coastal erosion and sea level rise.

The Motion was Put and

CARRIED

Cr Raftis entered the Chamber at 7.55pm.

MOTION 23 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer (CEO) to:

- 1** make public the CEO's current Key Performance Indicators (KPI's) within three months of the AGM of Electors' meeting;
- 2** to change the City's policy to ensure that all future contracts signed by the current, and future, CEO's of the City of Joondalup include publicly provided and accessible KPIs within one month of signing of the said contract.

The Motion was Put and

CARRIED

MOTION 24 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to **NOT REQUIRE** members of the public when speaking at a public meeting to state their full address, and to provide a system where this information can be verified prior to the commencement of the meeting, such as a confidential written register.

The Motion was Put and

CARRIED

MOTION 25 - L Crawford, Duncraig

MOVED L Crawford, SECONDED P Navas-Parejo that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to consider investing in a training program on 'Electromagnetic Fields Awareness' for key members of the City of Joondalup, particularly those involved in Planning and Development, Council Members and the Mayor. This would increase the City's knowledge base on current safety issues and how best to mitigate them, thereby minimising future harms and possibly even litigation.

The Motion was Put and

CARRIED

MOTION 26 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to establish a Public Notification Plan that deals with Algal Bloom outbreaks that recently closed Mullaloo Beach.

The Motion was Put and

CARRIED

MOTION 27 – B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council:

- 1 ENSURES** that any rates in the dollar rise is limited to no more than 0.1% in the coming year, due to the financial impact of interest rate rises and the general cost of living increases on the community;
- 2 NOTES** that any increases in Gross Rental Value (GRV) will have an increase in the Council rates required to be paid by ratepayers, and in the event that the rate in the dollar is also increased, it is likely to put enormous pressure on families who make up the largest ratepayer group within the City.

The Motion was Put and

CARRIED

MOTION 28 – M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to prepare and publish the Agenda for the Briefing Session at least five full days prior to the Briefing Session Meeting to allow residents and ratepayers sufficient opportunity to read it and prepare deputations.

The Motion was Put and

CARRIED

MOTION 29 - B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the City to expand the Waterwise verge garden program to:

- 1 ENCOURAGE** people to reduce water usage and plant native verge gardens;
- 2 INVESTIGATE** providing an annual selection of waterwise plants free to the community (as is undertaken in the Town of Victoria Park).

The Motion was Put and

CARRIED

MOTION 30 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer that the Council and Administration should generally not go on overseas trips at the expense of the ratepayers of the City of Joondalup.

The Motion was Put and

CARRIED

MOTION 31 - B Hewitt, Edgewater

MOVED B Hewitt, SECONDED M Kwok that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to report in all future Annual Reports all sources of income received by Council Members that are as a consequence of any of the following:

- 1 appointments to Regional Councils;
- 2 appointments to Development Assessment Panels;
- 3 appointments to the Western Australian Local Government Association;
- 4 appointments to any committees, boards, panels or any other body which are as a consequence of or in relation to a person holding the office of Council Member.

The Motion was Put and

CARRIED

MOTION 32 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to ensure that all administrative costs of the Special Area Rates (SARs) within the City of Joondalup, are passed onto the SARs in full, in addition to any operational costs which may already be charged to the SARs.

The Motion was Put and

CARRIED

Cr Pizzey left the Chamber at 8.28pm.

MOTION 33 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the Chief Executive Officer to make available to the ratepayers, through providing in the agenda or minutes of Council Meetings (both Briefing and Ordinary), answers to all questions that are taken on notice during Council Meetings (both Briefing and Ordinary). This is to include questions raised by both ratepayers and Elected Members.

The Motion was Put and

CARRIED

Cr Pizzey entered the Chamber at 8.31pm.

MOTION 34 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** that Council instructs the City:

- 1** to keep residents on the Pesticide Exclusion Register and Pesticide Use Notification Register without the need for annual re-registration;
- 2** **NOTES** the removal of the re-registration requirement, will prevent unnecessary anxiety if residents have forgotten to re-register in July.

The Motion was Put and

CARRIED

MOTION 35 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** Council to reconsider the proposed capital works project FNM2095 Mullaloo North Beach Connection and consider reallocating these funds to areas of higher need including the provision of low-key beachside fencing and signage to encourage the broader community that the coastal dune reserves are conservation areas with fragile and vulnerable ecosystems.

The Motion was Put and

CARRIED

Cr Hill left the Chamber at 8.37pm and returned at 8.39pm.

MOTION 36 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup **REQUEST** Council to direct the CEO to progressively revise the register of decisions to include archived decisions of Council for the City of Joondalup and Wanneroo and that an annual report be provided to Electors.

The Motion was Put and

CARRIED

MOTION 37 - M Sideris, Mullaloo

MOVED M Sideris, SECONDED B Hewitt that the Electors of the City of Joondalup in a move towards open and accountable government **DIRECTS** the Council to consider amending the City's ability to classify reports as confidential matters well beyond the deliberative period that Council requires to consider that matter before it.

The Motion was Put and

CARRIED

MOTION 38 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED J Grorud that the Electors of the City of Joondalup **REQUEST** that Council instructs the CEO to ensure information about fees, expenses and allowances in the annual financial statement are to be accurately reflected in the annual report as prescribed by s19BD of the *Local Government (Administration) Regulations 1996*.

The Motion was Put and

CARRIED

MOTION NO. 39 - M Kwok, Ocean Reef

MOVED M Kwok, SECONDED J Grorud that the Electors of the City of Joondalup **REQUEST** that Council instruct the City to resign membership of WALGA until WALGA has an independent forensic audit from the Office of the Auditor General and the report be published and made public.

The Motion was Put and

CARRIED

9 CLOSURE

2024 Annual Review of Delegations

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
1.1.6	Choice of Tender	To amend the wording to the Delegates Conditions, from "Authority to accept tenders valued up to \$500,000", to "Authority to accept tenders valued up to \$500,000 (excluding GST).	14	The amendment is to make it explicit that the value limit does not include any applicable GST.	Suggested for better clarity
1.1.15	Payments from Municipal Fund - Incurring liabilities and Making Payments.	Delegate Conditions – Inclusion of three new categories being: Category BB - limited to \$500,000 (\$550,000 including GST). Category DD – limited to \$50,000 (\$55,000 including GST). Category EE – limited to \$10,000 (\$11,000 including GST).	26	The addition of three new category payment thresholds being Category BB, DD and EE is proposed to accommodate inflation increases in prices/costs that have caused category/bracket creep.	Suggested for better efficiencies within Business Units.
1.1.23	Waiver of Fees and Granting of concessions	To remove the Facility Hire Subsidy Policy from the Register.	40	Based on a decision of Council – Policy was repealed at the meeting held on 16 August 2022 (CJ139-08/22).	The former Policy was replaced with the new Venue Hire Fees and Charges Policy.
1.1.23	Waiver of Fees and Granting of concessions	To remove the Conditions related to the Chief Executive Officer (00001) being; "Additional subsidies and waiver of hire fees under the Facility Hire Subsidy Policy limited to \$5,000 per request".	40	As the Facility Hire Subsidy Policy has been repealed this condition is no longer required.	The new Venue Hire Fees and Charges Policy allows for waiving of fees and charges; if Hirers are an incorporated association / or charity, and they can demonstrate they are experiencing financial

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
					hardship. The decision will be in accordance with terms and conditions.
1.1.24	Write Off of Monies	<p>A change to (CEO's) Delegates Conditions being a change in wording from "a. - individual items to \$20,000" to "a. - individual debtor amount to \$20,000 at time of write-off".</p> <p>A change to subdelegate conditions to:</p> <p>2. Manager Financial Services (00075) – Individual debtor amounts to \$5,000 at time of write-off.</p> <p>3. Manager Community Development and Library Services (000390) - Individual debtor amounts to \$500 at time of write-off.</p> <p>4. Coordinator Rating Services (00079) – Individual debtor amounts to \$100 at time of write-off.</p>	43	<p>Elected Members requested the City to clarify if the write off value in respect to the delegation was a cumulative value of items written off for any particular debtor. The proposed amendments to the conditions clarify and address this request.</p> <p>The subdelegate conditions of this delegation has remained unchanged for several years.</p> <p>In some cases, where agreement can be reached with a resident to waive certain costs, such as court fees and interest, any balance over \$50 currently needs to be authorised by senior management. Increasing the limit for Coordinator Rating Services (00079) to \$100 recognises the effect of inflation and growth in GRVs and rates.</p>	<p>The current wording is considered reasonable.</p> <p>The suggested amendments may increase the risk of operational inefficiency should there be debtor items recommended for write-off that cumulatively exceed the debtor amount thresholds per debtor.</p>
1.1.28	Private Works on, over or under Public Places	<p>Inclusion of the Function relating to the delegation being;</p> <p>1. Authority to grant permission or refuse permission to construct a specified</p>	48	The Private Works on, over or under Public Places was a new delegation as part of the 2023 Review, although there was an omission of the	For the delegation Function to be included in the Register.

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
		thing, on over, or under a specified public thoroughfare or public place that is local government property [ULP r.17(3)]. 2. Authority to impose conditions on permission including those prescribed in r.17(5) and (6) [ULP r.17(5)].		Function in the Register this change rectifies that omission.	
1.1.30	Declare Vehicle is Abandoned Vehicle Wreck	New Delegation – to provide Authority to: <ul style="list-style-type: none"> Declare that an impounded vehicle is an abandoned vehicle wreck [3.40A(4)]. 	50	This delegation will allow for disposal of declared abandoned vehicles such as abandoned trailers. It is suggested that the delegation be subdelegated to designated employees in Community Safety to improve organisational efficiencies.	Inclusion of additional delegation to align with the WALGA Delegation Register template. This delegation allows the City to Declare Vehicle's as Abandoned Vehicle Wrecks.
3.4.2	Dog Act 1976 – Dangerous Dog declared or Seized – Deal with Objection and Determine when to Revoke	New Delegation – to provide Authority to: <ul style="list-style-type: none"> consider and determine to dismiss or uphold an objection to the declaration of a dangerous dog. consider and determine to dismiss or uphold an objection to seizure of a dangerous dog. Revoke a declaration of a dangerous dog or revoke a notice to cause a dog to be destroyed. 	68	Inclusion of additional delegation to align with the WALGA Delegation Register template. This delegation reinforces that: an authorised officer of a local government can declare an individual dog to be a dangerous dog (declared). However, the same person cannot consider and decide on an objection (33F(6), 33G(4) and 33H(4)) or Revoke dangerous dog declarations or proposal to destroy dog (33H). this responsibility is to be delegated.	The City is currently revising procedures to support proposed delegated authority.
3.5.2	Food Act 2008 – Determine Compensation	New Delegation – to provide Authority to: <ul style="list-style-type: none"> to determine applications for compensation in relation to any item seized, if no contravention has been 	70	Ensures the correct delegation is provided to DPCD and MRS to consider applications for compensation.	Inclusion of additional delegation to align with the WALGA Delegation Register template

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
		<p>committed and the item cannot be returned [s.56(2)].</p> <ul style="list-style-type: none"> to determine an application for compensation from a person on whom a prohibition notice has been served and who has suffered loss as the result of the making of the order and who considers that there were insufficient grounds for making the order [s.70(2) and (3)]. 			relating to the ability to determine compensation.
3.5.3	Food Act 2008 – Prohibition Orders.	<p>New Delegation – to provide Authority to:</p> <ul style="list-style-type: none"> To serve a prohibition order on the proprietor of a food business in accordance with s.65 of the Food Act 2008 [s.65(1)]. to give a certificate of clearance, where inspection demonstrates compliance with a prohibition order and any relevant improvement notices [s.66]. to give written notice to proprietor of a food business on whom a prohibition order has been served of the decision not to give a certificate of clearance after an inspection [s.67(4)]. 	71	Ensures the correct delegation is provided to authorised officers to issue prohibition orders.	Inclusion of additional delegation to align with the WALGA Delegation Register template relating to the ability to deal with Prohibition Orders.

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
3.5.4	Food Act 2008 – Food Business Registrations.	New Delegation - to provide the Authority to: <ul style="list-style-type: none"> to consider applications and determine registration of a food business and grant the application with or without conditions or refuse the registration [s.11(1) and (5)]. to vary the conditions or cancel the registration of a food business [s.112]. 	72	Ensures the correct delegation is provided to issue food business registration certificates.	Inclusion of additional delegation to align with the WALGA Delegation Register template relating to consider Food Business Registrations.
3.5.5	Food Act 2008 – Debt Recovery and Prosecution	New Delegation - to provide the Authority to: <ul style="list-style-type: none"> to recover costs incurred in connection with the lawful destruction or disposal of an item (seized) including any storage costs [s.54(1)] and the costs of any subsequent proceedings in a court of competent jurisdiction [s.54(3)]. To institute proceedings for an offence under the <i>Food Act 2008</i> [s.125]. 	73	Ensures the correct delegation is provided to DPCD for recovering costs and instituting proceedings for prosecution.	Inclusion of additional delegation to align with the WALGA Delegation Register template relating to debt recovery and prosecution.
3.7.1	Local Planning Scheme No. 3 – Delegations – General	To consolidate Delegation 3.7.1 with 3.7.2. Reformat delegation for greater clarity. Various amendments to delegation and sub-delegation standards.	75	Separate delegations unnecessary. Avoid Council having to consider minor departures from requirements. Improve efficiency in sub-delegation process.	Amend function of delegation to clarify development applications to be determined by Council and relevant sections under Planning Development Regulations that are being delegated to CEO. Various amendments to sub-delegation standards as listed in document.

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
3.7.2	Local Planning Scheme No. 3 – Delegations – General	To remove delegation – Local Planning Scheme No. 3 Delegations – General, and consolidate into delegation 3.7.1.	82	Delegation 3.7.2 has been consolidated into delegation 3.7.1.	Delete delegation.
3.7.3	Planning and Development Act 2005 – Power as to Illegal Development	Change in numbering from 3.7.3 to 3.7.2.	84	An administrative change so that register structure can be maintained.	To proceed with the administrative change.
3.7.4	Planning and Development (Local Planning Schemes) Regulations 2015 – Determine Development Applications for 'Unlisted Use (Bicycle Hire)'. Regulations 2015 – Determine Development Applications for 'Unlisted Use (Bicycle Hire)'.	Change in numbering from 3.7.4 to 3.7.3.	85	An administrative change so that register structure can be maintained.	To proceed with the administrative change.
4.1.1	Amendments to the Parking Schemes.	Change any reference to the <i>City of Joondalup Parking Local Law 2013</i> to <i>City of Joondalup Parking Local Law 2024</i> .	87	Council adopted the <i>City of Joondalup Parking Local Law 2024</i> at the Council meeting held on 26 March 2024.	Updating the Delegation Register accordingly.
4.1.1	Amendments to the Parking Schemes.	To remove the Joondalup City Centre Car Parking for Commercial Development Policy from Register.	87	Based on a decision of Council – Policy was revoked at the meeting held 18 August 2020 (CJ118-08/20)	The Policy was revoked as the parking standards for commercial development are now specified in the Joondalup Activity Centre Plan, which was adopted in 2018, and therefore, the policy was no longer applicable.

DA No.	Affected Delegation	Change	Pg No. (Marked-up copy)	Rationale	Comment / Recommendation
4.1.1	Amendments to the Parking Schemes.	To remove the Dedicated Car Parking for Seniors and Parents with Prams Policy from Register.	87	Based on a decision of Council – Policy was repealed at the meeting held 22 August 2023 (CJ150-08/23).	The review of the Policy found that it has not influenced the provision of additional dedicated car parking bays and that there is limited statutory weight to enable any enforcement by the City.

Register of Delegation of Authority

City of Joondalup

INTRODUCTION

Register of Delegation of Authority

The Delegations of Authority contained within are made to Committees pursuant to Section 5.16 and to the Chief Executive Officer pursuant to Section 5.42 of the *Local Government Act 1995* (the Act) and, where listed, some of these functions are delegated by the Chief Executive Officer to City of Joondalup employees pursuant to Section 5.44 of the Act. All delegations made by the Council must be by an absolute majority decision.

Section 5.43 of the Act provides that the following are decisions that cannot be delegated to the Chief Executive Officer:

- Any power or duty that requires a decision of an absolute majority of the Council.
- Accepting a tender which exceeds an amount determined by the local government for the purpose of this paragraph.
- Appointing an auditor.
- Acquiring or disposing of any property valued at an amount exceeding an amount determined by the local government for the purpose of this paragraph.
- Any of the local government's powers under sections 5.98, 5.98A, 5.99 and 5.100 of the Act.
- Borrowing money on behalf of the local government.
- Hearing or determining an objection of a kind referred to in Section 9.5.
- The power under Section 9.49A (4) to authorise a person to sign documents on behalf of the local government.
- Any power or duty that requires the approval of the Minister or Governor.
- Such other duties or powers that may be prescribed by the Act.

The Act allows for the Chief Executive Officer to delegate any of their powers to another employee, this must be done in writing. The Act allows for the Chief Executive Officer to place conditions on any delegations if required.

A register of delegations, being this manual, relevant to the Chief Executive Officer and other employees is to be kept and reviewed at least once every financial year.

If a person is exercising a power or duty that they have been delegated, the Act requires them to keep necessary records to the exercise of the power or discharge of the duty. The written record is to contain:

- how the person exercised the power or discharged the duty;
- when the person exercised the power or discharged the duty; and
- the persons or classes of persons, other than council or committee members or employees of the local government, directly affected by the exercise of the power or the discharge of the duty.

In addition to delegations made in accordance with the *Local Government Act 1995*, a number of delegations are also made to the Chief Executive Officer, or directly to other officers in some instances, in accordance with the provisions of other legislation.

The aim of the delegated authority register is to assist with improving the time taken to make decisions within the constraints allowed by the relevant legislation. This is consistent with the City's commitment to a strong customer service focus.

Each instrument of delegation describes the function being delegated and the relevant statutory reference which is the source of power for the exercise of the function. Also included is a reference to related documents such as policies of the Council which may provide guidance in the exercise of the delegation.

This delegated authority register will be reviewed in accordance with the Act on an annual basis.

Register of Delegation of Authority

City of Joondalup

3.7 – PLANNING AND DEVELOPMENT ACT 2005

Delegation	3.7.1 LOCAL PLANNING SCHEME NO. 3 – DELEGATIONS - GENERAL
Head of power	PART 3. DELEGATIONS UNDER OTHER LEGISLATION
Delegator	Council
Express power to delegate	<i>Local Government Act 1995:</i> s. 5.42 (1) (b) Delegation of some powers and duties to CEO.
Express power or duty delegated	<i>Planning and Development (Local Planning Schemes) Regulations 2015:</i> Schedule 2 Deemed provisions for local planning schemes. Clause 82 Delegations by local government.
Function	<p>The following powers conferred or imposed on Council or the local government under the Scheme:</p> <ul style="list-style-type: none"> - a. the approval of an application for development approval for the purpose of a 'single house', or up to 5 'grouped dwellings', or any associated, ancillary or incidental development to a 'single house', 'grouped dwelling' or 'multiple dwelling' where: <ul style="list-style-type: none"> i. there have not been any objections to the application received; or the objection (s) received relates to matters that are not valid planning considerations for the subject application; or relate to elements of the proposal which meet the relevant deemed to comply requirements and/or development standard; or the proposal is amended or a condition imposed so elements the subject of the objection(s) meet the relevant deemed to comply requirement and/or development standards; and ii. the application is not required to be considered by the Joondalup Design Reference Panel; and iii. in the case of applications for development approval that require a Bushfire Attack Level assessment in accordance with <i>State Planning Policy 3.7 – Planning in Bushfire Prone Areas (SPP 3.7)</i> the development: <ul style="list-style-type: none"> a. has a Bushfire Attack Level of less than 40; and b. where the Bushfire Attack Level is 12.5, 19 or 29: <ul style="list-style-type: none"> i. is not a vulnerable land use as defined under SPP 3.7; and ii. complies with clause 6.5 of SPP 3.7; and iv. the Deemed to Comply requirements or Element Objectives of the <i>Residential Design Codes</i> and/or replacement Deemed to Comply requirements of the <i>Residential Development Local Planning Policy</i> or <i>Development in Housing Opportunity Areas Local Planning Policy</i> have been satisfied (where applicable), and the development satisfies any applicable standards and requirements of the Scheme, any applicable structure plan, activity centre plan or local development plan and all other applicable local planning policies; or v. the Local Housing Objectives of the <i>Residential Development Local Planning Policy</i> have been satisfied; or

vi. ~~in the case of applications for development approval where the development does not meet the Deemed to Comply requirements of the *Residential Design Codes* or the requirements of any applicable standards or requirements of the Scheme, any applicable structure plan, activity centre plan, local development plan, or local planning policy, provided:~~

a. ~~the plot ratio of the development does not exceed the requirement of Table 2.1 of the *Residential Design Codes*;~~

b. ~~the building setbacks of development, including retaining walls, are not less than those specified under the Deemed to Comply requirements or Table 2.1 of the *Residential Design Codes*, or any applicable structure plan, activity centre plan, local development plan or local planning policy by more than 1.5 metres;~~

c. ~~any outbuilding is not in the primary or secondary setback area stipulated in Table 1 or Table 2.1 of the *Residential Design Codes* or any applicable structure plan, activity centre plan, local development plan or local planning policy;~~

d. ~~the height and/or length of boundary wall(s) does not exceed the amounts set out in the Deemed to Comply Requirements or Table 2.1 of the *Residential Design Codes* or any applicable structure plan, activity centre plan, local development plan or local planning policy by more than 25% of those requirements, and where there are boundary walls to no more than two (2) separate boundaries. Where the application is for all grouped dwellings on a parent lot, boundary walls to internal lot boundaries will not be included in the two wall calculation;~~

e. ~~the height of the proposed fill or retaining wall within the primary street setback area does not exceed 1.2 metres above natural ground level; and~~

f. ~~the height of non-visually permeable fencing within the primary street setback area does not exceed 1.2 metres above natural ground level (as measured from the midpoint of the verge) for more than 25% of the frontage of the lot.~~

b. ~~the approval of an application for development approval for the purposes of a class of use listed in Table 3 Zoning Table, Table 3a Whitford Activity Centre Zoning Table and Table 3b Joondalup Activity Centre Zoning Table of the Scheme other than a 'single house', 'grouped dwelling', 'multiple dwelling', or any associated, ancillary or incidental development where:~~

i. ~~there have not been any objections to the application received; and~~

ii. ~~the application is not required to be considered by the Joondalup Design Reference Panel; and~~

iii. ~~in the case of applications for development approval that require a Bushfire Attack Level assessment in accordance with *State Planning Policy 3.7 – Planning in Bushfire-Prone Areas (SPP 3.7)* the development:~~

Register of Delegation of Authority

City of Joondalup

	<p>a. has a Bushfire Attack Level of less than 40; and</p> <p>b. where the Bushfire Attack Level is 12.5, 19 or 29:</p> <p>i. is not a vulnerable land use as defined under SPP 3.7; and</p> <p>ii. complies with clause 6.5 of SPP 3.7; and</p> <p>iv. the development satisfies any applicable standards and requirements of the Scheme, any applicable structure plan, activity centre plan or local development plan and all applicable local planning policies; with the exception of the following:</p> <p>v. setback requirements for patio(s), verandah(s), shade sail(s), portico(s), outbuilding(s) or retaining wall(s) not greater than 1.2 metres above natural ground level in height; or</p> <p>vi. the shortfall in car parking is not increasing from that previously approved.</p> <p>Authority to make determinations and decisions under Part 7, Part 8, Part 9 and Part 9A of Schedule 2 (Deemed Provisions) of the <i>Planning and Development (Local Planning Schemes) Regulations 2015</i>.</p>

DRAFT

INTRODUCTION

Register of Delegation of Authority

The Delegations of Authority contained within are made to Committees pursuant to Section 5.16 and to the Chief Executive Officer pursuant to Section 5.42 of the *Local Government Act 1995* (the Act) and, where listed, some of these functions are delegated by the Chief Executive Officer to City of Joondalup employees pursuant to Section 5.44 of the Act. All delegations made by the Council must be by an **absolute majority** decision.

Section 5.43 of the Act provides that the following are decisions that cannot be delegated to the Chief Executive Officer:

- Any power or duty that requires a decision of an absolute majority of the Council.
- Accepting a tender which exceeds an amount determined by the local government for the purpose of this paragraph.
- Appointing an auditor.
- Acquiring or disposing of any property valued at an amount exceeding an amount determined by the local government for the purpose of this paragraph.
- Any of the local government's powers under sections 5.98, 5.98A, 5.99 and 5.100 of the Act.
- Borrowing money on behalf of the local government.
- Hearing or determining an objection of a kind referred to in Section 9.5.
- The power under Section 9.49A (4) to authorise a person to sign documents on behalf of the local government.
- Any power or duty that requires the approval of the Minister or Governor.
- Such other duties or powers that may be prescribed by the Act.

The Act allows for the Chief Executive Officer to delegate any of their powers to another employee, this must be done in writing. The Act allows for the Chief Executive Officer to place conditions on any delegations if required.

A register of delegations, being this manual, relevant to the Chief Executive Officer and other employees is to be kept and reviewed at least once every financial year.

If a person is exercising a power or duty that they have been delegated, the Act requires them to keep necessary records to the exercise of the power or discharge of the duty. The written record is to contain:

- how the person exercised the power or discharged the duty;
- when the person exercised the power or discharged the duty; and
- the persons or classes of persons, other than council or committee members or employees of the local government, directly affected by the exercise of the power or the discharge of the duty.

In addition to delegations made in accordance with the *Local Government Act 1995*, a number of delegations are also made to the Chief Executive Officer, or directly to other officers in some instances, in accordance with the provisions of other legislation.

The aim of the delegated authority register is to assist with improving the time taken to make decisions within the constraints allowed by the relevant legislation. This is consistent with the City's commitment to a strong customer service focus.

Each instrument of delegation describes the function being delegated and the relevant statutory reference which is the source of power for the exercise of the function. Also included is a reference to related documents such as policies of the Council which may provide guidance in the exercise of the delegation.

This delegated authority register will be reviewed in accordance with the Act on an annual basis.

DELEGATIONS

PART 1. LOCAL GOVERNMENT ACT 1995

1.1 COUNCIL TO CEO

Delegation	1.1.1 ACTIVITIES ON PRIVATE LAND
Head of power	PART 1. LOCAL GOVERNMENT ACT 1995

Subdelegates	<p>Coordinator Planning Approvals (00112) Coordinator Urban Design and Policy (00111) Director Planning and Community Development (00105) Manager Planning Services (00108) Manager Regulatory Services (01093) Principal Urban Planner (01313) Senior Urban Planner (00115) Senior Urban Planner (00122) Senior Urban Planner (00125) Senior Urban Planner (00511) Senior Urban Planner (00609) Senior Urban Planner (00778) Senior Urban Planner (01479)</p>
Subdelegate conditions	<p>1. The following may be determined by a Principal Urban Planner (01313), Coordinator Planning Approvals (00112), Coordinator Urban Design and Policy (00111) and a Senior Urban Planner (00122, 00115, 00125, 00609, 00778, 01479, 00511):</p> <ul style="list-style-type: none"> a. Approval of an application for development approval for the purpose of up to five (5) 'grouped dwellings', or any associated ancillary or incidental development to a 'single house', 'grouped dwelling' or 'multiple dwelling' where: <ul style="list-style-type: none"> i. There have not been any objections to the application received; or the objection(s) received relate to matters that are not valid planning considerations for the subject applications; or relate to elements of the proposal which meet the relevant deemed-to-comply requirements and/or development standard; or the proposal is amended or a condition imposed so elements the subject of the objection(s) meet the relevant deemed-to-comply requirement and/or development standards; and ii. The application is not required to be considered by the Joondalup Design Reference Panel; and iii. In the case of applications for development approval that require a Bushfire Attack Level assessment in accordance with <i>State Planning Policy 3.7 - Planning in Bushfire Prone Areas (SPP3.7)</i> the development: <ul style="list-style-type: none"> a. has a Bushfire Attack Level of less than 40; and b. where the Bushfire Attack Level is 12.5, 19, or 29: <ul style="list-style-type: none"> i. is not a vulnerable land use as defined under SPP 3.7; and ii. complies with clause 6.5 of SPP3.7; and iv. The deemed-to-comply requirements or element objectives of <i>Residential Design Codes</i> and/or replacement deemed-to-comply requirements of the Residential Development Local Planning Policy or Development in Housing Opportunity Areas Local Planning Policy have been satisfied (where applicable), and the development satisfies any applicable standards and requirements of the Scheme, any applicable structure plan or local development plan and all other applicable local planning policies; or v. The Local Housing Objectives of the Residential Development Local Planning Policy have been satisfied; or vi. In the case of applications for development approval where the development does not meet the deemed-to-comply requirements of the Residential Design Codes or the requirements of any applicable standards or requirements of the Scheme, any applicable structure plan, local development plan or local planning policy provided: <ul style="list-style-type: none"> a. the setbacks of any garage, carport or hardstand car parking area are not less than those specified under the deemed-to-comply requirements of the Residential Design Codes, or any applicable structure plan, activity centre plan, local development plan or local planning policy by more than 3.0 metres; b. any outbuilding is not in the primary or secondary street setback

- area stipulated in Table 1 of the *Residential Design Codes*, or any applicable structure plan, local development plan or local planning policy, unless the outbuilding is a detached garage;
- c. the height and/or length of boundary wall(s) does not exceed the amounts set out in the deemed-to-comply requirements of the *Residential Design Codes* or any applicable structure plan, local development plan or local planning policy by more than 25% of those requirements, and where there are boundary walls to no more than two (2) separate boundaries and are located behind the street setback line. Where the application is for all grouped dwellings on a parent lot, boundary walls to internal lot boundaries will not be included in the two wall calculation;
 - d. the height of the proposed fill or retaining wall within the primary street setback area does not exceed 1.2 metres above natural ground level; and
 - e. the height of non visually permeable fencing within the primary street setback area on average does not exceed 1.5 metres above natural ground level; and

- b. the approval of an application for development approval for the purposes of a class of use (other than a grouped or multiple dwelling, or any associated, ancillary or incidental development where:
 - i. there have not been any objections to the application received; and
 - ii. the application is not required to be considered by the Joondalup Design Review Panel; and
 - iii. the development satisfies any applicable standards and requirements of the Scheme, any applicable structure plan, local development plan and all applicable local planning policies with the exception of the following:
 - a. setback requirements for patio(s), verandah(s), portico(s), outbuilding(s) or retaining wall(s) not greater than 1.2 metres above natural ground level in height; and/or
 - b. the shortfall in car parking is not increasing from that previously approved.
- c. Applications for signage.

2. The following applications may be determined by a Principal Urban Planner (01313), Coordinator Planning Approvals (00112) or Coordinator Urban Design and Policy (00111):

- a. The approval of any application for development approval for a 'single house', or up to five (5) 'grouped dwellings' or any associated, ancillary or incidental development where between one (1) and three (3) objections not referred to in 1a(i) above; and
- b. In the case of applications for development approval where the development does not meet the deemed-to-comply requirements of the *Residential Design Codes* or the requirements of any applicable standards or requirements of the Scheme, any applicable structure plan, local development plan or local planning policy provided:
 - i. The height and/or length of boundary wall(s) does not exceed the amounts set out in the deemed-to-comply requirements of the *Residential Design Codes* or any applicable structure plan, local development plan or local planning policy by more than 50% of those requirements, and where there are boundary walls to no more than three (3) separate boundaries. Where the application is for all grouped dwellings on a parent lot, boundary walls to internal lot boundaries will not be included in the two wall calculation;
 - ii. The height of the proposed fill or retaining wall within the primary street setback area does not exceed 1.5 metres above natural ground level; and

	<p>c. The approval of any application for development approval for the purposes of a class of use or signage (other than a grouped or multiple dwelling, or any associated, ancillary or incidental development where:</p> <ul style="list-style-type: none">i. There has been between one (1) and (3) objections received not referred to in 1a(i) above; andii. The application was not required to be considered by the Joondalup Design Review Panel; andiii. The development satisfies any applicable standards and requirements of the Scheme, any applicable structure plan, local development plan and all applicable local planning policies with the exception of the following:<ul style="list-style-type: none">a. Setback requirements for patio(s), verandah(s), portico(s), outbuilding(s) or retaining wall(s) not greater than 1.2 metres above natural ground levels in height; orb. The shortfall in car parking is not increasing from that previously approved; orc. Hours of operation for Home Business applications.
Policy	Not applicable.

THE PURPOSE OF THIS REPORT

Corporate Business Plan Quarterly Reports are presented to the Council each quarter and are published on our website. The reports provide information on achievements and performance against the quarterly milestones outlined in our 5-Year Corporate Business Plan. This plan is our medium-term planning document which contains the services, projects and activities which have been developed in response to the vision, goals and outcomes of our 10-Year Strategic Community Plan: *Joondalup 2032*.

This report shows all of the listed non-capital projects and activities and indicates whether the project/activity is on time and on budget at the end of each quarter. A commentary is also provided on exactly what has been achieved. Note that reporting on our 5-Year Capital Works Program is undertaken through the Capital Works Program Quarterly Reports.

INTEGRATED PLANNING AND REPORTING FRAMEWORK

Corporate Business Plan Quarterly Reports and Capital Works Program Quarterly Reports sit within an Integrated Planning and Reporting Framework which builds in Informing, Resourcing, Planning and Reporting requirements to ensure transparency and evidence of planned achievements.

A SHARED VISION FOR THE FUTURE

Our 10-Year Strategic Community Plan, *Joondalup 2032*, outlines our commitment to achieving a shared vision for the future which is operationalised through the 5-Year Corporate Business Plan:

The City in 2032 has a strong focus on sustainability, liveability, active lifestyles and friendly social interactions. We have a healthy environment, with protected bushland, marine ecosystems and accessible parks and green spaces. We are an environmentally-aware and socially-responsible City. We are a vibrant place where people want to live, work and play, and where people can find everything they need locally.

The City in 2032 caters for every stage of life. People feel welcome here and have a clear sense of belonging. We live in high-quality housing in attractive neighbourhoods which have excellent transport linkages and connectivity. We are multi-generational and multicultural; a place where everyone feels connected and safe.

We celebrate and adopt technology and innovation. We are a hub for education and state-of-the-art health facilities, and we are an active advocate for health and other community services. The City in 2032 is internationally connected — we are a global-facing city, with local amenity, and a powerful sense of community.

A GLOBAL CITY: BOLD, CREATIVE AND PROSPEROUS

KEY THEMES

The 5-Year Corporate Business Plan is separated in to the five key themes of *Joondalup 2032*. These key themes each include an overarching goal and a series of outcomes which reflect the feedback you gave us through the Shaping Your Local Community consultation initiative.

CORPORATE BUSINESS PLAN AT A GLANCE

Our Corporate Business Plan outlines the services, plans, strategies and frameworks, capital works programs, projects and activities, and key priorities for 2023/24 under each of the goals and outcomes of our 10-Year Strategic Community Plan — *Joondalup 2032*. Below is our Corporate Business Plan at a glance which shows these listed in summary.

SERVICES

The following shows how the services we deliver are aligned to the key themes of *Joondalup 2032*. Further details, including the full costings, are provided under each key theme section of this plan.

COMMUNITY	<ul style="list-style-type: none">• Community development• Community safety, compliance and education• Craigie Leisure Centre management• Cultural events, visual arts and arts development• Emergency management	<ul style="list-style-type: none">• Health and environmental services• Immunisation• Libraries• Recreation services

KEY PRIORITIES FOR 2023/24

ATTACHMENT
12.11.1

The following non-capital projects and activities are those we have identified as key priorities for 2023/24. The quarterly milestones for these projects and activities are provided under each key theme section of this plan.

Community		
Community Safety Plan A new plan that addresses community safety initiatives across the City, including parking management, animal management, CCTV, graffiti removal and community amenity. The plan ensures our community feels connected and safe through direct service provision, as well as supporting and encouraging local organisations and community-led activities.	Public Art Masterplan and Strategy A new masterplan and strategy to define the principles and priorities for public art in the City and guide resources and funding towards relevant public art projects that enhance the City's built environment, distinctive natural assets, significant Indigenous sites, historic locations and key destinations.	Reconciliation Action Plan A new plan which will set out the City's commitment to reconciliation with Aboriginal and Torres Strait Islander peoples.

Environment		
Climate Change Plan A plan which guides the City's planning for the future impacts of climate change across a range of areas relevant to local government, including infrastructure, health services, water management, emergency management, and the natural environment.	Environment Strategy A strategy that outlines the City's commitment to conserving, enhancing and rehabilitating the City of Joondalup's natural assets to ensure the long-term protection of the environment for future generations.	Local Government Waste Plan — City of Joondalup This plan guides the City's waste management practices to ensure increased diversion from landfill. The plan focuses on improving practices and providing the groundwork to inform the long-term planning for waste.

Place		
Burns Beach café development A café development on City-managed Crown land within the Burns Beach Coastal Node which will incorporate a two-storey food and beverage facility and be leased to commercial operators.	Heathridge Park Masterplan A masterplan for Heathridge Park that includes the investigation of two options: replacing/refurbishing the existing facilities; or the rationalisation of the existing community facilities into a single new multi-purpose facility.	Integrated Transport Strategy A new strategy to guide multi-modal transport planning and inform strategic policy, advocacy and infrastructure decisions in the City over the next 10 years.
Joondalup City Centre Development — Boas Place Investigations into future opportunities for the development of Boas Place in the Joondalup City Centre to incorporate a variety of land uses.	Local Planning Strategy review A review of the City's Local Planning Strategy, including the Local Housing Strategy and Local Commercial Strategy, to ensure the ongoing applicability of the stated strategic direction for land use planning and development.	Ocean Reef Marina Construction of a world-class waterfront precinct providing recreational, tourism, residential and boating facilities. This project is being managed by DevelopmentWA with support and contributions provided by the City.

Economy			
Economic Development Strategy	Event attraction	Place activation	Joondalup Innovation Precinct
A strategy to guide economic development activities within the City by providing support to local business, stimulating investment, and driving economic growth.	Attract and support significant events that are unique to Joondalup to enhance its image as an attractive destination for visitors, tourists and business.	City and community-led activities and projects that support the activation of spaces and places that are important to the wellbeing of the community and economy.	The development of a Joondalup Innovation Precinct for new and emerging technology and industries to support urban robotics, a digital innovation centre and the education and health precincts.

Leadership			
10-Year Strategic Financial Plan	Advocacy Framework	Core system replacement project	Customer service centralisation
A high-level document that outlines the City's approach to delivering infrastructure and services to the community in a financially-sustainable and affordable manner.	A framework that provides a strategic approach to advocacy activities to ensure evidenced-based decision making, greater stakeholder engagement, and the development of processes to maximise opportunities for support and investment into the City.	A core information technology solution for the City which would include a customer relationship management system, online customer portal, finance, and asset management system.	A project to centralise the City's main customer service functions to achieve greater organisational efficiency and a higher rate of first point of contact resolution.

QUARTER HIGHLIGHTS

COMMUNITY

Australia Day citizenship ceremony

The City of Joondalup's annual Australia Day citizenship ceremony the largest Australia Day citizenship ceremony in 2024. The ceremony took place on the grounds of Joondalup Resort where around 300 residents received their Australian citizenship. Hon Roger Cook MLA, the Western Australian Premier attended the event, which was compered by Channel 7's Rick Ardon. Sharon Wood-Kenney, Chair of the City's Reconciliation Action Plan Community Reference Group, delivered cultural immersion activities. The event received media coverage online, in print, radio and on television.

Joondalup Festival

The Joondalup Festival ran 2–22 March 2024, with three weeks of colour, light and sound throughout the City. The festival attracted thousands of community members to the region, with the 2024 program featuring more than 30 different shows, special events and community workshops. A highlight was the giant illuminated puppets of Electric Kingdom at Hillarys Boat Harbour. More than 120 artists, 40 event staff, 180 choir members and numerous stakeholders across 14 locations worked on the festival.

Discovery Outbound Program for Over 50s

The Joondalup Libraries' Discovery Outbound Program launched in the quarter. The program is a reimagining of the Platinum Adventure Program. Discovery Outbound events are held fortnightly, transporting participants to some of Perth's cultural and social events and places of interest.

ENVIRONMENT

2024 World Green City Awards

The Climate Change Strategy 2014–2019 has been internationally recognised as a finalist for the 2024 World Green City Awards. Run by the International Association of Horticultural Producers, these are the only global awards for cities where plants and nature are the core focus. The City's entry was amongst the highest scoring in the "Living Green for Water" category thanks to our Leafy City, Winter Tree Planting, and Waterwise Verge programs and use of smart irrigation systems. The City is one of only two Australian finalists nominated for the awards. The winners are notified in September 2024.

Gold Waterwise Council

The City was re-endorsed as a Gold Waterwise Council for 2022/23, and Craigie Leisure Centre was re-endorsed as a Gold Waterwise Aquatic Centre. These awards recognise, at a State level, The City's sustainable water management and commitment to building waterwise communities.

PLACE

ATTACHMENT

12.11.1

Integrated Parking and Compliance Management System

The City saw advances in the delivery of a new Integrated Parking and Compliance Management System in the quarter, with the tender approved by Council at its March meeting. This new system will deliver enhanced and modernised technology to replace various parking infrastructure and systems that have reached, or are close to reaching, their end of life. Contemporary parking management systems, such as the one selected for the City, will provide a greater range of choice for purchasing and managing parking for users, including the use of a mobile application, as well as providing a more efficient service through ticketless parking.

ECONOMY

Our Town

On 10 March, the City of Joondalup was the featured destination on “Our Town”, a television program airing Australia-wide on 7Two. The feature demonstrated why Joondalup is one of the fastest growing areas in Western Australia and a must-visit destination when it comes to business and tourism. Showcasing the natural and built environment of the district, the feature aimed to attract residents, business opportunities, visitors, and investors; providing great insight into what our City has to offer and sharing it with the nation.

LEADERSHIP

Canberra Advocacy visit

Mayor Hon Albert Jacob JP, Cr Rebecca Pizzey, the Chief Executive Officer, and the Manager of Economic Development and Advocacy spent three days in Canberra representing the City of Joondalup. The representatives lobbied Ministers and Shadow Ministers, Senators, Members of Parliament and advisers involved with infrastructure, transport, regional development and local government. They also visited the Cyber Security Cooperative Research Centre, the Indonesian Embassy, and the Indian High Commission, and inspected Canberra’s newest medical precinct and hospital expansion.

1. COMMUNITY

OUR GOAL

We have a vibrant cultural scene, and our community is friendly, welcoming, caring and supportive. We are prepared for emergencies and feel strong and resilient. We encourage and support local organisations and community-led activities, and feel connected and safe in our neighbourhoods.

YOUR OUTCOMES

1-1 Healthy and safe

You feel healthy and safe in your local community.

1-2 Inclusive and connected

You enjoy local services and programs that cater for different ages, abilities and backgrounds.

1-3 Active and social

You enjoy quality local activities and programs for sport, learning and recreation.

1-4 Artistic and creative

You celebrate, support and participate in art and events in your local area.

1-5 Cultural and diverse

You understand, value and celebrate the City's unique Aboriginal and other diverse cultures and histories.

Outcome 1-1 Healthy and safe

Community Funding Program A funding program consisting of 2 rounds intended for the delivery of community-initiated projects, programs and events that benefit the City of Joondalup community.		
Q1 Advertise round 1 of the Community Funding Program and deliver information workshops.	Advertised round 1 of the Community Funding Program in July 2023 via the City's eNewsletters and social media. Provided workshops for prospective applicants on 24 July 2023 and 26 July 2023.	✓
Evaluate the submissions received and determine the preferred recipients.	Evaluated the 43 submissions received during round 1 in September 2023. Recommendations for small grants will be provided to the Chief Executive Officer for consideration, with large grant recommendations to be considered by Council at the 28 November 2023 Council meeting.	✓
Q2 Provide recommendations to Council for approval.	Provided Council with recommendations for the large grants, which were approved at the 12 December 2023 Council meeting. Small grants were approved by the Chief Executive Officer and all applicants were notified in the quarter.	✓
Issue the funding agreements and payments for successful round 1 applicants.	Funding agreements were issued to all successful applicants, with the majority of small grants paid. Large grants were resolved by Council on 12 December 2023, and therefore, due to timing issues, the payment of executed funding agreements will occur in quarter 3.	✓
Q3 [milestone from previous quarter] Issue the funding agreements and payments for successful round 1 applicants.	Issued funding agreements and payments to all successful applicants, with the exception of 1 application which was subject to modification through a Notice of Motion at the February 2024 Council meeting.	✓
Advertise round 2 of the Community funding Program and deliver information workshops.	Advertised round 2 of the Community Funding Program in January and February via the City's eNewsletters and social media. Provided workshops for prospective applicants on 30 January 2024 and 5 February 2024.	✓
Evaluate the submissions received and determine the preferred recipients.	Evaluated the 20 submissions received during round 2 of the Community Funding Program in March 2024. Recommendations for small grants will be provided to the Chief Executive Officer for consideration, with large grant recommendations to be considered by Council at the 28 May 2024 Council meeting.	✓
Q4 Provide recommendations to Council for approval.		
Issue the funding agreements and payments for successful round 2 applicants.

Q4 Present the draft Local Heritage Survey to Council seeking endorsement.		

2. ENVIRONMENT

OUR GOAL

We have a beautiful natural environment which we care for and protect. We demonstrate best-practice in sustainability and environmental management. Our community is actively involved in conservation and sustainability initiatives and we share responsibility for preserving our natural assets for future generations.

YOUR OUTCOMES

2-1 Managed and protected

You value and enjoy the biodiversity in local bushland, wetland and coastal areas.

2-2 Clean and sustainable

You are supported to minimise waste and live sustainably in a clean environment.

2-3 Responsible and efficient

You benefit from a responsible and efficient use of natural resources.

2-4 Resilient and prepared

You understand and are prepared for the impacts of climate change and natural disasters.

Outcome 2-1 Managed and protected

You value and enjoy the biodiversity in local bushland, wetland and coastal areas.

Coastal Infrastructure Adaptation Plan A plan which guides the City's response to the future impacts of climate change along the coastline. The plan aims to ensure the City is adequately prepared to adapt to current and future coastal hazards, and to ensure the risk to City of Joondalup infrastructure and assets is minimised.		
Q1 Implement scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026.	Implemented the following scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026 in the quarter: <ul style="list-style-type: none"> • Liaised with and engaged consultants to conduct the City's 2023/24 Coastal Monitoring Program. • Liaised with and engaged contractors to conduct the City's 2023/24 Sand Bypassing Program. 	✓
Q2 Implement scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026.	Implemented the following scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026 in the quarter: <ul style="list-style-type: none"> • Completed photo monitoring and survey profiles for October 2023 as part of the City's 2023/24 Coastal Monitoring Program. • Completed the City's 2023/24 Sand Bypassing Program by transporting 10,000m³ from Sorrento Beach to Hillarys Beach. • Engaged consultant to commence concept design of maintenance works funded by the Coastal and Estuarine Risk Mitigation Program. 	▲
Q3 Implement scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026.	Implemented the following scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026 in the quarter: <ul style="list-style-type: none"> • Completed photo monitoring for March 2024 as part of the City's 2023/24 Coastal Monitoring Program. • Liaised with an external consultant to progress the concept design for maintenance works funded by the Coastal and Estuarine Risk Mitigation Program. 	✓
Q4 Implement scheduled actions from the Coastal Infrastructure Adaptation Plan 2018–2026.		

MILESTONE	COMMENT	ATTACHMENT STATUS
Coastal Hazard Risk Management and Adaptation Plan A plan developed under State Planning Policy 2.6 which identifies areas and assets that could potentially be impacted by coastal erosion and inundation hazards due to storm events and projected sea level rise. The plan provides recommendations and actions for how the City can respond and adapt to these coastal hazards.		
Q1 Undertake community consultation on the draft Coastal Hazard Risk Management and Adaptation Plan.	Undertook community consultation on the draft Coastal Hazard Risk Management and Adaptation Plan in the quarter. The outcomes of the consultation will be presented to Council in quarter 2.	✓
Q2 Present the draft Coastal Hazard Risk Management and Adaptation Plan to Council seeking endorsement.	Presented the community consultation outcomes of the draft Coastal Hazard Risk Management and Adaptation Plan to Council at the 12 December 2023 Council meeting. Council resolved to prepare a new Coastal Hazard Risk Management and Adaptation Plan.	✓
Commence implementation of the Coastal Hazard Risk Management and Adaptation Plan.	Implementation was not commenced in the quarter as the draft Coastal Hazard Risk Management and Adaptation Plan was not endorsed by Council.	✓
Q3 [milestone removed CJ015-02-24 refers]		
Q4 [milestone removed CJ015-02-24 refers]		
[additional milestone CJ015-02-24 refers] Present a revised project approach to Elected Members.		

3. PLACE

OUR GOAL

We have well-planned and attractive suburbs and streetscapes, supported by a range of integrated transport options. Our urban landscapes are connected, useable and accessible. A high standard of liveability is enjoyed by our community who can access quality facilities and public open spaces.

YOUR OUTCOMES

3-1 Connected and convenient

You have access to a range of interconnected transport options.

3-2 Well-planned and adaptable

You enjoy well-designed, quality buildings and have access to diverse housing options in your neighbourhood.

3-3 Attractive and leafy

You have access to quality public open spaces and enjoy appealing streetscapes.

3-4 Functional and accessible

You have access to quality community facilities that are functional and adaptable.

Outcome 3-1 Connected and convenient

Explore development opportunities for land within the Marina that is owned or managed by the City.	Continued to explore development opportunities for land within the marina as part of negotiations with DevelopmentWA and in accordance with the Development Agreement.	✓
Present reports to Elected Members on the progress and status of the Marina as required.	Presented a Project Status Report to the Major Projects and Finance Committee at the 25 March 2024 meeting.	✓
Q4 Provide support to DevelopmentWA and undertake agreed activities to progress the development of the Marina as per the Development Agreement.		
Provide feedback and technical guidance to progress the necessary approvals for the development of the Marina.		
Explore development opportunities for land within the Marina that is owned or managed by the City.		
Present reports to Elected Members on the progress and status of the Marina as required.		
Ocean Reef Marina commercial site development business case A business case to evaluate options for developing commercial facilities owned by the City. The facilities will be located on the Club Facilities Lot, a piece of land transferred back to the City.		
Q1 Present the business case to Council seeking endorsement.	The Ocean Reef Marina commercial site development business case has been prepared and reviewed by the City and DevelopmentWA. It has been agreed between the City and DevelopmentWA to pause the project for now, pending the appointment of the Marina Town Centre Proponent, to ensure that the City's commercial development is in alignment with the Town Centre. It is expected that the proponent will be appointed in quarter 2, so the business case will be reviewed in quarter 3. It is projected that a business case will be presented to Council seeking endorsement in quarter 4.	✓
Q2		

MILESTONE	COMMENT	ATTACHMENT STATUS
Q3 [additional milestone CJ231-11/23 refers] Provide the business case to DevelopmentWA and Town Centre proponent for review.	No further progress on the project in the quarter due to external delays. The City is awaiting confirmation from DevelopmentWA to discuss the project with the Town Centre proponent. It is anticipated that the business case will be presented to the proponent in quarter 4, should DevelopmentWA provide confirmation.	✓
Q4 [milestone from quarter 1] Present the business case to Council seeking endorsement.		
Ocean Reef Sea Sports Club building redevelopment Assistance provided to DevelopmentWA in the procurement and construction of the Ocean Reef Sea Sports Club building as part of the Ocean Reef Marina development.		
Q1 Provide ongoing support and assistance through the procurement and construction process in conjunction with DevelopmentWA, Ocean Reef Sea Sports Club and associated consultants.	Provided ongoing support and assistance through the procurement and construction process in the quarter, including participation in the tender assessment panel, chaired by DevelopmentWA, to procure a builder for the construction of the Ocean Reef Sea Sports Club and Marine Rescue Whitfords/Marina Manager facilities.	✓
Q2 Provide ongoing support and assistance through the procurement and construction process in conjunction with DevelopmentWA, Ocean Reef Sea Sports Club and associated consultants.	Continued to provide ongoing support and assistance through participation in a value engineering exercise and cost planning review process, to identify opportunities for savings in the proposed building design for the Ocean Reef Sea Sports Club.	✓
Q3 Provide ongoing support and assistance through the procurement and construction process in conjunction with DevelopmentWA, Ocean Reef Sea Sports Club and associated consultants.	Continued to provide ongoing support and assistance in the value engineering exercise, and review of submitted documentation, to work towards the finalisation of the building design for the Ocean Reef Sea Sports Club.	✓
Q4 Provide ongoing support and assistance through the procurement and construction process in conjunction with DevelopmentWA, Ocean Reef Sea Sports Club and associated consultants.		

4. ECONOMY

OUR GOAL

We are a global facing city with a prosperous and resilient economy. Our City is home to diverse industries that generate a wide-range of local job opportunities. We encourage creativity and innovation, and we support opportunities to build the City's brand as a popular business and tourism destination.

YOUR OUTCOMES

4-1 Prosperous and local

You feel supported to grow your business in the City.

4-2 Innovative and confident

You are attracted to the City's unique characteristics and potential and feel confident in investing.

4-3 Appealing and welcoming

You welcome residents, and local and international visitors to the City.

Outcome 4-1 Prosperous and local

You feel supported to grow your business in the City.

Q4 Implement scheduled actions from the Joondalup City Centre Place Activation Plan 2022 for the quarter.			

LEADERSHIP

OUR GOAL

We have a diverse elected body that represents, promotes and reflects the composition of our community. Our Council and workforce are accountable and transparent and make balanced decisions based on sound, professional advice. Quality services are delivered by our highly-skilled and effective workforce.

YOUR OUTCOMES

5-1 Capable and effective

You have an informed and capable Council backed by a highly-skilled workforce.

5-2 Proactive and represented

You are confident that the City is advocating on your behalf for initiatives that benefit the community.

5-3 Engaged and informed

You are able to actively engage with the City and have input into decision-making.

5-4 Responsible and financially-sustainable

You are provided with a range of City services which are delivered in a financially responsible manner.

Outcome 5-1 Capable and effective

MILESTONE	COMMENT	ATTACHMENT STATUS
Strategic Community Reference Group A reference group that provides input to Council on matters of significant community interest and strategic initiatives. The group consists of 12 community representatives, 2 youth representatives (aged 16–24 years) and 4 Elected Members.		
Q1 Conduct meetings of the Strategic Community Reference Group in accordance with the work plan.	Conducted the 31 July 2023 meeting of the Strategic Community Reference Group on the development of a new City of Joondalup Public Art Masterplan and Strategy.	✓
Review the Terms of Reference for the next term of the Strategic Community Reference Group	Reviewed the Terms of Reference for the next term of the Strategic Community Reference Group (2024–2025). The revised Terms of Reference will be presented to Council in quarter 2.	✓
Q2 Present a report to Elected Members at the October Council Meeting noting the feedback from Strategic Community Reference Group members and seeking support for any changes to the group's structure/functioning.	<ul style="list-style-type: none"> Presented the report to establish the 2024–2025 Strategic Community Reference Group, including the revised Terms of Reference at the 28 November 2023 Council meeting where the group was re-established, and the revised Terms of Reference were endorsed. A Feedback Outcomes Report has been prepared; however, it was considered more appropriate to provide the report to Council with the Annual Work Plan at the 27 February 2024 Council meeting, as the feedback form was based on the group's meeting content, not the structure and functioning. 	✓
Commence process for appointing the new Strategic Community Reference Group members.	The process for appointing the new Strategic Community Reference Group members commenced in the quarter. The nomination period for Community and Youth Representatives to the 2024–2025 Strategic Community Reference Group ran from 30 November 2023 to 14 December 2023.	✓
Present the expressions of interest for membership to the Strategic Community Reference Group to Council seeking endorsement.	Expressions of interest for membership to the 2024–2025 Strategic Community Reference Group were not presented to Council seeking endorsement as the close-off date for expressions of interest was later than expected on 14 December 2023. The nominations for Community and Youth Representatives have been collated and will be presented to Council for selection at the 27 February 2024 Council meeting.	✓
Present the draft work plan for 2024 to Council seeking endorsement.	Did not present the draft work plan for 2024 to Council seeking endorsement in the quarter, as the close-off date for expressions of interest was later than expected on 14 December 2023. The draft work plan is in development and will be presented to Council at the 27 February 2024 meeting.	✓

MILESTONE	COMMENT	ATTACHMENT 12.11.1 STATUS
Q3 [milestone from previous quarter] Present a report to Elected Members at the October Council Meeting noting the feedback from Strategic Community Reference Group members and seeking support for any changes to the group's structure/functioning.	The Feedback Outcomes Report was not presented to Elected Members in the quarter, as the comments from 2022–2023 Strategic Community Reference Group members indicated that no changes to the group's structure and functioning were required.	✓
[milestone from previous quarter] Present the expressions of interest for membership to the Strategic Community Reference Group to Council seeking endorsement.	The expressions of interest for membership to the Strategic Community Reference Group as Community and Youth Representatives were presented to Council for selection at the 27 February 2024 Council meeting. Council appointed 2 Community Representatives from each of the 6 wards, and 3 Youth Representatives from the district.	✓
[milestone from previous quarter] Present the draft work plan for 2024 to Council seeking endorsement.	The draft Strategic Community Reference Group Work Plan 2024 was presented to Council seeking endorsement at the 27 February Council meeting. Council endorsed the 2024 work plan, subject to amendments to timeframes for the meetings.	✓
Conduct meetings of the Strategic Community Reference Group in accordance with the work plan.	No meetings were scheduled in the quarter.	✓
Q4 Conduct meetings of the Strategic Community Reference Group in accordance with the work plan.		
Customer satisfaction survey A biennial telephone survey of the City's residents conducted by an independent consultant to measure satisfaction with City services.

MILESTONE	COMMENT	ATTACHMENT STATUS
Q3 [milestone from previous quarter] Appoint an external consultant to develop a Request for Tender document to undertake the organisational review/administrative efficiency assessment.	Report to appoint an external consultant to develop a Request for Tender document was presented to the Council meeting held in February 2024. Council resolved to refer the item back to the Chief Executive Officer to provide further options for conducting an organisational review, including external scoping.	✓
[milestone from previous quarter] Commence drafting of a Request for Tender document to present to Elected Members.	Did not commence drafting a Request for Tender as Council declined to appoint an external consultant.	✓
[additional milestone CJ231-11/23 refers] Undertake a workshop with Elected Members to develop the Request for Tender document to undertake the organisational review/administrative efficiency assessment.	Did not undertake a workshop with Elected Members as Council declined to appoint an external consultant.	✓
[additional milestone CJ231-11/23 refers] Present the Request for Tender document to Council for endorsement.	Did not present the Request for Tender document to Council as Council declined to appoint an external consultant.	✓
Q4 [additional milestone CJ231-11/23 refers] Appoint an external consultant to undertake the organisational review/administrative efficiency assessment.		
[additional milestone CJ231-11/23 refers] Commence the organisational review/administrative efficiency assessment.

COMMUNITY CONSULTATION OUTCOMES REPORT

Draft Iluka–Burns Beach Foreshore Reserve Management Plan

CONTENTS

OVERVIEW	3
STAKEHOLDERS	4
CONSULTATION MATERIALS	5
RESPONSE RATE	8
DEMOGRAPHICS	9
OUTCOMES	10
APPENDIX	13

OVERVIEW

The community was invited to provide feedback on the City of Joondalup's draft Iluka-Burns Beach Foreshore Reserve Management Plan. The City collected a total of 15 valid submissions throughout the 22-day advertised consultation period from 25 January 2024 to 15 February 2024.

Stakeholders directly engaged in this consultation included:

- Burns Beach Residents Association Inc
- City of Wanneroo
- Department of Biodiversity, Conservation and Attractions
- Department of Fire and Emergency Services
- Department of Planning, Lands and Heritage
- Friends of North Ocean Reef/Iluka Foreshore
- Iluka Homeowners Association

Respondents were asked to review the draft Iluka-Burns Beach Foreshore Reserve Management Plan and provide feedback. A total of 3 identified stakeholders and 12 individual community members provided submissions.

There was a wide variety of comments received. Common themes across the submissions included:

- Requests to continue funding the work of environmental friends' groups.
- Support for the management and preservation of conversation areas.
- Specific requests for updates to information in the draft Plan.

STAKEHOLDERS

A total of 7 stakeholders were directly engaged by the City of Joondalup. Stakeholders identified included:

- Environmental/friends' groups (1)
 - Friends of North Ocean Reef/Iluka Foreshore
- Resident/ratepayer groups (2)
 - Burns Beach Residents Association Inc
 - Iluka Homeowners Association
- Other local governments (1)
 - City of Wanneroo
- State government agencies (3)
 - Department of Biodiversity, Conservation and Attractions
 - Department of Fire and Emergency Services
 - Department of Planning, Lands and Heritage

A letter was also sent to the Member for Burns Beach to advise of the consultation should their constituents have any questions on the draft Plan or how to provide feedback.

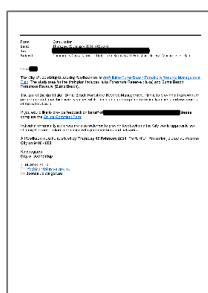

Additional stakeholders, including interested residents and ratepayers, were also indirectly engaged by the City via the consultation materials described below.

CONSULTATION MATERIALS

Resident/ratepayer groups and Friends of North Ocean Reef/Iluka Foreshore were sent emails on 25 January 2024 advising them of the consultation and directing them to provide feedback using the Online Comment Form. These stakeholders were also encouraged to promote the consultation and the Online Comment Form to their members and networks.

Letters were sent to State Government agencies, the City of Wanneroo, and the Member for Burns Beach advising them of the consultation and directing them to provide feedback using the Online Comment Form.

Email to Friends of North Ocean Reef/Iluka Foreshore and to resident/ratepayer groups (see Appendix 1 for full):

Letters to State Government agencies, the City of Wanneroo and the Member for Burns Beach (see Appendix 2–4 for full):

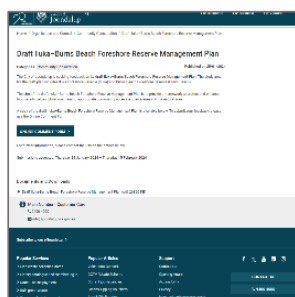

Online Comment Form (see Appendix 5 for full):

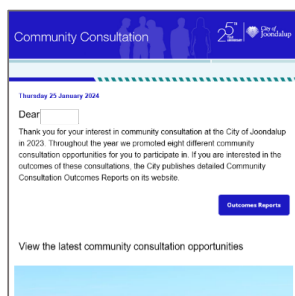

In addition to directly contacting identified stakeholders via post and email, the City advertised the consultation to other community members via the following means:

- Webpage linked through the “Community Consultation” section of the City’s website visible from 25 January 2024 to 15 February 2024.
- Item published in the Community Consultation eNewsletter emailed to subscribers on 25 January 2024.
- Items published in the Joondalup Voice insert of the *PerthNow Joondalup* community newspaper and emailed to subscribers of the Joondalup Voice eNewsletter on 25 January 2024 and 8 February 2024.
- Facebook post published through the City’s Facebook account on 25 January 2024.

Community Consultation webpage of the City’s website (see Appendix 6 for full):

Community Consultation eNewsletter (see Appendix 7 for full):

Joondalup Voice item in *PerthNow Joondalup* community newspaper, and Joondalup Voice eNewsletters (see Appendix 8–11 for full):

Social media posts (see Appendix 12 for full):

RESPONSE RATE

The City collected a total of 15 valid responses throughout the 22-day advertised consultation period. Submissions were considered valid if they contained full contact details and were submitted within the advertised timeframe. This data is shown in the table below.

	Invited to comment	Response received	Response rate
Responses received by stakeholder type:	N	N	%
Environmental/friends' groups	1	1	100.0%
Friends of North Ocean Reef/Iluka Foreshore*	1	1	100.0%
Resident/ratepayer groups	2	0	0.0%
Burns Beach Residents Association Inc	1	0	0.0%
Iluka Homeowners Association	1	0	0.0%
Other local governments	1	1	100.0%
City of Wanneroo	1	1	100.0%

OUTCOMES

QUESTION: "Please provide your feedback on the draft Iluka-Burns Beach Foreshore Reserve Management Plan"

Respondents were asked to provide their feedback about the draft Iluka-Burns Beach Foreshore Management Plan. The verbatim responses from individual community members are provided below. The responses from identified stakeholders are provided in full in the Appendix as follows:

- Joondalup Community Coast Care Forum Inc and Friends of North Ocean Reef-Iluka Foreshore (Appendix 13)
- City of Wanneroo (Appendix 14)
- Department of Biodiversity, Conservation and Attractions (Appendix 15)

Please provide your feedback on the draft Iluka-Burns Beach Foreshore Reserve Management Plan (N = 12) [†]
<p>As a resident here for over [- -] years, we experienced a bushfire here in [- -] where residents had to go down to the beach to escape and it was frightening. I am very concerned about the type of bush that was planted side and behind our property. In the last few years they grew fast and spread and the height is approximately 3 meters tall and spreading. The previous native bushes were very low approximately 1 meter and NONE were planted close to the houses. The fire break is too small at 3 meters. The same goes for houses at [- -], [- -], [- -], [- -], [- -] and [- -] Third Avenue Burns Beach. Fire break management needs to be looked at in this area. Please note, I sent through an online consent form already, but would like you to use this one.</p> <p>[multiple responses]</p> <p>Hello Re Burns Beach Foreshore Plan As A resident who has Resided here for over [- -] years and Experienced Bush Fire here in [- -] and Residents Had to go Down to Beach to Escape I am very concerned about the type of Bushes behind and side of our Residence. 3 meters is not enough for Fire Break. The same goes for House Adjacent Numbers [- -], [- -], [- -], [- -], [- -]</p> <p>[multiple responses]</p> <p>Re Burns Beach foreshore plan. As a resident who has Resided here for over [- -] years and experienced BUSH FIRES HERE in [- -] and as Residents we had to go down to the Beach to Escape. I am very concerned About the New Type of Bushes Planted behind and Side of our Residence 3 Meters is not enough for a fire break, The same goes for the houses Adjacent Numbers [- -], [- -], [- -], [- -], [- -].</p> <p>Fire Management. Houses [- -], [- -], [- -], [- -], [- -], [- -], [- -], [- -], [- -], [- -] Avenue, Burns Beach should be included in the Fire Management Plan as the Native Flora and Fauna of the Foreshore Reserve, is very close to these properties.</p> <p>Address the issue of uncontrolled cats, both domestic and feral, in and around the Iluka-Burns Beach Foreshore Reserve and local natural parks in the City. Also address the feral foxes and rabbits that also pose a threat to wildlife. No more destruction of Bush Forever Sites, the City needs to support legislating Bush Forever Sites (BFE) to counter potential land acquisition by developers. Preserving these sites helps maintain biodiversity, contributing to the overall health of the local environment. Many native species rely on these areas as their natural habitat. By preserving Bush Forever Sites, we ensure that these species have a safe and undisturbed space to thrive, supporting the balance of local ecosystems. Acknowledge and support the commendable efforts of the volunteer Friends groups working with the City's understaffed Natural Environment Team. There is a need for additional funding and staffing to complement their work and provide more substantial support for these dedicated volunteers.</p>

[†] Words that may identify respondents or contain offensive language have been removed and replaced with square brackets, ie [- -]. No alterations have been made to spelling/grammar.

I have not read the Management Plan in full. My family regularly walk along the pathway both in a northerly and southerly direction as well as along the beach in places. We always enjoy the flora and fauna and birdlife as well as the views across the ocean. The only suggestion I could make would be to see if the city could offer more support to the volunteer groups as they seem to do wonderful job.

I feel environmental protection should be the most important factor for any decision. Too many decisions are made for commercial reasons. Please look after our environment for future generations.

Thank you for the opportunity to comment of the draft Iluka Burns Beach Foreshore Management Plan. I have been a member of Friends of [- - -] and committee member of [- - -] since [- - -]. I am currently one of the [- - -] of Friends of [- - -]. I value the work done by the City's Natural Areas staff in protecting biodiversity and appreciate the complexity of managing bushland in urban areas. Below are a few concerns and comments I have regarding the draft plan :

1. Aboriginal Heritage

I am concerned that local knowledge of Mooro country, available in the City of Joondalup publication, Joondalup Mooro Boodjar, is not included.

2. European Heritage

- I have family ties to Iluka in New South Wales and would like to see consultation the people of the Bandjalang nation as to the appropriate way of recognising the use of their language. There is no mention of the WWII 10th Light Horse Regiment patrols along the coast from Scarborough to Moore River as recorded by Joondalup Library-

Interview with Wally Cooper [sound recording - cd] : 10th Light Horse in Wanneroo Cooper, Wally 1996

3. Climate Change

In my opinion there needs to be more research into increasing resilience of biodiversity in the face of a changing climate. I see a real need for greater efforts in community education to bring about the urgent changes in human behaviour needed to address climate change.

4. Biodiversity Management

*- The flora list appears to need work, species are missing and some taxon names are not current
- Polyphagous Shot Hole Borer is not mentioned, the current quarantine area boundary is at the southern end of Bush Forever Site 325 and potential host species occur in the reserve.*

- I would like to see the Being Weedwise brochure updated to include recently emerging weeds such as Golden Crown Beard and Bridal Creeper and the website links corrected (2 of the 3 links did not work when I attempted to follow links on the online brochure).

- I have observed many reptiles and a Quenda killed by cyclists on the shared path. This threat of injury or death from bicycle strike to fauna is not addressed in the plan.

- I have observed that the newly installed lighting at picnic shelters at Iluka (not shown in Figure 28) draw a large number of invertebrates from the reserve. Artificial lighting is a widespread sensory pollutant that can have extensive ecological consequences across levels of biological organisation ranging from the organism to the ecosystem.

- The number of invasive species is understated. There is no mention of the invasive snail species that are impacting fauna, particularly the uncommon native snail species, and vegetation of the reserve

- I see a real need for greater community education around biodiversity conservation. I so often see widespread lack of understanding of the impacts of humans on the natural environment and poor understanding of natural processes

- I would like to see greater support for natural areas friends groups and recognition of their role in conserving biodiversity

- I have long been concerned by the damage caused by the trampling of vegetation that occurs during the Abalone fishing season. As this activity is now concentrated at the northern end of Bush Forever Site 325 I am concerned about potential trampling of the small Marianthus paralias population

- I would like to see greater collaboration with universities on all aspects of biodiversity conservation research, especially threatened species conservation, ecosystem restoration, behaviour change to protect natural areas and increasing resilience of biodiversity to climate

[continues]

change

- I would like to see more weed control undertaken after fires.

- Much of the aerial photography in the plan is outdated and I would like to see more recent imagery used.

4. Management Actions

- I support the management actions but am concerned by the item "Investigate Planting Trees...". There is no definition of "local", many native species have the potential to negatively impact vegetation communities when planted in areas they do not occur naturally.

- I would like to see the adoption of the SERA "National standards for the practice of ecological restoration in Australia" in all restoration works undertaken.

I recently spent considerable time submitting my response to a similar "Consultation" about potential changes to the regulations regarding "parking on verges". As I have in the past, my response was pertinent, thoughtful and constructive. Regrettably I received a reply letter asking me if I would like to submit a reply, and at short notice. My time is obviously much more valuable to me, and of no account to the council. As such, this is my reply. Eventually I may find the time and a councillor who will take this matter up on my behalf, if your office has not taken this matter up with me. Respectfully [- - -] ps I have assumed you have still have records of the incident I refer to.

If I'm honest I'm not entirely sure what you're proposing? And as a community consultation document this should be clearer. The document isn't clear what the objectives are. If I have deduced correctly you are seeking to reduce weeds, reduce feral activity and improve outcomes for flora and fauna. Not reduce the land any further and you're acknowledge that more litter bins are needed and perhaps bikes should ride so fast along the path due to their ongoing injuring of reptiles? If this is correct - well done and I support! If not, I give up - and I'll move to Wannaroo eventually where they seem to be protecting their green land, with more care than Joondalup

There is a lot of information about the natural environment and the importance of maintaining it which is fantastic. However, there is still significant development being proposed along the Iluka-Burns Beach foreshore which negates all the good intentions of maintaining the natural environment. We should no longer be building along the beach, we know the predicted erosion problems, and thanks to the Coastal hazard report, we know what the preferred mitigation strategies are. If the community wants to maintain the natural coast they need to forego, restaurants, cafes and function centres that disrupt the flow between natural areas and brings in both pollutants and domestic animals. Natural, pristine coastline needs to be exactly that. Secondly, the Ocean Reef Marina in its current size and predicted housing development is not included in this report, therefore it is outdated and not a true representation of the state of our foreshore. This report should be updated to include this development and its effect on the Iluka/Burns Beach foreshore which is predicted to be significant.

I would like you to address the issue of surfers climbing over the coastal path fence to access the surf off the area close to Burns Beach Cafe. Would it be possible to create an access area, like a gap in the fence or for the Rangers to enforce the clearly signposted no access requirement to preserve the foreshore.

101 pages of claptrap. Surely you can condense it into something more readable

It provides full and comprehensive report on findings. The management plan seems to take a low interference and monitor approach, which feels appropriate for the conservation area. Whilst it touches on community and school education this seems to have a lack of tangible actions that the city can be held to account over.

Subject: Community Consultation — Draft Iluka–Burns Beach Foreshore Reserve Management Plan

Dear [REDACTED]

The City of Joondalup is seeking feedback on its [draft Iluka–Burns Beach Foreshore Reserve Management Plan](#). The study area for the draft plan includes Iluka Foreshore Reserve (Iluka) and Burns Beach Foreshore Reserve (Burns Beach).

The aim of the draft Iluka–Burns Beach Foreshore Reserve Management Plan is to provide a framework to protect and enhance biodiversity values whilst maintaining appropriate community access and awareness of the natural area.

If you would like to provide feedback on behalf of [REDACTED] please complete the [Online Comment Form](#).

Individual community members are also welcome to provide feedback and the City would appreciate you sharing the consultation information with your members and networks.

All feedback must be received by **Thursday 15 February 2024**. For further information, please contact the City on **9400 4000**.

Kind regards,
City of Joondalup

Request to be informed:

Community consultation assists Council in deliberating and then making decisions on certain matters. The analysis from this consultation will be provided to Council to assist them in their decision-making role first at a Briefing Session and then at a Council meeting. Deputations can be made at Briefing Sessions by appointment and questions and public statements can be presented at Council meetings.

☐ I would like to be informed via email when this consultation will be presented at a Briefing Session and Council meeting
Please ensure your email address is provided below

Draft Iluka–Burns Beach Foreshore Reserve Management Plan

The City of Joondalup is seeking feedback on its draft Iluka–Burns Beach Foreshore Reserve Management Plan. The study area for the draft plan includes Iluka Foreshore Reserve (Iluka) and Burns Beach Foreshore Reserve (Burns Beach).

(continues...)

The aim of the draft Iluka–Burns Beach Foreshore Reserve Management Plan is to provide a framework to protect and enhance biodiversity values whilst maintaining appropriate community access and awareness of the natural area.

To view the draft plan and provide feedback, please click 'Have Your Say' below.

Submissions accepted: Thursday 25 January 2024 — Thursday 15 February 2024.

[Have your say](#)

Draft Local Heritage Survey

The City of Joondalup is seeking feedback on its draft Local Heritage Survey. A Local Heritage Survey (previously called a Municipal Heritage Inventory) is a list of places which, in the opinion of a local government, are, or may become, culturally significant to the local community.

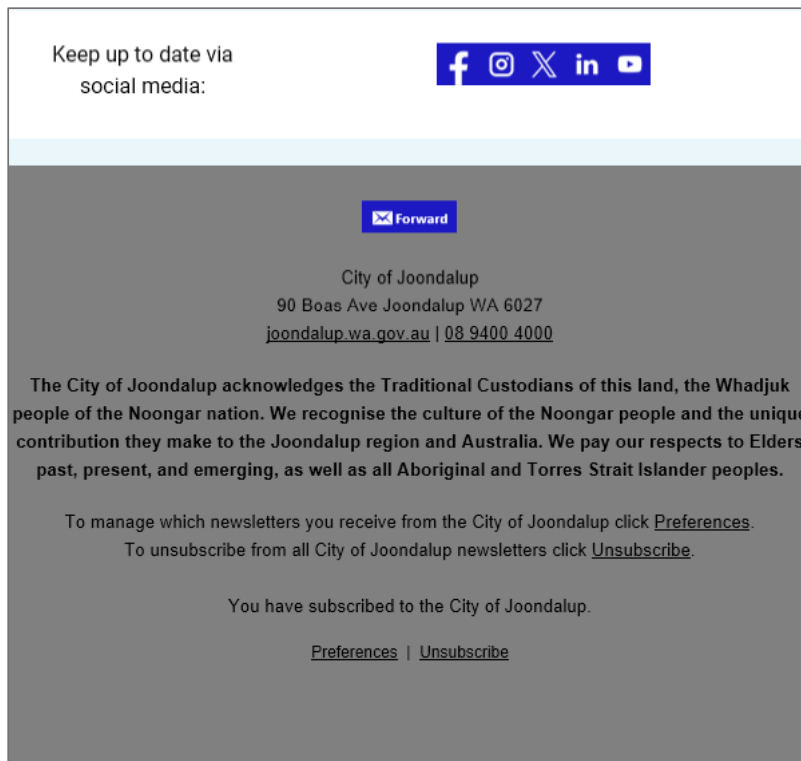

The City collected nominations from the community in March–April 2023. These nominations were then analysed by consultants, Element Advisory, and form the basis of the draft Local Heritage Survey. The consultants have also provided recommendations for places to be included in the City's Heritage List.

To view the draft Local Heritage Survey and provide feedback, please click 'Have Your Say' below.

Submissions accepted: Thursday 25 January 2024 — Thursday 15 February 2024.

25 January 2024

25TH YEAR ANNIVERSARY

City of Joondalup

COUNCILLOR'S COLUMN – CR JOHN CHESTER

South-East Ward News

Kingsley's Legana Park and Greenwood's Kanagra Park will each get new play spaces as part of the City's 2023/24 Capital Works program.

The park upgrades will include the replacement of ageing playground infrastructure, extension of the footpath networks and installation of mulched garden beds.

The Legana Park upgrade is scheduled for completion in April with the Kanagra Park project expected to be finished the following month.

Also in Greenwood, road resurfacing works, incorporating kerb replacement and storm water upgrades, are scheduled for Morrell Court, Elias Court and Oleaster Way over the coming weeks.

Kingsley to host bike comp!

Shepherds Bush Park in Kingsley will host a bike competition for 11-25-year-olds on **Saturday 24 February**, as part of the City's annual BMX, Skate and Scooter series.

The competition will take place at the park's popular pump and jump track from **3.00pm – 5.00pm**. Registration is from **2.00pm**.

Competitions will also be held at Kinross Skate Park on **Saturday 17 February** and at Mirror Park in Ocean Reef on **Saturday 2 March**.

Reclassification in works

In December 2023, Joondalup Council adopted an amendment to the *City of Joondalup Local Planning Scheme No. 3* that could result in about 30 hectares of bushland being reclassified from Public Open Space to Environmental Conservation reserve.

The reclassification would offer these natural areas greater protection from future development.

Many of these 31 areas of land have biodiversity and conservation values and form significant ecological links.

Council meeting dates

The times and dates for Council meetings have been set for 2024.

They are **Tuesday 27 February, Tuesday 26 March, Tuesday 23 April, Tuesday 28 May, Tuesday 25 June, Tuesday 23 July, Tuesday 27 August, Tuesday 17 September, Tuesday 22 October, Tuesday 19 November and Tuesday 10 December**.

All meetings will commence at **6.30pm**. The August meeting will be held at **12noon** allowing school students to attend.

Special meeting of Council

A Special Meeting of Council will be held in the Council Chamber on **Wednesday 31 January, from 6.00pm**.

The purpose of this meeting is for Council to consider the 2022-23 Annual Report and Financial Report. A date for the Annual General Meeting of Electors will also be set.

Premier attraction

Western Australian Premier Roger Cook will offer a congratulatory address at tomorrow's City of Joondalup Australia Day Citizenship Ceremony at Joondalup Resort, where about 300 people, from more than 40 different countries of origin, will be granted citizenship.

The ceremony is one of the biggest of its kind across the Perth metropolitan area.

One of the highlights will be the presentation of the City's 2024 Community Citizen of the Year Awards in the categories of Citizen of the Year, Youth Citizen of the Year, Senior Citizen of the Year and Active Citizenship – Group/Event.

Sorrento Surf Life Saving Club Facility - Redevelopment Project

The City is planning to redevelop the Sorrento Surf Life Saving Club facility on West Coast Drive, Sorrento.

The redevelopment will include the demolition of the existing facility and construction of a new surf club facility; public amenities; passive recreation areas; additional car parking; and a commercial café/restaurant.

A copy of the redevelopment plans and frequently asked questions document can be viewed on the City's website at joondalup.wa.gov.au

For further information, please contact the City on **9400 4000** or via email on info@joondalup.wa.gov.au

25TH YEAR ANNIVERSARY

City of Joondalup

MAYOR'S COLUMN – HON. ALBERT JACOB

Motoring fest back on grid
The Tyrepower Joondalup Festival of Motoring (JFOM) roars back to life in May 2024, six months after the Mariginiup-Wanneroo bushfires led to the event's last-minute postponement.

The two-day festival of speed will be staged in the Joondalup City Centre on **Saturday 4 and Sunday 5 May**. The free family-friendly program will feature static vehicle displays across the event site, activations, food vans, bars and music. The revised line-up also incorporates a new element, the JFOM Trash or Treasure Car Jumble where attendees can explore a range of automotive wonders.

The highlight for many will be Sunday's Joondalup City Sprint, where motorists, in cars of all shapes and sizes, take on a challenging 2.2km circuit in a time-trial format.

For updated event information, visit jfom.com.au

Joondalup's 2024 Citizens of the Year
The City's Community Citizens of the Year were announced at our Australia Day Citizenship Ceremony on **Friday 26 January**. Congratulations and thanks to these selfless and inspiring members of our community:

2024 City of Joondalup Community Citizen of the Year, Catherine Kolomyjek.
2024 Community Youth Citizens of the Year, Harry and Tom Linehan.
2024 Senior Citizen of the Year, Russell "Nev" Maw.
2024 Active Citizenship for Community Group or Event of the Year, Fostering Hope Australia.

Have your say!
The City is seeking feedback on its draft *Iluka-Burns Beach Foreshore Reserve Management Plan* and draft *Local Heritage Survey*.

The draft *Iluka-Burns Beach Foreshore Reserve Management Plan* provides a framework to protect and enhance biodiversity values of the area, while maintaining appropriate community access.

A *Local Heritage Survey* is a list of places which, in the opinion of a local government, are, or may become, culturally significant to the local community.

Submissions to both consultations can be made at joondalup.wa.gov.au. The public comment period for both closes on **Thursday 15 February**.

Tonight's the night to party
Tonight, the City of Joondalup hosts its premier concert event at Joondalup Resort.

The 2024 Valentine's Concert features Australian singing superstars Paulini and Tim Campbell, accompanied by the Perth Symphony Orchestra, who will take us back to the heady days of the late-90s – the era when our City was formed.

With more event coaches than ever to get you to and from the concert, it's a great opportunity to leave your car at home. Gates open from 5.00pm with the music starting at 7.30pm.

Visit joondalup.wa.gov.au for details.

APPENDIX 12 — Facebook post (published 25 January 2024)

APPENDIX 13 — Submission from Joondalup Community Coast Care Forum Inc and Friends of North Ocean Reef-Iluka Foreshore (page 1)

Comments on Draft Iluka-Burns Beach Foreshore Reserve Management Plan on behalf of Joondalup Community Coast Care Forum Inc and Friends of North Ocean Reef - Iluka Foreshore.

P8. The suburb name Iluka was proposed by the City of Wanneroo and approved in 1980. Iluka is an Aboriginal word meaning 'near the sea'.⁶ **Need to explain Iluka is not a Noongar word but comes from language of indigenous inhabitants of the north coast of NSW. (Iluka, NSW has beaches on the Pacific Ocean)**

P9. 1.3.5 Land Tenure

...The remaining bushland on the coast to the north of Burleigh Drive is currently not managed due to restricted access. **Needs further explanation as to why restricted access- ownership? Development? the area west of Marmion Ave is where Golden Crownbeard, a listed pest plant occurs, and therefore should be removed before it spreads into areas managed by LGA. Can the City issue a removal notice to the owner?**

P9. 1.3.6 Future Land Use

...380 ha of high quality coastal vegetation **inaccurate to say 380 ha of high quality coastal vegetation. Approx. 20% is bare sand and degraded areas due to weed invasion.**

P10. 1.3.6 Future Land Use

Marmion Marine Park

...with the final community reference committee meeting scheduled in the later half of 2023.**Needs to be updated as committee meetings have now ended.**

The section on Physical Environment appears to be a grab bag of facts from numerous sources only some of which are relevant to the Iluka-Burns Beach Foreshore Reserves. More attention needs to be paid to pointing out which statements are relevant to I-BB e.g. the Vegetation complexes as described bear little resemblance to the plants that are found there.

P19. 2.0 Description of the Physical Environment

2.1 Geology, Soils and Landforms

Soils of the Swan Coastal Plain

Section needs rewriting and simplifying.

(Tamala Limestone, predominantly calcarenite) **Delete, sentence it contradicts the sentence before it.**

P19. The Spearwood Sand Phase is characterised by undulating dunes with rocky crests of Aeolian sand over limestone, as in Figure 9. **This sentences doesn't make sense and figure 9 does not demonstrate this.**

(page 2)

Figures 3-5 need to be updated to show housing north of Burleigh Drive.

P24. 2.2 Hydrology

Groundwater

Maybe, mention freshwater discharge is observed in numerous places along the beach at Iluka - particularly noticeable during extremely low tides when the discharge creates little gullies with trickling fresh water running into the ocean. Probably same at BB.

Stormwater Drainage

P26. No mention of the stormwater drain and sump at the northern end of Peets development at Burns Beach. If this sump overflows it will go into the bushland and spread weeds as well as litter.

Fig 14. Insert Drainage sump mentioned above.

2.4 Vegetation

Vegetation Complexes

P31. The pre-European extent remaining within the Swan Coastal Plain IBRA region for the Quindalup Complex is 49%. The pre-European extent remaining within the City of Joondalup is 12.55%.^{24,25} These 2016 data are out of date. New data available.

P31... Local variations include the low closed forest of *Melaleuca lanceolata* - *Callitris preissii*

It should be noted that these diagnostic species do not occur naturally in the foreshore reserve

Nor are there any significant patches of Tuart, Jarrah or Marri as suggested by the inclusion in the text of

The Cottesloe Complex - Central and South is described as a "mosaic of woodland of *Eucalyptus gomphocephala* and open forest of *Eucalyptus gomphocephala* - *Eucalyptus marginata* - *Eucalyptus calophylla* with a closed heath on the limestone outcrops.

The absence or near absence of these species should be mentioned.

P31. ecological communities originally occurring in the region. is "1" the correct reference?

P35. No Threatened Ecological Communities were identified within Iluka - Burns Beach Foreshore Reserve .³⁵ *Honeymyrtle Shrubland on Limestone Ridges of the Swan Coastal Plain* is a TEC and given the large area of SgMhAr shown on Fig. 18, this area needs to be investigated to see if parts of it qualify for TEC status.

Figure 19 and Figure 20 show the vegetation condition. These are among the most important pages in the document as they should accurately reflect the condition of the vegetation and therefore set the priorities for future restoration. It is very surprising that Figure 19 (Burns Beach F R) shows so much area to be excellent or very good,

(page 3)

given that there is no friends group in this area and the city barely spends any time weeding or revegetating in the area. Personal observations would rank the area immediately west of Beachside Park as no better than Degraded given the high percentage of weeds e. g on either side of the stairs leading to the beach. Further north where the area is ranked as Excellent there are numerous patches of bare that are too small to show up on the map. Figure 20 (Iluka F R) is an accurate representation and the high percentage of Excellent and Very Good condition reflects 20 years of work by volunteers and contractors.

Fig.23 southern boundary of foreshore area is shown as footpath, other figures use continuation of line from Shenton Ave.

3.1 Flora

P47. Acacia (with 4 taxa), Conostylis (with 4 taxa), Hibbertia (with 4 taxa) and Melaleuca (with 3 taxa) were the best represented genera throughout the Iluka survey area.

There are at least 6 species of acacia, at least 4 species of scaevola, and 4 species of banksia. This indicates either poor selection of sites or insufficient sites.

P48. Is the "9" reference correct?

P49. A total of 24 weed species have been recorded in Iluka-Burns Beach Foreshore Reserve and are rated as priority weed species in the City of Joondalup, none of which is ranked as a Pest Plant under the City of Joondalup Local Law.

This contradicts para above. Should read: Of the 24 weeds rated as priority weed species in the City of Joondalup, none is ranked as a Pest Plant under the City of Joondalup Local Law.

P49. The City has recently added Golden Crownbeard (*Verbesina encelioides*) to its Pest Plant list. This plant has been found in areas adjacent to both the Iluka and Burns Beach Foreshore Reserves and is a threat to the reserves as it is a member of the Asteraceae family and has the ability to spread rapidly.

P50. Bi-monthly inspections. Does the City actually do this or is it a wish list item which can rarely be achieved due to lack of funding and staff? If they are conducted as stated, the Friends group should be provided with the results so they can assist with removal of the weeds.

P51. This was most likely due to increased Friends Group funding to undertake contractor hand weeding and grass-selective sprays which may have reduced the percentage of weed cover.

This hypothesis is incorrect as there was no significant change in amount of funding. (Coastwest grants - 2019 \$16,000, 2020 \$15,200, 2021 \$15,200, 2022 \$15,600)

(page 4)

Also could be interpreted that Friends groups used or employed contractors to spray. Needs to be clarified - spraying by City or contractors.

P51. The Friends of North Ocean Reef - Iluka Foreshore also conduct hand weeding within Iluka Foreshore Reserve. This statement underplays the role the Friends group plays and the effort and manhours it contributes. Its annual input of around 600 hours of voluntary labour most likely far exceeds the total annual hours contributed by the City and its contractors to weed control and revegetation in the Iluka F R.

P52. The City of Joondalup encourages natural bushland regeneration through weed management and conservation fencing, to allow natural regeneration to occur and vegetation to re-establish itself. This is important in maintaining species diversity and populations. The City supports revegetation in degraded or completely degraded areas using direct seeding techniques with local provenance seeds and seedlings, as required.

Natural regeneration is very limited as rabbits eat the germinating plants. Also the weed densities in the degraded areas stifle natural regeneration. Direct seeding seems to have been highly unsuccessful at the Hillarys dog beach and apart from which, it often involves a very limited suit of species, often mainly wattles. In Iluka, with the exception of unsuccessful direct seeding around the stairs leading to the lookout. To our knowledge the City has not undertaken a revegetation project in the Iluka F R for over 20 years. The revegetation has been initiated by the Friends group planting seedlings and guards provided by the City. The City is now assisting with the summer watering of those. This has become the main way to revegetate those areas in poor condition, but is not referred to in the plan.

Weed Control

Could add. Weed control by natural parasitisation is rare but in the Iluka- Burns Beach Foreshore Reserve, Dune onion weed (*Trachyantha divaricata*) is attacked by the parasitic Lesser Dodder (*Cuscuta epithymum*) - an introduced red-coloured twining annual climber.

P52 Community Education

There is no mention of past episodes of deliberate cutting down or pruning of bushes or suspected poisoning of bushes by homeowners to improve or maintain their view of the ocean. This needs to be included.

P52. Recommended Flora Action Plan; Supported with following comments and addition:

P 53. The major issue with Cape Tulip is stopping the spread within the reserve. There are very few places where it could spread to outside the reserve.

(page 5)

Bi-monthly weed inspections	Conduct weed inspections every two months to establish the extent of weeds and to identify priority weed species and ensure the information is passed on to Friends groups so there is a co-ordinated approach to weed control.
Weed Control	Ensure Friends groups receive adequate funding via City's Special Purpose Grants, to engage hand weeders during peak weed season.
Weed Control	Undertake a targeted approach to weed control of <i>Moraea flaccida</i> (One-leaf Cape Tulip) within Iluka reserve, to prevent its spread within the reserve and into surrounding reserves
Deliberate destruction of Native vegetation	Investigate and prosecute where deliberate destruction can be proven, instal signage where perpetrator is unknown.

Also need to add an Action to increase public awareness of the two plants on the City's Pest Plant list.

P54. Fungi Survey (2020)

Friends of North Ocean Reef-Iluka Foreshore record incidental sightings of fungi. At least 11 species have been recorded and photographed, although not necessarily identified to species or genera level (Photo montage available)

Recommended Fungi management Plan: **Supported.**

Recommended Pathogen Management Actions: **Supported with the additional Action.**

Pathogen Management	Undertake sampling of bushes or trees that have died be automatically sampled and analysed for pathogens (and herbicides).
---------------------	--

P59. Due to the endangered status of the Carnaby's Black-Cockatoo and the limited remaning **Spelling**

P60. The Iluka-Burns Beach Foreshore Reserve with its dense understorey provides plenty of foraging habitat for Quenda which were recorded on site in the 2020 fauna survey. Add - **However, this**

(page 6)

understory also provides shelter for Quenda's natural predators, foxes and both feral and domestic cats.

P60. In previous surveys the Western Grey Kangaroo (*Macropus fuliginosus*), Western Brush Wallaby (*Notamacropus irma*) and the Short-beaked Echidna (*Tachyglossus aculeatus*) have also been recorded.^{54, 55} The former two are no longer found in the Iluka Foreshore Reserve but echidnas are still thought to be present.

P61 Quenda. Another threat to quenda is the interaction with humans and effects on their diet. The number of quenda observed to live in the understory behind the shelter at Iluka Foreshore Park fluctuates between zero and three. It is not unusual for them to appear searching for food scraps, deliberately or accidentally left, as soon as the pavilion is occupied.

P62. Common Native Birds

White-winged fairywren should be mentioned as the male is the bird most photographers and ornithologists come to observe and photograph.

Osprey should be mentioned as the high points of the limestone cliffs within the Iluka F R are used as lookout points. No known nesting sites within I-BB F R - nearest is at Mindarie, the one at Ocean Reef having been destroyed.

P62 Add section Less Common Native Birds

The following migratory birds have been observed in the Iluka Foreshore Reserve, Sacred Kingfisher and Rainbow Bee-eater. Buff-banded Rail also recorded in the area which is unusual as they usually inhabit wetlands.

P62. The importance of birds as pollinators should be mentioned. Particularly for plants with red or orange flowers such as *Templetonia retusa* and *Eremophila glabra*, two common species on the limestone at Iluka F R and *Grevillia preissii* and *Calothammus quadrifidus* found in the heathland in Iluka F R.

P62. Mention should be made of the presence of at least two native snail species, as yet unidentified. The apparent absence of living snails but the abundance of desiccated shells on exposed sections of limestone at Iluka may relate to the change in climate - less rainfall and higher temperatures means less or absence of micro-algae to graze on. This may explain why all the live snails have been found in the heathland where moisture is more prevalent.

P62. No mention of insects as pollinators. Bees are not the only insect pollinators - wasps maybe more important here than bees and many plants are pollinated by moths.

P63. The House Mouse and European Rabbit have the potential to introduce and spread disease to native mammal populations and likely compete for food resources with other native fauna species. The main problem with rabbits is they prefer seedlings - thereby preventing

(page 7)

natural revegetation. Also eat seedlings planted by volunteers unless tree guards are used.

P64. Although no Rainbow Lorikeets were sighted in the 2020 fauna survey, they were recorded in a previous survey in 2013.and have been observed since 2020 in increasing numbers.

The seeds of the planted coastal sheoak (*Casuarina equisetifolia*) in the foreshore parks at Iluka and Burns Beach are a rich source of food for Little corellas (*Cacatua sanguinea*) during summer when other seeds are scarce.

P65. Recommended Fauna Management Actions: Supported with additional Action relating to Domestic Cats.

Domestic Cat control	Create greater awareness among households living adjacent to FRs of their responsibilities and ensure penalties (not warnings) are applied when registered cats are caught in FRs.
----------------------	--

P69. A development is proposed for Burns Beach in the predominantly cleared area near the northern car park. No mention of the proposed café further north at Beachside Park.

P73. An existing fire access way was formalised to create a pathway in the north of Iluka Foreshore Reserve adjacent to Burns Beach Caravan Park in 2021. In the event of a fire it will be necessary to cut the conservation fencing or other fencing as there is only one gate into the Iluka F R (at the entrance to the Iluka Foreshore Car Park, Figure 34) and none into the section north of the path leading from Silver Sands Drive, or in the BB F R, wide enough for a vehicle.

P73. No mention of the proposed widening of the DUP (Hillarys to BB) to 4m funded by Dept of Transport as part of WA Bike Network Program (City 2022/23 budget).

P74. There are toilets and showers located adjacent to the car park at Iluka Foreshore Reserve, as shown in Figure 35. Toilets and showers are also located at Burns Beach Foreshore Reserve to the north of the car parks, as shown in Figure 37. Should mention Defibrillators are located at both sets of toilets. The maintenance of these is the responsibility of ???

P75. Rubbish bins are generally installed in locations where people gather to socialise or undertake recreational activities. A wire bin at Iluka Foreshore Park for Containers for Change items has not been

(page 8)

successful as the number of general waste items (mainly cardboard coffee cups) far exceed CforC items despite a bin for general waste being located beside the CforC wire bin. An education programme and more explicit signage is required.

P76. Both sumps contain vegetation and there are currently no plans for changes to these sites. **see comment for p26**

P76. Recommended Social and Built Environment

Management Actions: **supported with addition of:**

Investigate the provision of additional waste services	Monitor and investigate the provision of additional waste services to mitigate litter, as a result of increased public use and infrastructure upgrades in the active reserve with emphasis on recycling and Containers for Change.
--	---

Figure 34. **Missing symbol for bin at corner of DUP and Volante path (but outside the area of this M P)**
Suggest distinguishing between conservation fencing and wire fencing.

P86. Recommended Fire Management Actions:**Supported.**

P87. Schools are also an important avenue for raising awareness and interest in environmental. **Girl Guides, Boy Scouts and Cubs are also possible targets and all have visited Iluka**

P88. Recommended Education and Training Management Actions:**Supported**

P90. 4.0 Implementation Plan

Given the responsibility for most of the actions recommended in the plan lies with the City's Natural Areas Team, and that this is just one of six Foreshore Reserve Management Plans and that the team is also responsible for over 100 natural areas, it is very difficult to expect and accept that all the recommendations in this plan can be achieved by the current number of staff and budget.

If this plan, along with the other plans, is to be fulfilled, the City must provide adequate staff and

(page 9)

funding. Alternatively, increase the amount of the Special Purpose Grant for the friends group (making available some of the budgeted funds available but not applied for by some of the other friends groups) and/ or increase the budget for the City to directly employ contractors, especially manual weeding contractors. There is a great danger that this is a plan for the shelf, not a plan that will result in outcomes that protects the foreshore reserve.

All subscripts need to be checked for continuity and references are on the actual page.

APPENDIX 14 — Submission from the City of Wanneroo

Section 1.3.6 Future Land Use – Tamala Conservation Park

The Tamala Conservation Park Establishment Plan outlines a future land tenure (as per below excerpt) which is different to that outlined in Figure 5 in the FMP. How has the Foreshore Management Plan boundary for Burns Beach been rationalised? Will the City of Joondalup be managing all the Foreshore Reserve (what is the ultimate land tenure)? Will Peet and/or Burns Beach management areas be maintained/developed by the Developers prior to being handed over?

Section 3 –

FMP's are generally required to consider SPP 2.6 and subsequently address coastal hazard risk management (CHRMAP)? Coastal monitoring determines impacts on dune stabilisation, vegetation cover, infrastructure management, beach replenishment activities, managed retreat/relocation if required? This could have a large amount of impact on management of the Foreshore reserve and provision of additional facilities. It could also have a "flow-on" affect to the City of Wanneroo foreshore to the north depending on treatment of some issues such as the installation of groynes.

Current Management Approach - Revegetation (p52)

Is this prioritised in a particular way? It may be beneficial for a coordinated approach to completely degraded / degraded areas that extend into City of Wanneroo land (blow-outs and informal tracks) noting some tracks may need to be retained for potential firebreaks. No mention of stabilisation – coir matting, brushing, wind break fencing etc.

Section 3.4 Fauna

Outlines fauna "species" present but only talks about mammals, birds etc. Shouldn't this be "Class"?

Non-Native Fauna (p65)

The City of Joondalup should continue to consult with the City of Wanneroo regarding feral animal control programs to provide a co-ordinated approach to feral animal control across conservation areas.

Section 3.5 Social and Built Environment (p68)

Mentions UXO slight – also mentions UXO investigation for DUP. Does not outline management going forward i.e. how will it affect revege activities, fencing etc?

Note the Executive Summary outlines that the City proposes to review risk and management of UXO and coastal hazards but coastal hazards are not discussed elsewhere other than in the "Recommended Social and Built Environment Management Actions"

Signage (p73)

Doesn't include Safety Signage (i.e. SLSWA) or BEN signs??

Rubbish (p75)

Mention of dog poo bins – is there any dog exercise areas within the vicinity or proposed areas? Are dogs permitted throughout?

Recommended Social and Built Environment Management Actions (p76)

Under "Section Access & Infrastructure (p69)" it is outlined that a development is proposed near the northern car park. Whilst it mentions it will be subject to its own approvals the indicative area should be mapped to ensure it is considered when considering management requirements within the vicinity.

Are there any other proposed developments within the FMP i.e. formalisation of paths, provision of additional facilities etc and shouldn't these be included under Recommended Social and Built Environment Management Actions and mapped to ensure revegetation activities do not clash?

Especially relevant adjacent Peet Management and Burns Beach Management areas where pressure to sell lots may reveal a demand for additional beach access.

The characteristics of the beach and suitability for access may assist with determining appropriate future access.

3.6 Fire Management (p84-87)

Whilst the FMP outlines the City is not currently undertaking bushfire mitigation/burn offs, any future fire mitigation may impact the vegetation to the north that is being maintained by the City of Wanneroo. It would be beneficial for future bushfire mitigation, such as mosaic burns, to be undertaken in consultation with the City of Wanneroo for Burns Beach Foreshore area.

If a lot of fires are believed to be deliberately lit, then increased visual surveillance through additional Ranger Patrols during the "bushfire season" or CCTV may assist and could be included in management.

4.2 Monitoring and Reporting

No coastal or beach monitoring (CHRMAs)? FMP's are generally very wholistic and would include this as per comments above.

No targets for monitoring – is vegetation required to meet good, very-good, excellent condition before the site is considered adequate? No targets for % weed cover, is it 0%?

Doesn't really outline monitoring timeframes clearly for all items – e.g. monitoring of feral animals is listed as ongoing? Does not outline how often and types of monitoring (visual, trapping etc).

There does not appear to be information on location of swimming beaches, particularly relevant if considering future beach access provisions, as some areas simply may not be appropriate.

Suggest numbering each management actions i.e. M1, M2 etc to allow easier tracking of progression/completion of actions.

APPENDIX 15 — Submission from Department of Biodiversity, Conservation and Attractions (page 1)

Att: [REDACTED]

Community Consultation: Draft Iluka-Burns Beach Foreshore Reserve Management Plan

I refer to your correspondence of 25 January 2024 requesting comments on the draft Draft Iluka-Burns Beach Foreshore Reserve Management Plan. The Department of Biodiversity, Conservation and Attractions' (DBCA) Parks and Wildlife Service has reviewed the referred information and provides the following advice.

DBCA recognises that the bushland areas, comprising the Iluka and Burns Beach foreshore reserves, are designated as Bush Forever sites 325 and 322 respectively. The coastal bushland areas contain high value including regionally significant vegetation, populations of threatened flora (*Marianthus paralius*), priority ecological communities and important fauna habitat. It is recommended that the purpose of the Crown reserves that are covered by the management plan be amended to include the primary purpose of 'conservation', reflecting the area's continued management by the City of Joondalup and aligning with the environmental values they contain.

Marmion Marine Park Expansion

As noted at page 10 and shown in Figure 6 (page 16) the existing and proposed expansion to the Marmion Marine Park interfaces the western boundaries of both foreshore reserves. Any proposed coastal management actions which may impact the existing and proposed marine park should be discussed with DBCA, including the installation of educational signage related to the marine park.

Burns Beach Foreshore Reserve

DBCA notes that the proposed boundaries of the Burns Beach Foreshore reserve, as shown in Figure 3 (page 13) of the management plan, do not reflect the current extent of City of Joondalup Reserves 47831 and 38526 or current cadastral lot boundaries. Portions of the foreshore reserve are privately owned and managed under agreement, by the Western Australian Planning Commission (WAPC). It is possible that DBCA will be assigned as the long-term manager of the adjacent portions of Tamala Conservation Park (in accordance with the Tamala Conservation

Swan Region
Locked Bag 104, Bentley Delivery Centre, Western Australia 6983
Corner Australia II and Hackett Drive, Crawley WA 6009
dbca.wa.gov.au

(page 2)

Park Establishment Plan). To ensure that the foreshore reserve boundaries shown in the management plan are generally consistent with previous strategic planning and are endorsed by current and future land management agencies, it is recommended that further liaison with the WAPC and DBCA is undertaken. This also applies to any management actions proposed in the management plan that are to be undertaken in areas not currently managed by the City.

Thank you for the opportunity to comment on this draft management plan. Please contact [REDACTED] at Parks and Wildlife's Swan Region office on [REDACTED] or by email at [REDACTED]@dbca.wa.gov.au if you have any queries regarding this advice.

Yours faithfully,

[REDACTED]

REGIONAL MANAGER

Executive Summary

The *Iluka-Burns Beach Foreshore Reserve Management Plan* outlines a framework for the environmental management of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve (referred to as Iluka-Burns Beach) for the next ten years. Iluka-Burns Beach are classified as Major Conservation Areas due to the high biodiversity values of the area.

As part of the development of the *Iluka-Burns Beach Foreshore Reserve Management Plan*, a flora, fauna and fungi survey was conducted in spring 2020. The results of this survey were combined with previous surveys to develop a comprehensive species list and ecological assessment of the site.

Iluka Foreshore Reserve is located approximately 27km north-west from the Perth Central Business District, with Burns Beach Foreshore Reserve being located adjacent to the north.

Iluka Foreshore Reserve in Iluka contains approximately 31 hectares (ha) of bushland and is bounded by Ocean Parade to the north, Burns Beach Road to the east, ocean to the west and extends just past Shenton Ave to the south.

Iluka Foreshore Reserve contains a significant State listed priority ecological community 'Coastal shrublands on shallow sands' (Priority 3) and is recognised for its regional environmental significance by being designated as a Bush Forever site (325) by the Western Australian Planning Commission in 2000. Iluka Foreshore Reserve contains the Burns Beach Waugal Aboriginal heritage site (ID 22672) and is also located adjacent to the State Heritage Register listed Marmion Marine Park.

The majority of the native vegetation at Iluka Foreshore Reserve is in excellent condition (70%) and the survey conducted in spring 2020 identified 74 native flora species (including one endangered species, two priority species and five significant species of the Perth Metropolitan Region), three native mammals (including one priority species), 25 native birds (including one endangered species), 13 native reptiles and 12 native invertebrates.

A comprehensive macroinvertebrate and herpetofauna survey was conducted at Iluka Foreshore between April 2015 to May 2018 by Spineless Wonders (engaged by Friends of North Ocean Reef – Iluka Foreshore) with over 500 invertebrate species being identified.¹

A total of 47 weed species, four non-native mammals, two non-native birds and one non-native invertebrate were identified at Iluka Foreshore Reserve in the survey conducted in spring 2020.

Burns Beach Foreshore Reserve in Burns Beach contains approximately 29 ha of bushland and is bounded by Tamala Park Conservation Reserve to the north, Beachside Drive to the east, ocean to the west and Ocean Parade to the south.

Burns Beach Foreshore Reserve contains a significant State listed priority ecological community 'Coastal shrublands on shallow sands' (Priority 3) and the majority of the site is recognised for its regional environmental significance by being designated as a Bush Forever site (322) by the Western Australian Planning Commission in 2000. Burns Beach Foreshore Reserve is also located adjacent to the State Heritage Register listed Marmion Marine Park.

The majority of the native vegetation at Burns Beach Foreshore Reserve is in excellent condition (65%) and the survey conducted in spring 2020 identified 63 native flora species

¹ Knowles, D.G. (2018)

(including four significant species of the Perth Metropolitan Region), three native mammals (including one priority species), 22 native birds, seven native reptiles and 12 native invertebrates.

A total of 43 weed species, three non-native mammals, two non-native birds were identified at Burns Beach Foreshore Reserve in the survey conducted in spring 2020.

Environmental threats have the potential to degrade natural areas and reduce biodiversity values. Environmental threats addressed in this Plan include weeds, pathogens and disease, human impacts, access and infrastructure, non-native fauna species and fire.

In order to address the key environmental threats at Iluka-Burns Beach a number of management actions are outlined within the Plan. Recommended management actions for the next five years include weed management, pathogen management, feral animal control, bushfire mitigation, monitoring flora and fauna species through field surveys, endangered flora species management, maintaining infrastructure, environmental education and supporting the Friends Group.

It is also proposed that the City reviews the risk and management of unexploded ordnances (UXO) within Burns Beach Foreshore Reserve and coastal hazard risks such as the limestone cliffs across the Iluka – Burns Beach Foreshore Reserve. Management actions will be implemented in partnership with Friends of North Ocean Reef - Iluka Foreshore and other key stakeholders and community groups, where relevant.

1.0 Introduction

1.1 Background

The City of Joondalup ('the City') is situated along the Swan Coastal Plain, with the Joondalup City Centre being located 30km from the Perth Central Business District. The City covers an area of 96.5km² which encompasses a diverse range of natural areas including 17km of coastal foreshore, a chain of wetlands and a variety of bushland ecosystems (as shown in Figure 1).

The City's southern boundary is located approximately 16km from the Perth Central Business District, and is bounded by the City of Wanneroo to the east and north, the City of Stirling to the south, and the Indian Ocean to the west.

There are a number of regionally, nationally and internationally significant natural areas located within the City, including the Yellagonga Regional Park and a number of Bush Forever sites which contain species of high conservation value. Significant natural areas adjacent to the City include the Marmion Marine Park and the Neerabup National Park.

The City of Joondalup is committed to conserving and enhancing the City's natural assets to ensure the long term protection of the environment for future generations.

1.2 Natural Area Management Plans

The City is developing Natural Area Management Plans to provide strategic ongoing management of the City's natural areas and protect native vegetation and ecosystems.

Environmental threats have the potential to degrade natural areas and reduce biodiversity values. Environmental threats addressed in this Plan include weeds, plant diseases, fire, non-native fauna species and human impacts.

Natural Areas Management Plans describe the potential environmental impacts, risks and threats in natural areas and the associated management strategies that will be implemented to minimise potential impacts.

1.3 Study Area

The study area for the Iluka-Burns Beach Foreshore Reserve Management Plan is Iluka Foreshore Reserve in Iluka and Burns Beach Foreshore Reserve in Burns Beach. These sites have been recognised for their regional environmental significance by being designated as Bush Forever sites 322 and 325^{2,3}. Marmion Marine Park is located adjacent to the sites and is listed on the State Heritage Register by the Government of Western Australia.

1.3.1 Location

Iluka Foreshore Reserve in Iluka contains approximately 31 ha of bushland and is bounded by Burns Beach Caravan Park and Ocean Parade to the north, Burns Beach Road and residential properties to the east, ocean to the west and extends just past Shenton Ave to the south, adjoining Ocean Reef Foreshore Reserve (as shown in Figure 2).

² Government of Western Australia (2000a)

³ Government of Western Australia (2000b)

Burns Beach Foreshore Reserve in Burns Beach contains approximately 29 ha of bushland and is bounded by Tamala Park Conservation Reserve to the north, Beachside Drive, residential properties and bushland to the east, ocean to the west and Ocean Parade and Burns Beach Caravan Park to the south (as shown in Figure 3).

1.3.2 Aboriginal Heritage

The Iluka-Burns Beach Foreshore Reserve is located within the Traditional Country of the Noongar people. Noongar people have lived in the south-west of Western Australia for more than 45,000 years. Noongar are made up of fourteen different language groups and Whadjuk is the name of the dialectal group from the Perth area.⁴

Noongar people have their own laws and customs and speak their own language. The laws and customs are characterised by a strong spiritual connection to country, caring for the natural environment and for places of significance.⁴ The Noongar connection with nature and country includes a close relationship with spiritual beings associated with the land.⁵

Iluka Foreshore Reserve contains the mythological Burns Beach Waugal Aboriginal heritage site (ID 22672). Waugal means soul, spirit or breath and is the snake or rainbow serpent major spirit for Noongar people and central to their beliefs and customs. Noongar people recognise the Waugal as the giver of life, maintaining all fresh water sources and making Noongar people custodians of the land. Noongar people believe that the Waugal dominates the earth and sky and its track shaped the sand dunes as it slithered over the land.⁵

1.3.3 European Heritage

Up until the early 1970's, Iluka-Burns Beach Foreshore Reserve was predominantly native vegetation. In the early 1970s there was a residential development at the south of Burns Beach Foreshore Reserve adjacent to Iluka Foreshore Reserve. Further residential developments adjacent to Iluka-Burns Beach Foreshore Reserve commenced in the 1970s.

The suburb name Iluka was proposed by the City of Wanneroo and approved in 1980. Iluka is an Aboriginal word from an eastern states dialect meaning 'near the sea'.⁶

Burns Beach is located on land originally owned by Midland Railway Company. A request was made by 50 district residents to the Wanneroo Road Board in 1908 and granted for a 50-acre reserve for camping and a health resort at the beach. By the late 1920s the area was referred to by locals as 'Burns Beach' after a farmer who ran sheep in the area.⁶

1.3.4 Land Use Planning

City of Joondalup Local Planning Scheme No. 3

Planning for land use occurs under the City of Joondalup Local Planning Scheme No. 3 (LPS3). LPS3 includes the protection of sites zoned as Environmental Conservation, meaning areas with biodiversity and conservation value.

Neither Iluka Foreshore Reserve or Burns Beach Foreshore Reserve are zoned as Environmental Conservation under LPS3 as they are both under a higher protection order, the MRS – Parks and Recreation.

⁴ SWALSC (no date(a))

⁵ SWALSC (no date(b))

⁶ Landgate (2020)

Metropolitan Region Scheme

The Metropolitan Region Scheme (MRS) was established in 1962 by the then Metropolitan Regional Planning Authority. The MRS sets out the broad pattern of land use for the whole Perth Metropolitan Region.

The coastal foreshore area of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve was zoned as Parks and Recreation when the MRS was established, meaning lands of regional significance for ecological, recreation or landscape purposes.

1.3.5 Land Tenure

Iluka Foreshore Reserve is Crown Land managed by the City of Joondalup and is reserved for the purposes of Parks and Recreation under the Metropolitan Region Scheme (MRS).

Burns Beach Foreshore is partly Crown Land managed by the City of Joondalup and reserved for the purposes of Parks and Recreation under the MRS. The other part of Burns Beach Foreshore Reserve is also reserved for the purposes of Parks and Recreation under the MRS, however it is owned by Burns Beach Management Pty Ltd (as shown in Figure 4). The City has an informal arrangement with Burns Beach Management Pty Ltd to manage the bushland area from Ocean Parade in the south to Burleigh Drive in the north. The remaining bushland on the coast to the north of Burleigh Drive is currently not managed by the City.

1.3.6 Current Land Use

The main uses of Iluka-Burns Beach are for recreational and conservation purposes such as walking, cycling, dog exercising, beach activities and use of adjacent playgrounds and Burns Beach Cafe.

Properties adjacent to Iluka Foreshore Reserve are primarily zoned as Low Density Residential with a small area of Commercial Zone (such as Iluka Plaza) and public open space (Pattaya Park and Burns Park). The Iluka Structure Plan applies to the properties to the north of Silver Sands Drive in Iluka.

Properties adjacent to Burns Beach Foreshore Reserve are primarily zoned as Low and Medium Density Residential with a small area of Commercial Zone and public open space (Burns Beach Park and Beachside Park). The Burns Beach Structure Plan applies to the majority of the properties adjacent to the site.

1.3.6 Future Land Use

Tamala Conservation Park

The establishment of a conservation park between Burns Beach and Mindarie as a Class A Reserve is outlined in the DPLH and WAPC *Tamala Conservation Park Establishment Plan*. Figure 5 identifies the proposed boundaries, with the proposed park comprising of around 380 ha of native coastal vegetation of conservation significance bordered in the west by the Indian Ocean and to the east by Marmion Avenue within the Cities of Wanneroo and Joondalup. The subject area is entirely reserved for Parks and Recreation under the MRS. The entire area lies within Bush Forever site 322 and consists of around 234 ha, owned by the Western Australian Planning Commission (WAPC) and 147 hectares of Crown Reserves.

The Cities of Wanneroo and Joondalup are prepared to continue managing these reserves wholly or in part, conditional upon State Government funding and maintaining a dual use path along the coast to connect Burns Beach and Mindarie.

The *Tamala Conservation Park Establishment Plan* notes the Noongar name of Booyeembara be considered by DBCA when developing the Management Plan for the Park. The plan references that the coastal area was referred to as Booyeembara, deriving from the Noongar word for rock (boya or booyee), referring to the prevalence of limestone in the area.

Marmion Marine Park

Marmion Marine Park is currently situated between Trigg Island and Burns Rocks, encompassing approximately 9,500 hectares (Figure 6). It was gazetted in 1987 as Western Australia's first marine park, with management guided by the *Marmion Marine Park Management Plan (1992-2002)*.

A review of the management plan was recommended by the then Marine Parks and Reserves Authority in 2012, and the Office of the Auditor General in its 2016 report *Management of Marine Parks and Reserves*. In 2019, development approval for Ocean Reef Marina required the excision of 143 hectares from Marmion Marine Park enacted through the *Reserves (Marmion Marine Park) Act 2019*. This triggered a review of the management plan to reflect the excision as well as the proposed extension of the marine park, as a commitment under the State Government's *Plan for Our Parks* initiative.

The DBCA commenced the review and proposed extension of Marmion Marine Park in 2021. There has been an extensive community engagement process throughout the review, including a Community Reference Committee. The Indicative Joint Management Plan is progressing through relevant statutory approvals and once approval from the relevant Ministers has been granted, will be advertised for the public comment period.

An extension to the Marmion Marine Park is being proposed to enhance protection of intertidal and subtidal macroalgae reef communities, sea grass beds, important habitat for the endemic Australia sea lion (*Neophoca cinerea*) and an array of seabirds. An extension to the park will also allow management frameworks to be put in place to manage the expected increase in use of this area into the future. The proposed extension will see Marmion Marine Park covering the entire length of Iluka – Burns Beach Foreshore Reserve coastline and the City's entire 17km length of coastline (Figure 6).

Marmion Marine Park will continue to be managed for multiple-use, with zoning to be determined through the planning process based on community input. The review will include the development of a new management plan to establish a contemporary management framework to conserve the ecological, social, and cultural values of the area, while allowing for sustainable use and planning for the predicted increased use of the area.

1.4 Aim and Objectives

The aim of the *Iluka-Burns Beach Foreshore Reserve Management Plan* is to provide a framework to protect and enhance biodiversity and conservation values whilst maintaining appropriate community access and awareness of the natural area.

The objectives of the *Iluka-Burns Beach Foreshore Reserve Management Plan* are to:

- Establish a baseline description of the Iluka-Burns Beach environment to guide future environmental planning and recommended management actions.
- Outline key environmental threats and the impact they have on conservation and recreation values.
- Outline management actions to address key environmental threats including monitoring and reporting.

1.5 Purpose

The purpose of the *Iluka-Burns Beach Foreshore Reserve Management Plan* is to:

- Provide information to assist the City in prioritising maintenance schedules.
- Guide the future development of the City's Conservation Capital Works Program.
- Increase opportunities for grant funding by having a detailed schedule of projects.
- Provide guidance to City employees, contractors and Friends Groups operating within Iluka-Burns Beach Foreshore Reserve.
- Provide mechanisms to raise community awareness of Iluka-Burns Beach Foreshore Reserve whilst protecting and enhancing biodiversity and conservation values.

1.6 Strategic Context

The *Iluka-Burns Beach Foreshore Reserve Management Plan* is a Natural Area Management Plan and aligns with the City of Joondalup Strategic Environmental Framework outlined in Figure 7. Details of the relevant local, State and Federal legislation, policies, plans and strategies are outlined in Appendix 1.

Figure 7: City of Joondalup Strategic Environmental Framework

1.7 Stakeholder Consultation

Key external stakeholders consulted for the development of the *Iluka-Burns Beach Foreshore Reserve Management Plan* include:

- Friends of North Ocean Reef - Iluka Foreshore
- Department of Biodiversity, Conservation and Attractions (DBCA)
- Department of Fire and Emergency Services (DFES)
- Department of Planning, Lands and Heritage (DPLH)
- Western Australian Local Government Association (WALGA)
- Burns Beach Residents Association (Inc)
- Iluka Homeowners Association
- Local residents.

2.0 Description of the Physical Environment

2.1 Geology, Soils and Landforms

Soils of the Swan Coastal Plain

Iluka-Burns Beach is situated in the City of Joondalup which is located within the Swan Coastal Plain. The majority of the soils of the Swan Coastal Plain are formed by material deposited by rivers and wind. A series of dune systems has been formed with the youngest dunes being the Quindalup Dunes nearest the coast, followed by the Spearwood Dunes and the oldest Bassendean Dunes are farthest from the coast, as shown in Figure 8.⁷

Iluka-Burns Beach is located within the Quindalup and Spearwood Dune System. The Spearwood Dune System comprises of sand derived from Tamala Limestone.⁸ The Spearwood Dunes have a core of sandy aeolianite with a capping of secondary limestone (Tamala Limestone, predominantly calcarenite) overlain by yellow brown siliceous sands with weak podzol development.^{9,10} The Spearwood Dunes are believed to have formed around 40,000 years ago and comprise of red/brown, yellow and pale yellow/grey sands. The Spearwood Sand Phase is characterised by undulating dunes with rocky crests of Aeolian sand over limestone.

The Quindalup System is described as coastal dunes of the Swan Coastal Plain, with calcareous deep sands and yellow sands, dominated by coastal scrub. The Quindalup System formed around 10,000 years ago and exhibits undulating and dramatic landscape features. The Quindalup dunes are underlain by the Safety Bay Sands formation, which comprises calcareous soils also derived from Tamala limestone.¹¹

The environmental geological characteristics of Iluka-Burns Beach are limestone and sand, impacting on the types of vegetation communities existing at the site.

The land contours of Iluka Foreshore Reserve range from 0m to 24m and the Burns Beach Foreshore Reserve land contours range from 0m to 27m Australian Height Datum (AHD), as shown in Figure 13 and Figure 14.

Acid Sulfate Soils

Potential Acid Sulfate Soils are naturally occurring soils and sediments that contain iron sulphides. Potential Acid Sulfate Soils are predominantly found in low-lying coastal wetlands and tidal flats and are harmless when left undisturbed. Exposure to air can cause the iron sulfides in Potential Acid Sulfate Soils to react with oxygen and water producing Acid Sulfate Soils with high concentrations of iron and sulfuric acid, which can lead to other contaminants, such as heavy metals and arsenic being released into the surrounding environment.¹²

Acid Sulfate Soils are categorised as Potential Acid Sulfate Soils or Actual Acid Sulfate Soils. Potential Acid Sulfate Soils have not been oxidised by exposure to air whilst Actual Acid Sulfate Soils have been disturbed or exposed to oxygen and become acidic.¹²

⁷ Bolland (1998)

⁸ Gozzard cited in ELA (2016a)

⁹ McArthur and Bettenay cited in Syrinx (2012)

¹⁰ DoW (2004)

¹¹ ELA (2017)

¹² DEC no date (a)

There is no known risk of Acid Sulfate Soils in Iluka Foreshore Reserve or Burns Beach Foreshore Reserve.¹⁰ The risk of Acid Sulfate Soils is based on the likelihood of Potential Acid Sulfate Soils occurring within soil profiles and has been mapped by the Department of Biodiversity, Conservation and Attractions (DBCAs) using available desk-top information and limited ground-truthing, within areas where intensive on-ground soil mapping and soil analysis work has been undertaken. The mapping undertaken has found that Acid Sulfate Soils are not known or expected to occur in the environment of Iluka Foreshore Reserve or Burns Beach Foreshore Reserve on the basis of the geological units present, depth to groundwater and partial “ground truthing” or onsite investigation. Within the City of Joondalup, areas of high to moderate acid sulfate soil risk are predominantly in wetlands or areas adjacent to wetlands, as shown in Figure 10.^{12,13}

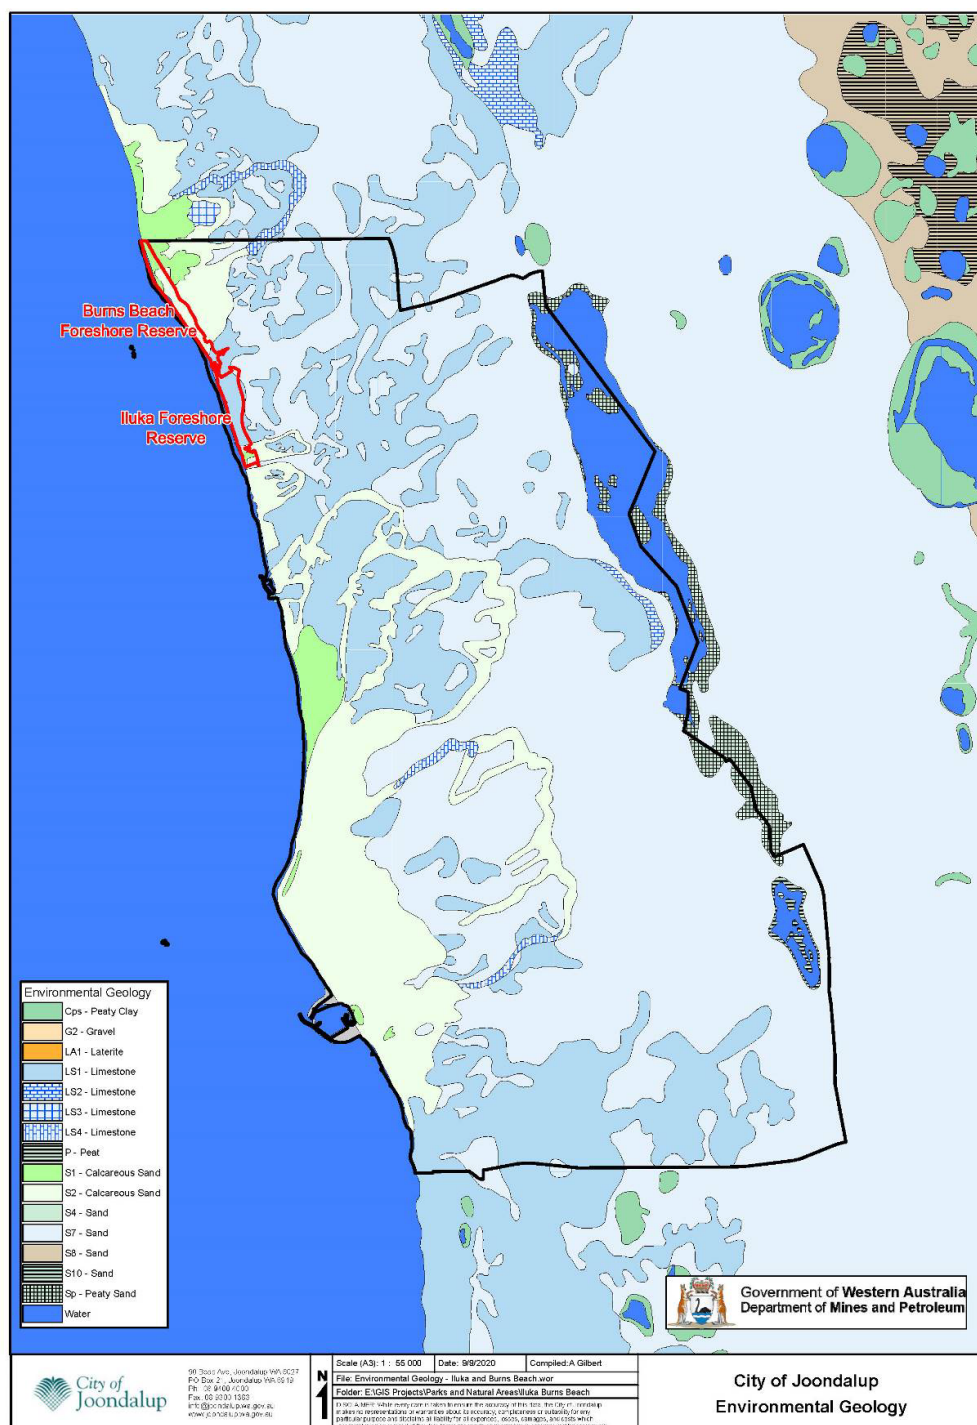

Figure 9: City of Joondalup Environmental Geology (sourced from Department of Mines and Petroleum 2013)

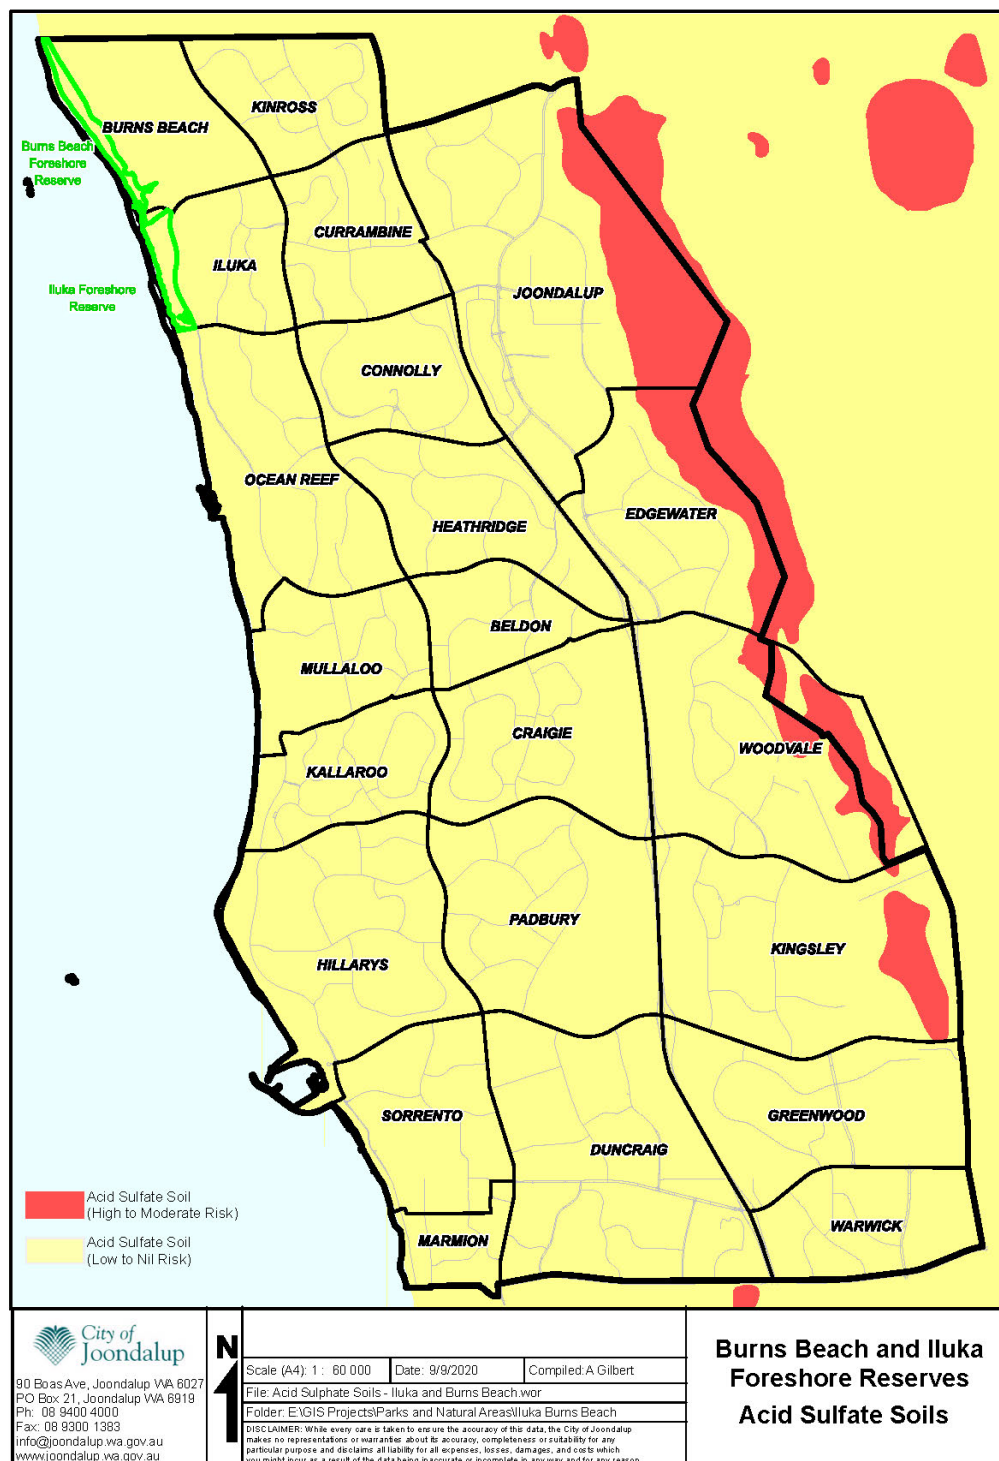

Figure 10: Iluka-Burns Beach Reserve Acid Sulfate Soil Risk

2.2 Hydrology

Groundwater

The City of Joondalup is located on Perth's largest source of groundwater, the Gnangara Groundwater System, comprising four main aquifers: superficial (shallow, unconfined), Mirrabooka (deeper, semi-confined), Leederville (deep, mostly confined) and the Yarragadee (deep, mostly confined). The Gnangara Mound extends across most of the superficial aquifer and refers to the water table creating a mound shape, as shown in Figure 11. Groundwater levels in the superficial aquifer have been declining over recent years due to pressure from extraction and the impacts of climate change, as shown in Figure 12.¹⁴

Figure 11: Gnangara Groundwater System (sourced from DWER 2020a)

There is a natural seasonal variance in Perth's groundwater system due to annual rainfall recharge, as shown in Figure 12.

¹⁴ City of Joondalup (2012a)

Figure 12: Average Groundwater Levels of the Gngangara Mound Superficial Aquifer (sourced from DWER 2020a)

It is likely that plant species at Iluka-Burns Beach utilise groundwater as the depth to water varies from 0m on the water line up to 21.5m, with a +/- range of 3m seasonal variance.¹³ In general, some plant species (usually larger tree species) in the Perth metropolitan area within approximately 10m of groundwater are likely to access the water table. Depth to water is the depth from the natural surface contours to the water table. Groundwater salinity at Iluka-Burns Beach is marginal (500 – 1000 TDS in mg/L).

There is one groundwater monitoring bore located within the north of Iluka Foreshore Reserve with groundwater level measurements having been taken from 1974 until 2020. The water levels taken at this bore indicate that the water table has risen by 0.044 meters AHD from 0.515 meters AHD in 1974 to 0.559 meters AHD in 2020.¹⁵ The water level readings taken at this bore are largely steady and a 0.05m variation is to be expected. The groundwater level near the coast is controlled by sea level and should not change much over time. Most of the groundwater decline in the Perth metropolitan area is recorded further inland such as at the top of the groundwater mound, whilst groundwater levels near the coast have remained stable.

The effect of long-term persistent hydrological change can cause changes in vegetation community composition and structure, with a potential loss of some species and a gradual replacement by more drought-tolerant species. The rate (m/yr) and magnitude (metres) of groundwater level change are also relevant to potential vegetation impact.¹⁶

¹⁵ DWER (2020b)

¹⁶ Loomes and Froend (no date)

The use of groundwater for domestic irrigation through bores is deemed suitable in the area and is supported in preference to scheme water. The area is low in iron concentration, resulting in a low iron staining risk.¹³

Stormwater Drainage

Stormwater consists of runoff from rainfall and material mobilised and dissolved in its path of flow. Stormwater is channelled and collected in sumps and swales to recharge the superficial aquifer and prevent the spread of weeds, pollutants, pathogens and sediment to vegetation.¹⁷

Sumps allow some stormwater to infiltrate retention basins, detain the water, collect sediment and over time the water is absorbed back into groundwater. Most sumps are steeply graded rectangular excavations with an inflow at the bottom. Sumps are fenced off in the interest of community safety due to the potential for rapid stormwater inflow.¹⁸

Iluka Foreshore Reserve does not contain a sump, however there is one located adjacent to the site in Pattaya Park, Iluka (Burns Beach Road Sump), as shown in Figure 13.

Burns Beach Foreshore Reserve does not contain a sump, however there is one located approximately 60 metres away (First Ave Sump) in Burns Beach Park, which adjoins to the site, as shown in Figure 14.

¹⁷ DoE (2004)

¹⁸ Grose and Hedgcock (no date)

Figure 13: Iluka Foreshore Reserve Drainage

Figure 14: Burns Beach Foreshore Reserve Drainage

2.3 Climate

The City of Joondalup experiences a Mediterranean climate of hot dry summers with an average temperature of 32°C during the day and mild wet winters with an average day time temperature of 18°C.¹⁹

The average annual rainfall in the City of Joondalup (as recorded at Perth Airport) from 2012 to 2022 was 664.4mm. Approximately 76% of the annual rain falls between the months of May and September, as shown in Figure 15.²⁰

Figure 15: Mean Monthly Rainfall Recorded at Perth Airport Weather Station 2012-2022 (sourced from BoM 2023a)

Current Climate Change

The City of Joondalup is located in the southwest of Western Australia, an area that is already being impacted by the effects of climate change particularly through rising temperatures and decreasing rainfall.

The long-term trend in temperature for south-west Western Australia has been increasing over the past century, with the rate of warming higher since 1960.²¹ In 2019 the mean annual temperature for Perth was 1.8°C above the long term average (1961-1990) and was the warmest year on record (since 1944). In 2022 the annual mean maximum temperature was 25.5°C.

There have also been greater temperature extremes. The mean number of days over 35°C between 1944 and 2014, was 27.5 days; between 1981 and 2010 it was 28.5 days; between 1991 and 2021 it was 37 days; and in 2022 there were 40 days.^{Error! Bookmark not defined.} In January

¹⁹ City of Joondalup (no date)

²⁰ BoM (2023b)

²¹ Hope et al. (2015)

2022, Perth Airport recorded six consecutive days over 40°C days and in February 2022, recorded seven consecutive days between 36-40°C.²²

There is a strong drying trend between May to July over south-west Western Australia, with rainfall since 1970 around 20% less than the average between 1900 and 1969. Since 1999, rainfall is around 26% less than the average between 1900 and 1969.²³ In 2019, Perth Airport recorded 524.6 mm which was its fourth-driest year since records commenced in 1944 and the driest year since 2010.²² In 2021, Perth Airport recorded 798.8mm and was one of the wettest year on record since 2011.²² In 2022, Perth Airport recorded 668.6mm of rainfall.

Future Climate Change

Climate change is expected to continue although the extent of change will be dependent on both the amount of greenhouse gases that continue to be emitted and how the environment responds. Future projections have been developed which indicate that for the south-west of Western Australia temperatures will continue to increase while rainfall decreases.²¹ Further details on these projections are provided in Table 1.

	2030	2090
Temperature	By 2030 temperatures are expected to rise between 0.6 to 1°C.	By 2090 temperatures under an intermediate emissions scenario could rise between 1.1 to 2.1°C and under a high emissions scenario between 2.6 to 4.2°C.
Rainfall	By 2030 winter rainfall is projected to decrease by up to 15%.	By 2090 under an intermediate emissions scenario winter rainfall could decrease by up to 28%, under a high emissions scenario this reduction could as high as 44%.
Extreme Temperatures	Extreme temperatures are projected to increase at a similar rate to mean temperature, with a substantial increase in the temperature reached on hot days, the frequency of hot days, and the duration of warm spells	
Extreme Rainfall and drought	Increased intensity of extreme rainfall events is projected, with <i>medium confidence</i> . Time spent in drought is projected (with <i>high confidence</i>) to increase over the course of the century.	
Fire Weather	There is <i>high confidence</i> that climate change will result in a harsher fire-weather climate in the future.	

Table 1: Future Climate Change Projections for South-West Western Australia (adapted from DWER 2021)

The future changes to the climate are expected to have the following impacts on local bushland areas:

- Overall reduction in biodiversity.
- Increase threats to the natural environment such as incidence of weeds, fire and disease.
- Changes to habitats and distribution patterns of species. A drier climate will result in reduced water availability for ecosystems and fauna and flora species.

²² BOM (2023b)

²³ BOM & CSIRO (2018)

- Potential extinctions of endemic species.
- Greater occurrence of extreme weather events such as heat-waves and intense storms.

Whilst climate change is difficult to address directly, many of the management actions in this Plan focus on maintaining vegetation resilience and will assist to minimise the effects of climate change.

2.4 Vegetation

Vegetation Complexes

Vegetation complexes are classified by the soil and landforms contained in medium to large areas along the Swan Coastal Plain. Regional scale mapping shows the study area is classified as having Quindalup Complex and Cottesloe Complex - Central and South (see Figure 16).

The Quindalup Complex is described as a coastal dune complex consisting mainly of two alliances – the strand and foredune alliance and the mobile and stable dune alliance. Local variations include the low closed forest of *Melaleuca lanceolata* – *Callitris preissii* and the closed scrub of *Acacia rostellifera*. The pre-European extent remaining within the Swan Coastal Plain IBRA region for the Quindalup Complex is 49%. The pre-European extent remaining within the City of Joondalup is 12.55%.^{24,25}

The Cottesloe Complex - Central and South is described as a “mosaic of woodland of *Eucalyptus gomphocephala* and open forest of *Eucalyptus gomphocephala* – *Eucalyptus marginata* – *Corymbia calophylla* with a closed heath on the limestone outcrops.”²⁶ Approximately 31% (10,606 ha) of the original vegetation complex extent of Cottesloe Complex – Central and South remains within the Perth Metropolitan Region, with 3% (345 ha) of this remaining vegetation existing within the City of Joondalup.

The State Government's Bush Forever Strategy aims to protect 51,000 ha of regionally significant vegetation, or 18% of the original vegetation, within the Swan Coastal Plain portion of the Perth Metropolitan Region. The State Government has established targets under Bush Forever which aim to protect at least 10% of each of the 26 vegetation complexes, to achieve a comprehensive representation of all the ecological communities originally occurring in the region.² The Strategy identifies 287 bushland sites. Iluka Foreshore Reserve is included within the Bush Forever Strategy as site 325 and Burns Beach Foreshore Reserve is included within the Bush Forever Strategy as site 322.

Due to the limited extent of the Quindalup Complex and Cottesloe Complex – Central and South vegetation complex remaining within the City of Joondalup, it is important to retain bushland within Iluka-Burns Beach Foreshore Reserve for its conservation value.

²⁴ ELA (2016b)

²⁵ NACMS (2016)

²⁶ Hedde et. al. cited in Syrinx (2014)

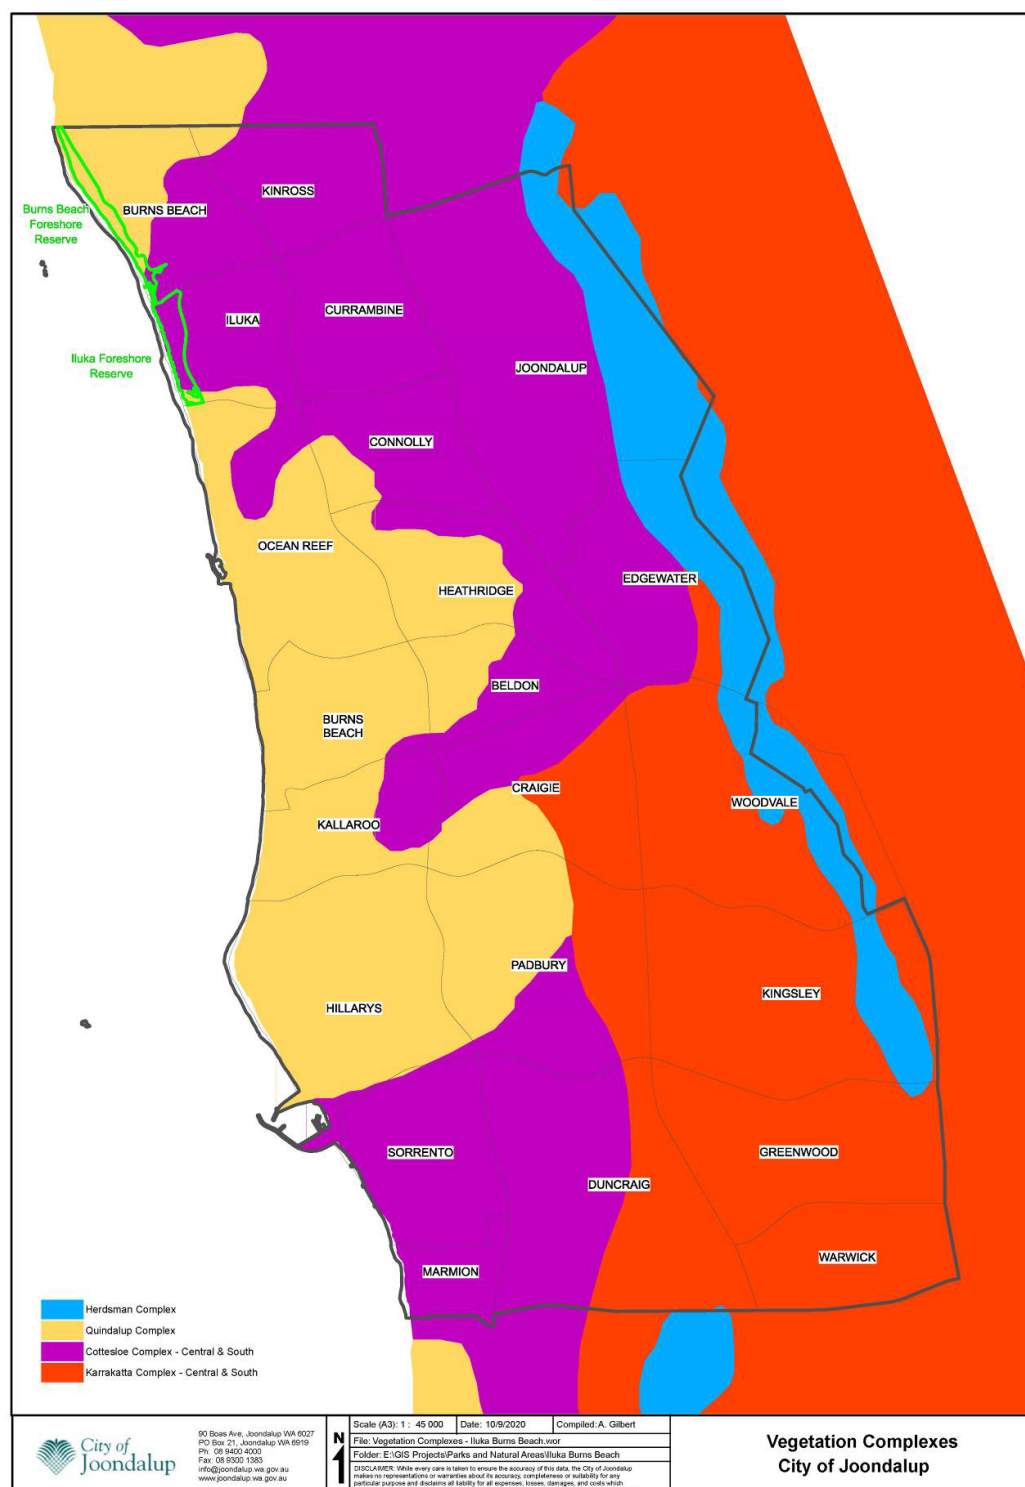

Figure 16: City of Joondalup Vegetation Complexes

Floristic Community Types

The vegetation of the Swan Coastal Plain has been systematically surveyed and defined into Floristic Community Types (FCTs). This floristic analysis defined 30 FCTs with some groups further subdivided, with a total of 43 types and sub-types recognised.²⁷

The Spearwood and Quindalup Dune units support FCT 24, FCT 27, FCT 28 and FCT 29. The following FCTs were inferred to occur in the study area through the State Government's Bush Forever assessment in 2000:

- FCT 24: Northern Spearwood shrublands and woodlands
- FCT 27: Species-poor mallees and shrublands on limestone
- FCT 28: Spearwood *Banksia attenuata* or *B. attenuata* — *Eucalyptus* Woodlands
- FCT 29a: Coastal shrublands on shallow sands
- FCT 29b: Acacia shrublands on taller dunes.

Only FCT 24 and FCT 29a were identified in Iluka-Burns Beach Foreshore Reserve during the September 2020 field survey conducted by Eco Logical Australia.²⁸

FCT 24 – Northern Spearwood shrublands and woodlands

FCT 24 is described as heaths or heaths with scattered *Eucalyptus gomphocephala* (Tuart), with heathlands in this group typically including *Banksia sessilis*, *Calothamnus quadrifidus*, and *Schoenus grandifloras*. The BsArSg vegetation community, comprising a total of 4.6ha (14.7%) of the Iluka survey area and 0.4ha (1.4%) of the Burns Beach survey area, has components analogous to the 'Northern Spearwood shrublands and woodlands' Priority Ecological Community, including the presence of *Banksia sessilis* and *Calothamnus quadrifidus* heathland, and is considered as likely representing this Priority Ecological Community. The inferred presence of FCT 24 is also noted in Bush Forever for Burns Beach Foreshore Reserve.

FCT 24 is currently listed as a Priority 3 (i), Priority Ecological Community (PEC)²⁹ which means that it is poorly known from several to many occurrences but does not appear to be under threat of habitat destruction or degradation.³⁰

FCT 24 can be a component of the Endangered Banksia Woodlands of the Swan Coastal Plain EPBC Act listed TEC.

FCT 29a – Coastal shrublands on shallow sands

FCT 29a is described as mostly heaths on shallow sands over limestone close to the coast. Important species include *Spyridium globulosum*, *Rhagodia baccata*, and *Olearia axillaris*. Quadrats within the remaining vegetation communities showed close affiliation with FCT 29a. Vegetation communities ArAcSg, FpApSc, McAr, SgEsOa, SgMhAr, SgSa, comprising a total of 24.4 ha (77.91%) of the Iluka survey area and 26.2 ha (89.4%) of the Burns Beach survey area, have components analogous to the 'Coastal shrublands on shallow sands' PEC, including the presence of heaths on shallow sands over limestone close to the coast, *Spyridium globulosum*, *Rhagodia baccata*, and *Olearia axillaris* and is considered as likely

²⁷ Gibson et al cited in ELA (2016)

²⁸ ELA (2021)

²⁹ DPaW (2015b)

³⁰ DEC (2010a)

representing this community. The inferred presence of FCT 29a is also noted in Bush Forever for Burns Beach Foreshore Reserve and Coastal Strip from Burns Beach to Hillarys.

FCT 29a: 'Coastal shrublands on shallow sands' is listed by DBCA as a Priority 3 ecological community which means that it is poorly known from several to many occurrences but does not appear to be under threat of habitat destruction or degradation.³¹

FCT 29a is listed within the Approved Conservation Advice (incorporating listing advice) for the Tuart (*Eucalyptus gomphocephala*) woodlands and forests of the Swan Coastal Plain TEC as a FCT that includes Tuart, indicating the potential presence of these TECs within the survey areas.

Whilst FCTs can be a useful way of describing groups of flora species, or defining Threatened or Priority Ecological Communities on the Swan Coastal Plain, vegetation communities are more commonly used to define plant communities.

Vegetation Communities

Field sampling confirmed seven vegetation communities occurring within Iluka-Burns Beach Foreshore Reserve. Although only two main vegetation communities exist within the Iluka – Burns Beach Foreshore Reserve area, SgMhAr (25.0%) and SgEsOa (24.1%), and described in full in Table 2 and shown in Figure 17 and Figure 18.

Table 2: Vegetation Communities at Iluka-Burns Beach Foreshore Reserve

Vegetation Community Reference	Vegetation Community Description	Burns Beach survey area	Iluka survey area	Total Site Coverage
McAr	<i>Melaleuca cardiophylla</i> , <i>Acacia rostellifera</i> mid shrubland over <i>Rhagodia baccata</i> , <i>Threlkeldia diffusa</i> low sparse chenopod shrubland and <i>*Ehrharta calycina</i> low sparse tussock grassland.	N/A	3.3 ha (10.5%)	3.3 ha (5.4%)

*indicates weed species.

Note: The remaining vegetation on site has been cleared and/or identified as open beach / rocks, dunal blow out and tracks (5.2 ha or 8.6%).

No Threatened Ecological Communities were identified within Iluka – Burns Beach Foreshore Reserve.³⁵

Vegetation Condition

The Keighery Scale is a tool used to rate the condition of vegetation from pristine to completely degraded, as detailed in Appendix 5. Infrastructure, formalised limestone or asphalt paths and areas of bare ground not containing vegetation (e.g. sandy or rocky beaches) were not assigned a vegetation condition category.

Vegetation condition assessments include observations regarding the numbers of native species, weed cover, vegetation structure, species diversity, amount of understorey, health condition of most species' populations and physical disturbance.

Changes in the vegetation condition can also be attributed to differing interpretations of Keighery Scale definitions by assessors as well as external factors such as different seasonal timings of vegetation assessments, frequency and intensity of recent fire occurrences and other disturbances such as the incidence of weeds can also result in variance in vegetation assessments.

A vegetation condition assessment was conducted in 2012 for the entire coastal foreshore area but has not been broken down into vegetation condition categories for the specific sites of Iluka Foreshore Reserve and Burns Beach Foreshore Reserve. Eco Logical undertook a vegetation condition assessment in September 2020 for the Iluka-Burns Beach Foreshore Reserve.

The vegetation condition at Iluka-Burns Beach Foreshore Reserve ranges from excellent to completely degraded. The majority of Iluka and Burns Beach survey areas were classed as being in excellent condition. Iluka-Burns Beach Foreshore Reserve contains various formal paths and informal tracks and these have been categorised as completely degraded. The majority of the remnant vegetation within Burns Beach Foreshore Reserve is in excellent condition, with the condition reducing to completely degraded in areas directly surrounding pathways, known as 'edge effects'.

The good condition areas surrounding pathways reflects the reduction in vegetation condition caused by disturbances, through the construction of formal and informal paths. Reduction in vegetation condition also commonly exists on the boundary edges of bushland areas, due to

various factors including the introduction of invasive species from surrounding areas, informal access and rubbish dumping.

Completely degraded areas in the northern sections of Burns Beach Foreshore Reserve generally surround the illegal vehicle tracks, fragmenting the vegetation throughout the area and preventing these areas from naturally revegetating. There is also a dunal blowout in the north of Burns Beach Foreshore Reserve. Vegetation condition is shown in Table 3, Figure 19 and Figure 20.

Table 3: Iluka-Burns Beach Foreshore Reserve Vegetation Condition Assessment using Keighery Scale

Site / Year	Burns Beach Foreshore Sept 2020	Iluka Foreshore Sept 2020
Pristine	N/A	N/A
Excellent	19.1 ha (65.2%)	21.9 ha (70%)
Very Good	2 ha (6.8%)	3.4 ha (10.9%)
Good	4.2 ha (14.3%)	3.7 ha (11.8%)
Degraded	N/A	N/A
Completely Degraded	1.9 ha (6.5%)	N/A
Open beach / rocks	1 ha (3.4%)	1.2 ha (3.8%)
Tracks	1.1 ha (3.8%)	1.1 ha (3.5%)
Total	29.3 ha	31.3 ha

Additionally the State Government's Bush Forever Strategy rated the vegetation condition of Burns Bush bushland as more than 70% excellent to pristine, less than 30% very good to good, with localised disturbance areas to the north of Burns Beach. The coastal strip from Burns Beach to Hillarys was rated as excellent to degraded, with areas of severe localised disturbance.³²

High resolution multi-spectral imagery has been obtained for the City of Joondalup in November 2015 and November 2019 and analysed to measure canopy cover and change in vigour of vegetation in key City conservation areas. The vegetation vigour change in Iluka-Burns Beach Foreshore Reserve over a two year period is shown in Figure 21 and Figure 22. The majority of the site has increased in vegetation vigour with some minor areas showing decline.

Vegetation Cover

The height of the majority of vegetation cover at Iluka-Burns Beach Foreshore Reserve is 0-3m, with a minor amount of vegetation with a height of 3-10m and a very minor amount of vegetation with a height of 10m or more, as shown in Figure 23 and Figure 24.

3.0 Biodiversity Management

Iluka-Burns Beach Foreshore Reserve supports an abundance of plant and animal species, including species listed as priority based on their endangered, threatened and migratory status. The long term protection of biodiversity values within Iluka-Burns Beach Foreshore Reserve is critical to ensure the conservation of this important bushland habitat. The protection and enhancement of biodiversity within Iluka-Burns Beach Foreshore Reserve also benefits the community through the provision of ecosystem services such as:

- the production of oxygen and capture of carbon dioxide
- noise and air quality regulation
- cooling of urban environments
- regulation of freshwater supplies
- generation and maintenance of topsoil
- generation and recycling of nutrients³³
- control of pests and diseases
- supporting seed dispersal and pollination
- providing a genetic store³⁴
- a number of cultural services such as recreational, aesthetic values and heritage values.³⁵

There are a number of environmental threats that pose a risk to the biodiversity of Iluka-Burns Beach Foreshore Reserve. The key environmental threats at Iluka-Burns Beach Foreshore Reserve addressed in this Section include:

- Weeds
- Pathogens and disease
- Non-native fauna species
- Human impacts
- Access and infrastructure
- Fire.

Management actions to address the key environmental threats are outlined in the following sections. There are other additional environmental threats that are out of the scope of this Plan and therefore not addressed such as climate change and habitat fragmentation.

3.1 Flora

Iluka-Burns Beach Foreshore Reserve is located within the Southwest Australia biodiversity hotspot. Southwest Australia, from Shark Bay in the north to Israelite Bay in the south, is one of 36 biodiversity hotspots in the world with over 3,600 endemic plant species occurring in this region. Approximately 30% of the original vegetation extent of this area remains in more or less pristine condition, with habitat loss being primarily due to agricultural and urban expansion and biological factors such as feral animals, weeds and the plant pathogen *Phytophthora cinnamomi*.^{36,37}

³³ Burbidge (2004)

³⁴ Millennium Ecosystem Assessment (2005)

³⁵ City of Joondalup (2012b)

³⁶ Conservation International (2020)

³⁷ WWF (no date)

Flora surveys enable collection of scientific data related to the occurrence and distribution of flora species and vegetation communities. Information obtained from flora surveys is used as a baseline to monitor the ecological health of flora populations and vegetation communities.³⁶

The City engaged consultants, Eco Logical Australia (ELA), to undertake a field flora survey of Iluka-Burns Beach Foreshore Reserve in September 2020.

The design of the flora survey was aligned with methodology outlined in the EPA *Technical Guidance: Flora and Vegetation Surveys for Environmental Impact Assessment* (2016). The survey was undertaken in accordance with the requirements of the State *Biodiversity Conservation Act 2016* (BC Act), *Environmental Protection Act 1986* (EP Act) and the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act).

The survey methodology included the use of 10m x 10m quadrats with at least 3 per vegetation community. It also included opportunistic sampling of species not recorded within the quadrats, to inform a species inventory of the study area. A total of 28 quadrats (14 in each Iluka and Burns Beach survey area) were installed within the study area, following analysis of aerial imagery, review of previous City of Joondalup field survey reports and ground-truthing.

ELA recorded a total of 149 flora species at the Iluka-Burns Beach Foreshore Reserve during their survey. This total included 92 native (62%) and 57 (38%) introduced taxa. The taxa comprised 52 families and 120 genera. The most commonly occurring family was Poaceae (19 taxa) and Fabaceae (17 taxa). Acacia (with 5 taxa), Conostylis (with 4 taxa), Hibbertia (with 4 taxa) and Melaleuca (with 3 taxa) were the most common genus.

ELA recorded a total of 121 flora species within the Iluka survey area (74 native and 47 introduced). Families with the highest number of species included Poaceae (15 species), Fabaceae (14 species) and Asteraceae (10 species). Acacia (with 4 taxa), Conostylis (with 4 taxa), Hibbertia (with 4 taxa) and Melaleuca (with 3 taxa) were the best represented genera throughout the Iluka survey area.

ELA recorded a total of 106 flora species within the Burns Beach survey area (63 native and 43 introduced). Families with the highest number of species included Poaceae (16 species), Fabaceae (14 species) and Asteraceae (6 species). Acacia (with 4 taxa), Conostylis (with 4 taxa), and Melaleuca (with 3 taxa) were the best represented genera throughout the Iluka survey area.

Previous flora surveys conducted in Iluka-Burns Beach Foreshore Reserve include:

- ATA Environmental (2001) *Iluka Flora & Vegetation Survey & Fauna Habitat Assessment*
- Dr. W. Foulds (1982) *Conservation Area Ocean Reef / Burn's Beach South*
- Cardno BSD Pty Ltd (2006) *Foreshore Management Plan Burns Beach*, prepared for Burns Beach Property Trust
- Keighery G.J. and B.J. (1992) *Flora of Burns Beach Coastal Reserve*
- City of Joondalup (2014) *Burns Beach Structure Plan No. 10*
- City of Joondalup (2009) *Burns Beach Park Natural Area Initial Field Assessment*
- AECOM (2018) *Tamala Park Reserve – Biological Report*, prepared for City of Wanneroo
- NACMS (2017) *Targeted Flora and Vegetation Survey – Part Lot 11485, 44 Ocean Parade, Burns Beach*, prepared for City of Joondalup
- GHD (2013) *Proposed Dual Use Coastal Path between Mindarie and Burns Beach: Environmental Study and Topographical Survey Report*, prepared for Department of Planning

- Government of WA (2000b) *Bush Forever Site Description: Burns Beach Bushland*.

The combination of results from all the surveys undertaken within Iluka – Burns Beach Foreshore Reserve indicates that there are 402 species, including 298 native species (76%) and 104 introduced species (26%).

The optimal time for surveying is spring for native flora and winter for weeds. Rainfall (4 mm) was recorded during the five day survey conducted by ELA, and a total of 322.1 mm of rainfall was received in the three months prior to the survey.³⁸ This is below the long-term average for the period June – August (446 mm), however it is still considered suitable for flora survey timing.⁹

Native Flora

Native flora is an important part of the Iluka-Burns Beach Foreshore Reserve ecosystem. The loss of native plant species can lead to a loss of fauna that depend on flora for food and shelter.

A total of 92 native flora species have been recorded at Iluka-Burns Beach Foreshore Reserve (see Appendix 2). There were 75 native flora species identified in the Iluka survey area and 63 native flora species identified in the Burns Beach survey area.

The number of native flora species recorded at Iluka-Burns Beach Foreshore Reserve is comparable to the number of species recorded in similar bushland areas nearby.³⁸ The diversity is also considered to be very good for remnant vegetation in a built-up urbanised area.⁹

One flora species listed as Endangered under the EPBC Act and BC Act was recorded within the Iluka survey area, namely *Marianthus paralius* (WA Herbarium ACC/8941/E). No Threatened flora species listed under the EPBC Act or BC Act were recorded within the Burns Beach survey area.

Two naturally occurring priority species rated by the Department of Biodiversity, Conservation and Attractions (DBCA) listed under the *Biodiversity Conservation Act 2016* has been recorded at Iluka Foreshore Reserve, *Hibbertia leptotheca* (Priority Three - Poorly-known species) and *Jacksonia sericea* (Priority Four - Rare, Near Threatened and other species in need of monitoring). Both species are also listed as Significant Flora of the Perth Metropolitan Region, under the State Governments' Bush Forever Strategy (2000). A further eight Bush Forever significant flora species were recorded within Iluka-Burns Beach Foreshore Reserve, including *Agonis flexuosa*, *Callitris preissii*, *Grevillea preissii* subsp. *preissii*, *Lechenaultia linarioides*, *Trymalium ledifolium*, *Diplopeltis huegelii*, *Melaleuca cardiophylla* and *Melaleuca lanceolata*, see Appendix 3.

Weeds

Weeds are exotic or native species that grow in ecosystems where they did not originally belong. Weeds are commonly introduced and distributed within bushland areas through the dispersal of seed by water, wind and animals such as birds, fire, through dumping of garden refuse, and by human or vehicle movement in natural areas.³⁹

Weeds have major economic, environmental and social impacts in Australia and can:

- displace native plant species

³⁸ ELA 2021

³⁹ Australian Government, no date

- alter ecosystems, nutrient recycling and soil quality
- harbour pests and diseases
- increase fuel loads for fires
- impact negatively on fauna and flora and their habitats
- compete with native species for space, water and nutrients.⁴⁰

Approximately 3,200 species of introduced plants have naturalised within Australia, with 500 of these being declared noxious or under legislative control. Garden plants are the main source of Australia's weeds, accounting for between 50% and 70% of recognised weed species. An estimated average of 20 plant species become naturalised in Australia each year.⁴⁰

A combined total of 57 weed species have been recorded at Iluka-Burns Beach Foreshore Reserve (see Appendix 2), from the flora surveys undertaken by Eco Logical (2020). From these 57 weed species, 24 have been identified as priority weed species for management (see Appendix 7). A total of 47 introduced (weed) species were recorded within the Iluka survey area, representing 38.8% of the total flora species recorded. A total of 43 introduced (weed) species were recorded within the Burns Beach survey area, representing 40.6% of the total flora species recorded.

Environmental weeds are classified as priority if they meet any of the following criteria:

- Weed species listed as a Weed of National Significance (WoNS) by the Australian Government.
- The weed species is listed as a Declared Pest Plant according to the *Biosecurity and Agriculture Management Act 2007*.
- The weed species is listed as a Pest Plant under the City's *Pest Plant Local Law 2012*.
- The City of Joondalup has determined that the weed species; poses a major threat to vegetation or the structure of vegetation communities; is likely to lead to a significant outbreak of individual weed species; and/or contribute to a high fuel load (e.g. grasses). These species are classed as priority weeds in the City of Joondalup.

The majority of the weed species recorded are daisies from the Asteraceae family and grasses from the Poaceae family. Many of the weed species adjoin disturbed areas, particularly pathways and informal tracks. Areas surrounding the boundary of Iluka-Burns Beach Foreshore Reserve, where the bushland meets the road, particularly in the northern section of the Burns Beach reserve, contain a high weed presence. The most common species observed in the 2020 survey at Iluka-Burns Beach Foreshore Reserve were *Ehrharta calycina* (Perennial Veldt Grass), *Ehrharta longiflora* (Annual Veldt Grass), *Tetragonia decumbens* (Sea Spinach), and *Pelargonium capitatum* (Rose Pelargonium).³⁸

A total of 24 weed species have been recorded in Iluka-Burns Beach Foreshore Reserve and are rated as priority weed species in the City of Joondalup, none of which is ranked as a Pest Plant under the City of Joondalup Pest Plant Local Law.

The City of Joondalup has a Pest Plant Local Law (2012) for the management of Caltrop (*Tribulus terrestris*) and Golden Crownbeard (*Verbesina encelioides*). Caltrop and Golden Crownbeard species was not recorded in the 2020 survey undertaken by ELA however there is anecdotal evidence that Golden Crownbeard occurs in areas adjacent to the Iluka-Burns Beach Foreshore Reserve.

⁴⁰ Invasive Plants and Animals Committee (2016)

Two species recorded are listed as Declared Pests under the *Biosecurity and Agriculture Management (BAM) Act 2007* (both of which are also listed on the City's priority weed list). Within the Iluka survey, *Asparagus asparagoides* (Bridal Creeper) and *Moraea flaccida* (One-leaf Cape Tulip) were recorded and are listed as Declared Pests s22(2) under the BAM Act. *Asparagus asparagoides* (Bridal Creeper) was recorded and is also listed as a WoNS. Within the Burns Beach survey area, *Asparagus asparagoides* (Bridal Creeper) is listed as a Declared Pest under the BAM Act and as a WoNS.

Examples of Identified priority weeds are illustrated in Appendix 6 and their recommended weed treatment methodology is detailed in Appendix 7, which is used for City of Joondalup on ground management of priority weeds.

Current Management Approach
